A.	Group System for Pricing of Bangladesh Standards (BDS)	4-5
B.	List of Divisional and Sectional Committees	6-9
C.	List of Bangladesh Standards	10-127
D.	List of International Standards adopted as Bangladesh Standards	128-288

FOREWORD

I am happy to introduce the Standards Catalogue-2016 of BSTI. It contains more than 4000 national standards of Bangladesh that are now in vogue.

In fact formulation, amendment and revision of national standards is a continuous process which is done by the technical committees of BSTI. The committees consist of persons drawn from professionals, scientists and technical experts of high standing. BSTI provides only the secretarial services. Currently, 2 (two) National Committees, 6 (Six) Divisional Committees and 73 (seventy three) Sectional (Technical) Committees are working on standards formulation.

Product standards are now required to be set not only for its own domestic market but the eyes are also kept open to accommodate the fast changing and often fastidious consumer preference, market dynamics and exigencies prevailing in the global market. Failure to respond to these paradigms would not only push the product out of market but will also jeopardize the credibility and good will of the product's country of origin. The distinguished members of the committees are relentlessly working to achieve those objectives. Often adoption of internationally recognized standards par se hastens the process, staves off controversy and facilitates access to foreign markets. It is hoped that the Sectional (Technical) Committees will consider this aspect of standard formulation.

Currently, 154 products are under the compulsory Certification Marks (CM) scheme of BSTI which in other words means that marketing of any of these items needs conformity certificate of Bangladesh Standard from the BSTI. These include Food and Agriculture, Chemical, Jute and Textile, Electrical-Electronics and Engineering products. With the launching of BSTI web site, the institution is now contemplating to insert as much information related to standards as possible in its web site for the clientele at home and abroad.

I thank my colleagues for their untiring efforts without which this publication would not have seen the light of the day.

We hope that the users will find the catalogue helpful.

Director General

Annexure-A

Group System for Pricing of Bangladesh Standards (BDS)

Group system for Pricing of Bangladesh Standards (BDS)

Bangladesh Standards (BDS) have been classified in the following 'Price Schedule'. The prices of all standards are indicated by an alphabetic code instead of a monetary value.

Bangladesh Standards (BDS)

Group	Pages	Price (Tk.)
A	01-05	500.00
B	06-10	600.00
C	11-15	700.00
D	16-20	800.00
E	21-25	900.00
F	26-30	1100.00
G	31-35	1300.00
H	36-40	1500.00
I	41-45	1700.00
J	46-50	1900.00
K	51 Up	2000.00

Adopted International Standards (BDS ISO, BDS IEC, BDS EN, BDS CAC, BDS ISO/IEC))

Group	Pages	Price (Tk.)
XA	01-10	1500.00
XB	11-20	1800.00
XC	21-30	2100.00
XD	31-40	2500.00
XE	41-Up	3000.00

Attention:

Reproduction or utilization of Bangladesh Standards (BDS) in any form or by any means, electronic, including photocopying and microfilm by any individual/agency other than BSTI is a punishable offence.

List of Divisional and Sectional Committee

LIST OF DIVISIONAL AND SECTIONAL COMMITTEES

A.1 Agricultural and Food Products Division

A.1.1 National Codex Committee

A.1.2 Agricultural and Food products Divisional Committee (AFDC)

A.1.3 Sectional Committees

1. AF/SC 1 Cereals, Pulses and their Products
2. AF/SC 2 Oilseeds and their Products
3. AF/SC 3 Milk and Milk Products
4. AF/SC 4 Fish and Fisheries Products
5. AF/SC 5 Meat, Poultry and their Products
6. AF/SC 6 Spices and Condiments
7. AF/SC 10 Tea and Coffee
8. AF/SC 11 Sugar and Sugar Industries Products
9. AF/SC 13 Animal Feeds
10. AF/SC 15 Fruits and Vegetables Products
11. AF/SC 16 Starch, derivatives and their bi-products
12. AF/SC 17 Forest Products
13. AF/SC 18 Food Colour, Artificial Sweeteners and Additives
14. AF/SC 20 Pesticides
15. AF/SC 21 Tobacco and Tobacco Products
16. AF/SC 22 Soft Drinks and Beverages
17. AF/SC 23 Irradiated Food Products

A.2 Jute and Textile Division

A.2.1 Jute & Textile Divisional Committee (JTDC)

A.2.2 Sectional Committees

1. JT/SC 1 Jute Products
2. JT/SC 2 Textile Products
3. JT/SC 3 Raw Jute
4. JT/SC 4 Jute Mills spares and Accessories
5. JT/SC 5 Textile Test Methods
6. JT/SC 6 Yarn, Rope, Twine & Cordages
7. JT/SC 7 Knit & Knit Products
8. JT/SC 8 Garments Products
9. JT/SC 9 Silk Products
10. JT/SC 10 Handloom Products
11. JT/SC 11 Textile Mills Accessories
12. JT/SC 12 Capital Machineries
13. JT/SC 13 Raw Cotton
14. JT/SC 14 Man -Made Fiber and Products

A.3 Electrical and Electronics Division

A.3.1 Bangladesh National Electrotechnical Committee (BNEC)

A.3.2 Electrical and Electronics Divisional Committee (EEDC)

A.3.3 Sectional Committee

1. ET/SC1 Transformers
2. ET/SC2 Electric Lamps and Accessories
3. ET/SC3 Switchgear and Protective Devices
4. ET/SC4 Dry Cells and Accumulators
5. ET/SC5 Electric Fans and Appliances
6. ET/SC8 Electric Wires and Cables
7. ET/SC9 Insulators and Insulating Materials
8. ET/SC10 Electronics
9. ET/SC12 Rotating Electric Machines
10. ET/SC13 Electric Measuring Instruments
11. ET/SC14 Telecommunication
12. ET/SC16 Information Technology (IT)
13. ET/SC 15 Computer and Computer Related
14. ET/SC17 Conformity Assessment
15. ET/SC18 Power Electronics

A.4 Chemical Division

A.4.1 Chemical Divisional Committee (CDC)

A.4.2 Sectional Committee

1. CH/SC 1 Fine Chemicals
2. CH/SC 2 Rubber and Plastics
3. CH/SC 3 Paper, Pulp, Board and Stationery
4. CH/SC 4 Leather, Footwear and Leather Products
5. CH/SC 5 Paints and Allied Materials
6. CH/SC 6 Glass and Ceramics
7. CH/SC 7 Lubricant and Related Products
8. CH/SC 8 Soap and Detergent
9. CH/SC 9 Mineral, Fuels and Petroleum Products
10. CH/SC 10 Cosmetics and Related Products
11. CH/SC 11 Ink and Allied Products
12. CH/SC 12 Fertilizer and Allied Products
13. CH/SC 13 Oils, Fats and Allied Products
14. CH/SC 14 Adhesives

A.5 Engineering Division

A.5.1 Engineering (Civil) Divisional Committee (ECDC)

A.5.2 Sectional Committees

1. CE/SC 1 Clay bricks, Hollow clay bricks, Clay Ceramic Tiles and Cement Blocks.
2. CE/SC 2 Cement and Cementing Materials
3. CE/SC 3 Structural Steel Section Bars Sections and Other Products
4. CE/SC 4 Pipes and Pipes Fittings
5. CE/SC 5 Sanitary Appliances and Water Fittings
6. CE/SC 6 Fire Fighting and Safety Equipments

A.6 Engineering Division

A.6.1 Engineering (Mechanical) Divisional Committee (EMDC)

A.6.2 Sectional Committees

1. ME/SC 1 Metallic Sheets, Plates, Wires and Allied Products
2. ME/SC 2 Tools, Equipments and Measuring Instruments
3. ME/SC 3 Security and Safety Items
4. ME/SC 4 Pump, Engine and Agricultural implements
5. ME/SC 5 Specialized Products and Household Appliances
6. ME/SC 6 Vehicles and Fuels
7. ME/SC 7 Sports Goods

Annexure-C

List of Bangladesh Standards

BDS 1:1958**AC electrical ceiling, bracket, table and pedestal fans**
(Cancels & replaces by BDS 818)**ET****BDS 2:2001****Football, volley balls and basket balls**
(First Revision)

Covers general requirements, materials, sizes, shape, air pressure, colour, finish, sampling and testing,

Part -1 Footballs**03 Page Gr-A ME****Part -2 Volley balls****03 Page Gr-A ME****Part -3 Basket balls****03 Page Gr-A ME****BDS 3:1957****Cricket and hockey balls (two grades)**

Covers general requirements, materials, sizes, shape, grade, mass, sampling and testing.

04 Page Gr-A ME**BDS 4:1957****Cricket bats (three grades)**

Covers general requirements, materials, grade, sizes, shapes, mass, sampling and testing.

04 Page Gr-A ME**BDS 5:1957****Hockey sticks (two grades)**

Covers general requirements, materials, sizes, mass, construction, sampling and testing.

06 page Gr-B ME**BDS 6:1957****Tennis, badminton and squash rackets**

Covers general requirements, materials, grade, construction, dimension, sampling and testing.

08 page Gr-B ME**BDS 7:1957****Shuttle cocks**

Covers general requirements, type, materials, mass, manufacture, and finish, sampling inspection and packing.

09 page Gr-B ME**BDS 8:1958****Method of Testing of cotton yarn**

(Cancels & replaces by BDS 1047:2013)

JT**BDS 9:1958****Method of inspection of cotton yarn grey**

(Cancels & replaces by BDS 1047:2013)

JT**BDS 10:1992****Soda ash, technical** (First Revision)

Covers the requirements and methods of test for soda ash, chemically termed as sodium carbonate, This material is used in textile, glass, ink, paper, paints, and leather industries. It is also used for water purification, for boilers and power station.

07 Page Gr-B CH**BDS 11:1995****Caustic soda (pure and technical)** (First Revision)

Prescribes requirements and methods of sampling and test for caustic soda and technical.

22 Page Gr-E CH**BDS 12:1991****Laundry soap** (Second Revision, Reaffirmed 2014)

Prescribes the requirements for three types of the material and the determination of total fatty matter, rosin acid, free caustic alkali, unsaponified fatty matter, chlorides, matter insoluble in alcohol, matter insoluble in water and total fatty matter.

05 Page Gr-A CH**BDS 13:2006****Toilet soap** (Third Revision ; Amendment 1, 2008)

Prescribes requirements and the methods of sampling and test for total fatty matter/rosin acid, unsaponified fatty matter, free caustic alkali, matter insoluble in alcohol, chloride, total free alkali and matter insoluble in water.

11 Page Gr-C CH**BDS 14:1998****Common salt (3 types)** (First Revision)**A.** This standard covers two grade of salt for industrial use. (Grade- 1 is recommended for chemical industries including paper industry and Grade-2 for other industries including soap industry)**B.** Fish and meat curing salt. This Specification covers fish and meat curing salt.**C.** Salt for use in the manufacture of explosives. This Specification covers salt for use in the manufacture of explosives.**24 Page Gr-E CH****BDS 15:1958****Common salt for animal consumption** (Reaffirmed 2012)

Specifies requirements, packing, marking and methods of test of common salt for animal consumption.

03 Page Gr-A CH**BDS 16:1958****Liquid chlorine**

Specifies requirements, sampling, packing and marking and methods of test for liquid chlorine used in bleaching of pulp and textiles, in water sterilization and manufacture of chemicals.

05 Page Gr-A CH**BDS 17:2006**

Tungsten filament lamps for domestic and similar general lighting purposes (Third Revision)

Applies to incandescent lamps for general lighting for those lamps of 25 W to 200 W rating, 100 V to 250 V with a nominal life of 1000 hours. Also describes methods of test.

22 Page **Gr-E** **ET**

BDS 18:2006A

Plywood tea-chests (Second Revision)

Prescribes the requirements for plywood for tea-chests standard sizes and requirements for tea-chests and their components, the tare; tests for plywood and tea-chests; terminology raw materials, manufacture of plywood for tea-chests, and methods of sampling.

29 Page **Gr-F** **AF**

BDS 19:1958

Glass shell for general lighting service lamps

(Cancels & replaces by BDS 1582 Part-1 and Part-2:1997)

CH

BDS 20:2002

Hide curing salt (First Revision; Reaffirmed 2012)

Prescribes requirements, sampling, packing, marking and methods of test for hide curing salt

11 Page **Gr-C** **CH**

BDS 21:2000

Cotton seed oil (First Revision)

Prescribes grades, requirements methods of sampling and test of cotton seed oil

05 Page **Gr-A** **AF**

BDS 22:1958

Methods of inspection of cotton hosiery yarn

(Cancels & replaces by BDS 1137:2013)

05 Page **Gr-A** **JT**

BDS 23:1968

Methods of inspection of cotton fabric grey

(Cancels & replaces by BDS 24:2010)

JT

BDS 24:2010

Methods of testing of woven cotton fabrics

(First Revision)

Definition and specific methods for determining dimension, weight, construction, shrinkage, breaking load and elongation of woven cotton fabrics.

05 Page **Gr-B** **JT**

BDS 25:2015

Mustard oil (Second Revision)

Prescribes grades, requirements and method of sampling and test of mustard oil.

7 page **Gr-B** **AF**

BDS 26:1958

Pipe threads

CE

BDS 27:2012

Cotton drills (Second Revision)

This standard prescribes the constructional details and other particulars of four varieties of cotton drills, gery, scoured, bleached, dyed and printed.

04 Page **Gr-A** **JT**

BDS 28:1991

Cotton cloth twill (First Revision)

Construction and other particulars of four varieties of cotton twill.

04 Page **Gr-A** **JT**

BDS 29:2012

Cotton shirting (Second Revision)

This Bangladesh Standard prescribes the constructional details and other requirements cotton shirting

03 Page **Gr-A** **JT**

BDS 30:2008

Cotton cloth calico (First Revision)

This Standad covers the manufacturing particulars and other details of the following:

- (1) Cotton Cloth, Calico, Scoured.
- (2) Cotton Cloth, Calico, Bleached.
- (3) Cotton Cloth, Calico, Dyed light shade after bleaching.
- (4) Cotton Cloth, Calico, Dyed heavy shade with out bleaching

03 Page **Gr-A** **JT**

BDS 31:2008

Cotton cloth cellular shirting (First Revision)

This Standard covers the manufacturing particulars and other details of the following:

- (1) Cotton Cloth, cellular shirting, Grey.
- (2) Cotton Cloth, cellular shirting, Scoured.
- (3) Cotton Cloth, cellular shirting, Bleached.
- (4) Cotton Cloth, cellular shirting, Dyed light shade after bleaching.
- (5) Cotton Cloth, Calico, Dyed heavy shade with out bleaching

05 Page **Gr-A** **JT**

BDS 32:2011

Poplin fabric (Third Revision)

This Standard prscribes the constructional detail and other particulars of one variety of cotton cloth poplin, bleached or dyed. If agreed, man-made fibres may be blended with cotton, but their percentage shall not exceed 40%.

07 Page **Gr-B** **JT**

BDS 33:1989

Cotton sewing thread (Reaffirmed 2005)

Detail construction and other particulars of 43 varieties of cotton sewing threads.

07 Page **Gr-B** **JT**

BDS 34:1993

Nitric acid (First Revision)

Prescribes requirements and methods of sampling and test for four grades of nitric acid, namely, technical, nitration, pure and analytical reagent. It covers specific gravity, minimum nitric acid content and impurities.

17 Page Gr-D CH

BDS 35:1994

Sulphuric acid for use in secondary batteries (Withdrawn)

Covers sulphuric acid for use in electrolytic solutions for secondary batteries

20 Page Gr-D CH

BDS 36:1993

Ammonium sulphate (fertilizer)

(First Revision; Amendment 1: 2008)

Covers the requirements sampling, packing and methods of tests.

12 Page Gr-C CH

BDS 37:1994

Hydrochloric acid (First Revision)

Prescribes the requirements and method of sampling and test for hydrochloric acid. It covers technical, chemically pure, and analytical reagent grades.

BDS 389:1990**Glossary of terms relating to hides, skins, and leather** (First Revision)

This glossary defines terms which are widely used in leather trade and industries.

129 page **Gr-K** **CH**

BDS 390:1990**Method of chemical testing of leather** (First Revision)

Covers chemical methods of testing.

133 page Gr-K CH**BDS 391:1964 (Reaffirmed, 2012)****Polythene tube for cold water services (low density)**

Applies to black polythene tube (type 425) for use in cold water services and in flush overflow warning and waste pipe applications.

18 page Gr-D CH**BDS 392:1990****Test sieves** (First Revision)

Specifies requirements for wire cloth test sieves and perforated plate test sieve.

29 page Gr-F CE**BDS 393:1964****Nitrogen, technical** (Reaffirmed, 2012)

Covers requirements and method of test for nitrogen.

03 page Gr-A CH**BDS 394:1964****pH scale** (Reaffirmed, 2012)

Applies strictly to aqueous solution at temperature between 0° to 95°C.

05 page Gr-A CH**BDS 395:1964****Oil of lemongrass**

(Cancels and replaces by BDS ISO 3217:2003)

CH**BDS 396:1964 (Reaffirmed 2012)****Paints brushing undercoat exterior for finishing vehicles**

Covers requirements and methods of test for material commercially known as ready mixed paint, brushing, undercoating, exterior with distinctive colours.

03 page Gr-A CH**BDS 397:1964****Ready mixed paint, brushing red-oxide-zinc chrome, priming.**

(Cancels and replaces by BDS ISO 1248:2003)

03 page Gr-A CH**BDS 398:1964****Ready mixed paint, spraying, red-oxide-zinc chrome, priming**

(Cancels and replaces by BDS ISO 1248:2003)

03 page Gr-A CH**BDS 399:1964 (Reaffirmed, 2012)****Aluminium paint, spraying for general purposes in dual containers**

Covers requirement and methods of test for material commercially known as aluminium paint, spraying for general purpose in dual container.

03 page Gr-A CH**BDS 400:1964****Aluminium paint, brushing for general purposes in dual containers** (Reaffirmed, 2012)

Prescribes requirements and methods of test for the material.

03 page Gr-A CH**BDS 401:1964****Varnish, finishing exterior, type 1 (synthetic)** (Reaffirmed, 2012)

Covers requirements and methods of test.

03 page Gr-A CH**BDS 402:1989****Ready mixed paint, brushing, finishing, semigloss for general purposes**

(First Revision; Amendment 1, 2:2007)

Prescribes requirements and methods of test.

09 page Gr-B CH**BDS 403:1964****Red-oxide paint for wagons** (Reaffirmed 2012)

Covers keeping qualities, inspection, packing and marking of packages, composition and testing procedure.

04 page Gr-A CH**BDS 404:1991****Ink, drawing, waterproof black** (First Revision)

Prescribes requirements and methods of sampling and test for the material.

05 page Gr-A CH**BDS 405:2012****Writing and printing papers** (Second Revision)

Prescribes the requirements for the commonly used types of writing and printing paper.

05 page Gr-A CH**BDS 406: 2016****Methods of Sampling and Test for Soaps**

(Second Revision)

This standard prescribes methods of sampling and test for soaps.

51 page. Gr-K CH**BDS 407:1964****Sticklac** (Reaffirmed 2012)

Deals with sampling, grades and method of test.

16 page Gr-D CH**BDS 408:1964****Seedlac** (Reaffirmed 2012)

Deals with method of sampling and testing.

17 page Gr-D CH**BDS 409:1964****Stationery for correspondence** (Reaffirmed 2012)

Specifies sizes and order of measurement of stationery and also defines various forms of stationery covered.

03 page Gr-A CH**BDS 410:1964****Sizes of correspondence envelopes and pockets**

(Reaffirmed 2012)

Covers sizes and designations of correspondence envelopes and pockets intended for postal purposes.

04 page **Gr-A** **CH**

BDS 411:1989

Carbon paper for typewriter

(First Revision; Amendment 1:2006)

Prescribes requirements and method of sampling and test for carbon papers for use with typewriter,

05 page **Gr-A** **CH**

BDS 412:1964

Endrin technical

Deals with sampling, requirements, quality, packing and marking and test procedure vulcanized.

18 page **Gr-D** **AF**

BDS 413:1964

Determination of hardness of rubber

(superseded by BDS 880 : 1978)

CH

BDS 414:1989

Standard of resistance for copper (First Revision)

Lays down standard values of the physical properties of annealed copper and specifies how the conductivity of commercial annealed copper can be calculated.

06 page **Gr-A** **ET**

BDS 415:1990

Standard current ratings (First Revision)

Gives standard current ratings in the range from 1 to 8000 A.

03 page **Gr-A** **ET**

BDS 416:1990

Standard rated current for low voltage

(First Revision)

Gives the standard rated current from 2 A to 63 A of fuse links for low voltage.

02 page **Gr-A** **ET**

(Cancels and replaces by BDS ISO 1924-1:2015)

CH**BDS 441 (Part-6):1991****Determination of tensile properties constant rate elongation method**

(Cancels and replaces by BDS ISO 1924-2:2015)

CH**BDS 441 (Part-7):1991****Determination of tearing resistance, (Elmendore method)**

This standard specifies a method for determinig the resistance of paper. It can also be used for light boards if the tearing resistance is within the range of the instrument.

CH**BDS 441 (Part-8):1991****Determination of ash of paper and board**

(Cancels and replaces by BDS ISO 2144:2015)

CH**BDS 441 (Part-9):1991****Paper, pulp and board measurement of diffuse blue reflectance factor**

This Standard specifies the equipment and preliminary procedures for measuring the diffuse reflectance factor of pulp, paper and board.

CH**BDS 441 (Part-10):1991****Paper, pulp and board measurement of diffuse reflectance factor. (ISO Brightness)**

(Cancels and replaces by BDS ISO 2470:2011)

CH**BDS 441 (Part-11):1991****Paper and board-determination of opacity (paper backing) diffuse reflectance method.**

(Cancels and replaces by BDS ISO 2471:2011)

CH**BDS 441 (Part-12):1991****Paper and board determination of stiffness-static bending method**

This Standard specifies a static bending method for determining the stiffness of paper and board.

CH**BDS 441 (Part-13):1991****Determination of bursting strength of paper**

(Cancels and replaces by BDS ISO 2758:2011 & 1186: 1987)

CH**BDS 441 (Part-14):1991****Determination of bursting strength of board**

(Cancels and replaces by BDS ISO 2759:2011)

CH**BDS 441 (Part-15):1991**

Determination of air resistance (gurley) of paper and board

This Standard specifies the equipment required and the method for determining the air resistance of paper and board by the principle known as "Gurley"

CH

BDS 441(Part-16):1991

Paper and board-determination of bursting strength after immersion in water

This Standard specifies a method for determination of the wet strength of paper and board by measuring its bursting strength after it has been immersed in water for a specified period.

CH

BDS 441 (Part-17):1991

Paper and board-determination of tensile strength after immersion in water for a specified period

This Standard specifies a method for determining the wet strength of paper by measuring the tensile strength of the material after it has been immersed in water for a specified time.

CH

BDS 441 (Part-18):1991

Paper and board-determination of resistance to picking-accelerating speed method using the IGT tester (pendulum or spring model)

This Standard specifies a method of operating the pendulum or spring model of the IGT printability factor in order to provide a measure of the picking resistance of paper and board.

CH

BDS 441 (Part-19):1991

Paper and board-determination of resistance to picking-accelerating speed method using the IGT tester (Electric model)

(Cancels and replaces by BDS ISO 3783:2011)

CH

BDS 441 Part-20:1991

Determination of folding endurance

(Cancels and replaces by BDS ISO 5626:2011)

CH

BDS 441 (Part-21):1991

Paper and board-determination of ageing dry heat treatment at 105°C

This Standard specifies a method of accelerating the using of paper and board the dry heat treatment at 105°C

CH

BDS 441 (Part-22):1991

Paper and board-accelerating ageing moist heat treatment at 90°C and 25 percent relative humidity

This Standard specifies a procedure humidified heat treatment of paper or board and the general procedure for testing the heat treated materials. This is board on work printing & writing papers, but may be used with discretion for other types of paper and board.

CH

BDS 441 (Part-23):1991

Paper and board-accelerating ageing moist heat treatment at 80°C and 65 percent relative humidity

This Standard specifies a procedure for high moisture heat treatment of paper or board and the general procedure for testing the heat treated materials. This method is based on work on printing & writing papers, but may be used with discretion for other types of paper and board.

CH

BDS 441 (Part-24):1991

Paper and board-accelerating ageing dry heat treatment at 120°C or 150°C

This Standard specifies a procedure for heat treatment of paper or board in air at relatively high temperature and the general procedure for testing for heat treated materials. This primarily intended for high points paper such are used insulation in electrical equipment.

CH

BDS 441 (Part-25):1991

Paper and board-determination of grease resistance

This Standard specifies a method for the determination of the grease resistance of paper and board may be tested either creased or uncreased. The test is primarily intended for foodboard grease proof, vegetable parchment and similar product.

CH

BDS 441 (Part-26):1991

Measurement of dimensional change of paper after immersion in water

This Standard specifies a method of measuring the dimensional change of paper after immersion in water. This property should not be confused with hydroexpansibility.

CH

BDS 441 (Part-27):1991

Determination of air permeance of paper and board (medium range) schopper method.

This Standard specifies a method for the determining the air permeance of paper and board in the medium air permeance range using the schopper apparatus.

CH

BDS 441 (Part-28):1991

Determination of water absorption of paper and board after immersion in water

This Standard specifies a method for the determination of the water absorption of paper and board after the total immersion in water for a specified time.

CH

BDS 441 (Part-29):1991

Determination of pH of aqueous extracts of paper, board and pulps

This Standard specifies a method for the determination of the pH of an aqueous extract of paper and board or pulps. The pH value is not a quantitative measures of the total content of acid or base in the material extracted.

CH

BDS 441 (Part-30):1991

Paper and board-determination of microbiological properties total bacterial count.

This Standard specifies a method for the determining the total bacterial population in paper (i.e. all bacteria both

within and on the surface of the sheet). It is applicable to most kinds of paper and board especially food grade.

CH

BDS 441 (Part-31):1994

Methods of test for paper and allied products: Part-31, Paper determination of smoothness (Bekkmethode)

(Cancels and replaces by BDS ISO 5627:2012)

CH

BDS 441 (Part-32):1994

Methods of test for paper and allied products: Part-32, paper determination of air permeability (Porosity)

This Standard specifies a method of determination of air permeability (porosity) of paper.

CH

BDS 441 (Part-33):1994

Methods of test for paper and allied products: Part-33, Paper determination of oil absorbancy.

This Standard specifies a method of determination of oil absorbancy of paper.

CH

BDS 441(Part-34):2003

Methods of test for paper and board: Part-34, Paper determination of kappa number of pulp.

This Standard specifies the method for determining the kappa number which is used to describe the degree of de-lignification obtained in a chemical pulping process. This standard is applicable to all kinds of chemical and semi-chemical unbleached semi-bleached pulps within the kappa number from 5 to 100 or pulps obtained with yields below 70%.

BDS 892:1978

Plastic testing methods PTM-10

Method for measuring the resistance to tear propagation of flexible plastic film or sheeting

Covers the determination of the average force required to propagate tearing through a specified length of plastic film.

04 Page Gr- A CH

BDS 893:1978

Plastic testing methods PTM-11

Method for measuring bursting strength of film

Covers the determination of the air pressure required to burst the form under specified conditions.

02 Page Gr- A CH

BDS 894:2003

Packaging of jute products in bales (First Revision)

Requirements of packaging conventional types of jute fabrics and jute bags in the form of bales.

08 Page Gr- B JT

BDS 895:2003

Packaging of jute products in rolls (First Revision)

Requirements of packaging different types of jute cloth in the form of rolls.

05 Page Gr- A JT

BDS 896:2001

Condensed milk and condensed skim milk

(First Revision)

(Cancels and replaces by BDS CAC-A-4:2002)

AF

BDS 897:1979

Evaporated milk and evaporated skim milk

Prescribes types, requirements, total milk solids, fat, titratable acidity, bacterial count, level of permitted food additives, packing and marking and method of test.

(Cancels and replaces by BDS 364:1963)

04 Page Gr- A AF

BDS 898:1979

Ball valve (horizontal plunger type) including floats for water supply purpose

It specified the requirements of manufacture, sizes & dimension materials, workmanship mass, and testing of ball valves.

14 Page Gr- C ME

BDS 899 Insulated flexible cords

BDS 899 (Part 1):2000

Part 1: General requirements (First Revision)

Requirements and dimensions for insulated flexible cords and cables upto and including 450 V to earth & 750 V between conductors.

08 Page Gr- B ET

BDS 899 (Part-2):2001

Part 2: Requirements for rubber insulated flexible cords (First Revision)

Requirements and dimensions for rubber insulated flexible cords upto and including 450 V to earth & 750 V between conductors.

08 Page Gr- B ET

BDS 899 (Part-3):2001

Part 3: Requirements for PVC insulated flexible cords (First Revision; Amendment 1:2009)

Requirements and dimensions for PVC insulated flexible cords upto and including 300 V to earth and 500 V between conductors.

08 Page Gr- B ET

BDS 899 (Part-4):2001

Part 4: Flexible cords insulated with varnished glass fibre. (First Revision)

Requirements and methods of test for flexible cords insulated with varnished glass fibre upto and including 300 V/300 V

05 Page Gr- A ET

BDS 899 (Part-5):2001

Part 5: PVC insulated extensible leads

(First Revision)

Requirements for PVC insulated extensible leads and relevant methods of test.

08 Page Gr- B ET

BDS 899 (Part-6):2001

Part 6: Methods of test (First Revision)

Methods of tests used for testing rubber insulated flexible cords and PVC insulated flexible cords.

21 Page Gr- E ET

BDS 900:2010

PVC insulated cables (non-armoured) for electric power and lighting (Second Revision)

Cover the requirements and tests for non-armoured PVC insulated cables with copper or aluminium conductors with conductors for electric power and lighting (including weatherproof cables and cables for low temperature conditions) for voltages up to and including 450 V to earth and 750 V between conductors.

13 Page Gr- C ET

BDS 901:1985

Power cables insulated and sheathed with thermoplastic materials based on PVC (First Revision)

(Cancels and replaces by BDS IEC 60502 Part-1, 2, 4)

ET

BDS 902:1979

Plastic testing methods PTM 16**Method for determination of the charpy impact resistance of rigid plastics (charpy impact flexural test)**

Covers the determination of the behaviour of specified specimens under specified impact stresses and for the estimation of the brittleness.

05 Page Gr- B CH

BDS 903:1979**Iso-propyl alcohol**

Covers requirements for colour, relative density, distillation range, residue on evaporation, miscibility with water, water content, alkalinity or acidity, aldehydes and ketones content and test methods.

11 Page Gr- B CH

BDS 904:1972**Ethanol**

(Cancels and replaces by BDS 847:1977)

CH

BDS 905:2003**Hessian bags (First Revision)**

Construction and other particulars of two types of hessian jute bags.

08 Page Gr- B JT

BDS 906:2016**B- Twill Jute Bags (Second Revision)**

This Standard prescribes constructional details and other requirements of jute bags for packing 100, 93 and 75 kg food grains.

08 page Gr-B JT

BDS 907:1980**Pulp, bamboo (soda) flash dried**

Deals with grades and fibre classification and specifies the requirements and methods of test for moisture, brightness, ash content, fibre length, breaking length, burst factor, tear factor, double fold.

08 Page Gr- B CH

BDS 908:2012**Butter Oil and Ghee (Second Revision)**

(Cancels and replaces by BDS CAC A-1:2008)

19 page Gr-D AF

BDS 909:1979,**Soyabean oil (Amendment 1:2000)**

Prescribes the requirements of volatile matter, insoluble matter, soap content, acid value, unsaponifiable matter, refractive index, density, iodine value, saponification value, and poisonous metals, sampling and tests.

19 Page Gr- D AF

BDS 910:1979**Mango juice**

(Cancels and replaces by BDS 513)

10 Page Gr- B AF

BDS 911:1979**Sodium alginate, food grade**

Prescribes requirements, solubility, identification test, purity, moisture, matter insoluble in water, viscosity, arsenic, lead, packing, storage & marking, method of test.

06 Page Gr- B AF

BDS 912:1979**Butylated hydroxy toluene, food grade**

Prescribes requirements, solubility, identification test, purity, melting point, sulphated ash, arsenic, leads, iron, packing, storage & marking, method of tests.

05 Page Gr- A AF

BDS 913:1979**Benzoic acid, food grade**

Prescribes requirements, solubility, identification test, purity, melting point, sulphated ash, lead, chlorinated compounds, packing & marking, method of tests.

06 Page Gr- B AF

BDS 914:1980**Method for the determination of the kappa number of pulp (degree of delignification)**

(Cancels & replaces by BDS 441 (P-34):2003)]

CH

BDS 915:1980**Hard-drawn copper and copper cadmium conductors for overhead power transmission purpose**

Covers chemical composition, dimensions, mechanical and electrical tests for solid and stranded circular conductors.

13 Page Gr- B ET

BDS 916:1980**Method for the determination of dry matter content of pulp**

Applies to moist air dry pulp that does not contain any appreciable quantity of matter (other than water) volatile at 105+20°C and does not apply to slush pulp not to the determination of the saleable mass of lots of pulp.

10 Page Gr- B CH

BDS 917:1980**Method for the determination of acid insoluble ash of pulp**

Specifies a method for the determination of the acid-insoluble ash of all kinds of pulp.

05 Page Gr- A CH

BDS 918:1980**Method for determination of the moisture content of paper and board**

[Cancels and replaces by BDS 441 (Part-1):1999]

05 Page Gr- A CH

BDS 919:1991**Method for sampling of paper and board**

(First Revision)

(Cancels and replaces by BDS ISO 186:2012)

06 Page Gr- B CH

BDS 920:1980

Blotting paper

(Cancels and replaces by BDS 501:1965)

05 Page Gr- A CH

BDS 921:1980**Standard sand for testing of cement**

(Cancels and replaces by BDS EN 197-1:2003)

05 Page Gr- A CE

BDS 922:1980**Ammonium chloride**

Covers two types of material : Type A contains no deliberate additive, whereas Type B contains an anti caking agent and is intended for use where a non-caking material is required. Requirements and methods of test are included for water, total chloride, matter insoluble in water, sulphated ash and acidity or alkalinity. A limit test for trace impurities is also specified.

08 Page Gr- B CH

BDS 923:1980**Plastics testing method PTM -17****Determination of the IZOD impact resistance of rigid plastics (IZOD impact flexural test)**

Methods of test are intended to determine the relative sensitivity of fracture by shock of rigid plastics as indicated by the energy expanded by a standard pendulum type impact machine in breaking in one below standard IZOD (cantilever beam) specimen.

06 Page Gr- B CH

BDS 924:1980**Leather cash bag**

Prescribes requirements material of construction and sampling procedure for inspection with regard to two sizes of leather cash bags, namely 230 and 300 mm., intended for safe keeping and carriage of cash and other valuables. The cash bags and other departments for keeping heavy coins.

06 Page Gr- B CH

BDS 925:1980**Chamois Leather**

Prescribes requirements for three grades of chamois leather intended for filtering petrol, cleaning optical instruments and polished surfaces, lining or padding of leather goods, and orthopaedic purposes. and also certain optional requirements for defence purposes. Essential chemical and physical requirements for free oils and fats, combined oils and fats, water soluble matter, ash, hide substance, water absorption and sink test, wet exposure test, petrol filtration test, etc. have been included.

14 Page Gr- C CH

BDS 926:1980**Ready mixed paint, brushing, petrol resisting, air-drying, for exterior painting of containers colour as required**

Prescribes requirements and methods of test for the materials which are used for the exterior protection of containers for petrol, mineral oils and lubricants. The materials are such that on air-drying these give a film

which can stand handling, without damage, whilst wetted with petrol, mineral oils and lubricants.

03 Page Gr- B CH

BDS 927:1980**Ready mixed paint, slushing, petrol resisting, air-drying, for interior painting of tanks and containers, red oxide (colour unspecified)**

Prescribes methods of test, composition, and requirements for consistency, drying time, finishing, colour fastness to light, residue on sieve, water content, scratch hardness, flexibility and adhesion, protection against corrosion, resistance to lubricating oil and petrol, flash point, weight in kg per 10 litres, calcium compounds, keeping properties, spreading capacity, spreading time and wet opacity.

05 Page Gr- A CH

BDS 928:1980**Ready mixed paint, brushing, acid resisting, for protection against acid fumes, colour as required**

Prescribes methods of sampling and test, composition, and requirements for resistance to acid and acid fumes, consistency, drying time, finish, colour, fastness to light, residue on sieve, scratch hardness, flexibility and adhesion, stripping test protection against corrosion, flash point, weight in kg per 10 litres, water content, spreading capacity, spreading time, wet opacity and keeping properties. The materials is intended for the protection of equipment and the interior of laboratories, factories and fume cupboards exposed to acid fumes.

07 Page Gr- B CH

BDS 929:2012**Jute corn sacks/bags (First Revision)**

This Standard prescribes the constructional details and other requirements of jute corn sacks/bags of dimensions 104 X 58.5cm(41X 23inch).

03 Page Gr- A JT

BDS 930:2003**A-twill jute bags (First Revision)**

Detail construction and other particulars of A-twill jute bags.

06 Page Gr- A JT

BDS 931:2006**Heavy cee jute bags (First Revision)**

Detail construction and other particulars of heavy cee jute bags.

06 Page Gr- B JT

BDS 932:1980

Method for determination of breaking load and elongation at break of woven textile fabrics

(Reaffirmed 2006)

(Cancels and replaces by BDS ISO 13934-1:2006.)

JT

BDS 933:1980

Method for determination of threads per decimetre in woven fabrics

(Cancels and replaces by BDS ISO 7211/2:2008.)

JT

BDS 934:1980

Code of practice for frozen fish

Prescribes sanitary conditions for production, storage and handling of frozen fish and fish fillets on board fishing vessels and on shore excluding shellfish, fresh water fish and per-cooked fishery products.

19 Page Gr-D AF

BDS 935:1980

Code of hygienic practices for handling and processing of fresh fish

Applies to fresh fish, chilled but not frozen, intended for human consumption. Contains technological guidelines and most essential requirements of hygiene for the handling and processing of fresh fish at sea and on shore.

08 Page Gr-B AF

BDS 936:1980

Fenitrothion, technical

Prescribes description, chemical name, requirements of active ingredient, free 3 methyl 4-nitrophenol content, material insoluble in acetone, moisture, acidity, alkalinity, specific gravity, packing and marking method of tests.

21 Page Gr-E AF

BDS 937:1980

Canned shrimps/prawns

prescribes terminology, style of presentation essential composition, requirements, drained weight, arsenic, lead, copper, zinc, tin, bacteriological requirements, permitted additives, packing and marking, method of sampling and tests.

07 Page Gr-B AF

BDS 938:1980

Canned crab meat

Prescribes terminology, requirements, drained weight, acid insoluble ash, arsenic, lead, copper, zinc, tin, bacteriological requirements, packing and marking, method of tests.

09 Page Gr-B AF

BDS 939:2008

Rice bran (First Revision)

This standard prescribes the requirements and methods of test for rice bran for use as livestock feed.

04 Page Gr-A AF

BDS 940:1980

Form of gunny contract packing allowance

JT

BDS 941:2012

Jute ww-vlour jute cloth (First Revision)

This Standard prescribes the constructional details and other requirements Dw-Flour jute cloth.

03 Page Gr-A JT

BDS 942:1980

Universal yarn count system of textile

(Canceles and replaces by BDS ISO 1144:2009)

JT

BDS 943:1980

Method for determination of P^H of the aqueous extract of textile materials

(Canceles and replaces by BDS ISO 3071:2006)

JT

BDS 944:2014

Cotton Dosuti (Panama Canvas) (First Revision)

This standard prescribes the constructional details and other particulars of cotton dosuti, grey, scoured, bleached or dyed.

04 page Gr-A JT

BDS 945:2012

B-twill cloth (First Revision)

This Standard prescribes the constructional details and other particulars of B-twill jute cloth used for the manufacture of jute bags for packing food grains.

07 Page Gr-B JT

BDS 946:1980

L-twill cloth (Reaffirmed 2008)

Detail construction and other particulars of liverpool twill (L-twill) cloth made of jute.

04 Page Gr-A JT

BDS 947:2006

Heavy cee cloth (First Revision)

Construction and other particulars of heavy cee cloth made of jute.

04 Page Gr-A JT

BDS 948:1981

DW-flour jute bags

Construction and other particulars of DW-flour jute bags.

05 Page Gr-A JT

BDS 949:2012

Method for Determination of Added oil Content of Jute Yarn and Fabrics (First Revision)

This Standard prescribes a method for determination of added oil content of jute yarn, rove and fabric.

This procedure is applicable to all types of jute yarns, roves and fabrics, but. does not apply to products containing petroleum-soluble additives other than oil, e.g. copper naphthenate.

05 Page Gr-A JT

BDS 950:1980

Cotton turkish towels

(Cancels and replaces by BDS 1898:2015)

04 Page Gr-A JT**BDS 951:2012****Cotton bed sheets (First Revision)**

This Standard prescribes the constructional details and other particulars of Cotton bed sheets, scoured, bleached, dyed or printed.

07 Page Gr-B JT**BDS 952:1981****Grades on milled rice (First Revision)**

Prescribes terminology, processing, requirements, contaminants and methods of sampling and analysis.

20 Page Gr-D AF**BDS 953:1981****L-twill bags**

Detail, construction and other particulars of Liverpool twill (L-twill) bags made of jute.

05 Page Gr-A JT**BDS 954:2016****Methods for Determination of Weight of Jute Fabrics (First Revision)**

This Standards prescribes methods for determination of weight per linear metre and weight per square metre of jute fabrics

04 page Gr-A JT**BDS 955:1981****Methods for Determination of Universal Count of Jute Yarn (Reaffirmed 2011)**

This Bangladesh Standard prescribes two methods for determination of universal count of jute yam. It is also applicable to single, plied or cabled yam.

05 Page Gr-A JT**BDS 956:2013****Cotton mosquito netting, round mesh**

(First Revision)

Detail, construction and other particulars of cotton mosquito netting, round mesh, dyed or grey.

05 page Gr-A JT**BDS 957:1999****ISO 3932:1976****Textiles — Woven fabrics-Measurement of width of pieces (First Revision)**

(Cancels and replaces by BDS ISO 22198:2009)

JT**BDS 957:1999****ISO 3933:1976****Textiles — Woven fabrics-Measurement of length of pieces**

(Cancels and replaces by BDS ISO 22198:2009)

JT**BDS 958:1981****Method for determination of nep count in cotton**

(First Revision)

Method for determination of number of neps present in cotton at different stage of spinning process.

05 Page Gr-A JT**BDS 959:1981****Raw copper****25 Page Gr-E ET****BDS 960:1981****Cathode copper**

Requirements for cathode copper (chemical composition)

07 Page Gr-B ET**BDS 961:1981****Electrolytic tough pitch high conductivity copper**

Requirements for electrolytic tough pitch high conductivity copper.

05 Page Gr-A ET**BDS 962:1981****Fire refined tough pitch high conductivity copper**

Requirements for fire tough pitch high conductivity copper.

07 Page Gr-B ET**BDS 963:1981****99.85 percent tough pitch copper**

Requirements for 99.85 % tough pitch copper.

05 Page Gr-A ET**BDS 964:1981****99.50 percent tough pitch copper**

Requirements for 99.50 % tough pitch copper.

05 Page Gr-A ET**BDS 965:1981****99.75 percent tough pitch copper**

Requirements for 99.75 % tough pitch copper.

06 Page Gr-B ET**BDS 966:1981****Phosphorus deoxidized non-arsenical copper**

Requirements for phosphorus deoxidized non-arsenical copper

05 Page Gr-A ET**BDS 967:1981****Tough pitch arsenical copper**

Requirements for tough pitch arsenical copper.

07 Page Gr-B ET**BDS 968:1981****Phosphorus deoxidized arsenical copper**

Requirements for phosphorus deoxidized arsenical copper.

04 Page Gr-A ET**BDS 969:1981****Oxygen free high conductivity copper**

Requirements for oxygen free high conductivity copper.

05 Page Gr-A ET**BDS 970:1981****Oxygen free high conductivity copper for special application**

Requirements for oxygen free high conductivity copper for special applications.

06 Page Gr-B ET

BDS 971:1981

Anti-fouling paint, brushing for ships, bottoms and hulls, red, chocolate or black, as required

Prescribes composition and 2 types depending upon the properties, and gives requirements and tests for leaching rate and toxicant availability and other general characteristics.

07 Page Gr-B CH

BDS 972:1981

Anti-corrosive paint, brushing for ships, bottoms and hulls, red chocolate or black, as required

(Cancels and replaces by BDS 774:1970)

07 Page Gr-B CH

BDS 973:1981

Specification and methods of test for linseed stand oil for paints and varnishes

Specifies the requirements and the corresponding methods of test for five types of linseed stand oil suitable for use in paints and varnishes.

05 Page Gr-A CH

BDS 974:1981

Specification and methods of test for raw tung oils for paints and varnishes

Specifies the requirements, and the corresponding methods of test for two types of tung oil suitable for use in paints.

06 Page Gr-B CH

BDS 975:2000

Glass globes for hurricane lantern (First Revision)

Covers the requirements for two sizes of glass globes for hurricane lanterns

(Cancels and replaces by BDS 646:1968)

05 Page Gr-A CH

BDS 976:1981

Methods for thermal shock tests of laboratory glassware.

Specifies general methods of test intended to assess the resistance of glassware used in laboratories to a shock arising from predetermined change in temperature.

05 Page Gr-A CH

BDS 977:1981

Chrome waxed sole leather

Prescribe requirements for chrome waxed sole leather used for soles of chapplas, sports shoes and for occupational and protective footwear. Besides giving the guidelines for raw material, tanning, bleaching, waxing and finish, it includes essential chemical and physical requirements like total ash, fats and oil, chromium content, pH, water absorption and crackness of the grain.

05 Page Gr-A CH

BDS 978:1981

Leather picking bands for looms

Requirements of leather picking bands for looms.

03 Page Gr-A JT

BDS 979:2013

Woven cotton tapes (First Revision)

Detail construction and other particulars of 21 varieties of woven cotton tapes.

06 page Gr-B JT

BDS 980:1981

Method for determination of weight per square metre and weight per linear metre of fabrics

(Cancels and replaces by BDS ISO 3801:2010)

JT

BDS 981:2013

Inland packaging of cotton cloth and yarn (First Revision)

Requirements of packing of cotton cloth and yarn intended for overload transport.

04 page Gr-A JT

BDS 982:2014

Handloom cotton Napkins, bleached, striped, checked or dyed (First Revision)

This standard prescribes constructional details and other particulars of four varieties of Handloom cotton napkins, bleached, striped, checked or dyed.

06 page Gr-B JT

BDS 983:2013

Method for determination of breaking load (tensile strength) of jute yarn (First Revision)

This standard prescribes a method for determination of breaking load (strength) of jute yarn b constant rate of traverse machine using a single strand yarn as the test specimen.

03 page Gr-A JT

BDS 984:1981

Jute canvas. Part-1, General requirements

(Reaffirmed 2007)

Detail and describes requirements of jute canvas.

09 Page Gr-B JT

BDS 985:2007

Jute canvas, Part-2 Fine 640 g/m² (First Revision)

Specific requirements of 640 gm/m² fine jute canvas.

03 Page Gr-A JT

BDS 986:2006

Bi-cycle rims (First Revision)

It covers the requirements for four sizes rim materials, shape and dimension, manufacture, finish, typical profile and method of test etc.

11 Page Gr-C ME

BDS 987:1981

Sand cast brass screw-down bib taps and stop taps for water services

(Cancels and replaces by BDS 1507 & BDS 1508)

13 Page Gr-C CE

BDS 988:1981**Wheat meal bread/brown bread**

Prescribes essential and optional ingredients, requirements of weight, total solid, pH, acid value, crude fibre, packing & marking.

13 Page Gr-C AF

BDS 989:1981**Code of practice for shrimps/prawns**

Prescribes the hygienic conditions for processing, handling and storage of fresh and frozen shrimps/prawns.

09 Page Gr-B AF

BDS 990:1981**Dextrin for adhesive purpose**

(Cancels and replaces by BDS 379:1964)

AF

BDS 991:2001**Turmeric powder (First Revision)**

Prescribes the requirements of moisture, ash, starch and lead.

04 Page Gr-A AF

BDS 992:2015**Turmeric whole (First Revision)**

Prescribes the requirements of moisture, extraneous matter, defective rhizomes, pieces of various grades.

09 Page Gr-B AF

BDS 993:1981**Method for sampling of leather footwear**

Covers, terminology, scale of sampling, method for selecting footwear, criteria for conformity and classification of defects of leather footwear.

06 Page Gr-B CH

BDS 994:2012**Metal Polish, liquid (Second Revision)**

Prescribes the requirements and the methods of sampling and test for the metal polish, liquid, which is suitable for general application to copper, brass, bronze, zinc, steel and allied metals.

07 Page Gr-B CH

BDS 995:1999**Silver polish liquid (First Revision)**

Prescribes the requirements and the methods of sampling and test for the silver polish, liquid which is suitable for general application to silver, gold, aluminium and electroplated nickel or chrome surfaces.

05 Page Gr-A CH

BDS 996:1981**High density polyethylene pipes for potable water supplies**

(Cancels and replaces by BDS ISO 4427 series)

07 Page Gr-B CH

BDS 997:2006**Wheat bran (First Revision)**

Prescribes requirements, particle size, (grade) moisture, crude protein, crude fat, crude fibre, total ash, packing and marking, method of sampling

05 Page Gr-A AF

BDS 998:1982**Dextrin for textile industry**

Prescribes types, requirements, particle size, moisture, cold water soluble, free acidity, ash content, reducing sugar, packing & marking, sampling & methods of test.

07 Page Gr-B AF

BDS 999:2000**Edible Palm oil (First Revision)**

This standard prescribed the requirements and methods of sampling and test for edible Palm oil.

04 Page Gr-A AF

BDS 1000:2001**Toffees (First Revision)**

Prescribes essential ingredients, types, requirements, moisture, sulphated ash, acid insoluble ash, reducing sugars, sucrose, fat, protein, lactose, packing & marking and method of test.

05 Page Gr-A AF

BDS 1001:2010**Wafer biscuits (First Revision)**

This standard prescribes the essential requirements and the methods of test for wafer biscuits

06Page Gr-B AF

BDS 1002:1981**Raw natural rubber**

Prescribes the minimum quality requirements and the corresponding methods of test for four grades. The grades are defined by number which indicate their maximum dirt content.

02 Page Gr-A CH

BDS 1003:1981**Method for determination of dirt in natural rubber**

Specifies a method for the determination of dirt contained in raw natural rubber. It is not applicable to dirt present as surface contamination.

03 Page Gr-A CH

BDS 1004 Part-1:1996**Method of test vulcanized rubber : density**

Prescribes the methods for determination of density of solid vulcanized rubber.

Page Tk. CH

BDS 1004 Part-2:1981**Methods of testing vulcanized rubber. Determination of tensile stress-strain properties**

Specifies a method of test in which standard test pieces, either dum-bells or rings, are attached in a tensile testing machine at a constant rate of traverse of driven grip or pulley.

09 Page Gr-B CH

BDS 1004 Part-3:1996**Methods of test for Vulcanized rubbers: measurement of cut growth of rubber by the use of the ross flexing Machine**

Prescribes the method for determining the resistance of rubber to cut growth when subjected to repeated flexing or bending under specific conditions and for known periods on Ross flexing machine.

09 Page Gr-B CH

BDS 1005:1981**Ready mixed paint, brushing, finishing stoving, enamel, colour as required.**

Prescribes methods of sampling and test, composition and requirements for consistency, drying time, finish, colour, residue on sieve, scratch hardness, flexibility and adhesion, stripping test, protection against corrosion, flash point, weight in kg per 10 litres, water content, spreading capacity, spreading time, wet capacity, keeping properties, etc. The material is intended for painting of metal parts of apparatus, equipment, machines, etc.

03 Page Gr-A CH

BDS 1006:1981**Shoe polish, paste (Amendment 1:2006)**

Covers requirements and methods of test for shoe polish of wax-solvent paste type.

02 Page Gr-A CH

BDS 1007:1981**Methanol (methyl alcohol)**

Specifies requirements and methods of sampling and test

20 Page Gr-D CH

BDS 1008:1982**Castorseed oilcake for fertilizer**

Prescribes types, requirements, moisture, water insoluble, organic nitrogen, total ash, acid insoluble ash, packing & marking, method of sampling and test.

14 Page Gr-D AF

BDS 1009:1982**Methods of sampling for milk and milk products**

Covers general and technical requirements, transport of samples, scale of sampling, sampling of milk and milk products, sample containers for milk & cream, sampling of sweetened condensed milk, dried milk, dried milk products & edible casein, butter oil and anhydrous butter oil (ghee), cheese, ice cream, water ices, frozen confections chemical and bacteriological examination.

34 Page Gr-G AF

BDS 1010:1982**Methods of sampling and test for processed fruits and vegetables in cans/containers**

Covers sampling, testing of samples, examination of the cans/containers, determination of vacuum of the cans/container head space, drained weight, pH of cut out syrup, specific gravity, acidity, sodium chloride, calcium, total sugars, arsenic, lead, copper, zinc, tin,

microbiological requirements and conversion table of brix, specific gravity, degree baume of sugar solution.

34 Page Gr-G AF

BDS 1011:1982**Methods of sampling and test for spices and condiments**

Covers detail of sampling and methods of test of spices and condiments.

46 Page Gr-J AF

BDS 1012:2007**List of permitted food additives and their permissible limits of use**

(First Revision; Amendment-1:2010)

(Cancels and replaces by BDS CAC 192:2015)

05 Page Gr-A AF

BDS 1013:1982**Fenitrothion 50 percent (w/w) emulsifiable concentrate**

Prescribes requirements, cold test, emulsion stability, heat stability, flash point, fenitrothion content, acidity or alkalinity, moisture content, packing & marking, sampling and method of test.

25 Page Gr-E AF

BDS 1014:2011**Diazinon 60 Percent (W/W) Emulsifiable Concentrate (First Revision)**

This standard prescribed the requirements and methods of sampling test for diazinon 60 percent (w/w) emulsifiable concentrate

26 Page Gr-F AF

BDS 1015:1982**Rice bran oil for industrial uses**

Prescribes requirements, moisture and volatile matter, acid value, unsaponifiable matter, refractive index, iodine value, saponification value, flash point, packing & marking and method of test.

11 Page Gr-C AF

BDS 1016:1982**Crude palm kernel oil**

Prescribes grades requirements, moisture and volatile matter, colour, acid value, free fatty acid, unsaponifiable matter, refractive index, iodine value, saponification value, packing & marking.

06 Page Gr-B AF

BDS 1017:2001**Chillies, whole and ground (First Revision)**

Prescribes description dimension of whole chillies, physical requirements, moisture content, total ash, acid insoluble ash, crude fibre, non-volatile ether extract, packing & marking.

06 page Gr-B AF

BDS 1018:1982**Adhesive insulating tapes for electrical purposes – Tapes with cotton textile substrates**

Requirements and the test for adhesive insulating tapes used for insulation purpose in electrical industry on low and medium voltage circuits.

07 Page Gr-B ET

BDS 1019:1982

Adhesive insulating tapes for electrical purposes — Tapes with PVC substrates

Covers adhesive insulating tapes for electrical purposes with PVC substrates to be used for holding, binding and insulating in electrical applications.

17 Page Gr-D ET

BDS 1020:1982

Classification of insulating materials for electrical machinery and apparatus

Covers seven classes of insulating materials generally used in electrical machinery and apparatus in relation to their thermal stability in service.

18 Page Gr-D ET

BDS 1021:1982

Type-writing paper

Covers requirements for type-writing paper intended for official correspondence and documentation.

03 Page Gr-A CH

BDS 1022:1982

Perchloroethylene (tetrachloroethylene) technical

Prescribes requirements and methods of sampling and test for perchloroethylene used in dry-cleaning, metal drying, solvent extraction, etc. It does not cover the pharmaceutical or food solvent grade material.

12 Page Gr-C CH

BDS 1023:2011

Bangladesh hessian Part III, 213g/m² and 270 g/m² at 16 percent contract regain

(Second Revision)

This Standard prescribes constructional details and other particulars of the following type of Hessian of such widths as agreed to between the buyer and the seller.

Type I -- 213gm/m², 38×31 (or 7 oz/ 40 9×8)

Type II – 270gm g/m², 47–47 (or 8.9 oz/ 40 in, 11×12)

04 Page Gr-A JT

BDS 1024:2011

Bangladesh Hessian Part-4, 245 g/m² at 16 percent contract regain (First Revision)

This standards prescribes constructional details and other particulars of 245g/m²: 38×39 (7.25 oz/sq. yd:9 ×10) type of Hessian of such widths as agreed to between the buyer and the seller

06 page Gr-B JT

BDS 1025 Part 1-3:2012

Jute tarpaulin fabric (First Revision)

This standard (Part I) covers general requirements regarding construction, freedom from defects, length, medium cuts and short pieces, width, contract moisture regain, corrected net mass, sampling, testing and

inspection, criteria for conformity, packing and marking for Jute Tarpaulin Fabric.

09 Page Gr-B JT

BDS 1026:1982

Jute corn sack cloth

Detail construction and other particulars of jute corn sack cloth.

04 Page Gr-A JT

BDS 1027:2016

Cotton yarn bleached/dyed (First Revision)

This standard prescribes linear density (count) of yarn, strength of yarn, tenacity in kg per tex of bleached cotton yarn, colour fastness of dyed yarn intended for use in power loom for manufacture of toweling cloth.

08 Page Gr-B JT

BDS 1028:2014

Lining Cloth (First Revision)

This standard prescribes the constructional details and other particulars of lining cloth. Cotton, Man-made fibres or Man -made fibres may be blended with cotton.

04 Page Gr-A JT

BDS 1029:1982

Cotton lining cloth (warp faced satin) dyed

Detail construction and other particulars of cotton lining cloth (warp faced satin) dyed.

06 Page Gr-B JT

BDS 1030:1998

Stencil paper (First Revision; Amendment 1:2006)

Specifies the requirements, methods of sampling and tests for waxless stencil papers used on duplicating machines.

08 Page Gr-B CH

BDS 1031:2006

Mild steel (MS) pipe and galvanized iron (GI) pipe (First Revision)

This standard specifies the requirements for butt welded and seamless screwed, socketed and plain end Mild Steel Pipes and Galvanized Iron (GI) Pipes

13 Page Gr-C CE

BDS 1032:1983

Dimension of pipe threads for gas list tubes and pressure tight screwed fittings

It specified the basic profiles, design and dimensions, tolerances and designation recommended gauge, etc.

14 Page Gr-C CE

BDS 1033:1983

General requirements for the supply of metallurgical materials

Terminology, certificate of compliance, supply, independent test etc.

03 Page Gr-A ME

BDS 1034

Winding wires

BDS 1034 (Part-1):2006**Enamelled round Copper winding wires**

(First Revision)

Applies to enamelled round copper winding wires intended to be used for winding of electrical equipments.

29 Page Gr-F ET

BDS 1034 (Part-2):2006**Enamelled rectangular copper winding wires**

(First Revision)

Requirements for enamelled rectangular copper winding wires to be used for windings of electrical equipment

08 Page Gr-B ET

BDS 1034 (Part-3):2006**Enamelled round aluminium winding wires**

(First Revision)

Requirements for enamelled round aluminium winding wires intended to be used for windings of electrical equipments.

17 Page Gr-D ET

BDS 1034 (Part-4):2006**Enamelled rectangular aluminium winding wires**

(First Revision)

Requirements for enamelled rectangular aluminium winding wires to be used for windings of electrical equipment.

08 Page Gr-B ET

BDS 1034 (Part-5):2006**Test methods (First Revision)**

Test methods for round and rectangular, copper and aluminium enamelled winding wires.

40 Page Gr-H ET

BDS 1035:1983**Enamelled copper conductors (Polyvinyl) acetal base with high mechanical properties), round wire**

(Cancels and replaces by BDS 1034 (Part 1, 2, 3, 4, 5)

ET

BDS 1036:2006**Bare aluminium and aluminium alloy conductors for overhead power transmission**

Applies to aluminium stranded and aluminium alloy conductors for overhead power transmission purpose. Cover all common construction having wires of the size in each aluminium and aluminium alloy layer.

10 Page Gr-B ET

BDS 1037:2003**Aluminium conductors, steel-reinforced (ACSR) for overhead power transmission (First Revision)**

Applies to aluminium conductors, steel-reinforced for overhead power transmission purposes.

18 Page Gr-D ET

BDS 1038:1983**Ventilating fans**

(Cancels and replaces by BDS IEC 60665)

ET

BDS 1039:2002**Honey**

(Cancels and replaces by BDS CAC 12:2007)

AF

BDS 1040:2006**Safety matches in boxes (First Revision)**

Prescribes requirements, appearance, sticks, boxes, number of sticks, splints match head, defective boxes, sticks without head, performance, requirements, safety ignition, burning quality, wearing strength of friction surface, damp proofness, packing & test.

13 Page Gr-C AF

BDS 1041:2016**Tamarind Pulp (First Revision)**

This standard prescribes the requirements and the methods of sampling and test for tamarind pulp, obtained from the mature fruits of Tamarindus indica.

09 Page Gr-B AF

BDS 1042:1983**Code of practice for seasoning of timber**

Covers classification of timbers for seasoning, preliminary treatment and storage, seasoning methods, air seasoning and its producers, kiln seasoning, solar seasoning, inspection, storage and transport of seasoned timber.

22 Page Gr-E AF

BDS 1043:1983**Gravel aggregates for surface treatment of roads (including surface dressings)**

(Cancels and replaces by BDS EN 13043:2011)

04 Page Gr-A CE

BDS 1044 Part-1:1983**Methods of testing concrete, Methods of sampling fresh concrete**

(Cancels and replaces by BDS ISO 1920:2008 Series)

09 Page Gr-B CE

BDS 1044 Part-2:1983**Methods of testing concrete, methods of testing of fresh concrete**

(Cancels and replaces by BDS ISO 1920:2008 Series)

27 Page Gr-F CE

BDS 1044 Part-3:1983**Methods of testing concrete, dimensions, tolerances and applicability**

(Cancels and replaces by BDS ISO 1920:2008 Series)

CE

BDS 1044 Part-4:1992**Methods of testing concrete, making and curing of test, specimens for strength test**

(Cancels and replaces by BDS ISO 1920:2008 Series)

CE

BDS 1044 Part-5:1992**Methods of testing concrete, making and curing of testing, specimens for strength test**

(Cancels and replaces by BDS ISO 1920:2008 Series)

CE

BDS 1045:1983**Methods of testing concrete 30. p.k. 50.00, Method of testing fresh concrete**

(Cancels and replaces by BDS ISO 1920:2008 Series)

09 Page Gr-B CE**BDS 1046:1983****Asbestos cement Products-Corrugated sheets & fittings for roofing & cladding**

(Cancels and replaces by BDS ISO 10904:2016)

17 Page Gr-D CE**BDS 1047:2013****Cotton yarn grey (Second Revision)**

(Cancels and replaces by BDS 9:1958)

07 Page Gr-B JT**BDS 1048:2015****Flannelettes (First Revision)**

Detail construction and other particulars of flannelettes scoured.

04 Page Gr-A JT**BDS 1049:2014****Textiles-Jute sacking- general requirements**

This standard specifies terminology, general requirements, packing, marking, sampling, inspection and criteria for conformity of jute sacking fabrics and bags.

13 page Gr-C JT**BDS 1050:1983****Hessian sand bags, unproofed and proofed**

Requirements for 36 cm x 84 cm hessian sand bags used as temporary barricades after filling with sand.

07 Page Gr-B JT**BDS 1051:1983****Method for determination of grammage of paper and board.wrapping and packing purposes**

(Cancels and replaces by BDS 441 (Part-4):1995)

06 Page Gr-B CH**BDS 1052:1983****Cereal based food for infant and children**

Prescribes the requirements and methods of test for cereal based food for infant and children.

AF**BDS 1053:1983****Wrapping tissue paper**

Prescribes the requirements and methods of sampling and tests for tissue paper used for wrapping and packing purposes.

06 Page Gr-B CH**BDS 1054:1983****Iron blue pigments for paints**

Specifies the requirements and the corresponding methods of test for iron blue pigments for paints.

04 Page Gr-A CH**BDS 1055:1983****Ultramarine pigments for paints**

Specifies the requirements and corresponding test methods for artificial ultramarine pigments, suitable for use in paints.

04 page Gr-A CH**BDS 1056:1983****Grease, graphite**

Prescribes requirements and the methods of sampling and test for each of the four grades of graphited grease used for general service under comparatively high load, low speed or low relative displacement of interacting surface requiring lubricating.

04 page Gr-A CH**BDS 1057:1983****Chrome retained upper leather**

Prescribes requirements for footwear leather uppers. commercially known as chrome retained upper leather, tanned with basic chromium salts initially followed by ratanage/vegetable and/or syntans. Besides, giving a general guideline with regard to raw material, tanning and finishing, it includes essential chemical and physical requirements like total ash, free fats oils, chromium, pH, water absorption, tensile strength, grain strength, and a method for assessing the resistance to mould growth.

04 page Gr-A CH**BDS 1058:1983****Methods of testing of strength of paper**

Specifies the method for determination of tensile strength and stretch (or elongation) and breaking length of paper.

05 page Gr-A CH**BDS 1059:1983****Tracing paper**

Prescribes requirements and methods of sampling and test for natural and treated tracing papers.

04 page Gr-A CH**BDS 1060:1983****Petrol (gasoline) for motor vehicle**

(Cancels and replaces by BDS 346:2010 and BDS 347:2010)

CH**BDS 1061:1983****Red phosphorous**

Prescribes requirements, methods of sampling and test, and analysis for red phosphorus, suitable for match industry, manufacture of fire works and general industrial use. It also covers the additional requirements for defence purposes.

10 page Gr-B CH

BDS 1062:1983**Potassium chlorate, technical**

Prescribes two grades of the material and specifies requirements, and methods of test and sampling.

12 page Gr-C CH

BDS 1063:1983**Litharage**

Deals with composition, methods of sampling and test and requirements for the material commercially known as litharge intended for the use in the manufacture of paints and pigments.

04 page Gr-A CH

BDS 1064:1983**Varnish, stoving**

Deals with composition and prescribes methods of sampling and test and requirements for resistance to white spirit, lubricating oil and water, drying time, finish, colour, scratch hardness, flexibility and adhesion, stripping test, flash point, volatile matter, viscosity, acid value and keeping properties. The materials is used for the production and decoration of metal surfaces.

04 page Gr-A CH

BDS 1065:1983**Varnish, acid resisting**

Deals with composition and prescribes methods of sampling and test and requirements for resistance to acid, drying time, finish, colour, scratch hardness, viscosity, acid value and keeping properties. The material is used for the protection and decoration of metal surfaces.

04 page Gr-A CH

BDS 1066:1983**Varnish, finishing, interior**

Prescribes requirements and methods of sampling and test.

04 page Gr-A CH

BDS 1067:1983**Recommended SI unit for textiles**

It contains a list of SI units recommended for use in the textile industry and trade.

05 page Gr-A JT

BDS 1068:1983**Integrated conversion table for replacing traditional yarn number by rounded values in the tex system**

This standard contains conversion factors and table rounding values of English, Metric, Worsted, Linen, Jute and Denier system compared with tex system.

24 page Gr-E JT

BDS 1069:1983**Conversion factors and conversion tables for yarn counts**

(Supersedes BDS 93:1960)

23 page Gr-E JT

BDS 1070:2014**Cotton Mulls (First Revision)**

This standard prescribes the constructional details and other particulars of one variety of bleached cotton mulls. If agreed, man made fibres may be blended with cotton, but their percentage shall not exceed 40.

04 page Gr-A JT

BDS 1071:2015**Coverlet (First Revision)**

This standard prescribes constructional details and other requirements of coverlet.

04 page Gr-A JT

BDS 1072:2012**Jute fabric for fertilizer bag**

(First Revision)

This Standard prescribes the constructional details and other particulars of the double warp (DW) jute fabric used for making bags for packing fertilizer

07 page Gr-B JT

BDS 1073:2014**Laminated jute bags for packing fertilizers (First Revision)**

This standard prescribes constructional details and other requirements of the laminated jute bags manufactured from basic fabric 407 g/m²; 85×39 Jute tarpaulin fabric conforming to BDS 1025(Part 2).

05 page Gr-A JT

BDS 1074:1983**Bread rolls**

Prescribes essential and other ingredients, types, weights, physical characteristics, requirements, total solid, pH, acid insoluble ash, crude fibre, packing & marking.

05 page Gr-A AF

BDS 1075:1983**Edible sunflower oil**

(Canceles and replaces by BDS CAC 23:2002)

AF

BDS 1076:2016**Tamarind Concentrate (First Revision)**

This standard prescribes the requirements and the methods of sampling and test for tamarind concentrate.

13 Page Gr-C AF

BDS 1077:1983**Irradiated foods**

(Cancels and replaces by BDS CAC 106:2008)

06 page Gr-B AF

BDS 1078:1983**Code of practice for the operation of radiation facilities for the treatment of foods**

Applies to code of practice for the operation of radiation facilities for the treatment of foods.

04 page Gr-A AF

BDS 1079:1984

Spades

It specifies requirements of spades for earth cutting and digging in agricultural and other sectors, Shapes, dimension, manufacture, finish, treatment, hardness, tests, packing & marking, etc.

04 page **Gr-A** **ME**
BDS 1080:1984

Pad locks

It covers the padlocks used for locking doors, boxes, almirah, etc. fitted with sliding bolts, hasps and staples and chain Material, sizes & dimensions, manufacture, workmanship tests etc.

13 page **Gr-C** **ME**

BDS 1081 (Part-1 to 6)

Power transformer

(Canceles and replaces by BDS IEC 60076)

ET

BDS 1082:1984

Horizontal centrifugal pumps for clear, cold, fresh water for agricultural purposes.

This specifies the technical requirements for horizontal centrifugal pumps for handing clean, cold, fresh, water for agricultural purpose.

32 page **Gr-G** **ME**

BDS 1083:2006

Ice cream (First Revision)

Prescribes physical requirements, composition, requirements of mass in gram, total milk solids, milk fat, acidity, sugar/solid ingredients, total colony counts, coliform count, phosphatase test, hygienic requirements, packing & marking and methods of test.(supersedes BDS 785 : 1970)

30 page **Gr-F** **AF**

BDS 1084:2015

Coriander powder (First Revision)

Prescribes description of the material, physical requirements, moisture, total ash, acid insoluble ash, packing & marking.

04 page **Gr-A** **AF**

BDS 1085:2015

Coriander, whole (First Revision)

Prescribes description of the material, physical requirements, grade, moisture content, packing & marking.

05 page **Gr-A** **AF**

BDS 1086:1984

Guides for storage of tomatoes

Prescribes the method of preserving tomatoes, harvesting optimum storage conditions.

03 page **Gr-A** **AF**

BDS 1087:1984

Methods of sampling of plywood

Prescribes terminology and sampling method.

04 page **Gr-A** **AF**

BDS 1088:1984

Phosphamidon 100 percent m/v water soluble concentrates

Prescribes requirements, phosphamidon, technical content, acidity, solubility, packing & marking, sampling and methods of test.

09 page **Gr-B** **AF**

BDS 1089:2007

Mosquito coils (Second Revision)

Prescribes general characteristics, active ingredients, biological efficacy, burning characteristics, moisture, sampling and method of test, packing and marking.

10 page **Gr-B** **AF**

BDS 1090:1984

Methods of test for plywood

Covers the method of density & moisture, resistance to dry heat, fire resistance, glue shear strength, adhesion of plies, water resistance, mycological test, tensile strength, static bending strength, compressive strength. (supersedes of BDS 287:1963)

24 page **Gr-F** **AF**

BDS 1091:1984

Method for determination of seam strength of jute fabric including their laminates

This standard prescribes a method for determination of seam breaking strength of seams when the load is applied perpendicularly to the seam using strip method and grab method.

05 page **Gr-A** **JT**

BDS 1092:1984

Method for determination of breaking load, elongation at break and tenacity of yarns

(Supersedes BDS 595)

(Cancels and replaces by BDS ISO 2062:2014)

JT

BDS 1093:1984

Methods for sampling cotton fabrics for determination of physical characteristics

It specifies the methods for sampling of cotton fabrics for physical test, namely, ends, picks, width, length, thickness, weight, breaking load and bursting strength.

07 page **Gr-B** **JT**

BDS 1094:1984

Methods for sampling of cotton fabrics for chemical tests

(Cancels and replaces by BDS ISO 5089:2008)

JT

BDS 1095:1984

Cotton mosquito netting, square mesh

Detail construction and other particulars of cotton mosquito netting, square mesh, bleached or dyed.

04 page **Gr-A** **JT**

BDS 1096:2015

Cotton gaberdine (First Revision)

Detail construction and other particulars of cotton gaberdine bleached.

04 page Gr-A JT

BDS 1097 Part-1:1984

Plastic emulsion paint for interior use

Prescribes the requirements, the methods of sampling and test plastic emulsion paint used for interior decoration.

05 page Gr-A CH

BDS 1097 Part-2:1989

Plastic emulsion paint for exterior use

Prescribes methods of sampling and test for plastic emulsion paint. The requirements covered are recoating properties, drying time, consistency, finish, colour, fastness to light, resistance to alkali, resistance to wet abrasion and washing, temperature stability, flexibility and capacity.

09 page Gr-B CH

BDS 1098:1988

Green oxide of chromium for paints

Specifies requirements and methods of sampling and test for green oxide of chromium pigment used in paints and allied industries.

12 page Gr-C CH

BDS 1099:1984

Aluminium pigments for paints

Specifies requirements and test methods for aluminium pigments suitable for use in i) general purpose, decorative and protective paints and ii) speciality finishing paints

19 page Gr-D CH

BDS 1100:1984

Recommendation for the determination of the ink absorbancy of paper and board

Applies to paper and board to be printed by the lithographic, gravure or letterpress process.

03 page Gr-A CH

BDS 1101:1984

Method for determination of water absorption of paper and board

Specifies method of determining the water absorption capacity of paper under standard conditions.

03 page Gr-A CH

BDS 1102 Part-1:1984

Fibreboard boxes, Part-1, Corrugated fibre board boxes

Prescribes the requirements for corrugated fibreboard boxes for general packing purposes for the maximum mass of the contents up to 75 kg.

06 page Gr-B CH

BDS 1102 Part-2:1984

Fibreboard boxes Part 2, Solid fibreboard boxes

Prescribes the requirements for solid fibre board boxes for general packaging purposes, for weight up to 40 kg.

03 page Gr-A CH

BDS 1103:1984

Ascorbic acid, food grade

Prescribes requirements, purity, loss on drying, sulphated ash, arsenic, lead, specific rotation, pH, packing, storage, & marking and methods of test.

04 page Gr-A AF

BDS 1104:1984

Sodium, metabisulphite, food grade

Prescribes requirements, purity, thiosulphate, arsenic, lead, iron, selenium, packing, storage & marking, method of tests.

04 page Gr-A AF

BDS 1105:1984

Guide for testing of physical conditions in cold storage

Prescribes definition of the most commonly occurring terms in industrial cold storage practices of fruits and vegetables, method for measuring the physical conditions inside cold stores.

09 page Gr-B AF

BDS 1106:2001

Nooddles (First Revision)

Prescribes description, requirements, moisture, acid value, degree of gelatinization, method of sampling and tests.

09 page Gr-B AF

BDS 1107:2007

Packet tea (First Revision)

(Cancels and replaces by BDS ISO 3720:2008)
AF

BDS 1108:1984

Cast aluminium and aluminium alloys for manufacture of utensils

ME

BDS 1109:1984

Wrought aluminium and aluminium alloys for manufacture of utensils. Materials, chemical composition, mechanical properties

04 page Gr-A ME

BDS 1110:1984

Wrought aluminium utensils

Shapes and dimensions, of bati, thala, dish, decchi, frypan, kettle, badnah, glass, basin, plate, milk can, screw, mug blati, batta etc.

13 page Gr-C ME

BDS 1111:1984

Centrifugally cast (spun) iron pressure pipes for water, gas and sewage

Specifies manufacture, mechanical tests, dimension of pipes, sockets and spigot pipes, tolerances coating, marking etc.

06 page Gr-B ME

BDS 1112:1985

Porcelain insulators for overhead power lines with a nominal voltage greater than 1000 volts

(Canceles and replaces by BDS IEC 60383 (Part 1, 2)

ET

BDS 1113:1985

Transformers for use on single wire earth return distribution systems

Covers the requirements for isolating and distribution transformers for use on single wire earth return distribution system.

14 page Gr-C ET

BDS 1114:1985

Gum arabia or gum acacia

Prescribes identification tests, requirements, loss on drying, total ash, acid insoluble ash, acid insoluble matter, starch or dextrin, tannin bearing gum, arsenic, lead, heavy metals, method of tests and packing & marking.

04 page Gr-A AF

BDS 1115:1985

Marine plywood Covers requirements for materials manufacture and performance of marine plywood suitable for the construction, repair and maintenance of marine and river craft, pontoons and the like.

09 page Gr-B AF

BDS 1116:1985

Logs for plywood

Prescribes dimensions of logs, quality requirements and marking.

06 page Gr-B AF

BDS 1117:1985

Potassium meta bisulphate, food grade

Prescribes requirements, identification tests, purity, matter insoluble in water, thiosulphate, arsenic, lead, iron, selenium, packing and marking, methods of test.

03 page Gr-A AF

BDS 1118:1985

Phosphoric acid, food grade

Prescribes requirements, identification tests, purity, nitrates, volatile acid, chloride, sulphate, flouride, arsenic, lead, packing and marking, methods of test.

05 page Gr-A AF

BDS 1119:1985

Dichlorvos 100 percent m/v émulsifiable concentrates

Prescribes requirements, physical description, cold test, flash point, emulsion stability, acidity, water content, packing and marking, sampling and method of tests.

21 page Gr-E AF

BDS 1120:1985

Size designation of cloths

(Canceles and replaces by BDS ISO 3635:2006)

JT

BDS 1121:1985

Methods of testing viscose rayon staple fibres

This standard prescribes methods for determining the following characteristics of viscose rayon staple fibres.

07 page Gr-B JT

BDS 1122:1987

Galvanized steel sheets, coils & corrugated sheets

It specifies steel sheets & coils zinc coated (Reaffirmed 2007)

25 page Gr-E ME

BDS 1123:2013

Carbonated beverages (Third Revision)

This standard prescribes the requirements and the methods of sampling and test for carbonated beverages

17 page Gr-D AF

BDS 1124:1985

Method for determination of dimensional changes of fabrics

(Canceles and replaces by BDS ISO 7771:2006)

JT

BDS 1125:2005

Umbrella Cloth (First Revision)

Detail construction and properties of seven classes of umbrella cloth.

07 page Gr-B JT

BDS 1126:1985

Textile for preparation, marking and mesuring of fabrics

(Canceles and replaces by BDS ISO 3759:2006)

JT

BDS 1127:2015

Determination of Cleanness of Raw Silk (First Revision)

This standard prescribes the method to determine the degree of cleanness of Raw silk on the basis of number of cleanness defects of raw silk.

07 page Gr-B JT

BDS 1128 : 1985

Methods for sampling of cotton yarn for determination of physical characteristics, namely skein breaking load and twist

Methods of sampling for cotton yarn for determination of physical characteristics.

07 page Gr-B JT

BDS 1129:1985

Methods of fibre sampling for testing

It specifies several methods for preparing laboratoty samples of fibre for testing.

14 page Gr-C JT

BDS 1130:1985

Dimensions of flyer Bobbins and screws

(Cancels and replaces by BDS ISO 344:2007)

14 page Gr-C JT

BDS 1131:1985

Three phase squirrel cage induction motors for centrifugal pumps for agricultural application

Covers 2, 4 & 6 pole squirrel cage three phase induction motors for centrifugal pumps for agricultural application

for voltages up to and including 650 V and having output up to and including 5 kW.

24 page **Gr-E** **ET**

BDS 1132

Lamp caps and holders

BDS 1132 (Part-1):1985

Part-1 Lamp caps

Dimensional requirements of bayonet caps, bayonet automobile caps, caps for fluorescent and sodium lamps.

22 page **Gr-E** **ET**

BDS 1132 (Part-2):1985

Lamp holders

Appropriate data sheets, the dimensions for lamp holders for use with the appropriate lamp caps.

11 page **Gr-C** **ET**

BDS 1133:1985

Guide for storage of mangoes

Prescribes botanical and common names of mango, harvesting, physical & chemical characteristics for different varieties of mangoes, quality characteristics of storage, methods of storage, optimum conditions for storage.

03 page **Gr-A** **AF**

BDS 1134:1985

Veneered wood boards for packing cases

Prescribes terminology, grades, materials, manufacture, workmanship and finish, dimensions and tolerances, sampling, tests, and marking.

06 page **Gr-B** **AF**

BDS 1135:1984

Cereal-based food for infant and children

(Cancels and replaces by BDS 74)

09 page **Gr-B** **AF**

BDS 1136:1986 (Reaffirmed 2007)

Protective helmets for scooter and motor cycle riders

Specifies materials, construction, workmanship, finish, weight performance etc.

09 page **Gr-B** **AF**

BDS 1137:2013

Grey cotton yarn for hosiery (First Revision)

Requirements of grey cotton yarn used in hosiery.

09 page **Gr-B** **JT**

BDS 1138:2005

Glossary of terms relating to hosiery

(First Revision)

Definitions of terms commonly used in the hosiery industry and trade.

45 page **Gr-I** **JT**

BDS 1139:1986

Three-phase induction motors (Amendment 1:2006)

Covers ratings, technical requirements, characteristics of three- phase induction motors for voltage up to including

11 kv and having winding with class A, class B and E insulation.

36 page **Gr-H** **ET**

BDS 1140:1986

Standard colors for PVC insulation for low frequency cables and wires

(Cancels and replaces by BDS 1876:2013)

ET

BDS 1141:1986

Ready mixed aluminium priming paints for wood work

Specifies two types of ready mixed aluminium paints, for application either to soft wood of woods treated with metallic naphthenates with brush.

04 page **Gr-A** **CH**

BDS 1142:2006

Woven cotton apparel fabric (First Revision)

Performance and requirements of woven cotton apparel fabric.

05 page **Gr-A** **JT**

BDS 1143:1986

Size designation of clutches, women's and girls under wear, nightwear, foundation and shirt

(Cancels and replaces by BDS ISO 4416:2006)

JT

BDS 1144:1986

Dimensions of flange mounted ac induction motors

Covers the dimensional requirements for horizontal shaft flange mounted screen protected and/or drip-proof or totally enclosed fan cooled ac squirrel cage industrial motors of frame size from 90 mm to 280 mm intended for general purpose application.

11 page **Gr-C** **ET**

BDS 1145:1986

Dimension of vertical shaft motors for pumps

Covers the dimensional requirements of vertical solid and hollow shaft motors mainly for driving pumps.

04 page **Gr-A** **ET**

BDS 1146:1986

Latches and locks for doors in buildings

It covers the dimensions, performance requirements, methods of test etc.

25 page **Gr-E** **ME**

BDS 1147:2006

Matka Hand Spun silk fabric (First Revision)

Detail construction and other particulars of seven varieties of matka silk fabric woven on handloom.

05 page **Gr-A** **JT**

BDS 1148:2011

Polyester blend shirting (market varieties)

(Second Revision)

Prescribes the requirements for polyester blend shirting manufactured out of any combination of polyester blended or filament yarns in warp and weft directions having polyester constituent of at least 48 percent and maximum 80 percent of the total.

07 page **Gr-B** **JT**

BDS 1149:2015

Method of Grading of Raw Silk (First Revision)

This standard prescribes method of grading of raw silk.

12 page **Gr-C** **JT**

BDS 1150:1986

Grading of continuous filament viscose rayon yarn

Method of grading continuous filament viscose rayon yarn and acetate yarn.

30 page **Gr-F** **JT**

BDS 1151:1986

Pavement marking paints

(Cancels and replaces by BDS 499:1965)

25 page **Gr-E** **CH**

BDS 1152:1986

Paper for match boxes

Prescribes requirements and methods of sampling and test. Essential characteristics for which requirements have been specified include substance, tear factors, breaking length and cob test.

02 page **Gr-A** **CH**

BDS 1153 : 1986

Base paper for carbon paper

Prescribes requirements and methods of sampling and test.

05 page **Gr-A** **CH**

BDS 1154:1986

Backing sheet for stencil

Prescribes requirements and methods of test

The essential characteristics for which requirements have been specified include burst factor, substances, folding endurance, breaking length and cob test.

02 page **Gr-A** **CH**

BDS 1155:1986

Millboard, greyboard and strawboard

Prescribes requirements for two grades of millboard and strawboard and one grade of greyboard. Essential characteristics include moisture content, breaking strength, burst factor, stiffness, pH value, ash percent, cupping test, water soluble chlorides and sulphates, fatty and similar acids, and matter soluble in ether.

09 page **Gr-B** **CH**

BDS 1156:1986

Cardboard tubes used as cores for jute industry

Cardboard tubes used as cores for jute industry recommends paper of cardboard for the manufacture of ten varieties of tubes and provides requirements and methods of test for their internal diameter, wall

thickness, mass, warpage, moisture regain and the beam strength on the basis of which the ten varieties are graded, sampling plan is also included.

06 page **Gr-B** **CH**

BDS 1157:1986

Paddy

Prescribes definitions, classification & grading, packing & marking, sampling and test method, requirements of purity, foreign matter, weed seeds, cracked kernels, other varieties, immature, damaged and fermented kernels and moisture.

03 page **Gr-A** **AF**

BDS 1158:1986

Veneered decorative plywood

Prescribes terminology, grades, materials, list of species of timber, manufacture, requirements, sampling and marking.

06 page **Gr-B** **AF**

BDS 1159:1986

Packaging of plywood, particle board, hard board and flash door.

Prescribes terminology, covers the requirements of crates type of timber, size of frame sections and battens/struts and the mode of assembly of the same for packaging the intended materials.

11 page **Gr-C** **AF**

BDS 1160:1987

Wrought aluminium solid conductor for electrical purpose for insulated cables.

Requirements for circular solid and 2, 3 and 4 core shaped solid conductors in a range of standard sizes from 16 mm² upto and including 300 mm².

07 page **Gr-B** **ET**

BDS 1161:1987

Wrought aluminium strip with drawn or rolled edges for electrical purpose

Requirements for aluminium strip with drawn or rolled edges for electrical purpose including chemical composition, mechanical properties and electrical resistance.

05 page **Gr-A** **ET**

BDS 1162:2014

Specification for Sanitary Ware Appliances

(Third Revision)

This standard covers the general requirements for materials of manufacture, methods of test, inspection and marking of all vitreous china and sanitary ware clay appliances.

07 page **Gr-B** **CE**

BDS 1163 Part-1:1987

Vitreous sanitary appliances (vitreous china) General requirements

It covers the general requirements for materials, manufacture, methods of test, inspection & working of all vitreous sanitary appliances.

13 page **Gr-C** **CE**

BDS 1163 Part-2:1987

Vitreous sanitary appliances (vitreous china)

Specific requirements for water closets.

It specifies the requirements for manufacture and construction, performance, dimensions and tolerances, finish & marking for water closets made of vitreous china.

04 page **Gr-A** **CE**

BDS 1163 Part-3:1987

Vitreous sanitary appliances (vitreous china)

Specific requirements of urinals.

It specifies the patterns, sizes construction, dimensions and tolerances and finish of bowl type urinals made of vitreous china.

03 page **Gr-A** **CE**

BDS 1163 Part-4:1987

Vitreous sanitary appliances (vitreous china)

Specific requirements of foot rests.

It covers the requirements for materials, manufacture & construction, dimensions & tolerances, tests, finish & marking of integrated pans made of vitreous china.

03 page **Gr-A** **CE**

BDS 1163 Part-5:1987

Vitreous sanitary appliances (vitreous china) specific requirements of integrated squatting pans (long pans)

04 page **Gr-A** **CE**

BDS 1164:1987

Orange juice

(Cancels and replaces by BDS 513)

09 page **Gr-B** **AF**

BDS 1165:1987

Tragacanth gum

Prescribes identification tests, requirements, loss on drying, total ash, acid insoluble ash, arsenic, heavy metals, bacterial count, E. coli, packing & marking.

03 page **Gr-A** **AF**

BDS 1166:2015

Dehydrated onion (First Revision)

Gives terminology, prescribes physical requirements, chemical requirements of moisture, total ash, acid insoluble ash, packing & marking.

06 page **Gr-B** **AF**

BDS 1167:2016

Dehydrated Garlic (First Revision)

This standard prescribes the requirements and the methods of sampling and test for dehydrated garlic

07 page **Gr-B** **AF**

BDS 1168:2002

Wheat flour for use by biscuit industry

(First Revision)

(Cancels and replaces by BDS 597:1966)

04 page **Gr-A** **AF**

BDS 1169:1987

Sliver cans used in textile mills

(Canceles and replaces by BDS ISO 93-1:2006 & BDS ISO 93-2:2006)

JT

BDS 1170:1991

Defination of size of weaving preparatory machines and looms

(Canceles and replaces by BDS ISO 142:2006)

JT

BDS 1171:2015

Determination of Scouring

Loss (Degumming) in Silk textile materials

(First Revision)

This standard prescribes a method for determining the scouring loss in silk textile materials.

03 page **Gr-A** **JT**

BDS 1172:1991

Shuttles for jute broad looms (First Revision)

This standard prescribes requirements of shuttles for use in over pick broad loom of RS 53 cm (or 135 in) to 86.6 cm(or 220 in) used for weaving Jute cloth. Shuttles conforming to this standard are suitable for use with full cops of the following sizes.

06 page **Gr-B** **JT**

BDS 1173:1987

Glossary of terms relating to jute products

This standard prescribes definitions of terms commonly used in the jute industry and trade.

20 page **Gr-D** **JT**

BDS 1174:2000

Specification and method of test for brightness of jute goods (First Revision; Reaffirmed, 2012)

This Bangladesh standard prescribes the details of brightness and other particulars of jute goods.

03 page **Gr-A** **JT**

BDS 1175:2011

Polyester blend suiting (Second Revision)

This Standard prescribes the requirements for polyester blend suiting with a minimum mass of 175g/m² manufactured from a combination of polyester spun or filament yarns in warp and weft directions having a minimum polyester content of 48 percent of the total

07 page **Gr-B** **JT**

BDS 1176:1987

Colour fastness requirements of synthetic fabrics and their blends with cotton and wool

(Cancels and replaces by BDS 1758:2006.)

06 page **Gr-B** **JT**

BDS 1177 (Part-1):2013

Plain knitted cotton fabric (First Revision)

Requirements of plain knitted cotton fabric grey, scoured or bleached knitted in circular machine.

07 page **Gr-B** **JT**

BDS 1177 (Part-2):2013**Plain knitted cotton Vests** (First Revision)

Requirements of grey, scoured or bleached plain knitted cotton vest of round or V-neck and with or without sleeves.

08 page **Gr-B** **JT**

BDS 1178:1987**Warpers beam**

(Cancels and replaces by BDS ISO 8116-2:2008 and BDS ISO 8116-4:2008)

03 page **Gr-A** **JT**

BDS 1179:2001**Malathion 57 percent (w/v) emulsifiable concentrates** (First Revision)

Prescribes requirements, cold test, flash point, water content, emulsion stability, high temperature storage stability, malathion content, acidity, alkalinity, specific gravity, packing & marking, sampling and method of tests.

13 page **Gr-C** **AF**

BDS 1180:2016**Chhana** (First Revision)

This standard prescribes the requirements and the methods of sampling and test for CHHANA.

10 page **Gr-B** **AF**

BDS 1181:2015**Jute Batching Oil** (First Revision)

This standard prescribes the requirements and the methods of sampling and test for jute batching oil.

16 page **Gr-D** **CH**

BDS 1182:2003**Liquefied petroleum gas** (First Revision)

Prescribes the requirements and methods of sampling and test for all types of liquefied petroleum gases commercially marked for household commercial and industrial applications but not for the automotive use.

03 page **Gr-A** **CH**

BDS 1183:1987**Base paper for waxed paper**

Prescribes two grades of base paper for waxed paper. Essential characteristics for which requirements have been specified include finish, substance, burst factor, tear factor, pH, wax absorptiveness, etc. Test method for determining the wax absorptiveness has also been included.

04 page **Gr-A** **CH**

BDS 1184:1987**Waxed paper for general packaging**

Prescribes four types of waxed paper used for general packaging. Characteristics for which requirements have been specified include substance, wax coating content, burst factor, water vapour permeability and blocking resistance.

03 page **Gr-A** **CH**

BDS 1185:1987**Waxed paper for confectionery**

Prescribes requirements for waxed paper intended for packaging confectionery and allied materials. As compared to waxed paper for general packaging, the standard covers more stringent requirements and an additional requirement of tear strength.

03 page **Gr-A** **CH**

BDS 1186:1987**Method for determination of bursting strength of paper**

(Cancels and replaces by BDS ISO 2758:2011)

09 page **Gr-B** **CH**

BDS 1187:1988**Methods of determination of resistivity of metallic electrical conductor materials**

Describes a reference method and a routine method for determining the electrical resistance and resistivity of specimens of metallic electrical conductor materials.

11 page **Gr-C** **ET**

BDS 1188:1988**Tensile testing of non-ferrous metals**

It specifies the dimensions of standard test pieces of non-ferrous metal and standard methods of tensile testing.

12 page **Gr-C** **ME**

BDS 1189:1988**Pectin**

Prescribes terminology, identification tests, galacturonic acid, acetyl group, loss on drying, acid insoluble ash, sulphur dioxide, lead, copper, bacterial count, E. coli, packing & marking, methods of test.

05 page **Gr-A** **AF**

BDS 1190:1988**Wooden furniture for office**

(Cancels and replaces by BDS 451:1964 and BDS 562:1965)

17 page **Gr-D** **AF**

BDS 1191:1988**Wooden furniture for school**

Specifies dimensions, requirements, description of table, chair, bench, almirah, black board, notice board, furniture for students boarding and furniture for students dining.

13 page **Gr-C** **AF**

BDS 1192 (Part-1):2014**Interlock knitted cotton fabric** (First Revision)

Requirement of interlock knitted cotton fabric grey, scoured, bleached or dyed, knitted on circular machine.

06 page **Gr-B** **JT**

BDS 1192 (Part-2):2014**Interlock knitted cotton vest** (First Revision)

Requirements of grey, scoured, bleached or dyed interlock knitted cotton vests of round or V-neck.

08 page **Gr-B** **JT**

BDS 1193:1988**Woven polyester/cellulosic blended apparel fabric**

Specifies requirement for woven polyester/cellulosic blend apparel fabric.

03 page **Gr-A** **JT**

BDS 1194:1988**Terminal markings and direction of rotation for rotating electrical machinery**

Determines terminal markings, direction of rotation and relation between terminal markings and direction of rotation for ac machines without commutator and dc machines with commutator.

11 page **Gr-C** **ET**

BDS 1195:1988**Designation of method of cooling of rotating electrical machinery**

Gives a simplified code for a few currently used types of machinery. Defines and classifies methods of circulation of coolants. Gives symbols and short definitions for any method in current use.

09 page **Gr-B** **ET**

BDS 1196:1988**Dimensions of three-phase foot mounted induction motors**

Specifies the fixing dimensions for foot mounted three-phase, 50 cycle, ac squirrel cage motor for general purpose application and having screen protected or drip-proof or both of totally enclosed construction.

08 page **Gr-B** **ET**

BDS 1197:1988**Gas mantles (Reaffirmed 2007)**

It covers the requirements for 100, 200, 300, 350, 400 candle gas mantles for oil pressure lanterns and it does not include hard mantles for low pressure gas lanterns.

03 page **Gr-A** **ME**

BDS 1198:1988**Wooden head form for testing of helmets**

It covers regarding sizes & dimensions, construction, etc.

03 page **Gr-A** **ME**

BDS 1199:2005**Rubber flat transmission belting of textile construction for general use (First Revision)**

Requirements for materials and construction of rubber flat transmission belting of cotton textile, construction having no distinct rubber cover.

17 page **Gr-D** **JT**

BDS 1200 (Part-1):2005**Rubber conveyor and elevator belting of ply construction Part 1: for general use (First Revision)**

Basic requirements in materials and construction for rubber and fabric ply felting designed for use on flat or troughed idlers.

23 page **Gr-E** **JT**

BDS 1201:1988**Requirements for colour fastness of cotton fabrics**

(Cancels and replaces by BDS 1758:2006)

JT

BDS 1202:1988**Requirements for colour fastness of handloom cotton textiles**

(Cancels and replaces by BDS 1758:2006)

JT

BDS 1203 (Part-1):1988**Test on electric cables under fire conditions- Part-1 Method of tests on a single vertical insulated wire or cable**

Method of tests on a single vertical insulated wire or cable and the requirement for compliance.

05 page **Gr-A** **ET**

BDS 1203 (Part-3):1990**Test on electric cables under fire condition - Method for classification of flame propagation characteristics of bunched cables**

Describes a method for the classification of the flame propagation characteristics of a bunch of cables.

14 page **Gr-C** **ET**

BDS 1204:1988**Mustard and rapeseed**

Prescribes grades and types of seed, requirements, foreign matter, moisture, free fatty acid, uronic acid, allyl isothiocyanate, amount of oil, packing & marking, methods of test.

06 page **Gr-B** **AF**

BDS 1205:2013**Curry powder (Second Revision)**

Prescribes requirements, moisture, volatile oil, non volatile ether extract, acid insoluble ash, crude fibre, salt, lead, packing & marking and test of spices and condiments.

09 page **Gr-B** **AF**

BDS 1206:1988**2, 4-d Sodium salt, technical**

Prescribes requirements, active ingredients, acid content, equivalent weight of the acid, melting point, loss on drying, packing & marking, sampling and method of tests.

06 page **Gr-B** **AF**

BDS 1207:2014**Handloom Absorbent lint cloth (First Revision)**

This standard prescribes the constructional details and other particulars of cotton lint absorbent, bleached, woven on handlooms used as an external absorbent and protective dressing and for the application of ointments and lotion.

06 page **Gr-B** **JT**

BDS 1208:1989**Shuttle for hessian and sacking looms (Reaffirmed 2005)**

Shape and dimensions, materials, shuttle accessories and mass of the shuttle for use on jute hessian and sacking looms.

03 page **Gr-A** **JT**

BDS 1209:2014

High speed jute bobbins (First Revision)

This standard prescribes dimensions and tolerances in respect of three sizes of high speed jute bobbins for use on jute spinning frames. Bobbins conforming to this standard are suitable for use on jute spinning frames having a pitch of 139.7mm, 120.65mm and 108 mm.

06 page **Gr-B** **JT**

BDS 1210:1989

Pitch-bound wire reeds for jute loom

Dimensions and other requirements of pitch-bound wire reeds, used in jute loom.

03 page **Gr-A** **JT**

BDS 1211:1989

Loom pickers

Tolerances on dimension and mass and requirements for workmanship, etc of loom pickers.

03 page **Gr-A** **JT**

BDS 1212:1989

Recommendations on shape and dimensions of jute loom pickers

Recommended shape and dimensions of pickers for both narrow and broad jute loom.

05 page **Gr-A** **JT**

BDS 1213 (Part 1):2016

Spool Centres (Cylindrical and Conical) for Jute Spool Winding Machines (First Revision)

This standard prescribes the requirements of 13 types of cylindrical and 11 types of conical spool centres for use in different types of jute spool winding machines.

05 page **Gr-A** **JT**

BDS 1213 (Part 2):2016

Spool centres (cylindrical and conical) for Jute precision winding machines

This standard prescribes the requirements of cylindrical and conical spool centres for use in different types of jute precision winding machines.

07 Page **Gr-B** **JT**

BDS 1214:2016

Card and Gill Pins for Use in Jute Industry-Specification (First Revision)

This standard specifies the requirements for the characteristics of card and gill pins for use in the Jute Industry.

06 Page **Gr-B** **JT**

BDS 1215:1989

Kaolin for paints

Deals with composition and prescribes methods of sampling and test and requirements for form and condition, lead-free material, volatile matter, residue on

sieve, oil absorption, colour, matter soluble in water, acidity and alkalinity.

05 page **Gr-A** **CH**

BDS 1216:2012

Specification for tooth-paste

(Second Revision)

This standard prescribes the requirements and the methods of sampling and test for toothpaste.

27 page **Gr-F** **CH**

BDS 1217:1989

Fixed capacitors for fans

Covers the basic mechanical and electrical requirements and method of tests for capacitors. It also gives the dimensions and capacitance up to 4 mF.

11 page **Gr-C** **ET**

BDS 1218 :1989

Accessories for use in shuttles for jute looms

Prescribes requirements of accessories, such as offset typs, cover, coverlock, drag spring, pin and bristles.

03 page **Gr-A** **JT**

BDS 1219:1989

Picking sticks (arms) for overpick jute looms

It prescribes materials, shape and dimensions of the picking sticks (arms) for overpick jute looms.

02 page **Gr-A** **JT**

BDS 1220:2009

Handloom cotton gauze, absorbent, non-sterilized

(First Revision)

Detail construction and other particulars of bleached and unmedicated non-sterilized cotton gauze made on handloom used for packing absorbent purpose during surgical operation.

05 page **Gr-A** **JT**

BDS 1221:2011

Industrial sewing threads made wholly or partly from synthetic fibres (Third Revision)

This Bangladesh Standard specifies requirements and method of test for industrial sewing threads made wholly or partly from synthetic fibres.

19 page **Gr-D** **JT**

BDS 1222:2012

Method for Conditioning of Textiles (First Revision)

This standard prescribes a procedure for conditioning of all textile materials.

07 page **Gr-B** **JT**

BDS 1223:2015

Visual and Tactual Examination of Raw silk

(First Revision)

This standard prescribes the method to inspect visually and by hand the general finish and characteristic nature of a lot of raw silk.

04 Page **Gr-A** **JT**

BDS 1224:1989

2, 4-D Sodium salt (water soluble powder)

Prescribes requirements, active ingredients, extractable acid, equivalent weight of extractable acid, impurities, free phenols, materials insoluble in water, rate of soluble, packing and marking, method of tests.

02 page **Gr-A** **CH**

BDS 1225:2002

Wheat flour for use in bread industry

(First Revision)

Prescribes requirements, moisture, protein, gluten, total ash, acid insoluble ash, alcoholic acidity, water absorption, maltose, granularity, sedimentation value, uric acid, titratable acidity, packing & marking and methods of test.

05 page **Gr-A** **AF**

BDS 1226:2015

Custard powder (First Revision)

(Cancels and replaces by BDS 628:1967)

AF

BDS 1227:1989

New insulating oil

Prescribes the requirements of new insulating oil or petroleum origin suitable for use as an insulating and heat transfer medium and are quenching medium for power and distribution electrical apparatus, such as transformer, switchgear; capacitors and allied equipments. The oils are low viscosity type completely free from additives.

22 page **Gr-E** **ET**

BDS 1228:1989

Dry battery type buzzers

Applicable to dry battery type buzzers, which can emit signal sound by means of the electro-magnetically excited diaphragm. It does not apply to those buzzers which are operated both ac and dc.

05 page **Gr-A** **ET**

BDS 1229:1989

Cotton huckaback towels

(Cancels and replaces by BDS 1898:2015)

JT

BDS 1230:2015

Determination of Conditioned size

(Linear Density) of Raw silk (First Revision)

This standard prescribes a method for determining the average conditioned size (linear density) of Raw silk.

03 Page **Gr-A** **JT**

BDS 1231:2015

Determination of Conducting Winding Test of Raw Silk (First Revision)

This standard prescribes the method of test to determine the number of times the raw silk will break during a certain period of winding it on the bobbins off the skeins and the feasibility of skeins for the winding operation.

06 Page **Gr-B** **JT**

BDS 1232:1989

Bobbin carrier for jute spinning frame

Requirements of bobbin carrier for jute spinning frame.

02 page

Gr-A

JT

BDS 1233:2013

Nylon socks (Second Revision)

Description and requirements of the seamless socks, knitted in plain, rib of fancy stitches.

08 page **Gr-B** **JT**

BDS 1234:1989

Cotton socks (Reaffirmed 2006)

Detail construction and other particulars of seamless cotton socks knitted or rib stitches.

08 page **Gr-B** **JT**

BDS 1235:1989

General and Safety requirements for household and similar electrical appliances

(Cancels and replaces by BDS IEC 60335)

ET

BDS 1236:2001

Iodized salt (First Revision; Amendment 1, 2007)

Prescribes requirements, moisture, particle size, water insoluble matter, chloride content, matter soluble in water other than sodium chloride, pH, iodine content, arsenic, copper, lead, cadmium, mercury, packing and marking, methods of test.

07 page **Gr-B** **AF**

BDS 1237:1989

Grades of wheat

Prescribes terminology, grade, classification of wheat (International and Bangladesh), requirements, protein, test weight, moisture, heat damaged, damaged classes, other classes of wheat, packing & marking and methods of analysis.

06 page **Gr-A** **AF**

BDS 1238:1989

Cheddar cheese

Prescribes requirements, moisture, salt, fat content, method of manufacture, packing & marking.

03 page **Gr-A** **AF**

BDS 1239:1989

White potato starch

Prescribes microscopic appearance, particle size, requirements, moisture, total ash, pH, crude fibre, total bacterial count, E. Coli, packing and marking.

03 page **Gr-B** **AF**

BDS 1240:2001

Drinking water (First Revision)

Prescribes biological and virological examination, requirements, of colour, odour, taste, turbidity, dissolved solids, pH, total hardness, calcium, copper, iron, manganese, chloride, sulphate, fluoride, phenolic compound, zinc, aluminium, limits for toxic substances, lead, arsenic, selenium, chromium, cyanides, cadmium, nitrates, barium, list of microscopic organisms.

09 page **Gr-B** **AF**

BDS 1241:2017**Shaving cream**

(First Revision; Amendment 1,2:2006)

Prescribes the requirements and methods of sampling and test for shaving creams covering both the lather and brushless types.

06 page **Gr-B** **CH**

BDS 1242:1989**Rectified sprit**

Prescribes the requirements and methods of sampling and test.

25 page **Gr-E** **CH**

BDS 1243:1989**Carbon papers, handwriting**

Prescribes requirements regarding base paper, substance, coating, durability and manifold. Also includes description and requirements regarding carbon work and resistance of curling. Methods of sampling and tests are also given.

03 page **Gr-A** **CH**

BDS 1244:1989**Silvered glass mirror for general purposes**

Prescribes requirements and the methods of sampling and test.

06 page **Gr-B** **CH**

BDS 1245:1990**Electric axila flow fan**

It covers performance and efficiency of requirements and tests to verify axial flow fans having impellers directly coupled to the shaft of AC electric motor. Terminology, symbols and units, design and general construction, speed regulations.

14 page **Gr-C** **ME**

BDS 1246:1990**Forged/rolled CTC segments**

CTC segments are used in CTC machines. (Crush tear and curl). It is to guide the manufacturers of CTC machine and the estate managers. Materials, chemical composition, mechanical properties, tests, packing, marking etc.

03 page **Gr-A** **ME**

BDS 1247:1990**General purpose lathes (preferred sizes)**

It lays down series for seing dia over bed, over carriage, and distances between centres.

02 page **Gr-A** **ME**

BDS 1248:1989**Ceramic unglazed vitreous acid resistant tiles**

It covers the requirements for ceramic unglazed vitreous acid resistant tiles used in laying of floors & lining of tanks subjected to corrosive conditions. Manufacture, Finish, Tests etc.

05 page **Gr-A** **CE**

BDS 1249:1989**Acid resistant bricks**

It specifies the requirements for acid-resistant bricks, dimensions, tolerances, test etc.

08 page **Gr-B** **CE**

BDS 1250:1990**Burnt clay facing bricks**

It specifies the dimensions, quality & strength of burnt clay facing bricks used in building & other structure, physical requirements etc.

03 page **Gr-A** **CE**

BDS 1251:2002**PVC insulation and sheath of electrical cables**

(First Revision)

Physical requirements and test methods for the types of PVC insulation and sheath for electric cables.

09 page **Gr-B** **ET**

BDS 1252:2016**Pabna type semi-automatic handloom** (First Revision)

This Standard prescribes the requirements of the bare machine under the name and style of Semi-automatic Handloom being extensively used in Bangladesh for the purpose of conversion of yarn into fabric irrespective of the origin, class and creed of fibre and also the quality, nomenclature or resultant composition of fabric woven there at.

05 page **Gr-A** **JT**

BDS 1253:1990**Methods for calibration and grading of extensometer for testing of metals**

19 Page **Gr-D** **ME**

BDS 1254:1990**Methods of sampling of liquid dielectrics**

Describes the procedures to be followed for sampling new liquid dielectrics in their delivery containers, as well as insulating liquids in service in electrical equipments. It also applies to liquid dielectrics whose viscosity at the sampling temperature is less than 1500 centi stocks.

14 Page **Gr-C** **ET**

BDS 1255:1990**Synthetic syrup**

Prescribes terminology, additives, preservatives, total soluble solids content, organoleptic test, limits of poisonous metals as arsenic, lead, copper, zinc & tin, packing & marking.

05 page **Gr-A** **AF**

BDS 1256:1990**Classification of commercial timber**

Details the distribution of common commercial timbers of Bangladesh classified according to their various uses and gives information on some of their important properties.

11 page **Gr-C** **AF**

BDS 1257:2013**Faller bars** (First Revision)

Requirements of faller bars for use in drawing frames in jute mills.

05 page Gr-A JT

BDS 1258:2013

Faller screws for jute drawing frames (First Revision)

Requirements of faller screws for use in drawing frames in jute mills.

03 page Gr-A JT

BDS 1259:1990

Spindle for jute cop winding machine

Requirements of spindle for cop winding machine in jute mill.

03 page Gr-A JT

BDS 1260:2016

Absorbent Cotton (Second Revision)

This specification prescribes the requirements and methods of test for absorbent cotton.

17 Page Gr-D JT

BDS1261:2016

Sanitary Towels/Napkins (First Revision)

This Bangladesh Standard specifies the requirements and test methods for sanitary towels. This standard does not apply to serviettes, refreshing towels and napkins, and panty liners.

13 Page Gr-C JT

BDS 1262:1990

Clay flooring tiles

It specifies the requirements for dimensions, quality & strength for clay flooring tiles & different types of tests.

05 page Gr-A CE

BDS 1263:1990

Burnt Clay hollow bricks for walls & partitions

It covers the dimensions, quality & strength for hollow bricks made from burnt clay & having perforations through & at right angle to the bearing surface tests.

07 Page Gr-B CE

BDS 1264:1990

Glossary of terms relating to structural clay products

It covers the definition of common terms applicable to structural clay products, used in building & civil engineering works.

03 Page Gr-A CE

BDS 1265:1990

Industrial safety helmet

It specifies the requirements regarding material, construction workmanship & finish & performance requirements of helmets intended to provide protection against falling objects & other hazards.

11 Page Gr-C CE

BDS 1266:1990

Non metal Helmet for firemen & civil defence personnel

It lays down the requirements regarding materials, construction, workmanship & finish, weight & performance of helmets, for the firemen & civil defence personnel.

12 page Gr-C CE

BDS 1267:1990

Duplicating ink for single drum rotary machine

Prescribes requirements and methods of sampling and test.

09 page Gr-B CH

BDS 1268:1990

Determination of water by karl fischer method

prescribes determination of free water or water of crystallization or moisture in most solid or liquid chemical products, both organic or inorganic.

09 Page Gr-B CH

BDS 1269:2014

Shampoo surfactant based (Second Revision)

Prescribes requirements and methods of sampling and test.

17 Page Gr-D CH

BDS 1270:1990

Strong room door

This standard lays down the requirements regarding materials and details of constructions which affords a degree of protection against burglarious attack. it also covers sizes & dimensions, locking mechanism door fittings, finish, marking etc.

07 Page Gr-B ME

BDS 1271:1990

Safes

This standard covers sizes, and dimensions, construction and workmanship, security requirements, materials, chemical composition etc.

15 Page Gr-C ME

BDS 1272:1990

Safes deposit locker

This standard covers types, sizes, materials, design & manufacture, workmanship and finish, packing, marking etc.

07 Page Gr-B ME

BDS 1273:1990

Vault door

This standard covers sizes & dimensions of the component parts, construction and general requirements, locking mechanism, packing, marking etc.

11 page Gr-C ME

BDS 1274:1990

Overall internal heights for lathe tool posts

It covers dimensions, tolerances, heights for lathe tool posts with reference to the horizontal axis of the lathe for various heights of the tool shanks.

02 page **Gr-A** **ME**

BDS 1275:1990

Carbide tips for brazing on Turning Tools

This standard lays down the types and dimensions of carbide tips for turning tools included to be fixed on the shanks of tools by brazing.

02 page **Gr-B** **ME**

BDS 1276:1990

Turning tools with carbide tips-External Tools

This standard specifies types and dimensions of turning tools with carbide tips (external tools). It also gives definition of right hand and left hand tools.

ME

BDS 1277:2011

Methods of sampling cosmetics (First Revision)

This standard prescribes methods of sampling cosmetics. It does not include the sampling procedure of toilet soaps. Methods of sampling and test for soaps are covered under

(BDS 12:1991; Reaffirmed 2014).

12 page **Gr-C** **CH**

BDS 1278:1990

Method of determination of the electrical strength of insulating oils

Describes a conventional test intended to reveal the extent of physical pollution of the insulating oils by water and other suspended matter, and the advisability of carrying out drying and filtration treatment before the oils are introduced into the apparatus for which they are intended.

08 page **Gr-B** **ET**

BDS 1279:1990

Specific resistance (resistivity) of insulating oil liquids

Prescribes the method for the determination of specific resistance (resistivity) applied to new electrical insulating liquids, as well as to liquids in service, or subsequent to service cables, transformers, circuit-breakers and other electrical apparatus.

16 page **Gr-D** **ET**

BDS 1280:1990

Low pressure sodium vapour lamps

Specifies low pressure sodium vapour lamps, which are integral type consists of arc-tube, u-shaped and glass tube made of tubular glass, operating on ac mains at 50 Hz with a ballast.

10 page **Gr-B** **ET**

BDS 1281:1990

Lamp-cap temperature rise

Specifies the standard method of measurement of lamp cap temperature rise which is to be used when testing lamps for general lighting services. It describes the test lampholders to be used for lamps fitted with E 27, E 40 and B 22/25 X 26 caps.

08 page **Gr-B** **ET**

BDS 1282:1990

Bicycle free wheel

It specifies the requirements for standard sizes (22² and 24²) of bicycles only. It covers materials, dimensions, workmanship, finish, packing, marking etc.

03 page **Gr-A** **ME**

BDS 1283:1990

Bicycle front Forks

It specifies the requirements for standard sizes (22² and 24²) of bicycles only. It covers materials, dimensions, manufacture and finish, test method, packing, marking etc.

ME

BDS 1284:1990

Bicycle hub assemblies

It specifies the requirements for front and rear hub assemblies suitable for fitting in popular sizes of bicycle used in the country. It covers materials, dimensions, finish, tests etc.

05 page **Gr-A** **ME**

BDS 1285:1990

By-cycle cranks and chain wheel

It specifies the requirements for cranks and chain wheels suitable for two standard sizes (22² and 24²) of bicycle. It covers materials, dimensions, workmanship, finish, packing etc.

03 page **Gr-A** **ME**

BDS 1286:1990

Bicycle Cotterpins, washers and nuts

It covers the requirements for two standard sizes (22² and 24²) of bicycle. It also covers dimensions of plain and spring washers, workmanship and finish, packing, marking etc.

Washing test (Reaffirmed 2008)

(Cancels and replaces by BDS ISO 105-C05:2009)
JT

BDS 1290:1990

Method for determination of colour fastness of textile material to washing: test 2 (Withdrawn)

This standard, prescribes a method for determination of colour fastness of textile materials to the action of soap solution at 50-- c

03 page Gr-A JT

BDS 1291:1990

Method for determination of colour fastness of textile material to washing: test 3 (Withdrawn)

This standard, prescribes a method for determination of colour fastness of all textile materials irrespective of their composition (cotton, wool silk or man-made fibres,

etc) and their form (fibre, yarn or fabric) to the action of soap and sodium carbonate solution at 60- c.

03 page Gr-A JT

BDS 1292:1990

Method for determination of colour fastness of textile material to washing: test 4 (Withdrawn)

This standard, prescribes a method for determination of colour fastness of all textile materials action of soap and sodium carbonate solution at 90-- c. It is applicable only to those fibres which are capable of withstanding such conditions.

03 page Gr-A JT

BDS 1293:2002

Textile test for colour fastness to artificial light

(Canceles and replaces by BDS ISO 105-B02:2015)
JT

BDS 1294:2011

Methods for determination of water soluble matter in textile materials (First Revision)

This Standard prscribes a methods for water soluble matter of textile materials.

04 page Gr-A JT

BDS 1295:1990

Cotton cambs (Reaffirmed 2008)

This standard prescribes the shape and dimensions of cotton cambs for use in jute looms.

JT

BDS 1296:2008

Inset mail wire healds for jute weaving

(First Revision)

Requirements for inset mail wire healds used in jute weaving.

JT

BDS 1297:2012

Boards for lay races of jute looms (First Revision)

This Standard prescribes requirements of boards for lay races of jute looms.

03 page Gr-A JT

BDS 1298:2008

Box back blanks for jute looms

Requirements of box back blanks for jute looms.
JT

BDS 1299:2012

Blanks for lay blocks for jute looms

(First Revision)

This Standard prescribes requirements of blanks for lay blocks for jute looms

03 page Gr-A JT

BDS 1300:2012

Specification for Blanks for swells of jute looms

(First Revision)

This Standard prescribes requirements of blanks for blanks for swells of jute looms jute looms

05 page **Gr-A** **JT**

BDS 1301:1990

Glazed earthenware tiles

It covers the requirements for glazed earthenware tile & associated fittings, generally used for finishing the surfaces of walls & floors of water closets, bathrooms, kitchen, hospitals & similar places.

09 page **Gr-B** **CE**

BDS 1302:1990

Glossary of terms relating to ceramic ware

It covers the terms & definition relating to ceramic ware.

04 page **Gr-A** **CE**

BDS 1303:1990

Chemical resistant mortars

It covers the requirements for silicate type, sulphur type & resin type chemical resistant mortars for bonding chemical resistant masonry units.

04 page **Gr-A** **CE**

BDS 1304:1990

Methods of test for chemical resistant mortars

It covers the methods for carrying out the following tests on silicate type, sulphur type & resin type chemical resistant mortars. Method of test.

- i) Working time, ii) Tensile strength,
ii) Flexural strength, iv) Compressive strength,
v) Bond strength etc.

20 page **Gr-D** **CE**

BDS 1305:1990

Ball clays for ceramic industry

It prescribes the requirements & the methods of test & sampling for ball clays used in ceramic industry.

13 page **Gr-C** **CE**

BDS 1306:1990

China clay for ceramic industry

It prescribes the requirements & the methods of sampling & test for china clay used in the ceramic industry.

13 page **Gr-C** **CE**

BDS 1307:1990

Electrometric insulation and sheath of electric cables

Specifies the physical requirements and test methods of the five groups of materials listed below :

- electrometric insulation for general service.
- electrometric sheath for general service.
- heat-resisting electrometric insulation.
- heat-resisting electrometric sheath.
- Silicone rubber insufflation.

Glossary of terms relating to ink and allied industries
CH

BDS 1320 (Part-1):1991

Density and relative density (specific gravity) of
crude petroleum and liquid petroleum products by
hydrometer method

This standard prescribes the method for the determination of the density, relative density (Sp.gr.) by means of a glass hydrometer, of crude petroleum & of petroleum products or mixtures of petroleum & non-petroleum products normally handled as liquids and having a rated vapour pressure 176.5 k Pa or less.

06 page **Gr-B** **CH**

BDS 1320 (Part-2):1991

Colour by Saybolt Chromometer

This standard specifies method of determination of the colour of refined oils such as undyed motor & piston gasoline, jet propulsion fuels, naphthas & kerosene & in addition, petroleum waxes and pharmaceutical white oils.

05 page **Gr-A** **CH**

BDS 1320 (Part-3):1991

Burning test (24 hours) for kerosene

This method is intended to evaluate the burning properties of kerosene that may be used as an illuminant & as a fuel for space heaters, cookers, incubators etc.

02 page **Gr-A** **CH**

BDS 1320 (Part-4):1991

Flash point by the Abel apparatus

This method determines the closed-cup-flash-point of petroleum products & other liquids having flash points between -18°C and 71°C inclusive.

04 page **Gr-A** **CH**

BDS 1320 (Part-5):1991

Smoke point of kerosene

This standard method prescribes a procedure for evaluating a kerosene in respect of its ability to burn without producing smoke.

03 page **Gr-A** **CH**

BDS 1320 (Part-6):1991

Detection of copper corrosion from petroleum
products by the copper strip tarnish test

This method covers the detection of the corrosiveness to copper of aviation gasoline, aviation turbine fuel, automotive gasoline or other hydrocarbons having a Reid vapour pressure not greater than 1.24 bar.

03 page **Gr-A** **CH**

BDS 1320 (Part-7):1991

Distillation of petroleum products

This standard specifies a procedure for the determination of the distillation characteristics of motor gasoline, aviation gasoline, aviation turbine fuels, special boiling spirit, kerosene, gas oils, distillate fuel oils and similar, petroleum products.

18 page **Gr-D** **CH**

BDS 1320 (Part-8):1991

Determination of sulphur in petroleum products
(lamp method)

This method covers the determination of total sulphur in liquid petroleum products in concentration above 0.002 percent by mass.

05 page **Gr-A** **CH**

BDS 1320 (Part-9):1991

Knock Characteristics of motor fuels by the research
method

This method covers the determination of the knock characteristics of motor gasoline, intended for use in spark ignition engines in terms of research octane number.

17 page **Gr-D** **CH**

BDS 1320 (Part-10):1991

Total lead in gasoline by iodine monochloride method

This method determines total lead in gasoline containing lead alkyls at concentration between 0.026 and 1.3 g/pl per litre.

02 page **Gr-A** **CH**

BDS 1320 (Part-11):1991

Vapour pressure of petroleum products by Reid
method

This method covers the determination of the absolute vapour pressure of volatile, non-viscous, petroleum materials, volatile crude oils and natural gas liquid having nominal vapour pressure 378°C up to 7 bar.

10 page **Gr-B** **CH**

BDS 1320 (Part-12):1991

Existent gum in fuels by jet evaporations

This method covers the determination of the existent gum in motor gasoline provision is made for determination of the unwashed gum content of motor gasoline.

04 page **Gr-A** **CH**

BDS 1320 (Part-13):1991

Oxidation stability of gasoline (induction method)

This method covers the determination of the stability of gasoline under accelerated oxidation condition.

09 page Gr-B CH

BDS 1320 (Part-14):1991

Doctor test

This method is intended primarily for the detection of mercaptans in motor fuels, kerosine and similar petroleum products. It is inapplicable in the presence of more than slight traces of peroxides.

03 page Gr-A CH

BDS 1320 (Part-15):1991

Merchantman sulphur in gasoline, kerosine, aviation turbine and distillate fuels (potentiometer method)

This method covers the determination of the merchantman sulphur in gasoline, kerosine, aviation turbine fuels and distillate fuels containing from 0.0003 to 0.01 percent by mass of mercaptan sulphur.

08 page Gr-B CH

BDS 1320 (Part-16):1991

ASTM colour of petroleum products by ASTM colour scale

This method covers the visual determination of the colour of a wide variety of petroleum products such as lubricating oils, heating oils, diesel fuels oil and petroleum waxes.

03 page Gr-A CH

BDS 1320 (Part-17):1991

Pour point of petroleum oils

(Cancels and replaces by BDS ISO 3016 :2010)

CH

BDS 1320 Part-18:1991

Kinematic viscosity of transparent and opaque liquids and calculation of dynamic viscosity

(Cancels and replaces by BDS ISO 3104 :2010)

CH

BDS 1320 (Part-19):1991 Determination

Sediment in crude oils and fuels oils by the extraction method

This method is intended for the determination of sediment in crude petroleum and fuel oils by extraction with toluene.

03 page Gr-A CH

BDS 1320 Part-20:1991

Water in petroleum products and bituminous materials by distillation

This method covers the determination of water in crude petroleum,(tars), and products derived from these materials.

03 page Gr-A CH

BDS 1320 (Part-21):1991

Conradson carbon residue of petroleum products

This method covers the determination of amount of carbon residue left after evaporation & pyrolysis of an oil, and is intended to provide some indication of relative coke forming properties.

03 page Gr-A CH

BDS 1320 (Part-22):1991

Ash from petroleum products

This method is intended for the determination of the ash in the range 0.001 to 0.180 percent by mass from distillate residual fuel oils, lubricating oils, waxes and other petroleum products, in which any ash forming materials present are normally considered to be undesirable impurities or contaminants.

03 page Gr-A CH

BDS 1320 (Part-23):1991

Neutralization number of petroleum products and lubricants (Colour indication titration method).

This method is intended for the determination of acidic or basic constituents in petroleum products and lubricants soluble in mixtures of toluene and isopropyl alcohol.

04 page Gr-A CH

BDS 1320 (Part-24):1991

Neutralization number by potentiometer titration

This method is intended for the determination of acidic constituents in petroleum products and lubricants and soluble or nearly soluble in mixtures of toluene and propan-2-OL.

05 page Gr-A CH

BDS 1320 (Part-25):1991

Methods of test for petroleum & its products: Cetane number

This method prescribes the test for determining the ignition quality of diesel fuels in terms of ASTM cetane number .

06 page Gr-B CH

BDS 1320 (Part-26):1991

Calculated cetane index of distillate fuels

This calculated index formula represents a means for directly estimating the cetane number of distillate fuels from API gravity & mid boiling point . This index value computed from the formula is termed the calculated cetane index.

07 page Gr-A CH

BDS 1320 (Part-27):1991

Heat of combustion of liquid hydrocarbon fuels by bomb calorimeter

This method provide for the determination of the gross heat of combustion of liquid fuels and formula are given for calculating the net heat of combustion.

11 page Gr-C CH

BDS 1320 (Part-28):1991

Flash point and fire point by cleveland open cup method

This method describes the procedure for determining the flash and fire points of petroleum products except fuel

oils and products having an open cup flash point below 79°C

03 page **Gr-A** **CH**

BDS 1320 (Part-29):1991

Flash point(Closed) by pensky-martens apparatus

(Cancels and replaces by BDS ISO 2719 :2010)

CH

BDS 1320 (Part-30):1991

Flash point (Open) and fire point of petroleum products by the pensky-Martens apparatus

This method is intended for the determination of the open flash point & the fire point of petroleum products.

03 page **Gr-A** **CH**

BDS 1320 (Part-31):1991

Softening point of bitumen (ring and ball)

This method prescribes a procedure for determining the softening point of bitumen.

04 page **Gr-A** **CH**

BDS 1320 (Part-32):1991

Methods of test for petroleum and its products: Solubility of bituminous binders

This method covers the determination of the degree of solubility in trichloethylene of asphalt materials having little or nominal matter.

03 page **Gr-A** **CH**

BDS 1320 (Part-33):1991

Loss on heating of bitumen and flux oil

This method determines the loss on heating of bitumen & of flux oil when heated under the conditions specified.

03 page **Gr-A** **CH**

BDS 1320 (Part-34):1991

Penetration of bituminous materials

This method covers determination of the penetration of semi-solid & solid bitumens materials. Materials having penetration below 350 can be tested by the standard apparatus & procedure described.

03 page **Gr-A** **CH**

BDS 1320 (Part-35):1991

Specific gravity of semi-solid bituminous materials

This method covers the determination of the specific gravity of semi-solid bituminous materials, asphalt cement, soft for pitches by use of a pycnometer.

03 page **Gr-A** **CH**

BDS 1320 (Part-36):1991

Ductility of bituminous materials

This method covers the test for ductility of bituminous materials at 20 ± 0.5°C

02 page **Gr-A** **CH**

BDS 1320 (Part-37):1991

Test for bitumen content

This method covers the determination of bitumen content in materials containing at least 25 percent bitumen.

03 page **Gr-A** **CH**

BDS 1320 (Part-38):1991

Test for total acidity in aviation turbine fuels

This method covers the determination of total acidity in aviation turbine fuel in the range from 0.000 to 0.100mg KOH/g.

06 page **Gr-B** **CH**

BDS 1320 (Part-39):1991

Test for hydrocarbon types in liquid petroleum products by fluorescent indicator absorption

This method covers the determination of hydrocarbon types over the concentration ranges of 5 to 95 volume percent aromatics, 0.3 to 55 volume percent olefins and 1 to 95 volume percent saturates in petroleum fractions that distill below 315°C.

07 page **Gr-B** **CH**

BDS 1320 (Part-40):1991

Freezing point of aviation fuels

This method covers the detection of separated solids in aviation reciprocating engine & turbine engine fuels at any temperature likely to be encountered during flight or on the ground.

04 page **Gr-A** **CH**

BDS 1320 (Part-41):1991

Aniline point and mixed aniline point of petroleum products and hydrocarbon solvents

(Cancels and replaces by BDS ISO 2977:2010)

CH

BDS 1320 (Part-42):1991

Water reaction of aviation fuels

This method covers the determination of the presence of water miscible components in aviation gasoline and turbine fuels and the effects of these components on the fuel water interface.

03 page **Gr-A** **CH**

BDS 1320 (Part-43):1991

Determination of water separation Characteristic of aviation turbine fuels by portable spectrometer in the field

This method provides a rapid portable means for field and laboratory use to rate the ability of aviation turbine fuels to release entrained or emulsified water when passed through fiber glass coalescing material. It is intended to measure the water separation Characteristics of fuel as produced, After it has been blended with additives or delivered to the point of use.

09 page **Gr-B** **CH**

BDS 1320 (Part-44):1991

Thermal oxidation stability of aviation turbine fuels (JFTOT) procedure

This method covers the procedure for rating the tendencies of gas turbine fuels to deposit decomposition products within the fuel system.

22 page **Gr-E** **CH**

BDS 1320 (Part-45):1991

Silver corrosion by aviation turbine fuels.

This method describes a procedure for the detection of the corrosiveness to silver of aviation turbine fuels.

04 page Gr-A CH

BDS 1320 (Part-46):1991**Test for electrical conductivity of aviation turbine fuels containing a static dissipator additive**

This methods cover the determination of the electrical conductivity of aviation fuels containing a static dissipater additive. The methods normaly give a measurment of the conductivity when the fuel is uncharged, that is, electrically at rest.

05 page Gr-A CH

BDS 1320 (Part-47):1991**Determination of phosphorous in lubricating oils and additives (quinoline phospho molybdate method)**

This method specifies a quinoline phosp homolydate method for the determination of the phosphorous content of unused lubricating oils and additives concentrates.

04 page Gr-A CH

BDS 1320 (Part-48):1999**Method of test for ptroleum and its products: Determination of acidity and alkalinity of greases**

This methods describes procedures for the determination of fueacid, fue alkali, and insoluble carbonates is calcium, sodium and lithium greases, but it is not applicable when the soaps of lead, zinc, aluminium or other weak bases are present.

03 page Gr-A CH

BDS 1321:1991**TV aerial feeder cables**

Covers the requirements for the television aerial feeder cables for connecting aerial and television receiver, unscreened, flexible and solid polyehtlene insulated and having a characteristic impedance 300 ohm.

08 page Gr-B ET

BDS 1322:1991**Conductors of insulated cables**

(Cancels and replaces by BDS IEC 60228:2009)

ET

BDS 1323:1991**Electronic type fan regulator (Amendment 1:2006)**

Deals with safety and performance requirements of electronic fan regulators for use with single phase ac fan up to 250 V.

14 page Gr-C ET

BDS 1324:1991**Loom (fly) spindles**

Requirements for loom (fly) spindles.

JT

BDS 1325:2010**Flyer spindles (Reaffirmed 2008)**

Requirements for flyer spindles for use in conjunction with speed frames.

JT

BDS 1326:1991**Flyers for jute spinning frames**

Requirements for flyers used in jute spinning frames.

03 page Gr-A JT

BDS 1327:1991**Faller bar slides for jute drawing frames**

Requirements for faller bar slides for use in jute drawing frames.

03 page Gr-A JT

BDS 1328:1991**Narsingdi type semi automatic handloom**

Definition of handloom and name of its all parts and measurements.

07 page Gr-B JT

BDS 1329:1991**Cotton knitted sports shirts (Reaffirmed 2006)**

Requirements of three types of cotton knitted sports shirts.

07 page Gr-B JT

BDS 1330:1991**Code for inland packaging of cotton hosiery yarn and goods**

Method of packaging of cotton hosiery yarn and goods for inland market.

06 page Gr-A JT

BDS 1331:2009**Handloom cotton lungi cloth**

This standard, prescribes constructional details and other particulars of handloom cotton lungi cloth.

05 page Gr-A JT

BDS 1332:1991**Methods for dermatological test for cosmetics**

(Cancels and replaces by BDS 1824:2009)

11 page Gr-C CH

BDS 1333:1991**Methods for determination of arsenic**

Prescribes methods for determination.

07 page Gr-B CH

BDS 1334:1991**Glossary of terms relating to ink and allied industries**

Covers the terms and definitions that are prevalent in ink and allied industries.

03 page Gr-A CH

BDS 1335:1990**Machine Tools. Lathe centers sizes for interchangeability**

03 page Gr-A ME

BDS 1336:1990**Terms and definition related to twist drill**

ME

BDS 1337:2015**Skin powders (First Revision)**

Prescribes the requirements and the methods of sampling and test.

12 page **Gr-C** **CH**

BDS 1338:1991

Hair dyes, liquid

Prescribes the requirements and the methods of sampling and test.

12 page **Gr-C** **CH**

BDS 1339:1991

Hair oils (Amendment 1:2006)

Prescribes the requirements and the methods of sampling and test.

04 Page **Gr-B** **CH**

BDS 1340 (Part-1):2006

Classification of cosmetic raw materials & adjuncts: Part-1 dyes, colour and pigments (First Revision)

This standards (Part-1)lists dyes, colours and pigments which are generally recognized as safe (GRAS)for use in cosmetics. The list also includes colourants which are intended for use in toiletry preparations.

06 Page **Gr-B** **CH**

BDS 1340 (Part-2):2012

Classification of cosmetic raw materials and adjuncts: Part-2 Ingredients other than dyes, colour and pigments (Second Revision)

This standards (Part-1)lists cosmetics raw materials and adjuncts, other than dyes, colours and pigments in the following four groups:

a) List of substances classified as GNRAS which must not form part of the composition of cosmetic products (Annex-A).

b) List of substance which cosmetic products must not contain except subject to the restrictions and conditions laid down (Annex-B).

c) List of preservatives allowed (Annex-C). and

d) List of U.V filters allowed in sunscreen products (Annex-D).

62 page **Gr-K** **CH**

BDS 1341:1991

Methods of sampling of petroleum and its products

This standard prescribes method for obtaining representative samples of petroleum and its products for purposes of test or examination.

11 page **Gr-C** **CH**

BDS 1343:1991

Ballast for low pressure sodium vapour lamps

Covers inductive-type ballast for use on an ac supply at 50 Hz to 60 Hz associated with sodium lamps having rated wattages, dimensions and apply also to ballast's which form an integral part of luminaire and which cannot be tested separately

29 page **Gr-F** **ET**

BDS 1344:1991

Capacitors for single phase ac motors

Requirements for capacitors intended for connection to windings to asynchronous motors supplied from a single phase system having rated frequency of 50 Hz and for capacitors to be connected to three-phase asynchronous motors of that they may be supplied from a single-phase system

22 page **Gr-E** **ET**

BDS 1345:2011

Motors for battery operated vehicles

Specifies the classification and electrical and mechanical performance of d.c. electric motors, having rated voltages up to 96V, forming part of the electrical equipment of battery operated industrial trucks, tractors and road vehicles for operation at ambient temperatures between 27 °C to 40 °C and at altitudes up to 1000 m.

12 page **Gr-C** **ET**

BDS 1346:1991

Zinc phosphide

Prescribes description, requirements of zinc phosphide, zinc contents, sieving requirements, packing and marking method of sampling and tests.

06 page **Gr-B** **CH**

BDS 1347:1991

Carbaryl 85% (w/w) soluble powder

Prescribes description, requirements of carbaryl content, sieving requirements, suspensibility, pH, presistency, packing, storage and marking, method of sampling and tests.

08 page **Gr-B** **AF**

BDS 1348:1991

Chocolate

(Cancels and replaces by BDS CAC 87:2008)

AF

BDS 1349

Stabilized power supplies, dc output

ET

BDS 1349 (Part-1):1991

Terms and definitions

Covers definitions applicable to stabilized power supplies designed to supply dc power from an ac or dc source for applications, such as in computers, communication, laboratories and industry.

13 page **Gr-C** **ET**

BDS 1349 (Part-2):1991

Rating and performance

Covers rating and performance applicable to stabilized power supplies designed to supply dc power from an ac or dc source.

13 page **Gr-C** **ET**

BDS 1349 (Part-3):1992

Radio frequency interference test

Specifies the measuring equipment and techniques to be used in assessing the radio-frequency interference

generated by stabilized supplies designed to supply dc power from an ac or dc source.

13 page **Gr-A** **ET**

BDS 1349 (Part-4):1992

Test other than radio frequency interference

Covers recommended procedures for measuring certain performance characteristics associated with stabilized power supplies designed to supply from a c or d c source.

39 page **Gr-H** **ET**

BDS 1350:1991

Method of test for power factor and dielectric constant of electrical insulating liquids

Prescribes method for determination of power factor and dielectric constant of new electrical insulating liquids as well as liquids in service or subsequent to service in cables, transformers, oil circuits breakers, and other electrical apparatus.

12 page **Gr-C** **ET**

BDS 1351:1981

Road vehicle Determination of exhaust carbon monoxide concentration at idle speed

03 page **Gr-A** **ME**

BDS 1352:2011

Cumin, whole (First Revision)

This standard prescribes the requirements and methods of sampling and test for cumin in the whole form.

03 Page **Gr-A** **AF**

BDS 1353:1992

Instant tea

Prescribes terminology, requirements of moisture, volatile oil, total ash, acid insoluble ash, packing and marking, method of sampling and test.

05 page **Gr-A** **AF**

BDS 1354:1992

Cloves whole and ground

Prescribes terminology, grades, requirements of moisture volatile oil, total ash, acid insoluble ash, packing and marking, method of sampling and test.

05 page **Gr-A** **AF**

BDS 1355:1992

Dimensions and properties for hot rolled steel column channel and angle sections

This standard covers the nominal dimensions, mass and sectional properties of hot rolled sloping flange beam and column section.

17 page **Gr-D** **CE**

BDS 1356:1992

Ferrules for water services

This standard covers the dimension, properties, manufacturer etc.

07 page **Gr-B** **CE**

BDS 1357:1992

Washers for use with fittings for water services

This standard covers requirements of washer for water services suitable for use in bib taps, slops valves, self closing taps, flush valves, pillar taps and Ferrules.

03 page **Gr-A** **CE**

BDS 1358:1992

Protective filters for welding cutting and similar operations

This standard covers requirements of the filters.

09 page **Gr-B** **CE**

BDS 1359:1992

Industrial safety belts and hardnesses

This standard covers the requirements for safety belts and hardnesses and their components.

13 page **Gr-C** **CE**

BDS 1360:1992

Equipment for eye and face protection during welding

This standard covers the requirements of goggles, hand shield helmet intended to protect an operator above the shoulder.

13 page **Gr-C** **CE**

BDS 1361:1992

Faucets

This standard specifies the technical requirements of various types of Faucets.

29 page **Gr-F** **CE**

BDS 1362:1992

Compounded feeds for cattle

Prescribes terminology, types, grades & froms, requirements of moisture, crude protein, crude fat, crude fibre, ash, common salt, calcium, phosphorous, vitamin A, packing & marking, sampling method of tests.

19 page **Gr-D** **AF**

BDS 1363:1992

Carbon electrodes for dry cells and batteries

Lays down the dimensions, tests and performance requirements of carbon electrodes for drycells and batteries.

09 page **Gr-B** **ET**

BDS 1364:1992

Glossary of terms for primary cells and batteries

(Cancels and replaces by BDS IEC 60050-481)

ET

BDS 1365:1992

Neon tester

Covers common type of neon testers for use on circuits of voltages not exceeding 500 volts ac or dc.

09 page **Gr-B** **ET**

BDS 1366:1992

Spark testing of electric cables

Specifies requirements and test methods for ac and dc spark testing of the insulation and sheath of electric cables, but does not apply to telecommunication cables.

09 page **Gr-B** **ET**

BDS 1367:1992**Single phase small ac and universal electric motors**

Covers small single-phase ac motors of the capacitor split phase, shadded pole types, ac series and universal motors for voltages up to and including 250 V and having winding with class A, class E, class B or class F insulation and output up to and including 1500 W.

36 page Gr-H ET

BDS 1368:2007**Cycle and rickshaw tyres (First Revision)**

This standard prescribes the requiremnts, methods of sampling and test for cycle & rickshaw pneumatic tyres intended for normal and heavy duty applications, while mounting in straight side rims conforming to BDS 986:1981 Bicycle rims-Specification

16 page Gr-D CH

BDS 1369:2012**Aviation gasoline kerosine type (First Revision)**

This standard prescribes the specification of the jet A-1 type of aviation turbine fuel wjocj os a re;atove;u ; ogj flash-point distillade of the kerosine type.

08 page Gr-B CH

BDS 1370:1992**Tooth powder (Amendment 1:2006)**

Prescribes the requirements and the methods of sampling and test for tooth powders.

09 page Gr-B CH

BDS 1371:1992**Cycle mudguards**

It covers the requirements for cycle front and rear mudguards used in the country

02 page Gr-A ME

BDS 1372:1992**Cycle padlocks**

It covers the dimensional and other requirements of cycle padlocks.

05 page Gr-A ME

BDS 1373:1992**Slotted countersunk flat head tapping screws**

It covers the characteristics of slotted countersunk flat tapping screws with thread sizes from st 2.2 to st 9.5 both inclusive.

03 page Gr-A ME

BDS 1374:1992**Slotted raised counter**

Classification of terms for shuttle. Useable for shuttle and its classification

03 page Gr-A ME

BDS 1375:1992**Fasteners hexagon products widths across flats**

It covers the widths across flats for heagon products to be used in the respective products standard.

03 page Gr-A ME

BDS 1376:1992**Classification of Terms for shuttles**

Classification of terms for shuttle. Useable for shuttle and its classification.

03 page Gr-A JT

BDS 1377:2012**Handloom Viscose Staple Fibre Lungies, Striped or Checked (First Revision)**

This standard prescribes constructional particulars and other requirements for two varieties of hand loom viscose staple fibre, LUNGIES, striped or checked.

07 page Gr-B JT

BDS 1378:2013**Identification of textile fibres (First Revision)**

Method of test for identification of textile fibre.

12 page Gr-C JT

BDS 1379:1992**Glossary of terms used in apparel industry**

(Reaffirmed, 2006)

It defines the terms used in apparel industry.

11 page Gr-C JT

BDS 1380:1992**Canola oil**

Prescribes terminology, requirements of moisture, free fatty acid, peroxide value, unsaponifiable matter, saponification value, Refractive index, Iodine value, Relative density, allylthiocyanate, iron, copper, lead, arsenic, hygienic requirements, packing and marking, method of sampling and tests.

03 page Gr-A AF

BDS 1381:1991**Glossary of terms of paper, board, pulp, and related terms**

(Cancels and replaces by BDS ISO 4046 Part 1-5:2012)

CH

BDS 1382 : 2015**Skin cream (Second Revision)**

Prescribes the requirements and the methods of sampling and test for skin cream.

07 page Gr-B CH

BDS 1383:1992**Bleaching powder, stable**

Prescribes the requirements and method of sampling and test for stable bleaching powder.

08 page Gr-B CH

BDS 1384:2002**Ball point pens (First Revision)**

Covers the requirements for single refill ball point pens, including desk type ball point pens.

12 page Gr-C CH

BDS 1385:1993**AC disconnectors (isolators) and earthing switches of rated voltage above 1 kV**

Specifies requirements for ac disconnectors and earthing switches, designed for indoor and outdoor installation, for voltage above 1000 V and for service frequencies up to and including 60 Hz. It also applies to the operating devices of these disconnectors and earthing switches and to their auxiliary equipment.

57 page Gr-K ET

BDS 1386:1993**Carriers and bases used in rewirable type electric fuses for voltages up to 650 V**

Covers performance requirements tests as well as dimensions of carriers and bases used in rewirable type electric fuses having rated current up to and including 100 A meant for ac systems of voltages not exceeding 650 V between lines.

21 page Gr-E ET

BDS 1387:1993**Guide on effects of current passing through the human body**

Covers the effects of current passing through the human body.

04 page Gr-A ET

BDS 1388**Basic environmental testing procedures for electronic and electrical items**

ET

BDS 1388 (Part-1):1993**General**

Covers general conditions applicable to all environmental testing procedures and lists the services of environmental testing procedures designed to assess the ability of electronic and electrical items and other items employing similar techniques to perform under expected conditions service, such as use, storage and transport.

15 page Gr-C ET

BDS 1388 (Part-2):1993**Cold test for non-heat dissipating items with gradual change of temperature**

Deals with cold test for non-heat dissipating items with gradual change of temperature.

03 page Gr-A ET

BDS 1388 (Part-3):1993**Dry heat test for non-heat dissipating items with gradual change of temperature**

Deals with dry heat test for non-heat dissipating items with gradual change of temperature.

03 page Gr-A ET

BDS 1389**High-voltage test techniques****BDS 1389 (Part-1):1993****General definitions and test requirements**

Applicable to:

- dielectric tests with direct voltage;
- dielectric tests with alternating voltage;
- dielectric tests with impulse voltage;
- tests with impulse current.

25 page Gr-E ET

BDS 1389 (Part-2):1993**Test procedures**

Applicable to:

- dielectric tests with direct voltage;
- dielectric tests with alternating voltage;
- dielectric tests with impulse voltage;
- tests with impulse current.

27 page Gr-F ET

BDS 1389 (Part-3):1993**Measuring devices**

Applicable to devices and to complete systems other than sphere-gaps, used for measurement of voltage, alternating voltage, lightning and switching impulse voltages for tests with high impulse current.

11 page Gr-C ET

BDS 1390:1993**Fuse-wire used in rewirable type electric fuses up to 650 volts**

Cover the requirements of fuse-wires used in rewirable type electric fuses up to 650 V.

06 page Gr-B ET

BDS 1391 (Part-1):1993**Lightning arresters Part-1: Non-linear resistor type for ac system**

Applies to surge protective devices designed for repeated operation to limit voltage surges ac power circuits and to interrupt power follow current.

35 page Gr-B ET

BDS 1392:1993**Guide for partial discharge measurements**

Applies to the measurement of partial discharges during tests with alternating voltage, but general terms, definitions and requirements are usually also applicable for measurement of partial discharges during tests with direct voltage.

22 page Gr-E ET

BDS 1393:1993**Bushings for alternating voltage above 1000 V**

(Cancels and replaces by BDS IEC 60137:2005)

ET

BDS 1394:1993**Application guide for the selection of high voltage fuses for transformer circuit application**

Applies to the use for transformer circuit applications.

04 page Gr-A ET

BDS 1395:1993

Cut-out switches (Reaffirmed 2005)

Specifies cut-out switches mainly used indoors for leading in and branch circuit of single phase 2-wire and three phase 3-wire system of ac voltage not more than 250 V and rated current not more than 100 A.

07 page **Gr-B** **ET**

BDS 1396**Stabilized power supplies, ac output**

ET

BDS 1396 (Part-1):1993**Rating and performance**

Applies to stabilized power supplies designed to supply ac power from an ac or dc source.

14 page **Gr-C** **ET**

BDS 1396 (Part-2):1993**Tests**

Covers the details of measuring equipments, test conditions and procedures for determination of performance characteristics of stabilized power supplies, ac output.

15 page **Gr-C** **ET**

BDS 1397:1993**Jute bagging for wrapping cotton bales**

Detail construction and other particulars of jute bagging for wrapping cotton bales.

05 page **Gr-A** **JT**

BDS 1398:1993**Heald wire**

It covers the requirements of round steel wire for heald.

04 page **Gr-A** **JT**

BDS 1399:1993**All metal reeds with plate baulks for use in cotton and silk looms**

(Cancels and replaces by BDS ISO 366-2:2009)

JT

BDS 1400:1993**Steel wire for reeds**

It covers the requirements of round steel wire for reed used in textile industry.

04 page **Gr-A** **JT**

BDS 1401:2010**Wooden shuttles for automatic cop changing jute looms**

(First Revision)

It prescribes the requirements of shuttles for used in automatic cop changing jute looms.

09 page **Gr-B** **JT**

BDS 1402:2007**Unteased white cotton-waste** (First Revision)

It prescribes a method for unteased white cotton waste used in axle box packing.

04 page **Gr-A** **JT**

BDS 1403:1993**Method for determination of colour fastness of textile materials to dry cleaning**

(Canceles and replaces by BDS ISO 105-D01:2011)

JT

BDS 1404:1993**Method for textiles estimation of moisture total size or finish ash and fatty matter in grey and finished cotton textile materials** (Reaffirmed 2008)

This standard, prescribes a method for estimation of (a) moisture, (b) total size or finish, (c) ash and (d) fatty matter in grey and finished cotton textile materials.

JT

BDS 1405:1993**Bolts, Screws, Nuts and Accessories Terminology and Nomenclature**

This Bangladesh Standard lays down the terminology and nomenclature of bolts, Screws, nuts and accessories, recommended for use unless otherwise specified in the appropriate product standard.

29 page **Gr-F** **ME**

BDS 1406:1993**Hexagon nuts style 2 products grades A and B.**

04 page **Gr-A** **ME**

BDS 1407:1993**Hexagon nuts style 2 product grades A and B.**

03 page **Gr-A** **ME**

BDS 1408:1993**General purpose screw threads general plan**

04 page **Gr-A** **ME**

BDS 1409:1993**General purpose screw threads selected sizes for screws, bolts and nuts**

This Bangladesh Standard specifies general purpose screw threads for screws, bolts and nuts in the diameter range 1 to 39 mm.

03 page **Gr-A** **ME**

BDS 1410:1993**Thread run-outs for fasteners thread of BDS 1408:1995 and BDS 1409:1993**

04 page **Gr-A** **ME**

BDS 1411:1993**Tapping screws thread**

07 page **Gr-B** **ME**

BDS 1412:1993**Thread undercuts of external metric thread fastners**

03 page **Gr-A** **ME**

BDS 1413:1993**Head configuration and gauging of countersunk head screws**

05 page **Gr-A** **ME**

BDS 1414:2000**Natural Mineral Water** (First Revision)

Prescribes terminology, requirements of free carbondioxide, total dissolved solids, copper, manganese, organic matter, arsenic, nitrate, sulphide,

phenolic compounds, cyanide, labelling, packing and marking, method of sampling and tests.

42 page **Gr-I** **AF**

BDS 1415:1993

Dal

Prescribes definitions, hygienic requirements, moisture, dirt, foreign food serious, damaged, unripe, unhusked, packing & marking, sampling & method of tests.

04 page **Gr-A** **AF**

BDS 1416:1993

Frozen Cuttle Fish and Squid

Prescribes terminology, grades, requirements of colour of fillet or tube, colour of flesh, surface discolouration, texture, odour, flavour, total bacterial count, E. coli, salmonella, hygienic requirement, packing and marking, method of sampling and tests.

04 page **Gr-A** **AF**

BDS 1417:1993

Carbofuran technical

Prescribes discription, requirements of moisture, curbofuran content, alkalinity, packing and marking, method of sampling and tests.

06 page **Gr-B** **AF**

BDS 1418:1993

Cinnamon, whole

Prescribes terminology, grades, requirements of moisture, volatile oil, extraneous matter, packing and marking, method of sampling.

04 page **Gr-A** **AF**

BDS 1419:1993

Melamine/phenolic moulding materials

(Cancels and replaces by BDS ISO 800:2010)
CH

BDS 1420:1993

Hair creams

Prescribes the requirements for hair creams and other oil-based emulsion preparations for the hair. These include water-in-oil and oil-in-water emulsions.

17 page **Gr-D** **CH**

BDS 1421:1992

Nail polish

Prescribes the requirements and the method of sampling and test for nail polish used for cosmetic purposes.

11 page **Gr-C** **CH**

BDS 1422:2006

Ball point refills (First Revision)

Covers the requirements for ball point pen refills made entirely from metal or metal and plastics material.

09 page **Gr-B** **CH**

BDS 1423:1993

Enamel synthetic exterior, a) Undercoating b) Finishing (Amendment 1:2007)

Prescribes requirements and methods of sampling and test for the material commercially known as enamel, synthetic exterior, a) Undercoating b) Finishing. The

material is used in painting systems for protective and decoration.

09 page **Gr-B** **CH**

BDS 1424:1993

Lipstick (Amendment 1,2:2006)

Prescribes the requirements and methods of sampling and test for lipstick.

05 page **Gr-A** **CH**

BDS 1425:2009

Table ware made of melamine plastics (First Revision)

Prescribes requirements and methods of sampling and test for tableware such as cups, saucers, plates, bowls, compartmented trays and similar articles, made of melamine plastics.

05 page **Gr-A** **CH**

BDS 1426:1993

Bitumen

(Cancels and replaces by BDS EN 12597:2009)
CE

BDS 1427:1993

Methods of sampling of bituminous materials

These methods apply to the sampling of bituminous materials at points of manufacture, storage, or delivery.

11 page **Gr-C** **CE**

BDS 1428:1993

Fasteners-bolts, screws, studs and nuts-symbols and designations of dimensions

It includes the method of dimensioning bolts Screws, Studs and nuts for use, unless otherwise specified in the appropriate products standards.

11 page **Gr-C** **ME**

BDS 1429:1993

Light gauge steel sections

Specifies the dimensions, mass, sectional properties and requirements for corrosion protection for cold formed light gauge open well steel sections for structural and other general applications, having minimum thickness of 1.25 mm.

27 page **Gr-F** **CE**

BDS 1430:1993

Hot-rolled steel sheet of high yield stress structural quality

Specifies the requirements of hot-rolled steel sheet of high yield stress structural quality in the harious grades and classes with the use of micro alloying elements and having the thickness between 1.6 to 6 mm inclusive. It includes dimensions, manufacture, chemical analysis, mechanical properties, test methods etc.

11 page **Gr-C** **CE**

BDS 1431:1993

Lined industrial rubber footwear

Specifies the requirements for lined rubber footwear for general purposes and industrial use. Dimensions, physical properties, test methods etc. are included in this standard.

11 page **Gr-C** **CE**

BDS 1432:1993

Burnt clay perforated building bricks

Specifies the requirements in regard to dimensions, perforations, quality, strength and also for quality of surface in case of special glaze for facing bricks of perforated burnt clay building bricks for use in walls and partitions.

02 page **Gr-A** **CE**

BDS 1433:1993

Dimensions quantities in general construction work

Specifies the various dimensional values in S. I units used in general construction work.

08 page **Gr-B** **CE**

BDS 1434:1994

Voltage measurement by means of sphere-gaps (One-sphere earthed)

Specifies the requirements and method for use of sphere-gaps for the measurement of the peak value of ac voltages, full standard voltage impulses and impulses with larger tail and dc voltages.

13 page **Gr-C** **ET**

BDS 1435:1994

Classification for electric and electronic equipment with regard to protection against electric shock

Describes classification with definitions for protection against electric shock in the event of failure of the insulation. It applies to electrical and electronic equipment intended for connection to an external power supply at system voltages not exceeding 440 V rms and 250 V rms between phase and earth.

03 page **Gr-A** **ET**

BDS 1436:1994

Electric welding accessories

Specifies the requirements and tests for electric welding accessories in order to optimize the safety of the operator to ensure satisfactory conditions of use.

07 page **Gr-B** **ET**

BDS 1437:1994

Degrees of protection provided by enclosures for rotating electrical machinery

Covers degrees of protection by enclosures applicable to electrical rotating machines.

11 page **Gr-C** **ET**

BDS 1438:1994

Single operator type arc welding transformers

Lays down the requirements and tests for air-cooled and oil-cooled arc welding equipment type, for manual, semi-automatic and automatic welding.

14 page **Gr-c** **ET**

BDS 1439:1994

General and safety requirements for electric lighting fittings

Specifies the design and constructional requirements, marking and tests on lighting fittings for indoor and outdoor purposes rated for a maximum voltage of 250 V.

14 page **Gr-C** **ET**

BDS 1440:1994

Designation method for mounted filaments of incandescent tungsten lamps

Specifies the designation method for mounted filaments of incandescent tungsten lamps (including tungsten halogen lamps).

04 page **Gr-A** **ET**

BDS 1441:1994

Decorative lighting outfits

Specifies the design and constructional requirements and tests applicable to decorative lighting outfits for indoor use rated for a maximum voltage of 250 V.

07 page **Gr-B** **ET**

BDS 1442 (Part-1):1994

Filler rods and wire for gas shielded arc-welding-Ferric steel

Specifies the requirements and chemical compositions for Austenitic stainless steel filler rods and wires.

16 page **Gr-D** **ME**

BDS 1442 (Part-2):1994

Filler rods and wire for gas shielded arc-welding-Austenitic stainless steel

Specifies the requirements and chemical compositions for Austenitic stainless steel filler rods and wires.

14 page **Gr-C** **ME**

BDS 1442 (Part-3):1994

Filler rods and wires for gas shielded arc welding-copper and copper alloy

Specifies the requirements and chemical composition for copper and copper alloys filler rods and wires.

11 page **Gr-C** **ME**

BDS 1442 (Part-4):1994

Filler rods and wires for gas shielded arc welding-Aluminium and Aluminium alloy and magnesium alloys

Specifies the requirements and chemical compositions for aluminium and aluminium alloys for filler rods and wires.

13 page **Gr-C** **ME**

BDS 1442 (Part-5):1994

Filler rods and wires for gas shielded arc welding-Nickel and nickel alloys

Specifies requirements and chemical composition for Nickel and Nickel alloys filler rods and wires.

09 page **Gr-B** **ME**

BDS 1443:1994

Tin Ingot

Covers the requirements for tin in the ingot form.

06 page **Gr-B** **ME**

BDS 1444:1994

Water filter, potable

Specifies requirements for a water filter used for filtration of drinking water.

08 page **Gr-B** **ME**

BDS 1445:2003

Synthetic detergent powder (First Revision)

Prescribes the requirements, methods of sampling and test for synthetic anionic detergent powder.

17Page **Gr-D** **CH**

BDS 1446 (Part-1):1994

Methods of testing plastics

It describes procedure for the determination water absorbed by a plastic test specimen.

04 page **Gr-A** **CH**

BDS 1446 (Part-2):1994

Methods of testing plastics

Specifies two methods for the determination of the temperature of deflection under load (bending stress) of plastics and ebonite.

04 page **Gr-A** **CH**

BDS 1446 (Part-3):1994

Methods of testing plastics

Specifies a colorimetric comparison method for the semi-quantitative determination of the amount of ammonia in phenol formaldehyde mouldings.

09 page **Gr-B** **CH**

BDS 1446 (Part-4):1994

Methods of testing plastics

Specifies a method of determining the bulk factor of a moulding material from its apparent density in the unmoulded form and its density in the moulding form.

03 page **Gr-A** **CH**

BDS 1446 (Part-5):1994

Methods of testing plastics

Specifies a method for the determination of flexural properties or rigid non-reinforced and fibre-reinforced plastic materials.

05 page **Gr-A** **CH**

BDS 1446 (Part-6):1994

Methods of testing plastics

Specifies a method for the determination of the charpy impact strength of rigid plastics.

08 page **Gr-B** **CH**

BDS 1446 (Part-7):1994

Methods of testing plastics

Specifies a method for the determination of the Izod impact strength of rigid plastics.

09 page **Gr-B** **CH**

BDS 1446 (Part-8):1994

Methods of testing plastics

Describes a method for determining the relative flammability characteristics of rigid plastics when brought into contact with an incandescent rod.

04 page **Gr-A** **CH**

BDS 1446 (Part-9):1994

Methods of testing plastics

Intends to serve as a basis for ensuring the preparation of equivalent test specimens from identical thermosetting compounds moulded under heat and pressure.

04 page **Gr-A** **CH**

BDS 1446 (Part-10):1994

Methods of testing plastics

Specifies a gravimetric method for the determination of the amount of matter that can be extracted by acetone.

03 page **Gr-A** **CH**

BDS 1446 (Part-11):1994

Methods of testing plastics

Specifies a method of determining shrinkage of thermosetting moulding materials.

03 page **Gr-A** **CH**

BDS 1446 (Part-12):1994

Methods of testing plastics

Describes a method for the preparation of plastics test specimens from plates or finished products by machining.

09 page **Gr-B** **CH**

BDS 1447 :2003

Classification of degrees of protection provided by enclosures of electrical equipment (First Revision)

Provides a system for specifying the enclosures of electrical equipments on the basis of degrees of protection provided by enclosures where the rated voltage of the equipment inside the enclosure does not exceed 72.5 kV.

37 page **Gr-H** **ET**

BDS 1448:1994

Degrees of protection provided by enclosures for low-voltage switchgear and controlgear

Covers the classification, marking and testing of standard means of protection applicable to low-voltage switchgear and controlgear.

12 page **Gr-C** **ET**

BDS 1449:1994

Porcelain bushings for alternating voltages upto and including 1000 V

Covers the requirements, characteristics and methods of tests for porcelain bushings for indoor and outdoor use, suitable for electrical equipment of nominal system voltage upto and including 1000 V.

12 page **Gr-C** **ET**

BDS 1450:2012

Guide for improvement of power factor in consumers installations-Low and medium supply voltages (First Revision)

Provides guidance to the consumers of electric energy to take supply at low and medium voltages for improvement of power factor of the installations in their premises.

13 page **Gr-C** **ET**

BDS 1451:2016

Rollers for Drawing and Spinning Frames in Jute Mill (First Revision)

This standard (Part 1) prescribes the requirements for rollers for jute drawing frames.

07 Page. **Gr-B** **JT**

BDS 1452:1994

Picking nose, boss and shell for looms

It prescribes requirements for picking nose, picking boss and picking shell for looms.

03 page **Gr-A** **JT**

BDS 1453:1994

Picking cone and bolt for looms

It prescribes requirements for picking cone and bolt for looms.

03 page **Gr-A** **JT**

BDS 1454:1994

Shuttles for plain cotton loom and its accessories

It prescribes shape and dimension, materials, accessories and mass of the shuttle for use in plain cotton looms.

13 page **Gr-C** **JT**

BDS 1455:1994

Textile machinery and accessories-spinning machinery-Definition of side, (left or right)

It gives the definition of side (left or right) of spinning machinery.

09 page **Gr-B** **JT**

BDS 1456:2013

Blanket (First Revision)

It describes constructional details and other particulars of three varieties of dyed blanket ; woollen, wool mixed with polyester or acrylic, and wool mixed with other fibres.

04 page **Gr-A** **JT**

BDS 1457:1994

Textiles-care labelling code using symbols

(Cancels and replaces by BDS ISO 3758:2013)

JT

BDS 1458:1994

Textile machinery and accessories-Drafting arrangements for spinning machines-Terminology

It gives the terms and definitions of the main parts of a drafting arrangement of spinning machine.

09 page **Gr-B** **JT**

BDS 1459:1994

White portland cement

Includes requirements of chemical and physical properties of white portland cement.

05 page **Gr-A** **CE**

BDS 1460:1994

Hot rolled steel sheet of structural quality

(Cancels and replaces by BDS ISO 4995:2006)

20 page **Gr-D** **CE**

BDS 1461:1994

Guide for electrical layout in residential buildings

Prescribes, for single family dwellings, the electrical installations needed to provide satisfactory facilities by the use of electricity. While this guide is primarily intended to apply to single family dwellings, the criteria are also to apply to the individual dwellings of multifamily residences so far as the latter are self contained. This guide is applicable for low voltage system upto 250 V both ac and dc.

35 page **Gr-G** **ET**

BDS 1462

Low frequency cable and wire with PVC insulation and PVC sheath

BDS 1462 (Part-1):1994

General requirements, tests and measuring methods

Specifies general requirements and mechanical, electrical and climatic test methods for low frequency cables and wires designed for use in telecommunication, inside plant and equipment and electronic devices employing similar techniques.

55 page **Gr-K** **ET**

BDS 1462 (Part-2):1994

Equipment wires, single

Covers the requirements for equipment wires, single for general and special purpose applications with solid or standard conductor PVC insulated, used in electronic and telecommunication equipment.

22 page **Gr-E** **ET**

BDS 1463:1994

Edible Groundnut oil

This standard prescribes the requirements and methods of sampling and test for groundnut oil used for edible and industrial purposes.

03 page **Gr-A** **AF**

BDS 1464:1994

Methods of determination of copper

This standard prescribes electrolytic and colorimetric methods for the determination of copper in micro and macro quantities.

13 page **Gr-C** **CH**

BDS 1465:1994

Determination of traces of heavy metals by dithizone (First Revision)

This standard prescribes calorimetric and photometric methods for the determination of traces of heavy metals (as lead) by dithizone method.

09 page **Gr-B** **CH**

BDS 1466:1994**Wooden flyer bobbins and pirns used in textile mills**

(Cancels and replaces by BDS 1839 (Part-1):2010)

JT

BDS 1467:2009**Bangla silk fabrics (First Revision)**

It specifies types, requirements, packaging, marking and sampling and criteria for conformity and testing for Bangladeshi silk fabrics.

11 page Gr-B JT

BDS 1468:1994**Canned papaya in syrup**

This standard prescribes the requirements for canned papaya (carica papaya) in syrup.

08 page Gr-B AF

BDS 1469:1994**Cardamom (whole)**

This standard prescribes the requirements for cardamom (Choti Elachi) of the family zingiberaceae.

04 page Gr-A AF

BDS 1470:2015**Lassi (yoghurt drink) (First Revision)**

This standard prescribes the requirements and methods of test for lassi prepared from yoghurt.

12 Page Gr-C AF

BDS 1471:2012**Flavoured Milk (First Revision)**

This standard prescribes the types, the requirements and the methods of sampling and test for flavoured milk.

16 page Gr-D AF

BDS 1472:2014**Zarda (chewing tobacco) flake type (First Revision)**

This standard prescribes the requirements for sampling and test for zarda (chewing tobacco), flake type.

15 page Gr-C AF

BDS 1473:1994**Low carbon steel wire rods**

Covers low carbon steel wire rods to be used for the manufacture of iron wire, armoured cable wire, galvanized wire stands, etc. With the exception that wire rods for core wire of coated electrodes shall be excluded.

09 page Gr-B ME

BDS 1474:1994**Low carbon steel wires**

Specifies the requirements of ordinary low carbon steel wires, annealed low carbon steel wires, galvanized low carbon steel wire and low carbon steel nails.

09 page Gr-B ME

BDS 1475 (Part-1):1994**Nails (steel nails)**

Specifies requirements, including dimensions and finish for different types of steel nails.

29 page Gr-F ME

BDS 1475 (Part-2):1994**Nails (copper nails)**

Specifies requirements, including dimensions and finish for different types of copper nails.

12 page Gr-C ME

BDS 1475 Part-3:1994**Nails (aluminium nails)**

Specifies requirements in respect of materials, dimension and finish for different types of aluminium nails.

29 page Gr-F ME

BDS 1476:1994**Malt extract (liquid)**

This standard prescribes the requirements and methods of sampling and test for malt extract for use in food industries.

38 page Gr-H AF

BDS 1477:1994**Edible safflower oil**

This standard applies to safflower oil which must be subjected to further processing in order it suitable for human consumption.

05 page Gr-A AF

BDS 1478:1994**Hand hammers**

Covers quality dimensions for different types of hammers with dimensions of handles.

55 page Gr-K ME

BDS 1479:1994**Paper pin**

Specifies the requirements for straight paper pin used for testing of papers.

04 page Gr-A ME

BDS 1480:1994**Paper clips**

Includes the requirements for wire paper clips used to secure sheets of paper.

04 page Gr-A ME

BDS 1481:2014**Leather sandals for men (First Revision)**

This standard prescribes the requirements, methods of sampling and test for leather sandals for men. This standard does not cover sandals made entirely from plastics or rubber.

08 page Gr-B CH

BDS 1482:1994**Zinc sulphate, heptahydrate (fertilizer)**

This standard prescribes the requirements and methods of sampling and test for zinc sulphate (Fertilizer).

29 page Gr-F CH

BDS 1483:1994

Paper adhesives liquid gum, office paste type

This standard prescribes the requirements and the methods of sampling and test for adhesives for joining paper to paper or paper to other surface like paperboard, wood, cloth, glass and metals in general office use.

15 page **Gr-C** **CH**

BDS 1484:1994**Methods of sampling for fish and fisheries products**

This standard prescribes the method of sampling for fish and fisheries products and criteria of these products for conformity with the standard.

15 page **Gr-C** **AF**

BDS 1485:2012**Printed silk saris (First Revision)**

This Bangladesh Standard prescribes the constructional details and particulars of different varieties of printed silk saris

04 page **Gr-A** **JT**

BDS 1486:1994**Dead spindles used in jute spinning frames.**

This standard specifies requirements for dead spindles used on jute spinning frames

07 page **Gr-B** **JT**

BDS 1487:1994F**Fuse yarn**

Specification for blasting fuses produced in Bangladesh.

03 page **Gr-A** **JT**

BDS 1488:1994**Size designation of cloth men's and boy's underwear nightwear and shirts.**

(Cancels and replaces by BDS ISO 4415:2007)

JT

BDS 1489:1994**Size designation of clothes men's and boy's outerwear garments**

(Cancels and replaces by BDS ISO 3636:2007)

JT

BDS 1490:2007**Saris-made of man-made fibres and their blends**

(First Revision)

It specifies the performance requirements of saris made of man-made fibres and their blends.

05 page **Gr-A** **JT**

BDS 1491:1994**Testing methods for wiring devices**

Specifies the general testing methods for switches, connectors, panel board for dwelling etc. used for connection to wiring of electric circuit at ac voltage not exceeding 600 V and frequency 50 Hz or 60 Hz.

89 page **Gr-K** **ET**

BDS 1492:1994**Helical-scan video tape cassette system using 12.65 mm magnetic tape on type VHS**

Applicable to magnetic video recording using 12.65 mm tape cassette on two-hand helical-scan video cassette recorders and defines the basic VHS format video cassette system of 50 Hz, 625 lines.

26 page **Gr-F** **ET**

BDS 1493:1994**Glossary of terms used in refractory**

Defines the different terms relating to refractory works.

05 page **Gr-A** **CE**

BDS 1494:1994**Dimension of refractory bricks**

Specifies the dimensions of various types of refractory bricks.

46 page **Gr-J** **CE**

BDS 1495:1994**High aluminium refractory bricks**

Specifies the dimension, characteristics and classification of high alumina refractory bricks.

CE

BDS 1496:2007**Unplasticized PVC pipes for potable water supply**

(Second Revision)

(Cancels and replaces by BDS ISO 4422 series)

32 page **Gr-G** **CE**

BDS 1497:1994**Edible vegetable fats (Second Revision)**

This standard prescribes the requirements and methods of sampling and test for edible vegetable fat.

05 page **Gr-A** **AF**

BDS 1498:2012**Chewing gum, ball gum and bubble gum**

(First Revision)

This standard prescribes the requirements and methods of sampling and test for chewin gum, ball gum and bubble gum.

06 page **Gr-B** **AF**

BDS 1499:1995**Mustard seed oilcake as livestock feed ingredient**

This standard prescribes the requirements and methods of sampling and test for mustard seed oilcake as livestock feed ingredient.

4page **Gr-A** **AF**

BDS 1500:1996**Glossary of basic terms for fishing nets**

This standards gives the basic terms relating to netting for fishing nets, including hanging of netting together with their definitions or, in some case, the method of expressing dimensions.

04 page **Gr-A** **JT**

BDS 1501:2011**Worsted socks (First Revision)**

This Standard prescribes the constructional details and other particulars of worsted socks, white, dyed or mixture shades.

10 page **Gr-B** **JT**

BDS1502:2012**Handloom cotton saris** (First Revision)

This Bangladesh standard prescribes the constructional particulars, and other requirements of different varieties of handloom cotton saris bleached, striped or checked etc.

07 page **Gr-B** **JT**

BDS 1503:2011**Mayonnaise** (First Revision)

This standard prescribes the requirements and the methods of sampling and test for Mayonnaise.

08 page **Gr-B** **AF**

BDS 1504:1996**Timber door window and ventilator frames**

This Standards lays down the requirements regarding material size construction and non knowship of timber door window and ventilator frames generally used in residential buildings, offices, schools, hospitals etc.

09 page **Gr-B** **AF**

BDS 1505:1995**Knitted gloves**

It specifies the requirements of white, coloured or mixed shaded knitted gloves.

12 page **Gr-C** **JT**

BDS 1506:1995**PVC pipes for electrical conduits**

(Cancels and replaces by BDS EN 60386-21:2010)

CE

BDS 1507:1995**Bip taps used in water supply**

(Cancels and replaces by BDS EN 200:2009)

CE

BDS 1508:1995**Stop taps used in water supply**

Specifies the requirements, dimensions construction, materials and test methods of stop taps used in water supply.

CE

BDS 1509:2002**Pillar taps used in water supply**

(Cancels and replaces by BDS EN 200:2009)

CE

BDS 1510:1995**Plastic potable water bottles**

This standard specifies the requirements for plastic water bottles used for carrying water purposes.

07 page **Gr-B** **CH**

BDS 1511:1995**Canvas shoes, rubber sole**

This standard prescribes the requirement and the methods of sampling and test for canvas shoes, rubber sole requirements for general use, games, sports and physical training.

07 page **Gr-B** **CH**

BDS 1512:1995**PVC insulated cables (for voltages upto 1100 V) with aluminium conductors**

Covers 250/440 V grade cables suitable for use on single phase or 3-phase systems where the voltage between each conductor and earth does not exceed 250 V and 650/1100 V grade cables are suitable for use on medium voltage 3-phase systems where the voltage between the conductor and earth does not exceed 650 V.

34 page **Gr-G** **ET**

BDS 1513:1995**Tungsten rods and tungsten wire for lamps and electron devices**

Covers the requirements of two types of drawn tungsten wires suitable for fabrication of parts for lamps and electron devices and tungsten rods for glass to metal sealing.

10 page **Gr-B** **ET**

BDS 1514:1995**Umbrella**

Covers the requirements for complete umbrellas.

08 page **Gr-B** **ME**

BDS 1515 (Part-1):1995**Grades of gold and gold alloys**

Specifies six standard grades of gold used in the manufacture of articles of gold, based on their gold content.

07 page **Gr-B** **ME**

BDS 1515 (Part-2):1995**Jewelleries of 21 carat gold**

Covers the typical composition of 21 carat gold alloys used in jewelleries.

03 page **Gr-A** **ME**

BDS 1516:1995**Spring balances**

Covers the requirements for spring balances.

07 page **Gr-B** **ME**

BDS 1517:1995**Suction hand pump**

Specifies the technical requirements for hand pumps for suction of water from a depth not exceeding seven metres.

09 page **Gr-B** **ME**

BDS 1518:2009**Handloom cotton check shirting** (Second Revision)

It prescribes constructional details and other particulars of handloom cotton check shirting.

09 page **Gr-B** **JT**

BDS 1519**Insulated varnishes containing solvents****BDS 1519 (Part-1):1995****Definition and requirements**

Covers the definitions related to and general requirements to be fulfilled by electrical insulating

varnishes containing solvents (after solvent removal and curing, become non-thermoplastic).

03 page **Gr-A** **ET**

BDS 1519 (Part-2):2000

Methods of tests

Covers the methods of tests applicable to insulating varnishes containing solvents for use in electrical equipment.

20 page **Gr-D** **ET**

BDS 1519 (Part-3):2000

Individual materials

Covers the requirements for insulating varnishes containing solvents which dry and/or cure without the application of heat and are of temperature index 105, 120, 130. Insulating varnishes specially designed for resistance to tacking as well as for resistances to mold growth are also covered in this standard.

20 page **Gr-D** **ET**

BDS 1520:2011

Bangla coded character set for information interchange (Second Revision)

Specifies Bangia version of character code which are included in the Unicode version 6.0.0 and specification of the codes and with their coded representations.

10 page **Gr-B** **ET**

BDS 1521

Crosslinked polyethylene insulated PVC sheathed cables

ET

BDS 1521 (Part-1):1995

For working voltages up to and including 1100 V

Specifies earthed or unearthed single phase or three phase systems for rated voltages upto and including 1100 V both armoured and unarmoured single, twin, three, four and multicore crosslinked polyethylene insulated and PVC sheathed cable for electric supply and control purposes.

35 page **Gr-G** **ET**

BDS 1521 (Part 2):1998

For working voltages from 3.3 kV up to and including 33 kV

Covers the requirements of armoured screened or unscreened single core and three-core crosslinked polyethylene insulated and PVC sheathed cables for electricity supply purposes.

22 page **Gr-E** **ET**

BDS 1522:1995

Bleaching and dyeing of cotton knitted fabrics

Water hardness, and details description of bleaching and dyeing process of different steps of grey cotton knitted fabric.

12 page **Gr-B** **JT**

BDS 1523:1995

Calcium carbonate, precipitated for cosmetic industry

This standard prescribes requirements and the methods of sampling and test for precipitated calcium carbonate for cosmetic industry

20 page **Gr-D** **CH**

BDS 1524:2006

After shave lotion (First Revision)

This standard prescribes the requirements and methods of sampling and test for after shave lotion.

03 page **Gr-A** **CH**

BDS 1525:1995

Methods of sampling of rubber and rubber combination footwear

This standard prescribes the methods of sampling and criteria for conformity for rubber footwear whose, upper may be wholly or partly made of rubber or canvas and sole made of rubber.

05 page **Gr-A** **CH**

BDS 1526:1995

Mineral oil for cosmetic industry

This standard prescribes requirements and methods of sampling and test for mineral oil for cosmetic industry.

21 page **Gr-E** **CH**

BDS 1527:1995

Cigarettes

This standard prescribes the requirements and the methods of sampling and test for Cigarettes made for tobacco gram and processed in Bangladesh.

07 page **Gr-B** **AF**

BDS 1528:1995

Beam Scale, covers the reavire must for commercial uses of four types of Beam Scale

09 page **Gr-B** **ME**

BDS 1529:2002

Specification for Air compression kraisack spraper

(First Revision)

Covers the requirements regarding constructions, materials dimension, method of test etc.

08 page **Gr-B** **ME**

BDS 1530:1995

The authorizations of Irradiation by groups or classes of food

This standard covers all food irradiation facilities and irradiated foods whether produced for domestic consumption, imported or exported.

05 page **Gr-A** **AF**

BDS 1531:1995

Black Tea, Vocabulary

This standard provides a list of terms and definitions, applicable to the techniques of processing and assessing black tea for commerce.

09 page **Gr-B** **AF**

BDS 1532:1995**Margarine**

This standard prescribes the requirements and methods of sampling and test for margarine.

07 page **Gr-B** **AF**

BDS 1533:1995**Bidis**

This standard prescribes the requirements and the methods of sampling and test for biddies. This standard does not covers the requirements for flavor and aroma of biddies.

09 page **Tk. 150.00** **AF**

BDS 1534:2014**Letter press ink, black for general purpose**

(First Revision)

This standard prescribes the requirements and the methods of sampling and test for Letter press Ink, Black General purpose, for use in flat-bed Letter press printing Machines.

04 page **Gr-A** **CH**

BDS 1535:1995**Bitumen-based coatings for cold application, suitable for use in contact with potable water**

This standard specifies the requirements and method of sampling and test for bitumen-based solvent borne coatings. It covers coating for cold application by either brushing, Spraying rolling, or dipping processes intended to give a coat for the corrosion protection and water proofing of substance including iron and steel.

58 page **Gr-K** **CH**

BDS 1536: 2016**Glycerine Toilet Soap (First Revision)**

This standard prescribes the requirements and the methods of sampling and test for glycerine toilet soap.

05 page **Gr-A** **CH**

BDS 1537:2013**Textiles – Gent’s Pullover, Knitted**

(First Revision)

This standard prescribes the constructional particulars and other requirements of gent’s knitted sweater. Manufactured by machine knitting, using hosiery yarn, which are bleached, dyed or in mixture shades.

10 page **Gr-B** **JT**

BDS 1538:1995**Handloom cotton bed spread**

This standard prescribes constructional particulars and other requirements of different varieties of handloom cotton bed spread.

11 page **Gr-C** **JT**

BDS 1539:2016**Women’s knitted cardigan (First Revision)**

This standard prescribes the constructional particulars and other requirements of women’s knitted cardigan manufactured by machine knitting, using knitted yarn, which are bleached, dyed or in mixture shades.

10 page **Gr-B** **JT**

BDS 1540:2011**Code for packaging of ready-made garments for export (First Revision)**

This code prescribes the method of packing of ready-made garments intended for export by sea or air to ensure their safe transit. The requirements of the packing materials have also been specified.

05 page **Gr-A** **JT**

BDS 1541:1995**Handloom silk bush shirt cloths loom state**

This standard prescribes constructional details and other particulars of handloom silk bush shirt cloth, loom state.

05 Page **Gr-A** **JT**

BDS 1542:2013**Jute twine (First Revision)**

This standard prescribes requirements of Twines, made from Jute.

04 page **Gr-A** **JT**

BDS 1543:2006**Porcelain insulation for over head power lines with a nominal voltage up to and including 1000 volts (First Revision)**

Specifies requirements and methods of sampling and tests for porcelain insulators for overhead power lines with a nominal voltage up to and including 1000 V. Both pin and shackle type insulators are covered.

29 page **Gr-F** **ET**

BDS 1544:1995**Direct action hand pump**

Covers the hand pumps suitable for lifting water from a depth up to 15 meter from a tubewell. Moreover where the layer of water exist at a level below 15 metre in this areas this type pump is not applicable.

17 page **Gr-D** **ME**

BDS 1545:1995**Household battery chargers**

Specifies requirements for batter chargers, with input ratings not exceeding 2.6 kVA intended for household or similar use for charging lead acid batteries of the automotive type and their derivatives such as batteries for electric vehicles, golf buggies and semi-traction purpose.

05 page **Gr-A** **ET**

BDS 1546:1995**Wheat flour for use in cake industry**

This Standards Prescribes the requirements and the method of sampling and test for wheat flour for use in cake industry.

04 page **Gr-A** **AF**

General purpose packing/ wrapping paper
(First Revision)
(Cancels and replaces by BDS 214:1962)
CH

BDS 1548:1995
Characteristics of porcelain insulators for overhead power line (3.3 kV and upwards)
Describes the standard characteristics of porcelain insulators for overhead power lines designed for system voltages of 3.3 kV and upwards.
15 page Gr-C ET

BDS 1549
Stationery lead acid batterie (Vented types)
ET

BDS 1549 (Part-1):1995
General requirements
Applicable to lead-acid batteries which are designed for services in a fixed location and which are permanently connected to the load to the dc power supply. It described general requirements terminologies and functional characteristics.
03 page Gr-A ET

BDS 1549 (Part-2):1995
Test conditions and test methods
Applicable to vented types-test conditions and test methods.
03 page Gr-A ET

BDS 1550:1996
Diapharm type knap sack sprayer
05 page Gr-A ME

BDS 1551:2009
Y-neck plain knitted worsted jersey
(First Revision)
This standard prescribes the constructional details and other particulars of plain knitted, Y-neck, scoured, bleached, dyed or of mixed shades made from worsted yarn.
14 page Gr-C JT

BDS 1552:2007
Instant noodles (First Revision)
Prescribes the requirements and methods of test for instant noodles.
05 page Gr-A AF

BDS 1553:1997
Railway carriage fans
Specifies the requirements and methods of tests for ac and dc fixed, swiveling and bracket type fans, including the associated speed regulators, for use in railway carriages.
30 page Gr-F ET

BDS 1554:1997
Household dish washing liquid

Prescribes the requirements and methods of test for liquid detergent for house hold hand dish washing.
13 page Gr-C CH

BDS 1555:1997
Direct moulded sole (DMS) boots for general purpose
CH

BDS 1556:1997
Chips/crackers (Amendment 1:2004)
This standard prescribes the quality requirements and methods of test for chips/crackers taken as a snack and not as a replacement for meals.
19 page Gr-D AF

Spun Polyester Yarn Part 2: For Knitting
(First Revision)
This specification prescribes the requirements and methods of sampling and test for 100% Spun Polyester yarn intended for knitting.
07 page Gr-B JT

BDS 1560:2009
Handloom woven shawls (First Revision)
This standard prescriber constructional particulars and other requirements of different varieties of handloom woven shawls.
07 page Gr-B JT

BDS 1561:2013
Glossary of Textile terms- natural fibres
(First Revision)
This standard prescribes definitions of terms commonly used in the textile industry and trade relating to natural fibres.
43 page Gr-I JT

BDS 1562:1997
Solvent cements for polyvinyl chloride (PVC) plastic pipe and fitting
Specifies requirements for solvent cement for joining unplasticized PVC pressure pipes complying with the requirements of BDS 1496 : 1996
10 page Gr-B CE

BDS 1563:2011
Protein Rich Biscuits (Second Revision)
This standard prescribes the requirements and methods of test for protein rich and intermediate protein rich nutritive biscuits.
34 page Gr-G AF

BDS 1564:1997
Chanachur (Amendment 1:2004)

This standard prescribes the quality requirements and methods of test for chanachur

20 page Gr-D AF

BDS 1565:1997

Basan

This standard prescribes the requirements and methods of sampling and test for basan.

09 page Gr-B AF

BDS 1566:1997

Hooka, tobacco, manufactured

This standard prescribes the requirements and the methods of test for hooka, tobacco manufactured.

13 page Gr-C AF

BDS 1567:2007

Refined Palm olein (First Revision)

This standard prescribes the requirements and methods of sampling and test for palm olein.

03 page Gr-A AF

BDS 1568:1997

Edible soya flour

This standard prescribes the requirements and methods of sampling and test for edible soya flour.

10 page Gr-B AF

BDS 1569:2013

Handloom cotton bedsheets (First Revision)

This standard prescribes constructional particulars and other requirements for seventeen varieties of handloom cotton bedsheets.

05 page Gr-A JT

BDS 1570:1997

Jewellery fineness of precious metal alloys

Specifies a range of fineness of precious metal alloys (excluding solders) recommended for use in the field of jewellery.

03 page Gr-A ME

BDS 1571:1997

Determination of gold in gold jewellery alloys cupellation method (fire assay)

Covers a cupellation method (fire assay) for the determination of gold in gold jewellery alloys preferably the gold content of the alloys between 333 and 930 parts by mass per thousand of gold the procedure applies specifically to gold alloys incorporating silver copper and zinc.

07 page Gr-B ME

BDS 1572:1997

Methods of sampling for precious metals

Specifies the procedure for obtaining samples for the determination of standard of fineness in precious metals.

06 page Gr-B ME

BDS 1573:1997

Jewellery ring size definition measurement and designation

Specifies the method for measuring the size of ring for the purposes of designating ring sizes to be used in jewellery.

03 page Gr-A ME

BDS 1574:2012

Cakes (Second Revision)

This standard prescribes the requirements and methods of sampling and test for plain, fruit and sponge Cake.

06 page Gr-B AF

BDS 1575:1997

Cast iron manhole cover and frames

Lays down basic and performance requirements for Manhole covers and frames in cast iron, intended for use in drainage and water works.

09 page Gr-B CE

BDS 1576:1997

Method for tensile testing of steel tubes

Prescribes the method of conducting tensile testing of steel tubes.

09 page Gr-B CE

BDS 1577:1997

Carbon steel Billets for the manufacturing of reinforcing Bars and Wire rods

Specifies requirements for carbon steelbillets for manufacturing of wire drawingrods and reinforcing bars of the deffernt 5 (five) types and grades.

03 page Gr-A CE

BDS 1578

Current transformers

BDS 1578 (Part-1):1997

General requirement

Specifies the general requirements applicable to current transformers for use with electrical measuring instruments and electrical protective devices at frequencies from 15 to 100 Hz. It will also apply to auto-transformer type current transformers.

22 page Gr-B ET

BDS 1578 (Part-2):1997

Measuring current transformers

Covers the specific requirements for measuring current transformers for use with measuring and indicating instruments, integrating meters and similar apparatus. It also applies to the measuring cores of multi-core current transformers.

05 page Gr-A ET

BDS 1578 (Part-3):1998

Protective current transformers

Specifies requirements and tests for protective current transformers used with electrical protective devices (relays/trip coils).

08 page Gr-B ET

BDS 1578 (Part-4):1998

Protective current transformers for special purpose application

Special purpose application such as balanced protective systems and distance protective schemes. It also applies to protective cores of multi-core current transformers for such applications.

07 page **Gr-B** **ET**

BDS 1579:1997

Foot sprayer

Prescribes the materials of construction and the method of testing the performance of foot operated sprayers used for spraying liquid pesticides formulations.

06 page **Gr-B** **ME**

BDS 1580:1997

Refillable seamless steel gas cylinders

Specifies minimum requirements for certain aspects concerning materials design construction and workmanship, manufacturing processes and test of manufacture of refillable seamless steel gas cylinders of water capacities liquified or dissolved gases, exposed to ambient temperatures.

29 page **Gr-B** **ME**

BDS 1581:2015

Fruit Drinks (Second Revision)

This Standard prescribes the requirements and methods of sampling and test for fruit drinks intended for direct consumption without dilution.

16 Page **Gr-D** **AF**

BDS 1582 (Part-1):1997

Glass shells for general lighting service lamps Part-1, 60 to 80 mm shell diameter

This part of this standard prescribes the requirements of length and diameter. Wall thickness at neck and crown, ovality, seaminess, bubbles, cords and staire. stones, adhered glass defects in blowing, finishing and annealing tests for glass shells of 60 to 80 mm shell diameter. This standard also prescribes the methods of sampling and test for pear-shaped and mushroom shapee glass shells for general lighting service lamps of bulb diameters not less than 60mm and not more than 80mm.

05 page **Gr-A** **CH**

BDS 1582 (Part-2):1997

Glass shells for general lighting service lamps Part-2, 81 to 130 mm shell diameter

This part (part-2) prescribes the requirements of length and diameter, Wall thickness at neck & at crown, ovality, seaminess, bubbles, cords & staire, stones, stones & knots, achered glass, defects in blowing, finishing & annealing tests for glass shells of 81 to 130 mm shell diameter. This standard also prescribes the methods of sampling & test for glass shells for general lighting service lamps of nominal bulb diamenters not less than 81 mm & not more than 130 mm.

06 page **Gr-B** **CH**

BDS 1583:1997

Sealing wax

(Cancels and replaces by BDS 651)

BDS 1584 (Part-1):1997

Methods of sampling and test for oils and fats Part-1, sampling physical and chemical tests

(Cancels and replaces by BDS 56:1961)

CH

BDS 1584 (Part-2):2013

Methods of sampling and test for oils and fats Part-2 purity test

This standard prescribes methods of sampling and purity tests for the oils and fats.

15 page **Gr-C** **CH**

BDS 1585:1998

Household insecticidal aerosols

This bangladesh standard prscribe the requirements and methods of test for household insecticidal aerosols.

15 page **Gr-C** **AF**

BDS 1586:2007

Soft drink powder

This standard prescribes the requirements and methods of sampling and test for sweetened soft drink powder.

11 page **Gr-C** **AF**

BDS 1587:1998

Methods of test for printing inks (Reaffirmed 2013)

This standard prescribes the metods of sampling and test for pringing inks.

31 page **Gr-G** **CH**

BDS 1588:1998

Moulded solid rubber soles and heels

This standard prescribes the requirements and methods of sampling and test for rubber full-soles with or without heels, half-soles and and heels sold as finished products.

a) This standard does not cover resin rubber soling neolite sole sheet, and very soft moulded rubber sole or heel normally used for canvas or all rubber footwear.

b) Top lifts and ladies high heel until sole are also not covered in this standard.

03 page **Gr-A** **CH**

BDS 1589:1998

Shoe polish liquid

This standard prescribes the requirements and methods of sampling and test for liquid shoe polish suitable for general application to leather footwear.

05 page **Gr-A** **CH**

BDS 1590:1998

Wet process porcelain insulators — Spool type/shackle type

Covers spool type/shackle type insulators made of wet process porcelain and used in the transmission and distribution of electrical energy.

10 page **Gr-B** **ET**

BDS 1591:1998

Code of safety for sulphuric acid

This standard prescribes a code of safety concerning hazard relating to sulphuric acid if describes and essential information for the safe handling and use of sulphuric acid.

07 page Gr-B CH

BDS 1592:1998

Code of safety for hydrochloric acid

This standard describes properties of hydrochloric acid, the nature of hazards associated with it and essential information storage, handling packing labelling, waste disposal, clearing and repair of tanks, selection and training of personnel, personal protective equipment and firstaid.

19 page Gr-D CH

BDS 1593:1998

Plastic sanitary squatting pan

Panlays down the requirement for material, dimension physical requirements and testing for power flush type injuction moulded high densit polyethiene (HDPE) or polypropylene (PP) squatting pan.

05 page Gr-A CE

BDS 1594:1998

Lithium base grease for industrial purposes

This standard prescribes the requirements and methods of sampling and test for lithium base greases suitable for industrial applications and for lubrication of plain as well as antifiration bearings.

07 page Gr-B CH

BDS 1595:1998

Ground rock, phosphate

This Bangladesh standard specifies the requirements for ground rock phosphate fertilizer grade.

04 page Gr-A CH

BDS 1596:1998

Zinc sulphate monohydrate, granular grade

This standard prescribes the requirements of zinc sulphates, monohydrate, granular grade.

03 page Gr-A CH

BDS 1597:1998

Petroleum jelly for cosmetic industry

This standard prescribes the requirements and methods of sampling of test for petroleum jelly for cosmetic industry.

13 page Gr-C CH

BDS 1598:1998

Correcting fluid

This standard prescribes the requirements and the methods of sampling and test for correcting fluid used for carrying out correcting on waxless stencil papers.

03 page Gr-B CH

BDS 1599:1998

Woven uniform fabric (Polyester cotton and polyester wool blend)

This standard prescribes the requirements and other particulars of 2 pypes of woven uniform fabric namely.

1) Polyester and cotton fabric.

2) Polyester and wool fabric.

08 page Gr-B JT

BDS 1600:2011

Sesame oilcake Aslivestock Feed

This standard prescribes the requirements and ethods of test for sesame oilcake used as livestock feed.

06 Page Gr-B AF

BDS 1601:1998

Mango chutney

This standard prescribes the requirements and methods of test for mango chutney.

09 page Gr-B AF

BDS 1602:1998

Water melon seed oil

This standard prescribes the requirements the methods of sampling and test for water melon seed oil.

04 page Gr-A AF

BDS 1603:1998

Modified starch for food industry

This standard prescribes the requirements and methods of test of modified starch for food industry.

07 page Gr-B AF

BDS 1604:1998

Rice flour

This standard prescribes the requirements, methods of sampling and test for rice flour.

11 page Gr-C AF

BDS 1605:2009

Textile great coat cloth - Specification (First Revision)

This standard prescribes the constructional particulars and other requirements of two varieties of great coat cloth.

06 page Gr-B JT

BDS 1606:1999

Tungsten filament electric lamps for railway rolling stock

Specifies the requirements and test for tungsten filament electric lamps for railway rolling stock.

06 page Gr-B ET

BDS 1607:1999

PVC covered conductors for overhead power lines

Specifies requirements for two type of (thickness 0.8 mm and 1.6 mm) PVC covered conductors for overhead power lines. These requirements are limited to the PVC covering and to the testing there of after application to a given overhead type of conductors.

05 page Gr-A ET

BDS 1608:2009**Cotton duck** (First Revision)

This standard prescribes the constructional details and other particulars of five varieties of cotton duck. The cotton duck may be grey, scoured or dyed.

05 page Gr-A JT

BDS 1609:1999**Plain jute bag**

This Bangladesh standard specifies types, size, and tolerance, manufacturing, requirements, packing, marking and labelling, sampling and criteria for conformity and testing jute bag.

11 page Gr-C JT

BDS 1610:1999**Gents cotton rib-knitted briefs part-1, 1X1, 2 ply rib-knitted**

This standard (part-1) prescribes the constructional details and other particulars of scoured, bleached or dyed cotton rib-knitted briefs. Rib-knitted fabric shall be 1X1 with two threads to a feeder commonly known as double ribbed.

05 page Gr-A JT

BDS 1611:1999**Textiles-Gents cotton briefs specification part-2 plain knitted**

This standard (part-2) prescribes the constructions details and other particulars of bleached or dyed plain knitted gents cotton briefs.

09 page Gr-B JT

BDS 1612**Voltage transformers****BDS 1612 (Part-1):1999****Part-1 General requirements**

Covers the general requirements applicable to all voltage transformers for use with electrical measuring instruments and electrical protective devices operating at frequencies from 15 to 100 Hz. It basically applied to transformers with separate windings only to highest system voltages of 36 kV for three phase voltage transformers.

29 page Gr-F ET

BDS 1612 (Part-2):1999**Part-2 Measuring voltage transformers**

Covers additional requirements for measuring voltage transformers.

03 page Gr-A ET

BDS 1612 (Part-3):2000**Part-3 Protective voltage transformers**

Covers additional requirements for protective voltage transformers.

07 page Gr-B ET

BDS 1613:2000**Green mango powder**

This standard prescribes the requirements for green mango powder.

03 page Gr-A AF

BDS 1614:2000**Code for pasteurization of milk**

This code prescribes the techniques for pasteurization of milk.

03 page Gr-A AF

BDS 1615:2000**Cocoa powder**

This standard prescribes the requirements and methods of test for cocoa powder.

05 page Gr-A AF

BDS 1616:2000**Dry cocoa sugar mixtures for drink preparation**

This standard prescribed the requirements and method of sampling and test for dry cocoa sugar mixture for drink preparation intended for use as a beverage.

04 page Gr-A AF

BDS 1617:2000**Instant curried dal mix**

This standard prescribes the requirements and methods of sampling and test for instant curried dal mix.

03 page Gr-A AF

BDS 1618:2000**Milk added drinks**

This standard prescribes the requirements and methods of sampling and test for milk added drinks.

page Gr- AF

BDS 1619:2000**Threads for footwear**

This specification covers cotton, linen, polyamide and polyester threads and blended threads that consist of polyamide (or polyester) and cotton, suitable for use in the manufacture of footwear.

07 page Gr-B JT

BDS 1620:2000**Lachsa shemai**

This standard prescribes the requirements and methods of sampling and test for lachsa shemai.

07 page Gr-B AF

BDS 1621:2000**Soyamilk**

This standard specification types and kinds, ingredients requirements, additives, contaminants, hygiene, packing, mark and label, sampling and criteria for conformity and testing for soyamilk. This standard does not cover pasteurized and concentrated soya milk.

05 page Gr-A AF

BDS 1622:2016**Round Neck Jersey (Sweater) (First Revision)**

This Standard prescribes the constructional details and other particulars of round-neck, plain- knitted jerseys, scoured, bleached, dyed or of mixture shades, made from worsted yarn.

10 page. Gr-B JT

BDS 1623:2000

Automotive hydraulic breake fluid heavy duty

Prescribes the requirements and methods of sampling and test for non petroleum type heavy duty automotive hydraulic brake fluid for use in hydraulic breake systems fitted with drum, discor either type of breakes at wide ambient temperature.

12 page Gr-C CH

BDS 1624:2000

Offset ink, black general purpose

This standard prescribes requirements and methods of sampling and test for offset ink, black, for general purpose.

17 page Gr-D CH

BDS 1625:2000

Handloom cotton pyjama cloth —Specification

This Bangladesh standards prescribes constructional particulars and other requirements for four varieties of handloom cotton pyjama cloth grey.

32 page Gr-G JT

BDS 1626:1999

Concrete pipes (with and without) reinforcement

This standard covers the requirements and test for reinforced and unreinforced cement concrete pipes of both pressure and non- pressure varieties used for water mains, sewers, culverts and irrigation works.

09 page Gr-B CE

BDS 1627:2000

Potassium chloride (muriate of potash) fertilizer grade

Covers the requirements and the methods of sampling and the test for potassium chloride (muriate of potash), fertilizer grade.

05 page Gr-B CH

BDS 1628:2000

Diammonium phosphate

Covers the requirements and the methods of sampling and test for diammonium phosphate with urea.

05 page Gr-A CH

BDS 1629:2000

Potassium sulphate, fertilizer grade

Prescribes the requirements and the methods of sampling and test for potassium sulphate fertilizer grade.

05 page Gr-A CH

BDS 1630:2000

Activated carbons, powdered

Covers the requirements and the methods of sampling and test for activated carbons, powdered.

05 page Gr-A CH

BDS 1631 (Part-1):2000

Plastics materials for food contact use Part-1, Poly (Vinyl chloride) (PVC) compound

Covers the requirements for poly (Vinyl chloride) (PVC) compound plastics materials (in the form of granules or powder) for the manufacture of plastics items for food contact use.

27 page Gr-F CH

BDS 1631 (Part-2):2000

Plastics materials for food contact use Part-2, miscellaneous additives

Prescribes the lists of miscellaneous additives which may be used in the manufacture of plastics materials for food contact use and gives the maximum level of use and any restriction or lamitations on the use of and additives or on the end-use of a plastics material because of the incorporation of a particular additives.

56 page Gr-K CH

BDS 1631 (Part-3):2000

Plastics materials for food contact use Part-3, colourants

Specifies the purity (composition) and migration Characteristics for colourants and colourant preparation to be used in the manufacture of plastics items for food contact application.

09 page Gr-B CH

BDS 1632:2000

Lever operated knapsack sprayer

This Specification covers the design and construction workmanship and finish, materials performance marking testing and sampling requirements for lever operated knapsack sprayers, used for spraying pesticides and agro chemicals. The sprayers of this type having a working pressure not exceeding 300 KPa.

09 page Gr-B ME

BDS 1633:2000

Pictorial marking for handling and class lebel for dangerous Goods

This Standard prscribes the pictorial markings indicative of the hazards involved in handling of dangerous goods. It also sets out details of the design and section of labels appropriate to the classes, categories and subsidiary risk of dangerous goods designated in the BDG* code. A large rellica of each class label and of the class 1 subsidiary risk label is provided.

32 Page **Gr-G** **CH**

BDS 1752:2006

Domestic pressure cookers

This standard covers the requirements for domestic pressure cookers .

11 Page **Gr-C** **ME**

BDS 1753:2006

Taxi meter

This standard specifies requirements of a taximeters, its design and construction, error limits, Installation and tests, verification and calibratation of a taximeter to be used in public transportation and soon.

04 Page **Gr-A** **ME**

BDS 1754:2006

Steel yard wighing machine

Tis standard covers the requirements for steellyards.

03 Page **Gr-A** **ME**

BDS 1755:2006

Specification for platform weighing machines

This standard covers the requirements for platform weighing machines.

03 Page **Gr-A** **ME**

BDS 1756:2006

Counter weighing machines

This standard covers the requirements for counter weighing machines.

03 Page **Gr-A** **ME**

BDS 1757:2006

Specification for weigh bridges

This standard covers the requirements for weigh-bridges.

04 page **Gr-A** **ME**

BDS 1758:2006

Textiles - colour fastness ratings-specification

(Cancels and replaces by BDS 1176, BDS 1201, BDS 1202)

JT

BDS 1759:2006

Code for inland packaging of man-made fibre fabrics and man-made fibre yarns

This code prescribes the methods of packaging man-made fibre fabrics and man-made fibre yarns intended for inland transport by rail or road. Section 1 of the code deals with packaging of man-made fibre fabrics and Section 2 deals with the packaging of man-made fibre yarns.

08 Page **Gr-B** **JT**

BDS 1760:2006

Code for seaworthy packaging of man-made fibre fabrics

This code prescribes the methods of packaging man-made fibre fabrics intended for transport by sea.

05 Page **Gr-A** **JT**

BDS 1761:2006

Specification for energy efficiency rating for self-ballasted lamps (integral type compact fluorescent lamps)

Specifies requirements for energy efficiency labeling of self ballasted lamps operating on mains supply of 230 V, a.c 50 Hz nominal, and method of measurement of electrical consumption and luminous flux for determination of efficiency if the lamps for the purpose of energy efficiency labeling.

10 Page **Gr-B** **ET**

BDS 1762:2006

In-service safety inspection and testing of electrical equipment

Specifies procedure for the in-service safety inspection and testing of single and polyphase electrical equipment, other than fixed equipment, which is designed for connection by a flexible power supply cord and plug to a low voltage supply. It applies also to cord extension set, electrical portable outlet devices, cord-connected portable residual current devices and portable isolation transformers.

15 Page **Gr-C** **ET**

BDS 1763:2006

Wax candles

This standard prescribes requirements of wax candles for use for illuminating purposes (excluding ornamental candles).

10 Page **Gr-B** **CH**

BDS 1764:2006

Methods of sampling and test for glues (bone, skin fleshing and glues)

This standard prescribes the methods of sampling and testing for adhesives manufactured from materials of animal origin. It applies to adhesives in the form of liquid, jelly, cake, flakes powder or granular solids.

20 Page **Gr-D** **CH**

BDS 1765:2006

Methods for Random Sampling

This standard lays down general procedures for the selection of item from a lot on an objective basis by using random sampling techniques. It also describes the methods of calculation of simple estimates like mean and proportion of defective from the sample data.

30 Page **Gr-D** **CH**

BDS 1766:2006

Baby Oil

This standard prescribes the requirements and methods of test for baby oil.

08 Page **Gr-B** **CH**

BDS 1767:2014

Jute bags for packing food grains, 50 Kg

(First Revision)

This standard prescribes the constructional details and other requirements of the jute bags for packing 50 Kg food grains.

15 Page **Gr-C** **JT**

BDS 1768:2006

Ready mixed anticorrosive priming paint (iron oxide red-type)

This standard prescribes the requirements and methods of sampling and test for iron oxide red-anticorrosive priming paint.

06 Page **Gr-B** **CH**

BDS 1769:2014

Fortified soyabean oil (First Revision)

This standard prescribes the requirements and methods of sampling and test for fortified soybean oil for edible purposes.

14 page **Gr-C** **AF**

BDS 1770:2014

Fortified edible palm oil (First Revision)

This standard prescribes the requirements and methods of sampling and test for fortified Palm oil for edible purposes.

10 page Gr-B AF

BDS 1771:2006

Fortified mustard oil

This standard prescribes the requirements and methods of sampling and test for mustard oil for edible purposes.

04 Page Gr-A AF

BDS 1772:2006

Fortified banaspati

This Bangladesh standard prescribes the general requirements and methods of test for banaspati.

16 Page Gr-D AF

BDS 1773:2016

Fortified edible sunflower oil (First Revision)

This standard prescribes the requirements, methods of sampling and test for fortified edible sunflower oil.

05 page Gr-A AF

BDS 1774:2006

Fortified palm olein (Amendment 1:2014)

This standard prescribes the requirements and methods of sampling and test for fortified palm olein.

04 Page Gr-A AF

BDS 1775:2006

Jute fabrics used in the packing of textile products

This standard prescribes constructional details and other particulars of the four varieties of jute fabrics, of such widths as agreed to between the buyer and the seller, used exclusively for packing of textile products.

04 Page Gr-A JT

BDS 1776:2006

Polyester wool blended worsted suitings

This standard prescribes the requirements of polyester wool blended worsted suitings.

05 Page Gr-A JT

BDS 1777:2006

Plain-knitted gent's cotton short drawer's

This standard prescribes constructional details and other particulars of plain-knitted gent's cotton short drawers, scoured, bleached or dyed.

09 Page Gr-B JT

BDS 1778:2006

Valve-regulated sealed type lead-acid stationary batteries

Specifies requirements for valve-regulated lead-acid cells and batteries intended for use in stationary applications. The Standard specifies the main performance characteristics and specifies corresponding test methods.

12 Page Gr-C ET

BDS 1779:2006

Filled ice-cream (vegetable fat)

This Standard prescribes the requirements and method of sampling and test for filled ice-cream.

05 Page Gr-A AF

BDS 1780:2014

Sweetened/unsweetened condensed filled milk (vegetable fat) (First Revision)

This Standard prescribes the requirements and method of testing for filled Sweetened/Unsweetened condensed filled milk (Vegetable Fat).

14 page Gr-C AF

BDS 1781:2008

Vegetable ghee (First Revision)

This Bangladesh Standard prescribes the general requirements and method of test for vegetable ghee.

11 Page Gr-B AF

BDS 1782:2007

Edible red palm oil

This Standard prescribes the requirements and method of sampling and test for edible red palm oil.

04 Page Gr-A AF

BDS 1783:2006

Akher gur

This Standard describes the requirements of Akher gur manufactured in the cottage industries in Bangladesh and the method of test for Akher gur..

03 Page Gr-A AF

BDS 1784:2006

Khejur gur

This Standard describes the requirements of Khejur gur manufactured in the cottage industries in Bangladesh and the method of test for Khejur gur.

03 Page Gr-A AF

BDS 1785:2007

Pasteurized camel milk

This Standard prescribes the requirements and the method of sampling and test for pasteurized Camel Milk.

04 Page Gr-A AF

BDS 1786:2007

Coconut oil for cosmetic industry

This Standard prescribes the requirements and the method of sampling and test for coconut oil used for cosmetic industry

05 Page Gr-A CH

BDS 1787:2007

Mineral turpentine

This Standard specifies requirements for mineral turpentine which is used extensively in the surface coating industry as solvents.

03 Page Gr-A CH

BDS 1788:2007

Gypsum (fertilizer grade)

This Standard prescribes the requirements and methods of sampling and test for gypsum for agricultural use.

03 Page Gr-A CH

BDS 1789:2007**Magnesium sulphate (fertilizer grade)**

This Bangladesh Standard specifies the requirements for magnesium sulphate, fertilizer grade.

03 Page Gr-A CH

BDS 1790 (Part 0):2007**Methods of test for cables****General**

Issued in different parts, prescribes methods of tests for electric cables, wires and cords in finished stage as well as their components, such as conductor, insulation, sheath and armour.

03 Page Gr-A ET

BDS 1790 (Part-1):2007**Methods of test for cables****Annealing test for wires used as conductors**

Covers method for determining the elongation properties of annealed copper wires, aluminium wires for welding cables and solidal conductors used in electric cables.

03 Page Gr-A ET

BDS 1790 (Part-2):2007**Methods of test for cables****Tensile test for aluminium wires**

Covers method for determine tensile strength of aluminium wires used for conductors of electric cables.

03 Page Gr-A ET

BDS 1790 (Part-3):2007**Methods of test for cables****Wrapping test for aluminium wires**

Covers a method to determine the ductility of aluminium wire used as conductors of electric cables.

03 Page Gr-A ET

BDS 1790 (Part-5):2007**Methods of test for cables****Conductor resistance test**

Covers a method to determine the resistance of copper and aluminium conductors.

03 Page Gr-A ET

BDS 1790 (Part-6):2007**Methods of test for cables****Thickness of thermoplastic and electromeric insulation & sheath**

Covers a method for verification of thickness of thermoplastic and electromeric insulation and sheath of electric cables.

03 Page Gr-A ET

BDS 1790 (Part-7):2008**Methods of test for cables****Tensile strength and elongation at break of thermoplastic and elastomeric insulation and sheath**

Cover the method to determine the tensile strength and elongation at break of thermoplastic and lastomeric insulation and sheath of electric cables.

04 Page Gr-A ET

BDS 1790 (Part-10):2009**Methods of test for cables****Loss of mass test**

Cover the method to determine the thermal effect on the mass of thermoplastic insulatin and sheath.

03 Page Gr-A ET

BDS 1790 (Part-11):2009**Methods of test for cables****Thermal ageing in air**

Cover the method for thermal ageing test in air of insulation and sheath of electric cables.

03 Page Gr-A ET

BDS 1790 (Part-12):2009**Methods of test for cables****Shrinkage test**

Cover determination of shrinkage characteristics of thermoplastic insulation and sheath of electric cables after exposure to specified elevated temperature.

03 Page Gr-A ET

BDS 1790 (Part-13):2009**Methods of test for cables****Ozone resistance test**

Cover a method for estimating the resistance of elastomeric material of electric cable to ozone attack.

03 Page Gr-A ET

BDS 1790 (Part 14):2009**Methods of test for cables****Heat shock test**

Cover a method for finding out cracking of thermoplastic insulation and sheath of electric cables taking place on overheating.

03 Page Gr-A ET

BDS 1790 (Part 15):2009**Methods of test for cables****Hot deformation test**

Cover a method to determination resistance of thermoplastic insulation and sheath of electric cables to deformation when subjected to mechanical pressure at high temperature.

03 Page Gr-A ET

BDS 1790 (Part-21)**Methods of test for cables****Cold impact test cover the method for cold impact test of cables**

ET

BDS 1790 (Part-43):2015**Methods of test for cables****Insulation resistance**

Covers method of determination of insulation resistance, calculation of volume resistivity and insulation resistance constant of the dielectric material of electric cable of direct current method.

06 Page Gr-B ET

BDS 1790 (Part-45):2015**Methods of test for cables****High voltage test**

Covers the method for high voltage test on electric cables.

06 Page Gr-B ET

BDS 1790 (Part-53):2015**Methods of test for cables****Flammability test**

Prescribes a method of test on electric cables under fire conditions.

07 Page Gr-B ET

BDS 1791 (Part-1):2007**13 A plugs, socket-outlets, adaptors and connection units****Rewirable and non-rewirable 13 A fused plugs**

Specifies the requirements for 13 A fused plugs having insulating sleeves on line and neutral pins, for household, commercial and light industrial purposes, with particular reference to safety in normal use. in a.c. circuits only, operating at voltages not exceeding 250 V r.m.s. at 50 Hz.

59 Page Gr-K ET

BDS 1791 (Part-2):2007**13 A plugs, socket-outlets, adaptors and connection units****13 A switched and unswitched socket-outlet**

Specifies the requirements for 13 A switched and unswitched shuttered socket-outlets for household, commercial and light industrial purposes, with particular reference to safety in normal use. a.c. circuits only operating at voltages not exceeding 250 V r.m.s. at 50 Hz.

62 Page Gr-K ET

BDS 1791 (Part-3):2007**13 A plugs, socket-outlets, adaptors and connection units****Adaptors**

Specifies the requirements for adaptors having insulating sleeves on the line and neutral plug pins and suitable for use with socket-outlets with particular reference to safety in normal use. Adaptors are intended for household, commercial and light industrial purposes. a.c. circuits only, operating at voltages not exceeding 250 V r.m.s at 50 Hz.

81 Page Gr-K ET

BDS 1791 (Part-4):2007**13 A plugs, socket-outlets, adaptors and connection units****13 A fused connection units: switched and unswitched**

Specifies the requirements for 13 A fused fixed connection units for household commercial and light industrial purpose, with particular reference to safety in normal use. a.c. circuits only, operating at voltages not exceeding 250 V r.m.s at 50 Hz.

35 Page Gr-G ET

BDS 1792:2007**Handloom cotton dress material, bleached, dyed, printed**

This standard prescribes constructional particulars and other requirements for twenty varieties of Handloom cotton dress material, bleached, dyed, printed.

05 Page Gr-A JT

BDS 1793:2008**Fortified wheat atta**

This standard prescribes the requirements and the methods of sampling and test for fortified wheat atta, hereafter termed FW atta.

09 Page Gr-B AF

BDS 1794:2008**Fortified maida**

This standard prescribes the requirements and the methods of sampling and test for fortified maida.

09 Page Gr-B AF

BDS 1795:2008**Textiles-rotor spun grey cotton yarns**

This standard specifies the requirements of grey cotton yarn spun by rotor spinning process

06 Page Gr-B JT

BDS1796:2008**Muri (puffed rice)**

This standard prescribes the requirements and the methods of Muri.

10 Page Gr-B AF

BDS 1797 (Part-1):2008**Graphical symbols for components of servo-mechanisms — Transductions and magnetic amplifiers**

Describe graphical symbols for components of servo-mechanisms of transductions and magnetic amplifiers

07 Page Gr-B ET

BDS 1798:2008**Baby toilet soap**

This specification prescribes the requirements and methods of sampling and test for baby toilet soap.

09 page Gr-B CH

BDS 1799:2008**Grades of raw cotton**

This Bangladesh standard prescribes the requirements of Grading of Raw Cotton.

03 page Gr-A JT

BDS1800:2008**Sheeting, ticking and bed sheets-specification**

This standard prescribes constructional details and other particulars of sheeting, tickings and bedsheets, scoured, bleached, dyed or printed.

04 page Gr-A JT

BDS 1801:2015**Edible jell (Second Revision)**

This standard prescribes the requirements and the methods of sampling and test for edible jell.

12 Page Gr-C AF

BDS 1802:2008

Spirulina powder

This standard prescribes the requirements and the methods of sampling and test for dried spirulina powder produced from the instantaneous and high temperature spraying and drying of *Spirulina paitnsis* or *Spirulina maxima*, cultured on a large scale.

04 Page Gr-A AF

BDS 1803:2008

Specification for hollow clay bricks and blocks

This standard covers hollow building and facing bricks, hollow blocks made from clay, shale, fire clay or mixtures thereof, and fired to incipient fusion.

BDS 1804:2008

Feeds and feeding of farm animals and pets

56 Page Gr-XE AF

BDS 1805:2008

Ultra high temperature milk and ultra high temperature homogenized milk

This standard prescribes the requirements and the methods of sampling and test for Ultra High Temperature (UHT) milk (cow milk)

04 Page Gr-A AF

BDS 1806:2008

Specification for stevia green leaf powder

This standard prescribes the requirements and the methods of sampling and test for dried stevia green leaf powder produced from the instantaneous and high temperature spraying and drying of stevia leaves (*Stevia rebaudiana*) cultured on a large scale.

04 Page Gr-A AF

BDS 1807:2008

Cumin powder

This standard prescribes the requirements for cumin (shada jeera). (*cuminum cyminum l*) in the powdered form.

03 Page Gr-A AF

BDS 1808:2008

Grades of raw kenaf and mesta fibre

This Bangladesh Standard prescribes the requirements for raw kenaf and mesta fibre (kutch and Pucca assortment) with permissible moisture.

07 Page Gr-B JT

BDS 1809:2008

Binola fabric

This Bangladesh Standard prescribes the constructional details and other particulars of Binola fabric.

03 Page Gr-A JT

BDS 1810:2008

Binola bag

This Standard prescribes constructional details and other requirements of Binola bag.

04 Page Gr-A JT

BDS 1811:2008

Sweetmeats

This Standard cancels and replaces BDS 1309:1990 Rasogolla.

08 Page Gr-A AF

BDS 1812 (Part-1):2009

Code of practice for interior illumination

General requirements and recommendations for working interior

Covers the principles and practice governing good lighting in buildings and relates chiefly to the lighting of 'working areas' in industrial, commercial and public buildings, hospitals and schools.

27 Page Gr-F ET

BDS 1812 (Part-2):2009

Code of practice for interior illumination

Schedule for values of illumination and glare index

Covers the recommended values of illumination and limiting values of glare index.

20 Page Gr-D ET

BDS 1812 (Part-3):2009

Code of practice for interior illumination

Calculation of coefficients of utilization by the BZ method

Covers the calculation of coefficients of utilization by the BZ classification.

24 Page Gr-E ET

BDS 1813:2009

General guidelines for production, preparation, handling and storage of halal food

This Standard prescribes practical guidelines for the food industry on the preparation and banding of halal food (including nutrient supplements) and to serve as a basic requirement for food product and food trade or business in Bangladesh.

14 page Gr-C AF

BDS 1814:2009

Dispensing capacity measures

This Standard specifies requirements for metric dispensing measures made of glass or transparent plastics materials.

10 Page Gr-B ME

BDS 1815:2008

Shoe polish, cream (First Revision)

This standard prescribes the requirements and the methods of sampling and tests for wax-emulsion type shoe cream suitable for general application to leather footwear.

08 Page Gr-C CH

BDS 1816:2008

Surface active agents glossary of terms

This standard defines terms frequently used in the field of surface active agents.

16 page Gr-D CH

BDS 1817:2008

Glossary of terms used in adhesives industry

This standard prescribes the glossary of terms used in the adhesives industry.

15 Page Gr-C CH

BDS 1818:2008

Talc for cosmetics industry

This specification prescribes the requirements and methods of sampling and test for talc used in cosmetics industry.

15 Page Gr-C CH

BDS 1819:2008

Paraffin wax

This Standard prescribes the requirements and the methods of sampling and tests for paraffin was used for waxing paper, making candles, and impregnating match sticks and for other general uses.

17 Page Gr-D CH

BDS 1820:2008

Letterpress ink, black, book printing

This Bangladesh Standard prescribes the requirements and methods of sampling and test for letterpress ink, black, book printing.

02 Page Gr-A CH

BDS 1821:2009

Specification for solubor (boron)

This Bangladesh Standard specifies the requirements for solubor (boron), fertilizer grade.

04 Page Gr-A CH

BDS 1822:2009

Specification for chelated zinc (fertilizer grade)

This Bangladesh Standard specifies the requirements for chelated zinc fertilizer grade.

04 Page Gr-A CH

BDS 1823:2009

Methods of test for dry pigments and extenders for paints

This Standard prescribes methods of test which are common to several material specificaitns for individual pigments and extenders in the dry condition. This standard covers definitins of terms used in the trade and industry, methods of sampling, form and condition of the material, color, staining power and tone, reducing power of white pigments, matter insoluble in water, acidity and alkalinity, ether extract, ash and lead content of pingment are also specified.

14 Page Gr-C CH

BDS 1824:2009

Methods of test for safety evaluation of cosmetics

(Cancels and replaces by BDS 1332:1991)

07 Page Gr-B CH

BDS 1825:2011

Tableware made of urea moulding compound

(First Revision)

This standard prescribes the methods of test for tableware such as cups, glasses and plates of various types made of urea moulding compounds

09 Page Gr-B CH

BDS 1826:2010

Sugar added partly skimmed milk powder

This standard prescribes the requirements methods of sampling and test for sugar added partly skimmed milk powder.

04 page Gr-A AF

BDS 1827:2010

Emulsion paint

This standard prescribes requirements and methods of sampling and test for Emulsion Paint used for interior and exterior protection and decoration of building surfaces after surface preparation and priming.

09 Page Gr-B CH

BDS 1828:2010

Animal tallow (in edible)

This standard prescribes requirements and methods of sampling and test for animal tallow.

05 Page Gr-A CH

BDS 1829:2010

Fresh, dried and powdered mushrooms

This standard prescribes the essential requirements and the method of sampling and test for fresh, dried and powdered mushrooms and mushroom enriched food products.

09 page Gr-B AF

BDS 1830:2009

Cotton fabric, water repellent, for capes and rain coats

This standard prescribes constructional details and other particulars of three varieties of the cotton fabrics, water repellent for capes and rain coats. If agreed, man-made fibers may be blended with cotton.

05 Page Gr-A JT

BDS 1831:2009

Method for estimation of residual starch in cotton fabrics after desizing

This standard prescribes a method for the estimation of residual starch in cotton fabrics.

05 Page Gr-A JT

BDS 1832:2010

Float glass

This standard Specifies the requirements for float glass intended for in building, architectural, vehicles and

mirror. The quality requirements are specified in terms of preferred thickness and tolerances, dimensional and optical properties. This specification excludes requirements for tempered and coated glass.

13 Page Gr-C CH

BDS 1833:2011

Economy emulsion paint (distemper)

This standard prescribes requirements and methods of sampling and test for economy emulsion paint (distemper) used for interior decoration and protection of building surfaces after surface preparation and priming wherever necessary

13 Page Gr-C CH

BDS 1834:2011

Mobile phone bangla keypad

Defines layouts for input of Bangla characters, signs, symbols and currency marks using industry standard 3 X 4 Mobile Keypad. This standard specifies Bangla Characters intended for the definition and implementation of standards for localization of ICT.

12 Page Gr-C ET

BDS 1835:2009

Textiles-ring spun polyester blended grey yarn-specification

This standard specifies requirements of grey yarn (single and doubled) spun from blend of polyester with cotton or viscose fibre on ring spinning frame

10 Page Gr-B JT

BDS 1836:2009

Spun polyester yarn

Weaving (conventional loom)

This specification prescribes the requirements and methods of sampling and test for 100 percent Spun Polyester Yarns intended for use in conventional looms

05 Page Gr-A JT

BDS 1837:2011

Wrought aluminium and aluminium alloys rivet, bolt and screw stock used for general engineering purposes

This Bangladesh standard specifies requirements for rivet stock or diameter up to and including 25mm made from one grade of aluminium and from four aluminium alloys in various conditions, and for bolt and screw stock or diameter up to including 12mm made from four aluminium alloys in various conditions.

12 Page Gr-C ME

BDS 1838:2011

Disposable razor blades

This Standard sets out the requirements for single, double, triple edge or multiple edges disposable stainless steel razor blades.

12 Page Gr-C ME

BDS 1839 (Part-1):2010

Bobbins and pirns used in textile mills

Wooden flyer bobbins

This Standard specifies requirements of wooden bobbins suitable for use on speed frames with open-leg type flyers.

05 Page Gr-A JT

BDS 1839 (Part-2):2010

Bobbins and pirns used in textile mills

Wooden warp bobbins for rabbeth spindles

This Standard(part-2) prescribes requirements of warp bobbins for rabbeth spindles for use on ring spinning frames.

09 Page Gr-B JT

BDS 1839 (Part-3):2010

Textile machinery and accessories-bobbins and pirns

Plastic flyer bobbins

This Standard specifies the requirements for plastic flyer bobbins for use on speed frames.

05 Page Gr-A JT

BDS 1840:2011

Code for seaworthy packaging of woollen & worsted yarn & cloth

This Standard prescribes the procedures of packaging of woollen and worsted yarn and cloth to be exported overseas for their safe transit, The requirements of packing materials have also been specified.

05 Page Gr-A JT

BDS 1841:2011

Code for inland packaging of woollen & worsted yarn & cloth

This Standard prescribes the procedures of packaging for the safe transit of woollen and worsted yarn and cloth intended for the internal markets. The requirements of packing materials have also been specified.

05 Page Gr-A JT

BDS 1842:2011

Adhesives for timber and timber products - polymer emulsion adhesives

This standard specifies requirements for polymer emulsion adhesives, in one-component and two-component preparations, intended for wood to wood bonding.

09 Page Gr-B CH

BDS 1843:2011

Specification for calcium hypochlorite

This Standard prescribes the requirements of calcium hypochlorite intended to be used as a sanitizer.

10 Page Gr-B CH

BDS 1844 :2011

Skin powder for babies

This standard prescribes requirements and methods of sampling and test for skin powder for babies.

09 Page Gr-B CH

BDS 1845:2011

Oven cleaner and grease remover

This Standard prescribes three types of oven cleaners and grease removers that are suitable for their removal

of carbon deposits, grease, baked-on fats and other surface contaminants from industrial and domestic cooking ovens, grills, fryers and other steel kitchen equipment, but that are not intended for use in self cleaning ovens. As type 1 and type2 oven cleaners may contain solvents that are detrimental to health it is recommended that these cleaners be used in well-ventilated areas and that prolonged breathing of the vapours be avoided.

09 Page Gr-B CH

BDS 1846:2011

Code of practice for curing and preservation of cattle hides, goat and sheep skins

This code of practice recommends practices to be observed in wet salting method of curing of cow and buffalo hides and goat sheep and calf skins.

05 Page Gr-A CH

BDS 1847:2011

Ice lolly

This standard prescribes the requirements and the methods of test for ice lolly.

22 Page Gr-E AF

BDS 1848:2011

Methods for determination of absorbency of absorbent textile materials

This Standard prescribes a methods for the determination of the absorbency of absorbent textile materials.

05 Page Gr-A JT

BDS 1849:2012

Household refrigerators/freezers

This standard covers the methods of determining the performance of self-contained Refrigerators/Freezers intended for household use.

32 Page Gr-G ME

BDS 1850:2012

Energy efficiency rating of household refrigerators, refrigerator-freezers and freezers section 1 conditioners—methods of measurement and requirements for energy efficiency labeling

This section of the standard specifies requirements for energy efficiency labeling of household electric refrigerators 'of the vapour compression type, together with a test method for determining the energy consumption of refrigerators that are capable of complying.

55 Page Gr-K ME

BDS 1851:2012

Blend composition of textiles

This standard prescribes the requirements of blend compositions of various textiles (yams, fabrics and garments) and the method of marking or labeling in respect of various fibres used in blends. The methods of testing the blends are also given in this standard.

05 Page Gr-A JT

BDS 1852:2012

Performance of air conditioners and heat pumps — energy labelling and minimum energy performance standard (MEPS) requirements

This Standard specifies the energy labelling requirements for single-phase non-ducted air conditioners of the vapour compression type and the minimum energy performance standard (MEPS) requirements for single-phase and three-phase air conditioners of the vapour compression type up to a rated total cooling capacity of 65 kW that fall within the scope of AS/NZS 3823.1.1, AS/NZS 3823.1.2 or AS/NZS 3823, 1.3.

82 Page Gr-K ME

BDS 1853:2012

Performance of close control air conditioners — minimum energy performance standard (MEPS) requirements

This Standard specifies the minimum energy performance standard (MEPS) requirements for close control air conditioners that fall in the scope of ASINZS 4965.1. This Standard does not specify electrical safety requirements. This Standard specifies the following values for cooling, as applicable

17 Page Gr-D ME

BDS 1854:2012

Canned bamboo shoot

This standard prescribes the requirements and methods of test for canned bamboo shoot.

10 page Gr-B AF

BDS 1855:2012

Edible rice bran oil

This standard prescribes the requirements and methods of sampling and test for edible rice bran oil.

04 page Gr-A AF

BDS 1856:2012

Textile-handloom viscose staple fibre shirting-specification

This Standard prescribes constructinal particulars and other requirements for six varieties of handloom viscose staple fibre shirting.

06 Page Gr-B JT

BDS 1857:2012

Method for estimation of common preservatives used in textile industry

This standard prescribes methods for quantitative estimation of single known preservative only and not for mixtures of preservatives used in textile industry.

12 Page Gr-C JT

BDS 1857 (Part-1):2015

Method for estimation of common preservative on textiles- Part 1

Prescribes methods for estimating the following preservatives on textiles

13 Page Gr-C JT

BDS 1857 (Part-2):2014

Textiles — estimation of common preservatives

Prescribes methods for estimation of the following preservatives on textiles:

- p*-nitro phenol
- 2, 4- dinitro-1-naphthol (DAN)
- 4, 6- dinitro-ortho-cresol (DNOC)
- Dichloro-diphenyl-trichloroethane (DDT)
- Pentachlorophenyl laurate (PCPL)

08 page Gr-B JT

BDS 1858:2012

Skin creams and lotions for babies

This specification prescribes the requirements and methods of sampling and test for skin creams and lotions for babies.

06 Page Gr-B CH

BDS 1859:2012

Floor liquid detergents

This standard specifies liquid detergents containing surfactants, intended for cleaning of floors. Products complying with this standard are non-abrasive and are intended to be used on surfaces such as painted surfaces, linoleum, rubber and vinyl tile flooring, cement and ceramic surfaces.

09 Page Gr-B CH

BDS 1860:2012

Minimum allowable values of energy efficiency and energy efficiency grades for ac electric fans

Specifies the energy efficiency grades, allowable values of energy efficiency, evaluating values of energy conservation, test methods and inspection rules for AC fans. This standard is applicable to desk fan, box fan, wall fan, slide fan, floor fan and ceiling fan that the rated voltage not exceeding 250 V, other rated voltage not exceeding 480 V and driven by AC motors.

07 Page Gr-B ET

BDS 1861:2012

Bangladesh essian part-vi, 298 g/m² At 16 percent contract regain

This Standard prescribes the constructional details and other particulars of the following type of Hessian of such widths as agreed to between the buyer and the seller.

07 Page Gr-B JT

BDS 1862:2012

Aviation gasoline

This Standard prescribes the requirements and methods of sampling and test for aviation gasoline intended for use in aircraft reciprocating engines.

07 Page Gr-B CH

BDS 1863:2012

Top (knit & woven) garments

This standard prescribes the Size designation & Test method of Top garments (knit & woven)

07 Page Gr-B JT

BDS 1864:2013

Single jute yarn

This standard prescribes the requirements of 4(Four) varieties of Single Jute yarns; such as- Special (A), C.B (B), Hessian (C) & Sacking (D)

07 page Gr-B JT

BDS 1865:2013

Textiles-jute and jute based bags- method for drop test

This standard prescribes constant drop height and progressive drop height methods for conducting drop test on filled jute and jute based bags under controlled and reproducible conditions.

06 page Gr-B JT

BDS 1866:2013

Low fat milk

This standard prescribes the requirements, methods of sampling and test for low fat milk

10 page Gr-B AF

BDS 1867:2013

Safety glass for motor vehicles

This Bangladesh standard specifies requirements for safety glass for installation either as windscreens, other panes or as partitions in motor vehicles and their trailers.

17 Page Gr-D CH

BDS 1868:2013

Papad

This standard prescribes the requirements and the method of sampling and test for Papad.

12 page Gr-C AF

BDS 1869:2013

Methods of test for microbiological examination of cosmetics and cosmetic raw materials

This Standard prescribes methods for determinations of microbial content of cosmetics and cosmetic raw materials.

12 Page Gr-D CH

BDS 1870: 2013

Synthetic resin adhesives for plywood (phenolic and aminoplastic)

This standard prescribes the requirements for phenolic and aminoplastic synthetic resin adhesives used in the plywood industry, covering liquid, powder and film adhesives.

07 Page Gr-B CH

BDS 1871:2013

Handloom cotton voile

This Standard prescribes the constructional particulars and other requirements for two varieties of handloom cotton voile.

05 page Gr-A JT

BDS 1873:2013

Guidelines for the safety assessment of foods derived from genetically engineered plants

This document is intended to provide guidance to both applicants and reviewers for regulatory purposes. No attempt is made to explicitly define all of the data that might be required during a safety assessment, as this may vary case-by-case, and generally, data and information requirements are applicable only to those plant parts used as a food source.

28 page **Gr-F** **AF**

BDS 1874:2013

Glass tableware

This standard prescribes the requirements, methods of sampling and test for glass tableware. This includes tumblers, plates, cups, saucers, mugs, jugs, stem ware, bowls, casseroles, dishes with or without cover. They can also be used for preparing food.

09 Page **Gr-B** **CH**

BDS 1875:2013

Curry paste and seasoning paste

This standard specifies the requirements of curry paste and seasoning paste with edible oil, chilly and spicy condiment composed equally, which is ready to use with other food components.

13 Page **Gr-C** **AF**

BDS 1876:2013

Standard colors for insulation for low-frequency cables and wires

This Standard applicable to thermoplastic insulation to be used with low-frequency cables and wires.

ET

BDS 1877:2014

Artificial fruit flavoured drinks

This Standard prescribes the requirements and methods of sampling and test for artificial flavoured drinks intended for direct consumption without dilution.

08 page **Gr-B** **AF**

BDS 1878:2015

Pipes and fittings made of unplasticized polyvinyl chloride (PVC-U) used for potable water supply

This Bangladesh standard specifies the characteristics and test methods of solid-wall pipes made from unplasticized poly(vinyl chloride) (PVC-U) for piping systems intended for use of cold potable water supply and for buried and above-ground drainage and sewerage under pressure

24 page **Gr-E** **CE**

BDS 1879:2014

Extruded profiles of aluminium and aluminium alloys

This standard specifies the tolerances on dimensions and form for aluminium and aluminium alloy extruded profile with a cross section contained within a circumscribing circle not greater than 800 mm (see Figure 1). This standard applies to extruded profiles for civil engineering applications only.

19 Page **Gr-D** **CE**

BDS 1880:2014

Textiles — jute bags for packing 50kg sugar— specification

This standard prescribes constructional details and other requirements of three types of jute bags for packing 50kg sugar.

13 Page **Gr-C** **JT**

BDS 1881:2014

Bottom (knit & woven) garments

This standard prescribes the Size designation & Test methods of Bottom garments (knit & woven).

08 page **Gr-B** **JT**

BDS 1882:2014

Textiles- synthetic mosquito nets-specification

This standard prescribes the requirements for three varieties of mosquito nets, made of polyester, polyamide or any other synthetic materials mosquito nettings.

06 page **Gr-B** **JT**

BDS 1883:2014

Method of electrical and photometric measurements of solid state lighting (LED) products

Covers the procedures to be followed and precautions to be observed in performing reproducible measurements of total luminous flux, electrical power, luminous intensity distribution, and chromaticity, of solid state lighting (SSL) products commonly known as LED products for illumination purpose, under standard test conditions.

17 Page **Gr-D** **ET**

BDS 1884:2014

Baby shampoo

This specification prescribes the requirements and methods of sampling and test for hair shampoo for babies based on surfactants.

12 Page **Gr-D** **CH**

BDS 1885:2014

Formaldehyde solution for industrial use

This Bangladesh standard specifies the purity requirements of formaldehyde solution, sampling and methods of test.

10 Page **Gr-B** **CH**

BDS 1886:2014

Fortified edible rice bran oil

This standard prescribes the requirements and methods of sampling and test for fortified edible rice bran oil.

11 Page **Gr-C** **AF**

BDS 1887:2014**Jute bags for packing urea**

This standards prescribes the constructional particulars and other requirements of jute bags for packing urea.

07 Page Gr-B JT

BDS 1888:2014**Textiles–glossary of terms relating made-up textiles items and ready-made garments**

This standard prescribes definitions of terms relating to made –up textile items and ready made garments.

21 Page Gr-E JT

BDS 1889:2014**Woven nylon fabric for umbrellas, water resistant**

This standard prescribes the performance requirements of different kinds of water resistant, woven, nylon fabrics used for various types of umbrellas.

11 Page Gr-C JT

BDS 1890:2015**Methods for determination of cohesion of raw silk**

This standard prescribes method for determination of the degree of agglutination of cocoon filaments forming the thread.

03 Page Gr-A JT

BDS 1891:2015**Methods for determination of conditioned mass of raw silk**

This standard prescribes method to determine the moisture free mass of the raw silk plus 11 percent of the dry mass allowed as regain of moisture.

03 Page Gr-A JT

BDS 1892:2015**Methods for determination of size (count) deviation and maximum deviation of raw silk**

This standard prescribes method to determine the degree of size (count) variation within the test pieces of definite length of raw silk, expressed in tex units (or denier).

04 Page Gr-A JT

BDS 1893:2015**Methods for determination of evenness variation of raw silk**

This standard prescribes method to determine the degree of evenness variation occurring in raw silk threads.

07 Page Gr-B JT

BDS 1894:2015**Methods for determination of neatness and low neatness of raw silk**

This standard prescribes method to determine the neatness percentage of raw silk.

03 Page Gr-A JT

BDS 1895:2015**Methods for determination of tenacity and elongation serigraph tests of raw silk**

This standard prescribes method for determining the tenacity and elongation of raw silk.

04 Page Gr-A JT

BDS 1896:2015**Synthetic vinegar**

This Bangladesh Standard prescribes the requirements, methods of sampling and test for synthetic vinegar.

05 Page Gr-A AF

BDS 1897:2015**Fortified rice**

This standard prescribes the requirements, processing, methods of sampling and test for fortified rice.

19 Page Gr-D AF

BDS 1898:2015**Towels and towelling**

This standard prescribes constructional details and other particulars of terry and huck-a-back towelling and towels; bleached, dyed, printed or striped.

08 Page Gr-B JT

BDS 1899:2015**Cloth marking chalks (tailor's-chalk)**

This standard prescribes the requirements and methods of sampling and test for cloth marking chalks. The material is mainly used for marking cotton, silk, synthetic fabrics and woolen cloth with pencil or any other suitable instrument.

11 Page Gr-C CH

BDS 1900:2015**Tulsi pati**

This standard prescribes the requirements and methods of sampling and test for tulsi pati.

15 Page Gr-C AF

BDS 1901: 2015**Octane booster**

This standard prescribes the requirements of octane booster.

05 Page Gr-A CH

BDS1902:2016**Textiles – polypropylene braided tapes for berets – specification**

This standard prescribes the constructional particulars and performance requirements of polypropylene braided tapes used in the manufacture of berets.

09 Page Gr-B JT

BDS1903:2016**Rib-knitted cotton fabric**

This standard prescribes the requirements of grey, scoured, bleached, dyed or printed rib- knitted fabric

04 page Gr-A JT

BDS1904:2016**Rib-knitted cotton vests**

This standard prescribes the requirements of grey, scoured, bleached, dyed or printed rib-knitted cotton vests with or without sleeves having round or V-neck.

04 Page Gr-XA JT

BDS1905:2016**Laminated jute bags for packing milk powder**

This standard prescribes constructional details and other requirements of two types of laminated jute bags for packing milk powder.

04 page Gr-A JT

BDS 1906:2016**Textiles – polyethylene lined jute bags for packing tea – specification**

This standard prescribes the requirements of polyethylene lined jute bags suitable for packing 30 kg tea.

09 page Gr-B JT

BDS 1907:2016**Methods for determination of bitumen content in laminated jute bags**

This standard prescribes two methods for determination of bitumen content in laminated jute bags.

08 Page Gr-B JT

BDS : 1908 2016**Transparent toilet soap**

This standard prescribes the requirements and the methods of sampling and test for transparent toilet soap.

04 page Gr-A CH

BDS1909:2016**Jute geotextiles**

This standard provides requirements of jute geotextiles (JGT) for „strengthening road subgrade’, ‘river bank protection work’ and ‘top soil erosion control of the hill slopes’. In case of road construction, double warp plain weave woven JGT is used. Natural additive treated woven JGT is recommended for controlling erosion of the river banks. Open mesh plain weave JGTs have been found suitable for hill slope top soil protection work.

16 Page Gr-D JT

BDS 1910:2016**Polyethylene for its safe use in contact with foodstuffs, pharmaceuticals and drinking water**

This standard specifies the requirements and methods of sampling and test for polyethylene plastic materials for the manufacture of plastic items used in contact with foodstuffs, pharmaceuticals and drinking water.

04 page Gr-A CH

BDS 1911:2016**Positive list of constituents of polyethylene in contact with foodstuffs, pharmaceuticals and drinking water**

This standard covers positive list of constituents of polyethylene, namely the homopolymer, copolymers, terpolymers and blends of these polymers manufacturing residues and auxiliary additives, which may be regarded as safe for use, when properly processed, in contact with foodstuffs, pharmaceuticals and drinking water and when present only in the prescribed limits of concentration.

08 page Gr-B CH

BDS 1912:2016**Positive list of constituents of styrene polymers in contact with foodstuffs, pharmaceuticals and drinking water**

This standard covers positive list of constituents of styrene polymers, namely, the polymers, residual monomers, catalysts, emulsifying agents, suspension agents, miscellaneous polymerization additives like process oxidants, and chain transfer agents, polymerization ingredients and auxiliary items for working which may be regarded as safe for use, when properly processed, in contact with foodstuffs, pharmaceuticals and drinking water and when present in the prescribed limits of concentration.

08 page Gr-B CH

BDS 1913: 2016**Guide on suitability of plastics for food packaging**

This standard covers primarily various thermoplastics singly or in combination which are considered suitable for food contact applications. This standard provides a general guidance to the food packer in selecting the specific thermoplastic material, singly or in combination, to design an acceptable food packaging system.

11 page Gr-B CH

BDS 1914: 2016**Grading glass for alkalinity - hydrolytic resistance of glass containers**

This Bangladesh standard specifies methods for determining the hydrolytic resistance of the interior surfaces of glass containers when subjected to attack by water at 121°C ± 1°C for 60 minutes ± 1 minute.

09 page Gr-B CH

BDS 1915:2016**Fish feed**

This Bangladesh Standard prescribes the requirements, methods of sampling and test for fish feed.

14 page Gr-C AF

BDS 1916:2016**Fish pickles**

This standard prescribes requirements and method of sampling and test for fish pickles.

06 page Gr-B AF

BDS 1917:2016**Guidelines for hygienic manufacture of cosmetics**

This standard is divided into two sections. Section 1 of this standard covers code of hygiene in the manufacture of cosmetics and section 2 includes guidelines and indicators for proper and hygienic traceability of raw materials to finished products including end process quality control.

06 page Gr-B CH

BDS 1918:2016

Herbal cosmetics - general guidelines

This standard primarily deals with general guidelines for herbal cosmetics.

03 page Gr-A CH

BDS 1919:2016

Handloom cotton handkerchiefs

This standard prescribes the constructional particulars and other requirements of handloom cotton handkerchiefs, bleached, dyed, striped, checked or printed.

04 Page Gr- A JT

BDS 1920:2016

Jamdani sharee

This Bangladesh Standard prescribes the constructional particulars, and other requirements of different varieties of Jamdani Sharee

06 Page Gr- B JT

BDS 1921:2016

Preservative treatments of textiles

This standard specifies treatments (that is, agents, their application and levels) of common preservatives used in textile industry for protection against one or more causes, namely, attack by fungi, bacteria and insects, and degradation caused by the action of weathering and sunlight.

19 Page Gr-D JT

BDS 1922:2016

Textiles - method for determination of flammability of blankets

This standard specifies a method for determination of flammability of blankets and blanket fabrics in terms of their ease of ignition and propagation of flame across the surface under specified test conditions.

09 Page Gr-B JT

BDS 1923: 2016

Skin lotions

This standard prescribes the requirements and the methods of sampling and test for skin lotions.

08 page Gr-B CH

Annexure-D
List of International Standards
adopted as Bangladesh Standards

INTERNATIONAL STANDARDS ADOPTED AS BANGLADESH STANDARDS (BDS)

AGRICULTURE & FOOD DIVISION:

BDS CAC RCP 1:2002

Code of practice general principles of food hygiene

(Cancels and replaces by BDS 822:2012)

18 Page Gr-XB AF

BDS CACRCP 8:2008

Recommended International Code of Practice for the processing and handling of quick frozen foods

This Code applies to the receiving, preparation, processing, handling, storage, transport, distribution, and retailing of all quick frozen foods such as cereals, fruits and vegetables, fish, meat, poultry and their products, bakery and pastry products. The Code does not apply to edible ices, ice creams and milk.

19 Page Gr-XB AF

BDS CAC RCP 11:2000

Code of hygienic practice for fresh meat

This code, together with the code for Ante-mortem and post mortem inspection slaughter animals and for Ante-mortem and post mortem judgment- of slaughter animals and meat; describes requirements necessary to achieve that goal. Traditional practices may permit departure from some of the requirements when fresh meat is produced for local trade.

36 Page Gr-XD AF

BDS CAC RCP 19:2008

Recommended International Code of Practice for Radiation Processing of Food

This Code is concerned with food products processed by gamma rays, X-rays or accelerated electrons for the purpose of, among other things, control of foodborne pathogens, reduction of microbial load and insect infestation, inhibition of the germination of root crops, and extension of durable life for perishable foods.

07 Page Gr-XA AF

BDS CAC RCP 21:2008

Recommended International Code of Hygienic Practice For Foods For Infants And Children

This Code of Hygienic Practice applies to all prepackaged foods produced, represented or purported to be for the special use of infants and/or children. It contains the minimum hygienic requirements for the handling (including production, preparation processing, packaging, storage, transport, distribution and sale) of such food to ensure a safe, sound and wholesome product.

20 Page Gr-XB AF

BDS CAC RCP 22:2008

Recommended International Code of Hygienic Practice For Groundnuts (Peanuts)

This Code of Hygienic Practice applies to groundnuts, also known as peanuts, monkey nuts or earth nuts (*Arachis hypogaea* L). It contains the minimum requirements of hygiene for farm handling, transportation, storage, in-shell operations and commercial shelling. It covers all types and forms of raw, dried groundnuts (peanuts) in-shell and shelled.

18 Page Gr-XB AF

BDS CAC RCP 25:2008

Recommended International Code of Practice for Smoked Fish

This Code of Practice applies to smoked fish and fishery products as defined in Section subparagraph 2.11 of this Code which are intended for human consumption.

It contains the technological guidelines and the essential requirements of hygiene for processing, handling, storage and distribution of smoked fish and smoked fish products. It does not provide specific information on particular smoking procedures with regard to a specific species of fish. The variations in this field of food technology are too numerous to justify such an attempt.

44 Page Gr-XE AF

BDS CAC RCP 28:2008

Recommended International Code of Practice for Crabs

This Code of Practice applies generally to commercial crabs of the Cancer species, king crab related species (*Litotes* and *Parasitoids*), swimming crabs (*Portunidae*), Geryon species and snow crab species (*Chionoectes*). It may also apply to other species which are similar in physical structure to the above mentioned. It contains the technological guidelines and the essential requirements of hygiene for harvesting, processing and handling of crabs at sea and on shore. No attempt has been made to identify regional practices. The technology of canning crab meat is not covered in this Code.

43 Page Gr-XE AF

BDS CAC RCP 33:2008

Recommended International Code of Hygienic Practice for the Collecting, Processing and Marketing Of Natural Mineral Waters 1

15 Page Gr-XB AF

BDS CAC RCP 39:2003

Code of hygienic practice for precooked and cooked food in mass catering

This code deals with the hygienic requirements for cooking raw foods and handling cooked and precooked foods intended for feeding large groups of people, such as children in schools, the older either in old peoples homes or by means of "meals on wheels" patients in

nursing homes and hospital, persons in prisons, school and similar institutions.

20 Page Gr-XB AF

BDS CAC RCP 45:2008

Code of Practice for the reduction of Aflatoxin B1 In Raw Materials and Supplemental Feeding stuffs for Milk Producing Animals

04 Page Gr-XA AF

BDS CAC RCP 48:2008

Code of Hygienic Practice for Bottled/Packaged Drinking Waters (Other Than Natural Mineral Waters)

This Code recommends general techniques for collecting, processing, packaging, storing, transporting, distributing, and offering for sale a variety of drinking waters (other than natural mineral water) for direct consumption. Recommendations concerning natural mineral water are provided in a separate Code (Recommended International Code of Hygienic Practice for the Collecting, Processing and Marketing of Natural Mineral Waters (CAC/RCP 33-1985).

09 Page Gr-XA AF

BDS CAC RCP 52:2008

Code of Practice for Fish And Fishery Products

This Code of practice applies to the growing, harvesting, handling, production, processing, storage transportation and retail of fish, shellfish and aquatic invertebrates and products thereof from marine and freshwater sources, **which are intended for human consumption**

98 Page Gr-XE AF

BDS CAC RCP 53:2008

Code of Hygienic Practice for Fresh Fruits and Vegetables

This code of practice covers general hygienic practices for the primary production and packing of fresh fruits and vegetables cultivated for human consumption in order to produce a safe and wholesome product: particularly for those intended to be consumed raw. Specifically, this code is applicable to fresh fruits and vegetables grown in the field (with or without cover) or in protected facilities (hydroponic systems, greenhouses). It concentrates on microbial hazards and addresses physical and chemical hazards only in so far as these relate to GAPs and GMPs.

26 Page Gr-XC AF

BDS CAC RCP 54:2008

Code Of Practice on Good Animal Feeding

The objective of this Code is to help ensure the safety of food for human consumption through adherence to good animal feeding practice at the farm level and good manufacturing practices (GMPs) during the procurement, handling, storage, processing and distribution of animal feed and feed ingredients for food producing animals.

12 Page Gr-XB AF

BDS CAC RCP 57:2008

Code Of Hygienic Practice for Milk and Milk Products

This Code applies to the production, processing and handling of milk and milk products as defined in the General Standard for the Use of Dairy Terms¹(CODEX STAN 206-1999). Where milk products are referred to in the code it is understood that this term also includes composite milk products. The scope of this Code does not extend to the production of raw drinking milk.

57 Page Gr-XE AF

BDS CAC GL 1:2008

Guidelines on Claims

For the purpose of these guidelines, a claim is any representation which states, suggests or implies that a food has particular characteristics relating to its origin, nutritional properties, nature, production, processing, composition or any other quality.

03 Page Gr-XA AF

BDS CAC GL 8:2011

Guidelines on Formulated Supplementary Foods for Older Infants and Young Children

The provisions of these Guidelines apply to Formulated Supplementary Foods for Older Infants and Young Children as defined in Section 3.1 below.

10 page Gr-XA AF

BDS CAC GL 13:2003

Guidelines for the preservation of raw milk by use of lactoperoxidase system

This code practice describes the use of the lactoperoxidase system for preventing bacterial spoilage of raw milk (bovine and buffalo)during collection and' transportation to a dairy processing plant.

06 Page Gr-XA AF

BDS CAC GL 18:1998

Guidelines for the application of the hazard analysis and critical control point (HACCP) system

This guideline identifies specifies hazards and preventive measures for their control to ensure the safety that focus or preventive measures rather than relying mainly on and product testing.

08 Page Gr-XA AF

BDS CAC GL 21:2008

Principles for the establishment and application of microbiological criteria for foods

04 Page Gr-XA AF

BDS CAC GL 23:2008

Guidelines for Use of Nutrition and Health Claims

This guideline relate to the use of nutrition and health claims in food labelling and, where required by the authorities having jurisdiction, in advertising¹. 1.2 These guidelines apply to all foods for which nutrition and health claims are made without prejudice to specific provisions under Codex standards or Guidelines relating to Foods for Special Dietary Uses and Foods for Special Medical Purposes. 1.3 These guidelines are intended to

supplement the Codex General Guidelines on Claims and do not supersede any prohibitions contained therein. 1.4 Nutrition and health claims shall not be permitted for foods for infants and young children except where specifically provided for in relevant Codex standards or national legislation.

05 Page Gr-XA AF

BDS CAC GL 24:2003

General Guidelines for use of the term "Halal"

This guideline recommend measures to be taken on the use of halal claims in food labeling.

07 Page Gr-XA AF

BDS CAC GL 26:2008

Guidelines for the Design, Operation, Assessment and Accreditation of Food Import and Export Inspection and Certification Systems

Audit is a systematic and functionally independent examination to determine whether activities and related results comply with planned objectives

13 Page Gr-XB AF

BDS CAC GL 27:2008

Guidelines for the Assessment of the Competence of Testing Laboratories Involved in the import and Export Control of Food

This guideline provides a framework for the implementation of quality assurance measures to ensure the competence of testing laboratories involved in the import and export control of foods. 2. These guidelines are intended to assist countries in the application of requirements for trade in foodstuffs in order to protect the consumers and to facilitate fair trade.

03 Page Gr-XA AF

BDS CAC GL 34:2008

Guidelines for the Development of Equivalence Agreements Regarding Food Import and Export Inspection and Certification Systems

This document provides practical guidance for governments desiring to enter into bilateral or multilateral equivalence agreements concerning food import and export inspection and certification systems. Such agreements may be binding instruments taking the form of "international agreements" under the Vienna Convention on the Law of Treaties, or they may be other less formal arrangements such as memoranda of understanding.

09 Page Gr-XA AF

BDS CAC GL 47:2009

Guidelines for Food Import Control Systems

This document provides a framework for the development and operation of an import control system to protect consumers and facilitate fair practices in food trade while ensuring unjustified technical barriers to trade are not introduced. The Guideline is consistent with the Codex Principles for Food Import and Export Inspection and Certification¹ and provides specific information about imported food control that is an adjunct to the Guidelines for the Design, Operation,

Assessment and Accreditation of Food Import and Export Inspection and Certification Systems².

13 Page Gr-XB AF

BDS CAC GL 48:2008

Model Certificate for Fish and Fishery Products

The model certificate apply to fish and fishery products presented for international trade that meet food safety, wholesomeness and conformity to food production requirements of the importing country. Animal and plant health matters are not covered. Where administratively and economically feasible, certificates may be issued in an electronic format provided that the relevant authorities of both the importing and exporting country are satisfied with the security of the certification system.

16 Page Gr-XB AF

BDS CAC GL 50:2008

General Guidelines on Sampling

This Guideline define at first in Section 2 general notions on food sampling, applicable in any situations, and then in Sections 3 to 5 cover certain situations of statistical food control, for whose certain sampling plans have been selected.

69 Page Gr-XE AF

BDS CAC GL 51:2008

Guidelines for Packing Media for Canned Fruits

This guideline describes the composition and labelling requirements for packing media for use with canned fruits.

04 Page Gr-XA AF

BDS CAC GL 55:2011

Guidelines for Vitamin And Mineral Food Supplements

This guideline apply to vitamin and mineral food supplements intended for use in supplementing the daily diet with vitamins and/or minerals.

03 page Gr-XA AF

BDS CAC A-1:2002

Butter

This Standard applies to butter intended for direct consumption or for further processing in conformity with the description in section 2 of this Standard.

06 Page Gr-XA AF

BDS CAC A-2:2008

Milk Fat Products

(Cancels and replaces by BDS 908:2012)

06 Page Gr-XA AF

BDS CAC A-3:2008

Evaporated Milks

This Standard applies to evaporated milks, intended for direct consumption or further processing, in conformity with the description in Section 2 this Standard.

03 Page Gr-XA AF

BDS CAC A-4:2002

Sweetened Condensed milk

This Standard applies to sweetened condensed milk, intended for direct consumption or further processing in conformity with the description in section 2 of this Standard.

03 Page Gr-XA AF

BDS CAC A-6:2008

Cheeses

This Standard applies to all products intended for direct consumption or further processing, in conformity with the definition of whey chesses in Section 2 of this Standard. Subject to the provisions of this Standard, Codex Standards for individual varieties of chesses may contain provisions which are more speciefies than those in this standard.

05 Page Gr-XA AF

BDS CAC A-7:2008

Whey Cheeses

This Standard applies to all products intended for direct consumption or further processing, in conformity with the definition of whey chesses in Section 2 of this Standard. Subject to the provisions of this Standard, Codex Standards for individual varieties of whey chesses may contain provisions which are more speciefies than those in this standard.

03 Page Gr-XA AF

BDS CAC A-8(a):2008

Named Variety Process (ed) Cheese And Spread able Process (ed) Chasse

Named variety Process (ed) cheese and spread able process(ed)cheese are made by grinding, mixing, melting and emulsifying with the aid of heat and emulsifying agents one or more varieties of cheese, with or without the addition of foodstuffs in accordance with paragraph 2

BDS CAC 12:2007

Honey

This standard prescribes the requirements of honey

06 Page Gr-XA AF

BDS CAC 13:2008**Preserved Tomatoes**

This Standard applies to the products, as defined in Section 2 below, and offered for direct consumption, including for catering purposes or for repacking if required. This Standard also applies to the product when indicated as being intended for further processing. The Standard does not include dried tomatoes and preserved tomatoes containing other vegetables such as pepper and onions in quantities that materially alter the flavour, aroma and taste of the tomato component.

06 Page Gr-XA AF

BDS CAC 16:2009**Canned Green Beans and Canned Wax beans**

Canned beans is the product (a) prepared from succulent pods of the fresh green bean or was bean plant conforming to the characteristics of phase-out vulgarism L. and Phaseolus cockiness L. form which strings, if any, and stems have been removed, (b) packed with water or other suitable liquid medium, nutritive sweeteners, seasoning, and other ingredients, appropriate to the product, and (c) processed by heat, in an appropriate manner, before or after being sealed in a container, so as to prevent spoilage.

07 Page Gr-XA AF

BDS CAC 17:2008**Canned Applesauce**

This Standard applies to canned applesauce, as defined in Section 2 below, and offered for direct consumption, including for catering purposes or for repacking if required. It does not apply to the product when indicated as being intended for further processing.

03 Page Gr-XA AF

BDS CAC 19:2008**Edible Fats and Oils Not Covered By Individual Standards**

This Standard applies to oils and fats and mixtures thereof in a state for human consumption. It includes oils and fats that have been subjected to processes of modification (such as trans-etherification or hydrogenation) or fractionation.

This Standard does not apply to any oil or fat which is covered by one of the following: the Codex Standard for Named Animal Fats; the Codex Standard for Named Vegetable Oils; the Codex Standard for Olive Oils and Olive-pomace Oils.

06 Page Gr-XA AF

BDS CAC 23:2002**Edible sunflower seed oil**

This standard applies to edible sunflower seed oil but does not apply to sunflower seed oil which must be

subject to further processing in order to tender it suitable for human consumption.

09 Page Gr-XA AF

BDS CAC 26:2008**Edible Sesameseed Oil**

This standard applies to edible sesameseed oil but does not apply to sesameseed oil which must be subject to further processing in order to render it suitable for human consumption.

10 Page Gr-XA AF

BDS CAC 31:2008**Edible Tallow**

This standard applies to edible tallow, but does not apply to refined edible tallow so designated.

07 Page Gr-XA AF

BDS CAC 32:2008**Margarine**

This standard will not apply to any product which contains less than 80% fat and is not labelled in any manner which implies, either directly or indirectly, that the product in margarine.

05 Page Gr-XA AF

BDS CAC 33:2008**Olive Oils and Olive Pomace Oils**

This standard applies to olive oils and olive-pomace oils described in Section 2 presented in a state for human consumption.

09 Page Gr-XA AF

BDS CAC 36:2008**Quick Frozen Finfish, Undedicated and Eviscerated**

This standard shall apply to frozen finfish undedicated and eviscerated¹.

07 Page Gr-XA AF

BDS CAC 37:2008**Canned Shrimps or Prawns**

This standard applies to canned shrimps or canned prawns.¹ It does not apply to specialty products where shrimp constitutes less than 50% m/m of the contents.

08 Page Gr-XA AF

BDS CAC 38:2008**Edible Fungi and Fungus Products¹**

This standard contains general requirements applicable to all edible fungi, whether fresh or processed, permitted for sale by the competent authorities in the consuming countries, except canned cultivated mushrooms of the genus Agaricus. Different requirements for the products covered by this standard may be laid down in group of products standards or in individual standards.

13 Page Gr-XB AF

BDS CAC 39:2008**Dried Edible Fungi**

This standard applies to dried fungi (including freeze-dried fungi), whole or sliced, of all edible species, after preparation and packaging.1

04 Page Gr-XA AF

BDS CAC 40:2008

Fresh Fungus "Chanterelle"

This Standard applies to edible, wild growing fungi of the species *Cantharellus cibarius*, supplied fresh, after sorting and packing.

03 Page Gr-XA AF

BDS CAC 42:2007

Canned Pineapple

This standard prescribes the requirements of Canned Pineapple.

09 Page Gr-XA AF

BDS CAC 48:2008

Apple Juice Preserved Exclusively by Physical Means

Unfermented but fermentable juice, intended for direct consumption, obtained by a mechanical process from sound, ripe apples (*pyrus malus* L.) preserved exclusively by physical means. The juice may be turbid or clear. The juice may be clarified. The juice may have been concentrated and later reconstituted with water suitable for the purpose of maintaining the essential composition and quality factors of the juice.

Powdered Dextrose(Icing Dextrose)

This standard prescribes the quality criteria for powdered Dextrose (Icing Dextrose).

02 Page Gr-XA AF

BDS CAC 55:2008

Canned Mushrooms

Canned mushrooms is the product:

(a) prepared from fresh mushrooms conforming with the characteristics of cultivated varieties (cultivars) of the genus *Agaricus* (*Psalliota*), including *A. bisporus*, which mushrooms shall be in good condition and after cleaning and trimming shall be sound;

(b) packed with water and/or juice exuding from the mushrooms or other suitable liquid medium, seasonings, and other ingredients, appropriate to the product; and

(c) processed by heat in an appropriate manner, before or after being sealed in a container, so as to prevent spoilage.

07 Page Gr-XA AF

BDS CAC 56:2008

Canned Asparagus

Canned asparagus is the product (a) prepared from the edible portion of stalks of varieties of the asparagus plant conforming to the characteristics of *asparagus officinalis* L., and may be peeled or unpeeled; (b) packed with water or other suitable liquid medium and may contain other ingredients appropriate to the product; and (c) processed by heat in an appropriate manner, before or after being sealed in a container, so as to prevent spoilage.

09 Page Gr-XA AF

BDS CAC 57:2008

Processed Tomato Concentrates

This Standard applies to the product as defined in Section 2 below, and offered for direct consumption, including for catering purposes or for repacking if required. This Standard also applies to the product when indicated as being intended for further processing. The Standard does not include products that contain seeds and skins such as "pizza toppings" and other "homestyle" products as well as products commonly known as tomato sauce, chilli sauce, and ketchup, or similar products which are highly seasoned products of varying concentrations containing characterising ingredients such as pepper, onions, vinegar, etc., in quantity that materially alter the flavour, aroma and taste of the tomato component.

06 Page Gr-XA AF

BDS CAC 58:2009

Canned Green Peas

This Standard Canned green peas is the product (a) prepared from fresh or frozen clean, substantially sound, whole shelled immature (green) seeds of garden pea varieties (cultivars) conforming with the characteristics of the species *pisum sativum* L., but excluding the subspecies *macrocarpon*.

06 Page Gr-XA AF

BDS CAC 61:2009

Canned Pears

This Standard applies to canned pears, as defined in Section 2 below, and offered for direct consumption, including for catering purposes or for repacking if required. It does not apply to the product when indicated as being intended for further processing.

06 Page Gr-XA AF

BDS CAC 62:2008

Canned Strawberries

06 Page Gr-XA AF

BDS CAC 66:2008

Table Olives

This standard applies to the fruit of the cultivated olive-tree (*Olea europaea sativa* Hoffg. Link) which has been suitably treated or processed and which is offered for direct consumption as table olives. It also covers olives packed in bulk containers which are intended for repacking into consumer size containers.

19 Page Gr-XB AF

BDS CAC 72:2008

Infant formula and formulas for special medical purposes intended for infant

This standards applying to infant formula in liquid or powdered from intended for use, where necessary, as a substitute for human milk in meeting the normal nutritional requirements of infants. It also provides a standard for formulate intended for infants with special nutritional requirements, except for certain provisional which must be modified to meet those special requirements.

12 Page Gr-XB AF

BDS CAC 74:2007

Processed cereal based foods for Infants and Young Children

This standard prescribes the essential composition of and quality criteria for processed cereal based foods for Infants and Young Children.

BDS CAC 254:2009

Certain Canned Citrus Fruits

This standard applies to certain canned citrus fruits, as defined in Section 2 below, and offered for direct consumption, including for catering purposes or for repacking if required. It does not apply to the product when indicated as being intended for further processing.

07 Page Gr-XA AF

BDS CAC 260:2014

Pickled Fruits and Vegetables

This standard applies to products, as defined in Section 2 below, and offered for direct consumption, including for catering purposes or for repacking if required. The products covered by this Standard include, but are not limited to onions, garlic, mango, radish, ginger, beetroot, royal plum, peppers, hearts of palm, cabbage, lettuce, lemons, baby corn (young corn) and green mustard (*Brassica juncea* ssp). It does not apply to the product when indicated as being intended for further processing.

06 Page Gr-XA AF

BDS CAC 263:2008

Cheddar

This standard applies to Cheddar intended for direct consumption or for further processing in conformity with the description in Section 2 of this Standard.

05 Page Gr-XA AF

BDS CAC 275:2008

Cream Cheese

This standard applies to Cream Cheese intended for direct consumption or for further processing in conformity with the description in Section 2 of this Standard.

In some countries, the term “cream cheese” is used to designate cheeses, such as high fat ripened hard cheese, that do not conform to the description I Section 2. This Standard does not apply to such cheeses.

06 Page Gr-XA AF

Microbiology of food and animal feeding stuffs- Horizontal method for the detection of presumptive pathogenic *Yersinia enterocolitica*

This international standard specifies a horizontal method for the detection of *Yersinia enterocolitica* presumed to be pathogenic to human subjects. This International Standard is applicable to:

- products intended for human consumption and the feeding of animals, and
- environmental samples in the area of food production and food handling.

31 Page Gr-XC AF

BDS ISO 11212-1:2008

Starch and derived products- Heavy metals content- Part 1:Determination of arsenic content by atomic absorption spectrometry

This part of ISO 11212 specifies a method for the determination of the arsenic content of starch, including derivatives and by-products, by atomic absorption spectrometry with hyride generation.

06 Page Gr-XA AF

BDS ISO 11212-2:2008

Starch and derived products - Heavy metals content - Part 2: Determination of mercury content by atomic absorption spectrometry

This part of ISO 11212 specifies a method for the determination of the mercury content of starch, including derivatives and by-products, by atomic absorption spectrometry with cold-vapour generation.

06 Page Gr-XA AF

BDS ISO 1212-3:2008**Starch and derived products - Heavy metals content - Part 3: Determination of lead content by atomic absorption spectrometry with electrothermal atomization**

This part of ISO 11212 specifies a method for the determination of the lead content of starch, including derivatives and by-products, by atomic absorption spectrometry with electrothermal atomization.

06 Page Gr-XA AF

BDS ISO 11212-4:2008**Starch and derived products- Heavy metals content Part 4: Determination of Cadmium content by atomic absorption spectrometry with electrothermal atomization**

This part of ISO 11212 specifies a method for the determination of the Cadmium content of starch, including derivatives and by-products, by atomic absorption spectrometry with electrothermal atomization.

06 Page Gr-XA AF

BDS ISO 11213:2008**Modified starch- Determination of acetyl content- Enzymatic method**

This international standard specifies an enzymatic method for the determination of the acetyl content of modified starch, both granular and soluble in cold water. Total and free acetyl contents are determined and the bound acetyl content is calculated. The method is suitable for determining acetyl contents up to 2 % (m/m).

08 Page Gr-XA AF

BDS ISO 11214:2008**Modified starch- Determination of carboxyl group content of oxidized starch**

This International Standard specifies a method for the determination of the carboxyl group content of oxidized starch. The method is suitable for determining carboxyl group contents up to 1 % (m/m).

05 Page Gr-XA AF

BDS ISO 11287:2012**Green tea- Definition and basic requirements**

This international standard specifies the parts of a named plant that are suitable for making green tea for consumption as a beverage and the chemical requirements for green tea that are used to indicate that tea from that source has been produced in accordance with good production practice.

06 Page Gr-XA AF

BDS ISO 11290-1:2009**Microbiology of food and animal feeding stuffs - Horizontal method for the detection and enumeration of Listeria monocytogenes- Part 1: etection method**

This part of ISO 11290 specifies a horizontal method for the detection of Listeria monocytogenes. Subject to the limitations discussed in the introduction, this part of ISO

11290 is applicable to products intended for human consumption or animal feeding.

16 Page Gr-XB AF

BDS ISO 11290-2:2009**Microbiology of food and animal feeding stuffs- Horizontal method for the detection and enumeration of Listeria monocytogenes- Part 2: Enumeration method**

This part of ISO 11290 specifies a horizontal method for the enumeration of Listeria monocytogenes.

20 Page Gr-XB AF

BDS ISO 11543:2008**Modified starch- Determination of hydroxypropyl content- Method using proton nuclear magnetic resonance (NMR) spectrometry**

This international standard specifies a proton NMR spectrometric method for the determination of the hydroxypropyl content of granular modified starch.

07 Page Gr-XA AF

BDS ISO 11798:2006**Information and socumentation- Permanence and durability of writing, printing and copying on paper- Requirements and test methods**

This international standard specifies requirements and test methods for evaluation of the permanence and durability of writing, printing and copying on paper staved in libraries, archives and other protected environments for long periods of time.

12 Page Gr-XB AF

BDS ISO 11866-1:2009**Milk and milk products- Enumeration of presumptive Escherichia coli- Part 1: Most probable number technique using 4-methylumbelliferyl-β-D-glucuronide (MUG)**

This part of ISO 11866-IDF 170 specifies a combined method for the enumeration of presumptive Escherichia coli and of presumptive coliforms by means of a culture technique involving a liquid medium with MUG, and calculation of the number of presumptive Escherichia coli and/or coliforms per gram or per millilitre by the most probable number (MPN) technique after incubation at 30 °C.

11 Page Gr-XB AF

BDS ISO 11866-2:2009**Milk and milk products- Enumeration of presumptive Escherichia coli- Part 2: Colony- count technique at 44° C using membranes**

This part of ISO 11866 -IDF 170 specifies a method for the enumeration of presumptive Escherichia coli by means of a colony-count technique at 44 °C.

09 Page Gr-XA AF

BDS ISO 12078:2009**Anhydrous milk fat- Determination of sterol composition by gas liquid Chromatography (Reference method)**

This international standard specifies a gas liquid chromatographic reference method for the determination of the sterol composition of anhydrous milk fat extracted from dairy products.

16 Page Gr-XB AF

BDS ISO 14502-1:2015**Determination of substances characteristic of green and****black tea- Part 1: Content of total polyphenols in tea Colorimetric method using Folin- Ciocalteu reagent**

This part of ISO 14502 specifies a method for the determination of the total polyphenol content of leaf tea and instant tea by a colorimetric assay using Folin-Ciocalteu phenol reagent [4]. It is applicable to both green and black tea products.

10 Page Gr-XA AF

BDS ISO 14673-1:2009**Milk and milk products- Determination of nitrate and nitrite contents- Part 1:Method using cadmium reduction and spectrometry**

This part of ISO 14673-IDF 189 specifies a method for the determination of the nitrate and nitrite contents of milk and milk products by cadmium reduction and spectrometry. The method is applicable to

- whole and partly skimmed and skimmed dried milk;
- hard, semi-hard and soft cheeses;
- processed cheese;
- whey cheese, caseins and caseinates, and dried whey.

13 Page Gr-XB AF

BDS ISO 14673-2:2009**Milk and milk products- Determination of nitrate and nitrite contents- Part 2: Method using segmented flow analysis (Routine method)**

This part of ISO 14673-IDF 189 specifies a routine method for the determination of the nitrate and nitrite contents of milk and milk products by segmented flow analysis. The method is applicable to milk, cheese, and liquid and dried milk products and infant foods

14 Page Gr-XB AF

BDS ISO 14673-3:2009**Milk and milk products- Determination of nitrate and nitrite contents- Part 3: Method using cadmium reduction and flow injection analysis with in-line dialysis (Routine method)**

This part of ISO 14673-IDF 189 specifies a routine method for the determination of the nitrate and nitrite contents of milk and milk products by cadmium reduction and flow injection analysis (FIA).

10 Page Gr-XA AF

BDS ISO 15189 :2012**Medical laboratories- Particular requirements for quality and competence**

This international standard specifies requirements for quality and competence particular to medical laboratories.

35 Page Gr-XD AF

BDS ISO 15598:2015**Tea – Determination of crude fibre content**

This International Standard specifies a method for the determination of crude fibre content in tea.

07 Page Gr-XA AF

BDS ISO 16654:2009**Microbiology of food and animal feeding stuffs- Horizontal method for the detection of Escherichia coli O157**

This international standard specifies a horizontal method for the detection of Escherichia coli serogroup O157. Subject to the limitations discussed in the introduction, this International Standard is applicable to products intended for human consumption or for animal feeding stuffs.

13 Page Gr-XB AF

BDS ISO 17192:2009**Milk powder-Determination of soy and pea proteins using capillary electrophoresis in the presence of sodium dodecyl sulfate (SDS-CE)- Screening method**

This international standard describes a method for the determination of the soy and pea protein isolates –in low-heat milk powder, using capillary electrophoresis in the presence of sodium dodecyl sulfate (SDS-CE)

13 Page Gr-XB AF

BDS ISO 17792:2009**Milk, milk products and mesophilic starter cultures- Enumeration of citratefermenting lactic acid bacteria-Colonycount technique at 25 °C.**

This international standard specifies methods for the enumeration of citrate-fermenting lactic acid bacteria using a colony-count technique at 25° C.

12 Page Gr-XB AF

BDS ISO 18252:2009**Anhydrous milk fat- Determination of sterol composition by gas liquid chromatography (Routine method)**

This international standard specifies a routine gas liquid chromatographic method for the determination of the sterol composition in anhydrous milk fat extracted from dairy products directly on the unsaponifiable matter, without purification and derivatization.

13 Page Gr-XB AF

BDS ISO 18329:2009**Milk and milk products- Determination of furosine content- Ion- pair reverse- phase high- performance liquid chromatography method**

This international standard specifies a method for the quantitative determination of furosine content milk and milk products. The method is particularly applicable to raw or heat-treated milk and to cheese.

11 Page Gr-XB AF

BDS ISO 18593:2009

Microbiology of food and animal feeding stuffs- Horizontal methods for sampling techniques from surfaces using contact plates and swabs

This international standard specifies horizontal methods for sampling techniques using contact plates or swabs on surfaces in the food industry environment (and food processing plants), with a view of detecting or enumerating viable microorganisms.

08 Page Gr-XA AF

BDS ISO 20837:2009

Microbiology of food and animal feeding stuffs- Polymerase chain reaction (PCR) for the detection of food-borne pathogens- Requirements for sample preparation for qualitative detection

This international standard provides criteria and examples for sample preparation in order to obtain PCR compatible samples or nucleic acids of suitable quality and quantity for PCR.

07 Page Gr-XA AF

BDS ISO 20838:2009

Microbiology of food and animal feeding stuffs- Polymerase chain reaction (PCR) for the detection of food-borne pathogens- Requirements for amplification and detection for qualitative methods

This international standard provides the overall framework for qualitative methods for the detection of food borne pathogens using the polymerase chain reaction (PCR).

07 Page Gr-XA AF

BDS ISO 21187:2009

Milk- Quantitative determination of bacteriological quality- Guidance for establishing and verifying a conversion relationship between routine method results and anchor method results

This international standard specifies guidelines for the establishment of a conversion relationship between the results of a routine method and an anchor method, and its verification for the quantitative determination of the bacteriological quality of milk.

13 Page Gr-XB AF

BDS ISO 21807:2009

Microbiology of food and animal feeding stuffs- Determination of water activity

This international standard specifies basic principles and requirements for physical methods of determining the water activity of products intended for human consumption and the feeding of animals.

07 Page Gr-XA AF

BDS ISO TS 21872-1:2009

Microbiology of food and animal feeding stuffs- Horizontal method for the detection of potentially

enteropathogenic Vibrio spp- Part 1: Detection of Vibrio parahaemolyticus and Vibrio cholerae

This part of ISO TS 21872 specifies a horizon International method for the two main pathogenic Vibrio species, causing intestinal illness in humans: V. parahaemolyticus and V. cholerae.

19 Page Gr-XB AF

BDS ISO TS 21872-2:2009

Microbiology of food and animal feeding stuffs- Horizontal method for the detection of potentially enteropathogenic Vibrio spp- Part 2: Detection of species other than Vibrio parahaemolyticus and Vibrio cholerae

This part of ISO TS 21872 specifies a horizon International method for detection of the enteropathogenic Vibrio species, causing illness in or via the intestinal tract, other than Vibrio parahaemolyticus and Vibrio cholerae.

24 Page Gr-XC AF

BDS ISO 22000 :2008

Food safety management systems- Requirements for any organization in the food chain

This international standard specifies requirements for a food safety management system where an organization in the food chain needs to demonstrate its ability to control food safety hazards in order to ensure that food is safe at the time of human consumption. It is applicable to all organizations, regardless of size, which are involved in any aspect of the food chain and want to implement systems that consistently provide safe products. The means of meeting any requirements of this International Standard can be accomplished through the use of internal and/or external resources.

32 Page Gr-XD AF

BDS ISO 22174:2009

Microbiology of food and animal feeding stuffs- Polymerase chain reaction (PCR) for the detection of food-borne pathogens- General requirements and definitions.

This international standard specifies the general requirements for the in vitro amplification of nucleic acid sequences (DNA or RNA). It is applicable to the testing of foodstuffs and isolates obtained from foodstuffs for food-borne pathogens using the polymerase chain reaction (PCR).

11 Page Gr-XB AF

BDS ISO 22662:2009

Milk and milk products- Determination of lactose content by high-performance liquid chromatography (Reference method)

This international standard specifies the reference method for the determination of lactose content of raw milk, heat-treated milks, dried milk and raw and pasteurized cream. The method is not applicable to fermented milks and milks to which oligosaccharides have been added.

10 Page Gr-XA AF

BDS ISO TS 6090:2009**Milk and dried milk, buttermilk and buttermilk powder, whey and whey powder- Detection of phosphatase activity**

This technical specification specifies a screening method for the detection of the phosphatase activity in cow's milk and dried milk, buttermilk and buttermilk powder, and whey and whey powder.

09 Page Gr-XA AF

BDS ISO TS 11133-1:2009**Microbiology of food and animal feeding stuffs- Guidelines on preparation and production of culture media —Part 1: General guidelines on quality assurance for the preparation of culture media in the laboratory**

This European prestandard provides the general terminology related to quality assurance of the preparation of culture media and specifies the minimum requirements to be used for the microbiological analysis of products intended for human consumption or animal feeding.

15 Page Gr-XB AF

BDS ISO TS 11133-2:2009**Microbiology of food and animal feeding stuffs- Guidelines on preparation and production of culture media- Part 2: Practical guidelines on performance testing of culture media**

This Technical Specification sets criteria and methods for the performance testing of culture media. This Technical Specification applies to:

- commercial bodies producing and/or distributing ready-to-use or semi-finished reconstituted or dehydrated media to microbiological laboratories;
- non- commercial bodies supplying media to third parties;
- microbiological laboratories preparing culture media for their own use and evaluating the performance of these media.

23 Page Gr-XC AF

BDS ISO TS 16649-3:2009**Microbiology of food and animal feeding stuffs- Horizontal method for the enumeration of β -glucuronidase-positive Escherichia coli —Part 3: Most probable number technique using 5-bromo-4-chloro-3-indolyl- β -Dglucuronide**

This Technical Specification specifies a horizontal method for the enumeration of β -glucuronidase-positive Escherichia coli, by means of the liquid-medium culture technique and calculation of the most probable number (MPN) after incubation at 37 °C, then at 44 °C.

08 Page Gr-XA AF

BDS ISO TS 20836:2009**Microbiology of food and animal feeding stuffs- Polymerase chain reaction (PCR) for the detection of food-borne pathogens- Performance testing for thermal cyclers**

This technical specification provides basic requirements for the installation, performance and maintenance of

thermal cyclers. Although thermal cyclers are robust technical equipment, they do require regular maintenance. Their cooling/heating elements, either Peltier or other technology, have a limited lifetime. Proper functioning of the cooling/heating element depends both on the quality of the cooling/heating devices and proper use and care.

ENGINEERING DIVISION:**BDS EN 196-1:2013****Methods of testing Cement Part-1 Determination of strength (First Revision)**

This document describes the method for the determination of the compressive and, optionally, the flexural strength of cement mortar. The method applies to common cements and to other cements and materials, the standards for which call up this method It may not apply to other cement types that have, for example, a very short initial setting time.

20 Page Gr-XB CE

BDS EN 196-2:2013**Methods of testing Cement Part-2 Chemical analysis of cement**

This document specifies the methods for the chemical analysis of cement. This document describes the reference methods and, in certain cases, an alternative method which can be considered to be equivalent. In the case of a dispute, only the reference methods are used.

30 Page Gr-XC CE

BDS EN 196-3:2013**Methods of testing Cement Part-3 Determination of setting time and soundness (First Revision)**

This document specifies the methods for determining standard consistence, setting times and soundness of cements. The method applies to common cements and to other cements and materials, the standards for which call up this method. It may not apply to other cement types

that have, for example, a very short initial setting time. The method is used for assessing whether the setting time and soundness of a cement is in conformity with its specification.

08 Page **Gr-XA** **CE**

BDS EN 196-5:2013

Methods of testing Cement Part-5 Pozzolonacity test for pozzolanic cement (First Revision)

This European Standard specifies the method of measuring the pozzolanicity of pozzolanic cements conforming to (1) EN 197-1 . This Standard does not apply to Portland pozzolana cements or to pozzolanas.

07 Page **Gr-XA** **CE**

BDS EN 196-6:2013

Methods of testing Cement Part-6: Determination of fineness (First Revision)

This European Standard describes three methods for determining the fineness of cement. The sieving method serves obly to demonstrate the presence of coarse cement particles. This method is primarily suited to checking and controlling the productin process.

10 Page **Gr-XA** **CE**

BDS EN 196-7:2013

Methods of testing Cement

Part-7: Methods of taking and preparing samples of cement (First Revision)

This European Standards describes the equipment to be used, the method to be follwed and the provisions for taking samples of cement representative of given lots for testing to assess the quality of products prior to during or after delivery.

10 Page **Gr-XA** **CE**

BDS EN 196-8:2013

Methods of testing Cement-Part-8:Heat of hydration-Solution method

This European Standards describes a method of solutin calorimetry, also known as the solutin method. The heat of hydration is expressed in joules per gram of cement.

10 Page **Gr-XA** **CE**

BDS EN 196-9:2013

Methods of testing Cement- Part-9:Heat of hydration- Semi-adiabatic method

This European Standards describes a method of measuring the heat of hydration of Semi-adiabaticcalorimetry, also known as the Langavant method. The aim of the test is the continuous measurement of the heat of hydration of cement during the first few days. The heat of hydratin is expressed in joules per gram of cement.

17 Page **Gr-XB** **CE**

BDS EN 196-21:2003

Methods of testing Cement- Part-21: Determination of the chloride aud alkali content of cement

This Bangladesh Standard specifies methods of determining the chloride, carbon dioxide and alkali content of cement.

15 Page **Gr-XB** **CE**

BDS EN 197-1:2003

Cement Part-1 Composition, specification and conformity criteria for common cements (Reaffirmed 2010)

EN 197-1 defines and gives the specifications of 27 distinct common cement products and their constituents. The definition of each cement includes the proportions in which the constituents are to be combined to produce these distinct products in a range of six strength classes. The definition also includes requirements the constituents have to meet and the mechanical, physical and chemical requirements of the 27 products and strength classes.

43 Page **Gr-XE** **CE**

BDS EN 197-2:2003

Cement Part-2: Conformity Cement evaluation

EN 197-2 specifies the scheme for the evaluation of conformity of cements to their corresponding product specification standards, including certification of conformity by a certification body.

CE

BDS EN 200:2009

Sanitary tapware- Single taps and combination taps for water supply systems of type 1 and type 2 General technical specification

Specifies:

- a) the field of application for pillar taps, bib taps, single and multi-hole combination taps for use in:
 - 1) a supply system of Type 1 (see Figure 1);
 - 2) a supply system of Type 2 (see Figure 2);
- b) the dimensional, leaktightness, pressure resistance, hydraulic performance, mechanical strength, endurance and acoustic characteristics of nominal size ½ and ¾ single taps and combination taps;
- c) Test methods to verify the characteristics. The tests described in this European Standard are type tests (laboratory tests) and not quality control tests carried out during manufacture.

45 Page **Gr-XE** **CE**

BDS EN 246:2009

Sanitary tapware- General specifications for flow rate regulators

Specifies:

- ¾ the dimensional, mechanical, hydraulic and acoustic characteristics with which flow rate regulators should comply;
- ¾ the procedures for testing these characteristics. This European Standard is applicable to:
 - ¾ flow rate regulators intended to be mounted on tapware used with sanitary appliances in toilets, washrooms and kitchens (single taps, combination tap assemblies, mechanical mixing valves, thermostatic mixing valves);
 - ¾ flow rate regulators used under the following pressure and temperature conditions:

15 Page **Gr-XA** **CE**

BDS EN 248:2009

Sanitary tapware- General specification for electrodeposited coatings of Ni-Cr

Specifies:

- ¾ the condition of the exposed surfaces of tapware ;
- ¾ the characteristics (resistance to corrosion, adherence) of

the surface coating; ¾ the tests for verifying these characteristics. It applies to all sanitary fittings (supply or waste fittings) which have a metallic Ni-Cr coating, whatever the nature of the substrate material.

Methods of testing fly ash

Part 1: Determination of free calcium oxide content

This Bangladesh Standard describes the procedure for the determination of free calcium oxide content in fly ash.

05 Page Gr-XA CE

BDS EN 477:2008

Unplasticized polyvinylchloride (PVC-U) profiles for the fabrication of windows and doors- Determination of the resistance to impact of main profiles by falling mass

Specifies a method for the determination of the resistance to impact by a falling mass at 210 8C of unplasticized polyvinylchloride (PVC-U) main profiles for the fabrication of windows and doors for the assessment of the extrusion.

04 Page Gr-XA CE

BDS EN 478:2008

Unplasticized polyvinylchloride (PVC-U) profiles for the fabrication of windows and doors- Appearance after exposure at 150 °C.

Specifies two methods for the determination of the effect of heat on unplasticized polyvinylchloride (PVC-U) profiles for the fabrication of windows and doors. The oven method is considered as the reference method.

03 Page Gr-XA CE

BDS EN 479:2008

Unplasticized polyvinylchloride (PVC-U) profiles for the fabrication of windows and doors- Determination of heat reversion

Specifies a method for the determination of the heat reversion of unplasticized polyvinylchloride (PVC-U) profiles for the fabrication of windows and doors by a test at 100 8C in an oven.

04 Page Gr-XA CE

BDS EN 490:2008

Concrete roofing tiles and fittings for roof covering and wall cladding- Product specifications

Specifies requirements for concrete roofing tiles and fittings for pitched foot coverings and wall cladding and lining. Concrete roofing tiles and fittings may incorporate surface coatings and glued concrete components.

26 Page Gr-XC CE

BDS EN 491:2008

Concrete roofing tiles and fittings for roof covering and wall cladding- Test methods

Specifies test methods for concrete roofing tiles and fittings conforming to EN 490. for assembly into pitched foot covering or external wall cladding or internal wall lining cladding.

28 Page Gr-XC CE

BDS EN 513:2008

Unplasticized polyvinylchloride (PVC-U) profiles for the fabrication of windows and doors-Determination of the resistance to artificial weathering

Specifies a method for exposing test pieces from an unplasticized polyvinylchloride (PVC-U) profile for the fabrication of windows and doors to a Zenon arc laboratory light source, in order to assess changes in impact strength and colour.

06 Page Gr-XA CE

BDS EN 514:2008

Unplasticized polyvinylchloride (PVC-U) profiles for the fabrication of windows and doors- Determination of the strength of welded corners and T-joints

Specifies two methods for the determination of the effect of heat on unplasticized polyvinylchloride (PVC-U) profiles for the fabrication of windows and doors. From the failure load the failure stress is calculated.

09 Page Gr-XA CE

BDS EN 515:2010

Aluminium and aluminium alloys- Wrought products-Temper designations

This European Standard establishes temper designations for all forms of wrought aluminium and aluminium alloys and for continuously aluminium and aluminium alloy drawing stock and strip intended to be wrought

17 Page Gr-XA CE

BDS EN 538:2008

Clay roofing tiles for discontinuous laying- Flexural strength test

Describes the test method used to evaluate the flexural strength of clay roofing tiles as defined in the standard EN 1304 Clay roofing tiles — Product definitions and specifications. Other physical characteristics are dealt with by the standard EN 539 Clay roofing tiles — Determination of physical characteristics: Impermeability and frost resistance

10 Page Gr-XA CE

BDS EN 539-1:2008

**Clay roofing tiles for discontinuous laying-
Determination of physical characteristics- Part 1:
Impermeability test**

Describes two test methods for testing the impermeability to water of clay floor tiles and fittings which can be considered as equivalent.

12 Page Gr-XB CE

BDS EN 580:2008

Plastics piping systems- Unplasticized poly (vinyl chloride) (PVC-U) pipes- Test methods for the resistance to dichloromethane at a specified temperature (DCMT)

Specifies a method for determining the resistance of unplasticized poly(vinyl chloride) (PVC-U) pipes to dichloromethane at a specified temperature (DCMT). This standard is applicable to PVC-U pipes, irrespective of their use.

04 Page Gr-XA CE

BDS EN 681-1:2008

Elastomeric seals- Material requirements for pipe joint seals used in water and drainage applications- Part 1: Vulcanized rubber

Specifies requirements for materials used in vulcanized rubber seals for:

- 1) cold potable water supply (up to 50 °C);
- 2) hot potable and non-potable water supply (up to 110 °C);
- 3) drainage, sewerage and rainwater systems (continuous flow up to 45 °C and intermittent flow up to 95 °C);

17 Page Gr-XA CE

BDS EN 681-2:2008

Elastomeric seals- Materials requirements for pipe joint seals used in water and drainage applications- Part 2: Thermoplastic elastomers

Specifies requirements for materials used for moulded seals only of thermoplastic elastomers (TPE) used in joints of:

- 1) thermoplastic piping systems for non pressure waste water discharge (intermittent flow up to 95 °C) inside buildings;
- 2) thermoplastic piping systems for non-pressure underground drainage and sewerage (continuous flow up to 45 °C and intermittent flow up to 95 °C);
- 3) thermoplastic rainwater piping systems. General requirements for finished joint seals are also given; any additional requirements called for by the particular application are specified in the relevant product standards taking into account that the performance of pipe joints is a function of the seal material properties, seal geometry and pipe joint design.

15 Page Gr-XA CE

BDS EN 727:2008

Plastics piping and ducting systems- Thermoplastics pipes and fittings- Determination of Vicat softening temperature (VST)

Specifies a method for determining the Vicat softening temperature (VST) of pipes and fittings (see note) of thermoplastics materials, based on method B of ISO

306:1987, i.e. using a force of (50 ± 1) N and a rate of temperature increase of 50 °C/h.

06 Page Gr-XA CE

BDS EN 743:2008

Plastics piping and ducting systems- Thermoplastics pipes- Determination of the longitudinal reversion

Specifies two methods for determining the longitudinal reversion of cylindrical thermoplastics pipes with smooth surfaces.

07 Page Gr-XA CE

BDS EN 744:2008

Plastics piping and ducting systems- Thermoplastics pipes- Test method for resistance to external blows by the round-the-clock method

Specifies a method for determining the resistance to external blows of thermoplastics pipes with circular cross sections by using the round-the-clock method.

10 Page Gr-XA CE

BDS EN 755-1:2010

Aluminium and aluminium alloys- Extruded rod/bar, tube and profiles- Part 1: Technical conditions for inspection and delivery

This document specifies the technical conditions for inspection and delivery of wrought aluminium and aluminium alloy extruded rod/bar, tube and profile for general engineering applications.

15 Page Gr-XB CE

BDS EN 755-2:2010

Aluminium and aluminium alloys. Extruded rod/bar, tube and profiles- Part 2: Mechanical properties

This document specifies the mechanical the mechanical property limits resulting from tensile testing applicable to aluminium and alloys extruded rod/bar, tube and profile. Technical conditions for inspection and delivery, including product and testing requirements, are specified in EN 755-1.

13 Page Gr-XB CE

BDS EN 755-3:2010

Aluminium and aluminium alloys- Extruded rod/bar, tube and profiles- Part 3 : Round bars, tolerances on dimensions and form

This document specifies the tolerances on dimensions and form for aluminium and aluminium alloy extruded round bars having diameters in the range from 8 mm up to 320 mm.

08 Page Gr-XA CE

BDS EN 755-4:2010

Aluminium and aluminium alloys- Extruded rod/bar, tube and profiles- Part 4: Square bars, tolerances on dimensions and form

This document (EN 755-4:2008) has been prepared by Technical Committee CEN/TC 132 "aluminium and aluminium alloys" the secretariat of which is held by AFNOR.

08 Page Gr-XA CE

BDS EN 755-5:2008-06**Aluminium and aluminium alloys- Extruded rod/bar, tube and profiles- Part 5 : Rectangular bars: tolerances on dimensions and form**

This document specifies the tolerances on dimensions and form for aluminium and aluminium alloy extruded Rectangular bars having thicknesses in the range from 2 mm up to 240 mm and widths in the range from 10 mm up to 600 mm.

10 Page **Gr-XA** **CE**

BDS EN 755-6:2010**Aluminium and aluminium alloys- Extruded rod/bar, tube and profiles- Part 6 : Hexagonal bars, tolerances on dimensions and form**

This document specifies the dimensions and form for aluminium and aluminium alloy extruded hexagonal bars having widths across flats in the range from 10 mm up to 220 mm.

08 Page **Gr-XA** **CE**

BDS EN 755-7:2010**Aluminium and aluminium alloys- Extruded rod/bar, tube and profiles- Part 7: Seamless tubes, tolerances on dimensions and form**

This document specifies the tolerances on dimensions and form for aluminium and aluminium alloy extruded seamless tubes, with an outside diameter (OD) from 8 mm to 450 mm (round tube see Figure 1) or with a cross section contained within a circumscribing circle (CD) from 10 mm to 350 mm (other than round tube see Figure 2), supplied in straight lengths.

16 Page **Gr-XB** **CE**

BDS EN 755-8:2010**Aluminium and aluminium alloys- Extruded rod/bar, tube and profiles- Part 8: Porthole tubes, tolerances on dimensions and form**

This document specifies the tolerances on dimensions and form for aluminium and aluminium alloy extruded porthole tubes, with an outside diameter (OD) from 8 mm to 450 mm (round tube see Figure 1) or with a cross section contained within a circumscribing circle (CD) from 10 mm to 350 mm (other than round tube see Figure 2), supplied in straight lengths.

16 Page **Gr-XB** **CE**

BDS EN 755-9:2010**Aluminium and aluminium alloys- Extruded rod/bar, tube and profiles- Part 9: Profiles, tolerances on dimensions and form**

(Cancels & replaces by BDS 1879:2014)

18 Page **Gr-XB** **CE**

BDS EN 763:2008**Plastics piping and ducting systems- Injection-moulded thermoplastics fittings- Test method for visually assessing effects of heating**

This standard specifies methods for visually assessing the effects of heating on injection-moulded thermoplastics fittings, including cracking or splitting induced by residual stress.

07 Page **Gr-XA** **CE**

BDS EN 771-3:2009**Specification for masonry units- Part 3:Aggregate concrete masonry units (dense and light-weight aggregates)**

Specifies the characteristics and performance requirements of aggregate concrete masonry units made from dense and lightweight aggregates or a combination of both for which the main intended uses are common, facing or exposed masonry in load bearing or non load bearing building and civil engineering applications.

22 Page **Gr-XC** **CE**

BDS EN 772-1:2009**Methods of test for masonry units- Part 1: Determination of compressive strength**

This European Standard specifies:

a method for determining the compressive strength of masonry units.

08 Page **Gr-XA** **CE**

BDS EN 772-2:2009**Methods of test for masonry units-Part 2: Determination of percentage area of voids in masonry units (by paper indentation)**

Specifies a method of determining the percentage area of voids in masonry units.

03 Page **Gr-XA** **CE**

BDS EN 772-3:2009**Masonry units- Part 3: Aggregate concrete masonry units**

Specifies the characteristics and performance requirements of aggregate concrete masonry units made from dense and lightweight aggregates or a combination of both for which the main intended uses are common, facing or exposed masonry in load bearing or non load bearing m building and civil engineering applications.

18 Page **Gr-XA** **CE**

BDS EN 772-6:2009**Methods of test for masonry units- Part 6: Determination of bending tensile strength of aggregate concrete masonry units**

Specifies a method of determining the bending tensile strength of aggregate concrete masonry units having a width less than 100 mm and a ratio of length to width greater than 10, in accordance with prEN 771-3.

05 Page **Gr-XA** **CE**

BDS EN 772-11:2009**Methods of test for masonry units- Part 11: Determination of water absorption of aggregate concrete, autoclaved aerated concrete, manufactured stone and natural stone masonry units due to capillary action and the initial rate of water bsorption of clay masonry units**

Specifies a method of determining the water absorption coefficient due to capillary action for aggregate concrete, autoclaved aerated concrete, natural stone and

manufactured stone masonry units and the initial rate of water absorption for clay masonry units.

05 Page **Gr-XA** **CE**

BDS EN 772-13:2009

Methods of test for masonry units -Part 13: Determination of net and gross dry density of masonry units (except for natural stone)

Specifies a method of determining the net and gross dry density of masonry units (except for natural stone masonry units)

06 Page **Gr-XA** **CE**

BDS EN 772-14:2009

Methods of test for masonry units- Part 14: Determination of moisture movement of aggregate concrete and manufactured stone masonry units

Specifies a method of measuring the moisture movement of aggregate concrete and manufactured stone masonry units between two specified extreme moisture conditions.

06 Page **Gr-XA** **CE**

BDS EN 772-16:2009

Methods of test for masonry units- Part 16: Determination of dimensions

Specifies a method of determining the overall dimensions, thickness and combined thickness of shells and webs, depth of voids and plane parallelism of the bed faces of masonry units.

06 Page **Gr-XA** **CE**

BDS EN 772-20:2009

Methods of test for masonry units- Part 20: Determination of flatness of faces of masonry units

Specifies a method for determining the flatness of surfaces of masonry units.

03 Page **Gr-XA** **CE**

BDS EN 849:2008

Valve for transportable gas cylinders and type testing of BDS EN 849

Specifies the requirements for gas cylinders valves and the method of testing such valves, for type approval.

29 Page **Gr-XC** **CE**

BDS EN 921:2008

Plastics piping systems- Thermoplastics pipes- Determination of resistance to internal pressure at constant temperature

Specifies a method for determining the resistance of thermoplastics pipes to constant internal water pressure at constant temperature. This standard is applicable to thermoplastics pipes intended for the transport of fluids.

12 Page **Gr-XB** **CE**

BDS EN 932-1:2011

Tests for general properties of aggregates- Part 1: Methods for sampling

This European Standard specifies methods for obtaining samples of aggregates from deliveries, preparation and processing plants including stocks, The aim of sampling is to obtain a bulk sample that is representative of the average properties of the batch.

18 Page **Gr-XB** **CE**

BDS EN 932-2:2011

Tests for general properties of aggregates- Part 2: Methods for reducing laboratory samples

This European Standard specifies methods for reducing laboratory samples of aggregates to test portions, when the test portion mass is:

- specified by a lower limit on the mass;
- specified by a tolerance around a target mass;
- determined precisely by the requirements of a test method.

08 Page **Gr-XA** **CE**

BDS EN 932-3:2011

Tests for general properties of aggregates -Part 3: Procedure and terminology for simplified petrographic description

This European Standard specifies a basic procedure for the petrographic examination of aggregates for the purposes of general classification. The procedure is not suitable for the detailed petrographical study of aggregates for specific end uses.

08 Page **Gr-XA** **CE**

BDS EN 932-5 :2011

Tests for general properties of aggregates- Part 5: Common Equipment and calibration

This European Standard specifies general requirements for common equipment, calibration procedures and reagents for the testing of the properties of aggregates.

10 Page **Gr-XA** **CE**

BDS EN 932-6:2011

Tests for general properties of aggregates- Part 6: Definitions of repeatability and reproducibility

This European Standard gives definitions of repeatability and reproducibility adapted from ISO 5725-1 to the specific situation of sampling and testing aggregates.

10 Page **Gr-XA** **CE**

BDS EN 933-1:2011

Tests for geometrical properties of aggregates - Part 1: Determination of particle size distribution - Sieving method

This Part of this European Standard specifies a method, using test sieves, for the determination of the particle size distribution of aggregates. A₁ It applies to aggregates of natural or artificial origin, including filler. lightweight aggregates, up to 90 mm nominal size, but excluding filler.

06 Page **Gr-XA** **CE**

BDS EN 933-2:2011

Tests for geometrical properties of aggregates- Part 2: Determination of particle size distribution –Test Sieves, nominal size of apertures

This Part of this European Standard specifies nominal aperture sizes and shape for woven wire cloth and perforated plate in test sieves used for test methods for aggregates. It applies to aggregates of natural or artificial origin including lightweight aggregates.

03 Page Gr-XA CE

BDS EN 933-3:2011

Tests for geometrical properties of aggregates- Part 3: Determination of particle shape- Flakiness index

This part of this European Standard specifies the procedure for the determination of the flakiness index of aggregate and applies to aggregates of natural or artificial origin, including lightweight aggregates. The test procedure specified in this part of this European Standard is not applicable to particle sizes of less than 4 mm or greater than 80 mm.

11 Page Gr-XB CE

BDS EN 933-4:2011

Tests for geometrical properties of aggregates- Part 4: Determination of particle size distribution- shape index

This standard describes the reference method used for type testing and in cases of dispute for the determination of the shape index of coarse aggregates. For other purposes, in particular factory production control, other methods may be used provided that an appropriate working relationship with the suitable reference method has been established.

10 Page Gr-XA CE

BDS EN 933-5:2011

Tests for geometrical properties of aggregates- Part 5: Determination of percentage of crushed and broken surfaces in coarse aggregate particles

This European Standard specifies a method for the determination of the percentage of particles with crushed and broken surfaces in a sample of natural coarse aggregate. It applies to gravel or mixed aggregate containing gravel.

08 Page Gr-XA CE

BDS EN 933-6:2011

Tests for geometrical properties of aggregates- Part 6: Assessment of surface characteristics- Flow coefficient of aggregates This European Standard specifies methods for the determination of the flow coefficient of coarse and fine aggregates. It applies to coarse aggregate of sizes between 4 mm and 20 mm and to fine aggregate of size up to 4 mm.

16 Page Gr-XB CE

BDS EN 933-7:2011

Tests for geometrical properties of aggregates- Part 7: Determination of shell content- Percentage of shells in coarse aggregates

This European Standard specifies a method for the determination of shell content of coarse aggregates. It applies to gravel or mixed aggregate containing gravel. The test method specified in this part of this European Standard is applicable to particle size fractions d_i/D_i where $D_i \leq 63$ mm and $d_i \geq 4$ mm.

06 Page Gr-XA CE

BDS EN 933-8:2011

Tests for geometrical properties of aggregates— Part 8: Assessment of fines—Sand equivalent test.

This European Standard specifies a method for the determination of the sand equivalent value of the 0/2mm fraction in fine aggregates and all-in aggregates. It applies to natural aggregates.

06 Page Gr-XA CE

BDS EN 933-9:2011

Tests for geometrical properties of aggregates- Part 9: Assessment of fines- Methylene blue test

This standard describes the reference method used for type testing and in cases of dispute for the determination of the methylene blue value of the 0/2 mm fraction in fine aggregates or all-in aggregates (MB).

13 Page Gr-XB CE

BDS EN 933-10:2011

Tests for geometrical properties of aggregates- Part 10: Assessment of fines- Grading of fillers (air jet sieving)

This European Standard describes the reference method used for type testing and in cases of dispute for determining the particle size distribution up to 2 mm size of natural or manufactured origin filler aggregate using air jet sieving. For other purposes, in particular factory production control, other methods may be used provided that an appropriate working relationship with the reference method has been established.

08 Page Gr-XA CE

BDS EN 933-11:2011

Tests for geometrical properties of aggregates— Part 11: Classification test for the constituents of coarse recycled aggregates

This European Standard describes the reference method used for type testing and in cases of dispute for determining the particle size distribution up to 2 mm size of natural or manufactured origin filler aggregate using air jet sieving. For other purposes, in particular factory production control, other methods may be used provided that an appropriate working relationship with the reference method has been established.

13 Page Gr-XB CE

BDS EN 934-1:2009

Admixtures for concrete, mortar and grout- Part 1: Common requirements

Specifies the common requirements for all admixtures covered by EN 934-2, EN 934-3, EN 934-4 and EN 934-

5, which contain the specific requirements for each type of admixture. The requirements for corrosion behavior are not applicable to chloride based admixtures.

08 Page Gr-XA CE

BDS EN 934-2:2009

Admixtures for concrete, mortar and grout- Part 2: Concrete admixtures- Definitions, requirements, conformity, marking and labelling

Specifies definitions and requirements for admixtures for use in concrete. It covers admixtures for plain, reinforced and prestressed concrete which are used in site mixed, ready mixed concrete and precast concrete.

14 Page Gr-XB CE

BDS EN 962:2008

Valve protection caps and valve guards for use with industrial and medical gas cylinders Design, construction and tests of BDS EN 962

Specifies the requirements for valve protection caps and guards, intended for use with industrial and medical gas cylinders.

11 Page Gr-XB CE

BDS EN 1024:2008

Clay roofing tiles for discontinuous laying- Determination of geometric characteristics

Specifies the methods for determining the geometric characteristics of clay tiles as defined in prEN 1304.

17 Page Gr-XB CE

BDS EN 1052-3:2009

Methods of test for masonry- Part 3: Determination of initial shear strength

Specifies a method for determining the in plane initial shear strength of horizontal bed joints in masonry using a specimen tested in shear. Guidance is given on the preparation of the specimens, the conditioning required before testing, the testing machine, the method of test, the method of calculation and the contents of the test report.

12 Page Gr-XB CE

BDS EN 1053:2008

Plastics piping systems- Thermoplastics piping systems for non- pressure applications- Test method for watertightness

Specifies a test method for watertightness of:

- joints of thermoplastics piping systems for non-pressure applications;
- thermoplastics fabricated products made from more than one piece for non-pressure applications.

07 Page Gr-XA CE

BDS EN 1055:2008

Plastics piping systems. Thermoplastics piping systems for soil and waste discharge inside buildings.

Test method for resistance to elevated temperature cycling

Specifies a method for testing the resistance of thermoplastics piping systems for soil and waste discharge inside buildings, marked 'B', or buried in the ground within the building structure, marked 'BD' or 'UD', to 1500 cycles of elevated temperature cycling.

05 Page Gr-XA CE

BDS EN 1097-1:2011

Tests for mechanical and physical properties of aggregates Part 1: Determination of the resistance to wear (micro-Deval)

This European Standard describes the reference method used for type testing and in case of dispute for determining the resistance to wear of coarse aggregates (main text) and aggregates for railway ballast (Annex A). For other purposes, in particular factory production control, other methods may be used provided that an appropriate working relationship with the reference method has been established. The sample is normally tested in a wet condition, but the test may also be carried out in a dry condition.

13 Page Gr-XB CE

BDS EN 1097-2:2011

Tests for mechanical and physical properties of aggregates Part 2: Method of the determination of resistance to fragmentation.

This European Standard describes the reference method , the Los Angeles test, used for type testing and in case of dispute (and an alternative method, the impact test) for determining the resistance to fragmentation of coarse aggregates and aggregates for railway ballast (Annex A).

33 Page Gr-XD CE

BDS EN 1097-3:2011

Tests for mechanical and physical properties of aggregates Part 3: Determination of loose bulk density and voids

This European Standard specifies the test procedure for the determination of the loose bulk density of dry aggregate and the calculation of the voids. The test is applicable to natural and artificial aggregates up to a maximum size of 63 mm.

A method for the determination of the apparent (bulk) density of filler in kerosene is given in Annex A.

06 Page Gr-XA CE

BDS EN 1097-4:2011

Tests for mechanical and physical properties of aggregates Part 4: Determination of the voids of dry compacted filler

This standard describes the reference method used for type testing and in cases of dispute, the determination of the voids of dry compacted filler by means of a Rigid apparatus. For other purposes, in particular factory production control, other methods may be used provided that an appropriate working relationship with the reference method has been established. The test is applicable to natural and manufactured fillers. It is used,

for example to determine their bitumen carrying capacity.

08 Page **Gr-XA** **CE**

BDS EN 1097-5:2011

Tests for mechanical and physical properties of aggregates Part 5: Determination of water content by drying in a ventilated oven

This standard describes the reference method used for type testing and in cases of dispute for the determination of the water content of aggregates by drying in a ventilated oven. For other purposes, in particular factory production control, other methods may be used provided that an appropriate working relationship with the reference method has been established.

09 Page **Gr-XA** **CE**

BDS EN 1097-6:2011

Tests for mechanical and physical properties of aggregates Part 6: Determination of particle density and water absorption

This European Standard specifies methods for the determination of the particle density and water absorption of aggregates. The first five methods are applicable to normal aggregates with a sixth method for lightweight aggregates. The principal methods specified are:

- a) a wire basket method for aggregates passing a 63 mm sieve but retained on a 31,5 mm sieve;
- pycnometer methods for aggregates passing a 31,5 mm sieve but retained on a 0,063 mm sieve.

28 Page **Gr-XC** **CE**

BDS EN 1097-7:2011

Tests for mechanical and physical properties of aggregates Part 7: Determination of the particle density of filler- Pycnometer method

This standard describes the reference method used for type testing and in cases of dispute for the determination of the particle density of filler by means of a pycnometer. For other purposes, in particular factory production control, other methods may be used provided that an appropriate working relationship with the reference method has been established.

12 Page **Gr-XB** **CE**

BDS EN 1097-8:2011

Tests for mechanical and physical properties of aggregates Part 8: Determination of the polished stone value

This Standard describes the reference method used for type testing and in cases of dispute for determining the polished stone value (PSV) of a coarse aggregate used in road surfacings. For other purposes, in particular factory production control, other methods may be used provided that an appropriate working relationship with the reference method has been established.

27 Page **Gr-XC** **CE**

BDS EN 1097-9:2011

Tests for mechanical and physical properties of aggregates Part 9: Determination of the resistance to wear by abrasion form studded tyres- Nordic test.

This Standard specifies the test procedure for the simulation of the abrasive action of studded tyres on coarse aggregates used in a surface layer. The test is applicable to crushed and uncrushed natural and artificial aggregates with a size fraction of 11,2 rom to 16,0 rom.

05 Page **Gr-XA** **CE**

BDS EN 1097-10:2011

Tests for mechanical and physical properties of aggregates Part 10: Determination

This Standard specifies a procedure for determining the water suction height of an aggregate in direct contact with a free water surface.

11 Page **Gr-XB** **CE**

BDS EN 1112:2009

Sanitary tapware- Shower outlets for sanitary tapware for water supply systems of type 1 and type 2- General technical specification

Specifies:

- the dimensional, leaktightness, mechanical, hydraulic and acoustic characteristics with which shower outlets shall comply;
- the procedures for testing these characteristics

22 Page **Gr-XC** **CE**

BDS EN 1113:2009

Sanitary tapware- Shower hoses for sanitary tapware for water supply systems of type 1 and type 2- General technical Specification

Specifies:

- the dimensional, leaktightness, mechanical and hydraulic characteristics with which shower hoses shall comply;
- the procedures for testing these characteristics.

22 Page **Gr-XA** **CE**

BDS EN 1254-2:2009

Copper and copper alloys- Plumbing fittings- Part 2: Fittings with compression ends for use with copper tubes

Specifies materials, assembly dimensions and tolerances and test requirements for fittings of copper and copper alloys with or without plating or coating. Maximum permissible temperatures and pressures are also established.

17 Page **Gr-XB** **CE**

BDS EN 1277:2008

Plastics piping systems-Thermoplastics piping systedms for buried non-pressure application-Test methods for leak tightness of elastomeric sealing ring type joints

This European standard specifies three basic test pressure piping systems. Unless otherwise specifiedin the referring standard, the methods pressures used are the following:

07 Page **Gr-XA** **CE**

BDS EN 1304:2008**Clay roofing tiles and fittings. Product definitions and specifications**

Specifies requirements for clay roofing tiles and fittings for pitched roof coverings and wall cladding and lining. It applies to all tiles and fittings as defined in Clause 3. Clay roofing tiles and clay fittings which conform to this document are suitable for use as roof coverings, vertical wall cladding and lining.

21 Page **Gr-XC** **CE**

BDS EN 2004-1:2014**Aerospace series- Test methods for aluminium and aluminium alloy products- Part 1: Determination of electrical conductivity of wrought aluminium alloys**

This Standard specifies a non destructive test method for the determination of electrical conductivity of wrought aluminium alloy. It is applicable when referenced.

08 Page **Gr-XA** **CE**

BDS EN 13055-1:2011**Lightweight aggregates- Part 1 lightweight aggregates for concrete, mortar and grout**

This European Standard specifies the properties of Lightweight aggregates and lightweight aggregates obtained by processing natural, manufactured or recycled materials and mixtures of these aggregates for use in concrete.

28 Page **Gr-XC** **CE**

BDS EN 1329-1:2008**Plastics piping systems for soil and waste discharge (low and high temperature) within the building structure. unplasticized poly(vinyl chloride) (PVC-U) Specifications for pipes, fittings and the system**

Specifies the requirements for pipes, fittings and the system of unplasticized poly(vinyl chloride) (PVC-U) piping systems in the field of soil and waste discharge (low and high temperature) inside buildings (marked with "B") and for soil and waste discharge systems for both inside buildings and buried in ground within the building structure (marked with "BD").

26 Page **Gr-XC** **CE**

BDS EN1338:2009**Concrete paving blocks- Requirements and test methods**

Specifies materials, properties, requirements and test methods for unreinforced cement bound concrete paving blocks and complementary fittings. It is applicable to precast concrete paving blocks and complementary fittings for pedestrian use, vehicular use and roof coverings, e.g. footpaths, precincts, cycle tracks, car parks, roads, highways, industrial areas (including docks and harbours), aircraft pavements, bus stations, petrol filling stations.

54 Page **Gr-XE** **CE**

BDS EN 1339:2009**Concrete paving flags- Requirements and test methods**

Specifies materials, properties, requirements and test methods for cement bound unreinforced concrete paving flags and complementary fittings.

19 Page **Gr-XB** **CE**

BDS EN 1340:2009**Concrete kerb units- Requirements and test methods**

Specifies materials, properties, requirements and test methods for unreinforced, cement bound precast concrete kerb units, channels and complementary fittings, that are for use in trafficked paved areas and roof coverings.

14 Page **Gr-XB** **CE**

BDS EN 1367-1:2011**Tests for thermal and weathering properties of aggregates Part 1: Determination of resistance to freezing and thawing**

This European Standard specifies a test method which provides information on how an aggregate behaves when it is subjected to the cyclic action of freezing and thawing.

10 Page **Gr-XA** **CE**

BDS EN 1367-2:2011**Tests for thermal and weathering properties of aggregates Part 2: Magnesium sulfate test**

This European Standard describes the reference method used for type testing and in cases of dispute for assessing how an aggregate behaves when subjected to the cyclic action of immersion in magnesium sulfate, followed by oven drying. For other purposes, in particular factory production control, other methods may be used provided that an appropriate working relationship with the reference method has been established.

14 Page **Gr-XB** **CE**

BDS EN 1367-3:2011**Tests for thermal and weathering properties of aggregates- Part 3: Boiling test for "Sonnenbrand" basalt**

This European Standard specifies methods for the determination of the presence of signs of "Sonnenbrand" in basalt and the disintegration of aggregate produced from basalt showing such signs.

08 Page **Gr-XA** **CE**

BDS EN 1367-4:2011**Tests for thermal and weathering properties of aggregates- Part 4: Determination of drying shrinkage**

This standard describes the reference method used for type testing and in cases of dispute, for determining the effect of aggregates on the drying shrinkage of concrete. For other purposes, in particular factory production control, other methods may be used provided an appropriate working relationship with the reference method has been established.

This standard is based on the testing of concretes of fixed mix proportions and aggregates of 20 mm maximum size.

13 Page **Gr-XB** **CE**

BDS EN 1367-5:2011**Tests for thermal and weathering properties of aggregates- Part 5: Determination of resistance to thermal shock**

This European Standard specifies methods for the determination of resistance to thermal shock of aggregates subject to heating and drying in the production of hot bituminous mixtures. This standard describes the reference method use for type testing and in case of dispute. For the purpose of type testing and in case of dispute only the reference method should be used.

06 Page **Gr-XA** **CE**

BDS EN 1367-6:2011**Tests for thermal and weathering properties of aggregates- Part 6: Determination of resistance to freezing and thawing in the presence of salt (NaCl)**

This European Standard specifies a method of assessing the frost resistance of an aggregate when it is subjected to the cyclic action of freezing and thawing in the presence of 1 % solution of NaCl in de-ionized or distilled water.

06 Page **Gr-XA** **CE**

BDS EN 1411:2008**Plastics piping and ducting systems- Thermoplastics pipes- Determination of resistance to external blows by the staircase method**

Specifies a method for determining the resistance to external blows of thermoplastics pipes by using the staircase method. This method is not applicable to perforated pipes.

12 Page **Gr-XB** **CE**

BDS EN 1426:2009**Bitumen and bituminous binders- Determination of needle penetration**

Specifies a method for determining the consistency of bitumen and bituminous binders. Normal procedure is described for penetrations up to $330 \times 0,1$ mm, but for penetrations above this value, up to $500 \times 0,1$ mm, different operating parameters are necessary.

13 Page **Gr-XB** **CE**

BDS EN 1427:2009**Bitumen and bituminous binders- Determination of the softening point- Ring and Ball method**

Specifies a method for the determination of the softening point of bitumen and bituminous binders in the range of 28 °C to 150 °C.

12 Page **Gr-XB** **CE**

BDS EN 1428:2009**Bitumen and bituminous binders- Determination of water content in bitumen emulsions- Azeotropic distillation method**

Specifies a method for determining of the water content in bitumen emulsions by means of distillation.

06 Page **Gr-XA** **CE**

BDS EN 1429:2009**Bitumen and bituminous binders- Determination of residue on sieving of bituminous emulsions, and determination of storage stability by sieving**

Specifies methods utilizing sieving for the determination of the quantity of coarse Particles of binder present in bitumen emulsions, and for the determination of storage stability.

06 Page **Gr-XA** **CE**

BDS EN 1430:2009**Bitumen and bituminous binders — Determination of particle polarity of bituminous emulsions**

Specifies a method for the determination of the particle polarity of bituminous emulsions.

05 Page **Gr-XA** **CE**

BDS EN 1431:2009**Bitumen and bituminous binders — Determination of residual binder and oil distillate from bitumen emulsions by distillation**

Specifies a method for the quantitative determination of residual binder and oil distillate in bituminous emulsions

08 Page **Gr-XA** **CE**

BDS EN 1717:2009**Protection against pollution of potable water in water installations and general requirements of devices to prevent pollution by backflow**

Deals with the means to be used to prevent the pollution of potable water inside premises and the general requirements of protection devices to avoid pollution by backflow.

14 Page **Gr-XB** **CE**

BDS EN 1744-1:2011**Tests for chemical properties of aggregates- Part 1: Chemical analysis**

This Standard specifies procedures for the chemical analysis of aggregates. It specifies the reference procedures and, in certain cases, an alternative method which can be considered as giving equivalent results. Unless otherwise stated, the test methods specified in this standard may be used for factory production control, for audit tests or for type tests.

59 Page **Gr-XE** **CE**

BDS EN 1744-3:2011**Tests for chemical properties of aggregates- Part 1: Preparation of eluates by leaching of aggregates.**

This European Standard specifies a method for the preparation of eluates, by leaching of aggregates, for subsequent investigation of physical and chemical properties by existing standard methods for the purpose of compliance testing. It applies to unbound aggregates that have a particle size below 32 mm with or without size reduction (see clause 8).

08 Page **Gr-XA** **CE**

BDS EN 1744-4:2011

Tests for chemical properties of aggregates- Part 4: Determination of water susceptibility of fillers for bituminous mixtures.

This European Standard specifies the procedure for the determination of the water susceptibility of fillers for bituminous mixtures, by separation of filler from a bitumen filler mixture.

A method for the determination of water susceptibility by volume increase and loss of stability of a Marshall specimen is described in Annex A.

14 Page Gr-XB CE

BDS EN 1744-5:2011

Tests for chemical properties of aggregates- Part 5: Determination of acid soluble chloride salts.

This European Standard specifies the procedure for the determination of acid soluble chloride salts which may be present in aggregates. This test is suitable for aggregates where the chloride content does not derive directly from contact with, or immersion in, saline water. Examples of such aggregates are: recycled aggregates containing hydrated cement, where chloride may be bound as calcium chloroaluminates; and some aggregates from desert areas where chloride is occluded within the aggregate particles.

07 Page Gr-XA CE

BDS EN 1744-6:2011

Tests for chemical properties of aggregates- Part 6: Determination of the influence of recycled aggregate extract on the initial setting time of cement.

This Standard specifies the procedure for the determination of the influence of water-soluble components from recycled aggregates on the initial setting time of cement.

05 Page Gr-XA CE

BDS EN 1745:2009

Masonry and masonry products- Methods for determining design thermal values

Gives procedures for the determination of design thermal values (thermal resistance and/or thermal conductivity) of masonry and masonry products.

14 Page Gr-XB CE

BDS EN 1905:2008

Plastics piping systems-Unplasticized poly (vinyl chloride) (PVC-U) pipes, fittings and material- Method for assessment of the PVC content based on total chlorine content

This standard specifies a method for assessing the poly (vinyl chloride)(PVC) content in reprocessible and recyclable unplasticized (PVC-U) materials or materials derived from PVC-U products.

04 Page Gr-XA CE

BDS EN 12020-1:2010

Aluminium and aluminium alloys- Extruded precision profiles in alloys EN AW- 6060 and EN AW- 6063- Part 1: Technical conditions for inspection and delivery

This document specifies technical conditions for inspection and delivery of alloys EN AW-6060 and EN AW- 6063 extruded precision profiles manufactured with and without a thermal barrier (See Figures 1 and 2) and without further surface treatment.

08 Page Gr-XA CE

BDS EN 12020-2:2010

Aluminium and aluminium alloys- Extruded precision profiles in alloys EN AW- 6060 and EN AW- 6063- Part 2: Tolerances on dimensions and form

This document specifies tolerances on dimensions and form of extruded precision profiles, in alloys EN AW- 6060 and EN AW- 6063 manufactured with and without a thermal barrier (See Figures 1 and 2) It applies to extruded products supplied without further surface treatment. Precision profiles covered in this standard are distinguished from extruded profiles for general applications covered in EN 755-9 by the following characteristics.

13 Page Gr-XB CE

BDS EN 12061:2008

Plastics piping systems- Thermoplastics fittings- Test method for impact resistance

This standard specifies a method for testing the impact resistance of fittings by dropping them onto a rigid surface. For a fitting with seal retaining components, such as seal retaining caps or rings, the method includes assessment of the watertightness of the fittings when the fixing elements show disturbance as a result of the test.

02 Page Gr-XA CE

BDS EN 12256:2008

Plastics piping systems- Thermoplastics fittings- Test method for mechanical strength or flexibility of fabricated fittings

This standard specifies a method for testing the mechanical strength or flexibility of fabricated thermoplastics fitting intended to be used in nonpressure underground applications.

05 Page Gr-XA CE

BDS EN 12390-4:2008

Testing hardened concrete- Part 4:Compressive strength- Specification for testing machines

Specifies the requirements for the performance of compression testing machines for the measurement of the compressive strength of concrete.

05 Page Gr-XA CE

BDS EN 12439:2011

Mixing Water for Concrete

This International Standard specifies the requirements for water that is suitable for making concrete in accordance with ISO 22965 (all parts) and describes methods for assessing its suitability.

13 Page Gr-XB CE

BDS EN 12591:2009**Bitumen and bituminous binders- Specifications for paving grade bitumens**

Provides a framework for specifying a range of properties and relevant test methods for bitumens, which are suitable for use in the construction and maintenance of roads, airfields and other paved areas, together with requirements for evaluation of conformity..

02 Page Gr-XA CE

BDS EN 12592:2009**Bitumen and bituminous binders- Determination of solubility**

Specifies a method for determining the degree of solubility of bituminous binders having little or no mineral matter other than recovered bituminous binders from asphalt mixes, in a specific solvent. Toluene is used as the solvent for reference tests.

06 Page Gr-XA CE

BDS EN 12593:2009**Bitumen and bituminous binders- Determination of the Fraass breaking point.**

Specifies a method for determining the Fraass breaking point which measures the brittleness of bitumen and bituminous binders at low temperatures

15 Page Tk.200.00 CE

BDS EN 12594:2009**Bitumen and bituminous binders- Preparation of test samples**

Specifies a method for preparing samples of bituminous binders in order to test their properties.

08 Page Gr-XA CE

BDS EN 12595:2009**Bitumen and bituminous binders- Determination of kinematic viscosity**

This European Standard specifies a method for the determination of the kinematic viscosity of bituminous binders at 60 °C and 135 °C, in a range from 6 mm²/s to 300 000 mm²/s. Bituminous Emulsions are not covered within the scope of this method.

13 Page Gr-XB CE

BDS EN 12596:2009**Bitumen and bituminous binders- Determination of dynamic viscosity by vacuum capillary**

Specifies a method for the determination of the dynamic viscosity of bituminous binders by means of a vacuum capillary viscometer at 60 °C in a range between 0,003 6 Pa .s to over 580 000 Pa . s. Bituminous Emulsions are not within the scope of this method.

13 Page Gr-XB CE

BDS EN 12597:2009**Bitumen and bituminous binders-Terminology**

Standard defines terms for bitumen of various types and binders derived from bitumen.

10 Page Gr-XA CE

BDS EN 12608:2008**Unplasticized polyvinylchloride (PVC-U) profiles for the fabrication of windows and doors- Classification, requirements and test methods**

Specifies classifications, requirements and test methods for unplasticized polyvinylchloride (PVC-U) profiles for the fabrication of windows and doors.

20 Page Gr-XB CE

BDS EN 12846:2009**Bitumen and bituminous binders — Determination of efflux time of bitumen emulsions by the efflux viscometer**

Specifies a method for the determination of the efflux time of bitumen emulsions.

08 Page Gr-XA CE

BDS EN 12847:2009**Bitumen and bituminous binders— Determination of settling tendency of bituminous emulsions**

Specifies a method for the determination of the settling tendency of bituminous emulsions.

08 Page Gr-XA CE

BDS EN 12620 :2011**Aggregates for Concrete.**

This European Standard specifies the properties of aggregates and filler aggregates obtained by processing natural, manufactured or recycled materials and mixtures of these aggregates for use in concrete. It covers aggregates having an oven dried particle density greater than 2,00 Mg/m (2 000 kg/m³) for all concrete, including concrete in conformity with EN 206-1 and concrete used in roads and other pavements and for use in precast concrete products. 15> It also covers recycled aggregate with densities between 1,50 Mg/m³ (1 500 kg/m³) and 2,00 Mg/m³ (2000 kg/m³) with appropriate caveats and recycled fine aggregate (4 mm) with appropriate caveats.

40 Page Gr-XD CE

BDS EN 12848:2009**Bitumen and bituminous binders — Determination of mixing stability with cement of bituminous emulsions**

Specifies a method for the determination of mixing stability of bituminous emulsions with cement. It applies to overstabilized cationic bituminous emulsions and to slow-setting and overstabilized anionic bituminous emulsions

05 Page Gr-XA CE

BDS EN 12849:2009**Bitumen and bituminous binders- Determination of penetration power of bituminous emulsions**

Specifies a method for the determination of the penetration power of bituminous emulsions, through reference filler.

This test method is applicable to low-viscosity bituminous emulsions.

04 Page Gr-XA CE

BDS EN 13043 :2011**Aggregates for bituminous mixtures and surface treatments for roads, airfields and other trafficked areas**

This European Standard specifies the properties of aggregates and filler aggregates obtained by processing natural or manufactured or recycled materials for use in bituminous mixtures and surface treatments for roads, airfields and other trafficked areas. This standard does not cover the use of reclaimed bituminous mixtures.

32 Page Gr-XD CE

BDS EN 13055-1:2011**Lightweight aggregates- Part 1 lightweight aggregate for concrete, mortar and grout**

This European Standard specifies the properties of lightweight aggregates and lightweight filler aggregates obtained by processing natural, manufactured or recycled materials and mixtures of these aggregates for use in concrete, mortar and grout in buildings, roads and civil engineering works.

25 Page Gr-XC CE

BDS EN 13055-2 :2011**Lightweight aggregates- Part 2 lightweight aggregates for bituminous mixtures and surface treatments and for unbound and bound application**

This European Standard specifies the properties of lightweight aggregates and fillers derived thereof obtained by processing natural, manufactured or recycled materials and mixtures of these aggregates for bituminous mixtures and surface treatments and for unbound and hydraulically bound applications other than concrete, mortar and grout.

28 Page Gr-XC CE

BDS EN 13074:2009**Bitumen and bituminous binders —Recovery of binder from bitumen emulsions by evaporation**

Specifies a method for the recovery of binder from bitumen emulsions in a manner that will permit further testing with minimum changing the characteristics of the binder.

02 Page Gr-XA CE

BDS EN 13075-1:2009**Bitumen and bituminous binders- Determination of breaking behaviour- Part1: Determination of breaking value of cationic bituminous emulsions, mineral filler method**

Specifies a method for the determination of the breaking value of cationic bituminous emulsions

10 Page Gr-XA CE

BDS EN 13075-2:2009**Bitumen and bituminous binders- Determination of breaking behaviour- Part 2: Determination of fines mixing time of cationic bitumen emulsions**

Specifies a method for the determination of the fines mixing time of cationic bitumen emulsions, under standardized conditions

05 Page Gr-XA CE

BDS EN 13139:2011**Aggregates for mortar**

This European Standard specifies the properties of aggregates and filler aggregates obtained by processing natural, anufactured or recycled materials and mixtures of these aggregates for use in mortar, e.g.,

23 Page Gr-XC CE

BDS EN 13179-1:2011**Tests for filler aggregates for bituminous mixtures- Part 1: Delta ring and ball test**

This European Standard specifies the procedure used to determine the stiffening effect of filler aggregate when mixed with bitumen.

07 Page Gr-XA CE

BDS EN 13179-2:2011**Tests for filler aggregates for bituminous mixtures- Part 2: Bitumen number**

This European Standard specifies the procedure for determining the apparent viscosity of a water-filler aggregate mixture, expressed numerically.

07 Page Gr-XA CE

BDS EN 13242 :2011**Aggregates for unbound and hydraulically bound materials for use in civil engineering work and road construction**

This European Standard specifies the properties of aggregates obtained by processing natural or manufactured or recycled materials for hydraulically bound and unbound materials for civil engineering work and road construction.

It provides for the evaluation of conformity of the products to this European Standard.

28 Page Gr-XC CE

BDS EN 13304:2009**Bitumen and bituminous binders- Framework for specification of oxidised bitumens**

Provides a framework for the specification of oxidised bitumen used mainly in roofing, waterproofing and adhesives.

02 Page Gr-XA CE

BDS EN 13305:2009**Bitumen and bituminous binders- Framework of specification of hard industrial bitumens.**

Provides a framework for the specification of hard industrial bitumen used mainly in flooring, varnishes, mineral rubber, roofing and mastic.

02 Page Gr-XA CE

BDS EN 13369:2009**Common rules for precast concrete products**

Specifies the terminology, requirements, basic performance criteria, test methods and evaluation of conformity that will be referred to by specific product standards unless they are not appropriate.

44 Page **Gr-XE** **CE**

BDS EN 13450 :2011

Aggregates for railway ballast

This European Standard specifies the properties of aggregates obtained by processing natural or manufactured materials or recycled crushed unbound aggregates for use in construction of railway track. For the purposes of this standard, the aggregate is referred to as railway ballast. It provides for the evaluation of conformity of the products to this European Standard.

26 Page **Gr-XC** **CE**

BDS EN 13501-1:2009

Fire classification of construction products and building elements Part 1: Classification using test data from reaction to fire tests

Provides the reaction to fire classification procedure for all construction products, including products incorporated within building elements.

Products are considered in relation to their end use application.

42 Page **Gr-XE** **CE**

BDS EN 13748-1:2008

Terrazzo tiles- Terrazzo tiles for internal use

Specifies materials, properties and methods of testing for unreinforced cement-bound terrazzo tiles which are factory made and sold ready to be placed.

30 Page **Gr-XC** **CE**

BDS EN 13748-2:2008

Terrazzo tiles- Terrazzo tiles for external use

Specifies materials, properties and methods of testing for unreinforced cement-bound terrazzo tiles which are factory made and sold ready to be placed.

The tiles are intended for external use (including roofing applications) in pedestrian areas, e.g. walkways, terraces, commercial centres and swimming-pools, etc, where the decorative aspect of the covering is predominant.

37 Page **Gr-XD** **CE**

BDS EN 13808:2009

Bitumen and bituminous binders- Framework for specifying cationic bituminous emulsions

Specifies the requirements for performance characteristics of cationic bituminous emulsion classes which are suitable for use in the construction and maintenance of roads, airfields and other paved areas. This European standard applies to emulsions of pure bitumen, or of fluxed bitumen, or of cut back bitumen and to emulsions of polymer modified bitumen, or of polymer modified fluxed bitumen, or of polymer modified cut-back bitumen, which also includes latex modified bituminous emulsions.

16 Page **Gr-XB** **CE**

BDS EN 13924:2009

Bitumen and bituminous binders- Specifications for hard paving grade bitumens

Provides a framework for specifying the properties and relevant test methods for hard paving grade bitumens which are suitable for use in the construction and maintenance of roads, airfields and other paved areas..

10 Page **Gr-XA** **CE**

BDS EN 14023:2009

Bitumen and bituminous binders- Framework specification for polymer modified bitumens

Bangladesh Provides a framework for specifying the characteristics and relevant test methods for polymer modified bitumens which are suitable for use in the construction and maintenance of roads, airfields and other paved areas.

15 Page **Gr-XB** **CE**

BDS EN 14437:2008

Determination of the uplift resistance of clay or concrete tiles for roofing- Roof system test method

Specifies a test method to establish the uplift resistance of installed clay or concrete tiles for roofing complying with the relevant product standard, EN 490 or EN 1304, which are unfixed or mechanically fixed to the substructure.

17 Page **Gr-XB** **CE**

BDS EN 14506 :2009

Devices to prevent pollution by backflow of potable water- Automatic diverter- Family H, type C

This document specifies:

- a) field of application;
- b) requirements for automatic diverters;
- c) dimensional and the physico-chemical properties and the properties of general hydraulic, mechanical and acoustic design of automatic diverters;
- d) test method and requirements for verifying these properties. For sanitary tapware (see Clause 2) with integrated devices, the automatic diverter is only considered to be a backflow protection device if it has passed the requirements of this document and additionally those of the applicable product standard for the draw off tap or mixing valve;
- e) marking and presentation;
- f) acoustics.

18 Page **Gr-XB** **CE**

BDS EN 14891:2008

Liquid applied water impermeable products for use beneath ceramic tiling bonded with adhesives— Requirements, test methods, evaluation of conformity, classification and designation

Specifies the evaluation of conformity and the classification and designation of liquid applied water impermeable products beneath ceramic tiling.

25 Page **Gr-XC** **CE**

BDS EN 15057:2016

Fibre cement profiled sheets- Impact resistance test method

This European Standard specifies a soft body impact test method for fibre-cement profiled sheets for roofing.

BDS ISO 148-1:2008**Metallic materials- Charpy pendulum impact test - Part 1: Test method**

This part of ISO 148 specifies the Charpy pendulum impact (V-notch and U-notch) test method for determining the energy absorbed in an impact test of metallic materials.

12 Page **Gr-XB** **CE**

BDS ISO 148-2:2008**Metallic materials- Charpy pendulum impact test- Part 2: Verification of test machines**

This part of ISO 148 covers the verification of the constructional elements of pendulum-type impact testing machines. It is applicable to machines with 2 mm or with 8 mm strikers used for pendulum impact tests carried out, for instance, in accordance with ISO 148-1.

20 Page **Gr-XB** **CE**

BDS ISO 148-3:2008**Metallic materials- Charpy pendulum****impact test- Part 3: Preparation and characterization of Charpy V reference test pieces for verification of test machines**

This part of ISO 148 covers the requirements, preparation and methods of qualifying test pieces that are used to indirectly verify pendulum impact testing machines in accordance with ISO 148-2 and with the certificate for reference test pieces.

10 Page Gr-XA CE

BDS ISO 155:2008**Belt drives- Pulleys for V-belts (System based on datum width) - Geometrical inspection of grooves**

Standard specifies the methods of checking the regularity of the grooves and pulleys for V-belts specified in the System based on datum width. The grooved pulleys may be designed for use with classical or narrow V-belts.

03 Page Gr-XA ME

BDS ISO 161-1:2008**Thermoplastics pipes for the conveyance of fluids- Nominal outside diameters and nominal pressures - Part 1: Metric series**

Specifies the nominal outside diameters for metric thermoplastics pipes for the conveyance of fluids in pressure and non-pressure applications.

It also specifies nominal pressure ratings, minimum required strengths and overall service (design) coefficients for thermoplastics pipes for pressure applications.

04 Page Gr-XA CE

BDS ISO 161-2:2008**Thermoplastics pipes for the conveyance of fluids - Nominal outside diameters and nominal pressures - Part 2: Inch-based series**

Specifies the nominal outside diameters for inch-based thermoplastics pipes for the conveyance of fluids in pressure and non-pressure applications. It also specifies nominal pressure ratings, minimum required strengths and Overall Service (design) coefficients for thermoplastics pipes for pressure applications.

04 Page Gr-XA CE

BDS ISO 225:2008**Fasteners- Bolts, screws, studs and nuts- Symbols and designations of dimensions**

Lays down the method of dimensioning bolts, screws, studs and nuts, recommended for use unless otherwise specified in the appropriate product Standards.

It includes common describes the feature. Symbols and describes the feature.

19 Page Gr-XB ME

BDS ISO 228-1:2008**Pipe threads where pressure-tight joints are not made on the threads—Part 1: Dimensions, tolerances and designation**

Specifies the requirements for thread form, dimensions, tolerances and designation for fastening pipe threads, thread sizes 1/16 to 6 inclusive. Both internal and external threads are parallel threads, intended for the mechanical assembly of the component parts of fittings, cocks and valves, accessories, etc.

06 Page Gr-XA CE

BDS ISO 228-2:2008**Pipe threads where pressure-tight joints are not made on the threads - Part 2: Verification by means of limit gauges**

Specifies the verification, by means of limit gauges, of cylindrical threads, the dimensions and tolerances of which are given in ISO 228-1.

13 Page Gr-XB CE

BDS ISO 254:2008**Belt drives- Pulleys- Quality, finish and balance**

Specifies the characteristics of quality which are common to all transmission pulleys; it states specific quality levels for the finish and balance of transmission pulleys.

03 Page Gr-XA ME

BDS ISO 255:2008**Belt drives- Pulleys for V-belts (System based on datum width)- Geometrical inspection of grooves**

This International Standard specifies the methods of checking the regularity of the grooves and pulleys for V-belts specified in the System based on datum width.

06 Page Gr-XA ME

BDS ISO 261:2008**ISO general purpose metric screw threads- General plan**

Specifies ISO general purpose metric screw threads (M) having basic profile according to ISO 68-1. Basic dimensions are given in ISO 724. For tolerances see ISO 965-1.

05 Page Gr-XA ME

BDS ISO 262:2008**ISO general purpose metric screw threads - Selected sizes for screws, bolts and nuts**

Specifies selected sizes for screws, bolts and nuts in the diameter range from 1 mm to 64 mm of ISO general purpose metric screw threads (M) having basic profile according to ISO 68-1. These selected sizes are recommended also for general engineering use.

These screw threads are selected from ISO 261. For thread designations see ISO 965-1.

02 Page Gr-XA ME

BDS ISO 264:2008**Unplasticized polyvinyl chloride (PVC) fittings with plain sockets for pipes under pressure - Laying lengths - Metric series**

Specifies the series of diameters to be used and the dimensions which are common to all types of

unplasticized polyvinyl chloride (PVC) fittings with plain sockets for pipes under pressure, regardless of their method of manufacture (with the exception of fittings fabricated from pipes) and composition.

05 Page Gr-XA CE

BDS ISO 264 Add 1:2008

Unplasticized polyvinyl chloride (PVC) fittings with plain sockets for pipes under pressure - Laying length- Metric series. Addendum 1: Diameters 200 mm and 225 mm

Rubber- Temperatures, humidifies and times for conditioning and testing

Specifies the temperature, humidity and time conditions used for the conditioning and testing of all types of rubber test piece.

03 Page Gr-XA CE

BDS ISO 487:2008

Steel roller chains, types S and C, attachments and chain wheels

Specifies the characteristics of a range of steel roller chains dimensionally derived from the malleable iron type, suitable for conditions of operation and

maintenance prevailing in such fields as agriculture, building, quarrying and related industry, mechanical handling, etc., together with associated chain wheels. The dimensions are given in inches and in millimetres; the latter are conversions from the basic inch dimensions.

17 Page Gr-XB ME

BDS ISO 554:2016

Standard atmospheres for conditioning and/or testing- Specifications

This International Standard lays down three standard atmospheres for conditioning and/or testing which are not very different from ordinary ambient conditions.

01 Page Gr-XA CE

BDS ISO 580:2008

Plastics piping and ducting systems- Injection-moulded thermoplastics fittings- Methods for visually assessing the effects of heating

Specifies two methods for assessing the effects of heating on injection-moulded thermoplastics pipe fittings- method A, using an air oven, and method B, using a liquid bath. In case of disagreement, method A is the reference method.

06 Page Gr-XA CE

BDS ISO 606:2008

Short-pitch transmission precision roller chains and chain wheels

This International Standard specifies requirements for short-pitch precision roller chains of simple and multiplex construction suitable for the mechanical transmission of power and allied applications, together with those for their associated chain wheels.

17 Page Gr-XB ME

BDS ISO 630-1:2013

Structural steels— Part 1: General technical delivery conditions for hot-rolled products

This part of ISO 630 specifies the general technical delivery conditions for steel flat and long products (plate/ sections/wide flats and bars) used principally for general-purpose structural steels. The steels specified in this part of ISO 630 are intended for use in welded or bolted structures.

09 Page Gr-XA CE

BDS ISO 630-2:2013

Structural steels— Part 2: Technical delivery conditions for structural steels for general purposes.

This part of ISO 630 specifies qualities for steels for general structural use. This part of ISO 630 applies to steel plates rolled on a reversing mill, wide flats, hot-rolled sections and bars, which are used in the as-delivered condition and normally intended for welded or bolted structures.

10 Page Gr-XA CE

BDS ISO 630-3:2013

Structural steels- Part 3: Technical delivery conditions for fine grain structural steels This part of ISO 630 specifies requirements for the flat and long products of hot rolled weldable fine-grain structural steels in the as-

rolled (for SG grades only), normalized/normalized-rolled and then mechanical-rolled delivery conditions. It applies to steels plates rolled on a reversing mill, wide flats, hot-rolled sections and bars, which are intended for use in heavily loaded parts of welded or bolted structures.

17 Page Gr-XB CE

BDS ISO 630-4:2013

Structural steels- Part 4: Technical delivery conditions for high yield strength quenched and tempered structural steel plates

This part of ISO 630 specifies qualities for high yield strength quenched and tempered structural steels This part of ISO 630 reversing mill, which are used in the quenched and tempered condition and normally intended for welded or bolted structures.

14 Page Gr-XB CE

BDS ISO 630-5:2016

Structural steels- Part 5: Technical delivery conditions for structural steels with improved atmospheric corrosion resistance

This part of ISO 630 specifies qualities for steels with improved atmospheric corrosion resistance for general structural use. It applies to steel plates rolled on a reversing mill, wide flats, hot-rolled sections and bars, which are used in the usual delivery conditions as given in 6.3, and normally intended for welded or bolted structures.

18 page Gr-XB CE

BDS ISO 630-6:2016

Structural steels- Part 6: Technical delivery conditions for seismic improved structural steels for building

This part of ISO 630 specifies qualities for seismic-proof improved structural steels. This part of ISO 630 applies to steel plates with thicknesses of 6 mm or over and up to 125 mm, wide flats and hot-rolled sections up to 140 mm, which are used in the usual delivery conditions as given in 6.2 and normally intended for welded or bolted structures.

16 page Gr-XB CE

BDS ISO 657-1:2008

Hot-rolled steel sections- Part 1 : Equal- leg angles- Dimensions

Specifies dimensions of hot-rolled equalleg angles.

04 Page Gr-XA CE

BDS ISO 657-2:2008

Hot-rolled steel sections -Part 2: Unequal-leg angles - Dimensions

Specifies dimensions of hot-rolled unequalleg angles.

05 Page Gr-XA CE

BDS ISO 657-5:2008

Hot-rolled steel sections - Part V : Equal-leg angles and unequal-leg angles- Tolerances for metric and inch series

Specifies metric and inch dimensional tolerances applicable to hot-rolled steel angles having either equal or unequal leg lengths in accordance with the metric dimensions of ISO/R 657/I and ISO/R 657/H or the inch dimensions of ISO/R 657/ill and ISO/R 657/IV.

03 Page Gr-XA CE

BDS ISO 657-11:2008

Hot-rolled steel sections -Part 11 : Sloping flange channel sections (Metric series)- Dimensions and sectional properties

Specifies dimensions and sectional properties of metric series hot-rolled steel sloping flange channel sections.

02 Page Gr-XA CE

BDS ISO 657-15:2008

Hot-rolled steel sections- Part 15 I Sloping flange beam sections (Metric series)- Dimensions and sectional properties

Standard specifies dimensions and sectional properties of metric series hot-rolled steel sloping flange beam sections.

02 Page Gr-XA CE

BDS ISO 657-16:2008

Hot-rolled steel sections -Part 16 I Sloping flange column sections (metric series)- Dimensions and sectional properties

Specifies dimensions and sectional properties of metric series hot-rolled sloping flange steel column sections.

02 Page Gr-XA CE

BDS ISO 657-18:2008

Hot-rolled steel sections- Part 18 I L sections for shipbuilding (metric series) - Dimensions, sectional properties and tolerances

Specifies dimensions, sectional properties and dimensional tolerances for metric series hot-rolled steel L sections for shipbuilding.

04 Page Gr-XA CE

BDS ISO 657-19:2008

Hot-rolled steel sections - Part 19 I Bulb flats (metric series)- Dimensions, sectional properties and tolerances

Specifies dimensions, sectional properties and dimensional tolerances for metric series hot-rolled steel bulb flats.

03 Page Gr-XA CE

BDS ISO 657-21:2008

Hot-rolled steel sections -Part 21 I T-sections with equal depth and flange width -Dimensions

Specifies dimensions of the hot-rolled tee sections with equal depth and flange width.

Zinc ingots

Technical corrigendum 1

03 Page Gr-XA ME

BDS ISO 752:2013

Zinc ingots

This International Standard contains five grades of zinc recognized in worldwide commerce. It specifies the classifications, chemical compositions, markings and other requirements for primary zinc. It includes a table of related grades of zinc which are recognized in other International Standards. This International Standard applicable to primary zinc only and does not include requirements for secondary zinc produced by re-melting.

03 Page Gr-XA ME

BDS ISO 834-1:2015

Fire-resistance tests- Elements of building construction- Part 1: General requirements

This part of ISO 834 specifies a test method for determining the fire resistance of various elements of construction when subjected to standard fire exposure conditions. The test data thus obtained will permit subsequent classification on the basis of the duration for which the performance of the tested elements under these conditions satisfies specified criteria.

25 Page Gr-XC CE

BDS ISO 834-4:2015

Fire-resistance tests- Elements of building construction- Part 4: Specific requirements for load bearing vertical separating elements

This part of ISO 834 specifies the procedures to be followed for determining the fire resistance of loadbearing vertical separating elements when exposed to heating on one face

07Page Gr-XA CE

BDS ISO 834-8:2015

Fire-resistance tests- Elements of building construction- Part 8: Specific requirements for non-load bearing vertical separating elements

This part of ISO 834 specifies the procedures to be followed for determining the fire resistance of non-loadbearing vertical separating elements when exposed to heating on one face.

08 Page Gr-XA CE

BDS ISO 885:2008

General purpose bolts and screws- Metric series- Radii under the head

Specifies the sizes of the radii under the head and the transition diameters of metric series general purpose bolts and screws.

02 Page Gr-XA ME

BDS ISO 898-1:2008

Mechanical properties of fasteners made of carbon steel and alloy steel- Part 1: Bolts, screws and studs

Specifies the mechanical properties of bolts, screws and studs made of carbon steel and alloy steel when tested at an ambient temperature range of 10 °C to 35 °C.

25 Page Gr-XC ME

BDS ISO 898-5:2008

Mechanical properties of fasteners -Part 5 : Set screws and similar threaded fasteners not under tensile stresses

Specifies the mechanical properties of set screws and similar fasteners not under tensile stresses in the range from 1,6 up to and including 39 mm thread diameter which are made of carbon steel or alloy steel.

06 Page Gr-XA ME

BDS ISO 898-7:2008

Mechanical properties of fasteners- Part 7: Torsional test and minimum torques for bolts and screws with nominal diameters 1 mm to 10 mm

Specifies a torsional test for the determination of the breaking torque of bolts and screws with nominal diameters 1 mm to 10 mm with property classes 8.8 to 12.9 in accordance with ISO 898-1.

04 Page Gr-XA ME

BDS ISO 965-1:2008

ISO general purpose metric screw threads- Tolerances- Part 1: Principles and basic data

Specifies the basic profile for ISO general purpose metric screw threads (M) conforming to ISO 261.

18 Page Gr-XB CE

BDS ISO 965-2:2008

ISO general purpose metric screw threads- Tolerances -Part 2: Limits of sizes for general purpose external and internal screw threads- Medium quality
Specifies limits of sizes for pitch and crest diameters for ISO general purpose metric screw threads (M) conforming to ISO 262 having basic profile according to ISO 68-1.

05 Page Gr-XA CE

BDS ISO 965-3:2008

ISO general purpose metric screw threads- Tolerances-Part 3: Deviations for constructional screw threads

Specifies deviations for pitch and crest diameters for ISO general purpose metric screw threads (M) conforming to ISO 261 having basic profile according to ISO 68-1.

16 Page Gr-XB CE

BDS ISO 965-4:2008

ISO general purpose metric screw threads- Tolerances Part 4: Limits of sizes for hot-dip galvanized external screw threads to mate with internal screw threads tapped with tolerance position H or G after galvanizing

Specifies deviations and limits of sizes for pitch and crest diameters for ISO general purpose metric external screw threads conforming to ISO 262 having a basic profile according to ISO 68-1.

04 Page Gr-XA ME

BDS ISO 965-5:2008

ISO general purpose metric screw threads- Tolerances Part 5: Limits of sizes for internal screw threads to mate with hot-dip galvanized external screw threads with maximum size of tolerance position h before galvanizing

Specifies deviations and limits of sizes for pitch and crest diameters for ISO general purpose metric internal

screw threads conforming to ISO 262 having basic profile according to ISO 68-1.

BDS ISO 1163-1:2008

Plastics - Unplasticized poly (vinyl chloride) (PVC-U) moulding and extrusion materials -Part 1: Designation System and basis for specifications

This part of ISO 1163 establishes a System of designation for unplasticized PVC thermoplastic material which may be used as the basis for specifications.

05 Page **Gr-XA** **CE**

BDS ISO 1163-2:2008

Plastics-unplasticized poly (vinyl Chloride) (pvgu) moulding and extrusion Materials –

Part 2: Preparation of test specimens and Determination of Properties

Specifies procedures and conditions for the preparation of test specimens of PVC-U materials in a specified state, and methods for measuring their properties. Any property listed in this part and referred to in combination with part 1 shall be determined by the method referred to in this part.

06 Page **Gr-XA** **CE**

BDS ISO 1167-1:2008

Thermoplastics pipes, fittings and assemblies for the conveyance of fluids- Determination of the resistance to internal pressure- Part 1: General method

Specifies a general test method for determining the resistance to internal hydrostatic pressure at a given temperature of thermoplastics pipes, fittings and piping systems for the transport of fluids. The method accommodates water-in-water, water-in-air tests.

04 Page **Gr-XA** **CE**

BDS ISO 1167-2:2008

Thermoplastics pipes, fittings and assemblies for the conveyance of fluids- Determination of the resistance to internal pressure-Part 2: Preparation of pipe test pieces

Specifies the dimensions and method for preparation of extruded, or injection-moulded tubular, test pieces used to determine the resistance of thermoplastics pipes to internal hydrostatic pressure according to ISO 1167-1.

03 Page **Gr-XA** **CE**

BDS ISO 1167-3:2008**Thermoplastics pipes, fittings and assemblies for the conveyance of fluids- Determination of the resistance to internal pressure- Part 3: Preparation of components**

Specifies the procedure for the preparation of components, i.e. fittings and valve bodies, for the determination of their resistance to internal pressure according to ISO 1167-1.

09 Page Gr-XA CE

BDS ISO 1167-4:2008**Thermoplastics pipes, fittings and assemblies for the conveyance of fluids- Determination of the resistance to internal pressure- Part 4: Preparation of assemblies**

Specifies the procedure for the preparation of both end-load-bearing and non-end-load-bearing assemblies, for the determination of their resistance to internal hydrostatic pressure according to ISO 1167-1.

06 Page Gr-XA CE

BDS ISO 1169:2013**Zinc alloys- Determination of aluminium content- Titrimetric Method**

This International Standard specifies a titrimetric method for the determination of aluminium in zinc alloys .

It is suitable for the determination of aluminium contents (mass fractions) between 3% and 30%.

06 Page Gr-XA ME

BDS ISO 1204:2011**Reciprocating internal combustion engines- Designation of the direction of rotation and of cylinders and valves in cylinder heads, and definition of right-hand and left-hand in-line engines and locations on an engine**

This International Standard specifies a method of designating the direction of rotation and of cylinders of reciprocating internal combustion engines and of designating a specific valve in a cylinder head when the cylinder head is mounted on the engine or dismantled.

13 Page Gr-XB ME

BDS ISO 1207:2008**Slotted cheese head screws- Product grade A**

Specifies the characteristics of slotted cheese head screws in product grade A and with thread sizes from M 3,5 to M 10 inclusive.

04 Page Gr-XA ME

BDS ISO 1275:2008**Double-pitch precision roller chains and sprockets for transmission and conveyors**

Specifies requirements for double-pitch precision roller chains suitable for the mechanical transmission of power and for conveyors, together with those for their associated sprockets.

09 Page Gr-XA ME

BDS ISO 1420:2016**Rubber- or plastics-coated fabrics- Determination of resistance to penetration by water**

This International Standard specifies a pass/fail method for the determination of the resistance of rubber- or plastics-coated fabrics to water penetration (hydrostatic resistance) when subjected to a specific hydrostatic pressure over a fixed period of time. Two test specimen shapes are given: one is circular, the other square

03 Page Gr-XA ME

BDS ISO 1421:2016**Rubber- or plastics-coated fabrics- Determination of tensile strength and elongation at break**

This International Standard describes two methods for the determination of the tensile strength of fabrics coated with rubber or plastics:

Method 1 — the strip test method, which is a method for the determination of tensile strength and elongation at break;

Method 2 — the grab test method, which is a method for the determination of tensile strength only.

BDS ISO 2591:2008

Test sieving -Part 1 : Methods using test sieves of woven wire cloth and perforated metal plate

This part of ISO 2591 draws attention to and describes the main factors affecting test sieving and the results obtained; it also specifies general principles to be followed concerning apparatus, procedure and presentation of results.

It applies to methods in which test sieves of woven wire cloth or perforated metal plate are used. Test sieving methods using test sieves of electroformed sheet will form the subject of ISO 2591-2.

13 Page Gr-XA CE

BDS ISO 2599-2:2008

Steel - Conversion of elongation values -

Part 2: Austenitic steels

Specifies a method of converting room temperature percentage elongations after fracture obtained on various proportional and non-proportional gauge lengths to other gauge lengths.

06 Page Gr-XA CE

BDS ISO 2602:2008

Statistical interpretation of test results- Estimation of the mean- Confidence interval

Specifies the statistical treatment of test results needed to calculate a confidence interval for the mean of a population.

ISO metric trapezoidal screw threads -Basic Profile and maximum material profiles

This International Standard specifies the basic Profile and maximum material profiles of ISO metric trapezoidal screw threads.

04 Page Gr-XA ME

BDS ISO 2941:2016

Hydraulic fluid power- Filter elements- Verification of collapse/burst pressure rating

This International Standard specifies a method for verifying the collapse/burst pressure rating of a hydraulic fluid power filter element, i.e. the capability of a filter element to withstand a designated differential pressure at the normal (i.e., intended direction of) flow, by means of pumping contaminated fluid through the filter element until either collapse/burst occurs or the maximum expected differential pressure is reached without element failure.

09 page Gr-XA CE

BDS ISO 2943:2016

Hydraulic fluid power- Filter elements- Verification of material compatibility with fluids

This International Standard specifies a method of verifying the compatibility of materials comprising a hydraulic fluid power filter element with a designated fluid, by verifying the ability of the filter element to maintain its collapse burst rating after being subjected to the designated system fluid at a high and/or low temperature.

The filter element mounting seal is not included as part of the element.

05 page Gr-XA ME

BDS ISO 3008:2015

Fire-resistance test- Door and shutter assemblies

This International Standard, used in conjunction with ISO 834-1, specifies a method for determining the fire resistance of door and shutter assemblies designed primarily for installation within openings incorporated in vertical separating elements.

52 Page Gr-XE CE

BDS ISO 3008-2:2015**Fire-resistance tests-Part 2: Lift landing door assemblies**

This part of ISO 3008 specifies the method of the test for determining the fire resistance of the lift landing door assemblies which can be exposed to fire from the landing side. The procedure applies to all the types of lift landing door assemblies used as a means of access to the lifts in buildings and which are intended to provide a fire barrier to the spread of fire via the lift well.

24 Page Gr-XC CE

BDS ISO 3046-1:2004**Reciprocating internal combustion engines - Performances -Part-1 : Standard reference conditions, declarations of power, fuel and lubricating oil consumptions, and test methods**

This Part of ISO 3046 specifies the requirements for the declaration of power, fuel consumption, lubricating oil consumption and the test method in addition to the basic requirements defined in "Core" standard ISO 15550.

34 Page Gr-XD ME

BDS ISO 3046-2:2005**Reciprocating internal combustion engines- Performances -Part-2 : test methods**

This Part of ISO 3046 specifies acceptance and type test methods for reciprocating internal combustion engines in commercial production. Where necessary, individual requirements are given for particular engine applications.

16 Page Gr-XB ME

BDS ISO 3046-3:2011**Reciprocating internal combustion engines- Performance- Part 3: Test measurements**

(First Revision)

This part of ISO 3046 specifies the common measurement techniques of the main performance parameters of reciprocating internal combustion engines, in addition to the basic requirements defined in ISO 15550. This is to ensure that the required accuracy of measurement is achieved for comparison of the measured values with those values specified by the engine manufacturer. Where necessary, individual requirements may be given for particular engine applications.

07 Page Gr-XA ME

BDS ISO 3046-4:2011**Reciprocating internal combustion engines- Performance- Part 4: Speed governing**

(First Revision)

This part of ISO 3046 establishes a classification for the requirements and parameters of speed-governing systems and specifies terms and definitions of typical engine speeds for reciprocating internal combustion (RIC) engines.

Where necessary, individual requirements are given for particular engine applications.

18 Page Gr-XB ME

BDS ISO 3046-5:2004**Reciprocating internal combustion engines- Performance- Part-5 :Torsional vibrations**

This Part of ISO 3046 establishes general requirements and definitions for torsional vibrations in shaft systems of sets driven by reciprocating internal combustion (RIC) engines. Where necessary, individual requirements are given for particular engine applications.

12 Page Gr-XB ME

BDS ISO 3046-6:2004**Reciprocating internal combustion engines- Performance- Part-6 : Overspeed protection.**

This Part of ISO 3046 specifies general requirements and gives definitions for overspeed limiting devices used for the protection of reciprocating internal combustion engines and their driven machinery.

03 Page Gr-XA ME

BDS ISO 3046-7:2004**Reciprocating internal combustion engines- Performance -Part-7: Codes for engine power.**

This Part of ISO 3046 defines code for engine brake power in accordance with ISO 3046-1, in order where necessary, to simplify the application of the statements of power specified in ISO 3046-1 and to facilitate communication. This applies, for example, to statements of power used on engine data plates.

04 Page Gr-XA ME

BDS ISO 3114:2008**Unplasticized polyvinyl chloride (PVC) pipes for potable water supply- Extractability of lead and tin- Test method**

This International Standard specifies a method of test for the determination of the extractability of certain stabilizers of unplasticized PVC in Order to verify that the extracted quantities do not exceed a certain concentration.

02 Page Gr-XA CE

BDS ISO 3126:2008**Plastics piping systems- Plastics components- Determination of dimensions**

This document specifies methods for measurement and/or determination of the dimensions of plastics pipes and fittings and the accuracy of the measurement.

It specifies procedures for measuring angles, diameters, lengths, squareness and wall thicknesses for the purposes of checking conformity to geometric limits.

18 Page Gr-XB CE

BDS ISO 3127:2008**Thermoplastics pipes- Determination of resistance to external blows- Round-the-clock method**

This International Standard specifies a method for the determination of the resistance to external blows of thermoplastics pipes of circular Cross-section; it is called the round-the-clock method. This method is applicable to isolated batches of pipe tested.

07 Page Gr-XA CE

BDS ISO 3130:2010**Wood- Determination of moisture content for physical and mechanical tests.**

This International Standard specifies a method for determining the moisture content of wood for physical and mechanical tests.

02 Page Gr-XA CE

BDS ISO 3213:2008**Polypropylene (PP) pipes- Effect of time and temperature on the expected strength.**

This International Standard lays down the minimum values for expected strength as a function of time and temperature in the form of reference lines, for use in calculations on pipes made of

- polypropylene homopolymer (PP-H);
- polypropylene block copolymer (PP-B);
- polypropylene random copolymer (PP-R).

10 Page Gr-XA CE

BDS ISO 3213:2009**Polypropylene (PP) pipes- Effect of time and temperature on the expected strength.**

This International Standard lays down the minimum values for expected strength as a function of time and temperature in the form of reference lines, for use in calculations on pipes made of

- polypropylene homopolymer (PP-H);
- polypropylene block copolymer (PP-B);
- polypropylene random copolymer (PP-R).

10 Page Gr-XA CE

BDS ISO 3219:2009**Non-alloy and alloy steel butt-welding fittings.**

This International Standard specifies the dimensions, tolerances and generally used grades of non-alloy, low-alloy and alloy steels for butt-welding bends (type 2D (90° and 180°) and 30 (450, 90° and 1800), concentric and eccentric reducers, tees, caps and stub ends with quality requirements as used for piping work.

17 Page Gr-XB CE

BDS ISO 3310-1:2008**Test sieves- Technical requirements and testing- Part 1: Test sieves of metal wire cloth**

This part of ISO 3310 specifies the technical requirements and corresponding test methods for test sieves of metal wire cloth.

It applies to test sieves having aperture sizes from 125 mm down to 20 µm, in accordance with ISO 565.

14 Page Gr-XB CE

BDS ISO 3310-2:2008**Test sieves — Technical requirements and testing- Part 2: Test sieves of perforated metal plate**

This part of ISO 3310 specifies the technical requirements and corresponding test methods for test sieves of perforated metal plate.

It applies to test sieves having ¾ round holes, with sizes from 125 mm down to 1 mm, or ¾ square holes, with sizes from 125 mm down to 4 mm, in accordance with ISO 565.

08 Page Gr-XA CE

BDS ISO 3310-3:2008**Test sieves - Technical requirements and testing- Part 3: Test sieves of electroformed sheets**

This part of ISO 3310 specifies the technical requirements and corresponding test methods for test sieves in which the sieving medium is a metal sheet with electrochemically formed apertures.

It applies to test sieves having round (circular) or Square apertures ranging in size from 500 µm to 5 mm, in accordance with ISO 565.

06 Page Gr-XA CE

BDS ISO 3419:2008**Non-alloy and alloy steel butt-welding fittings**

This International Standard specifies the dimensions, tolerances and generally used grades of non-alloy, low-alloy and alloy steels for butt-welding bends (type 2D (90° and 180°) and 30 (450, 90° and 1800), concentric and eccentric reducers, tees, caps and stub ends with quality requirements as used for piping work.

17 Page Gr-XB CE

BDS ISO 3458:2010**Assembled joints between fittings and polyethylene (PE) pressure pipes -Test of leakproofness under internal pressure**

This International Standard specifies the requirement and method of test for checking the leakproofness of assembled joints (excluding fusion-welded joints) between mechanical fittings and polyethylene (PE) pipes when the internal pressure is greater than that for which the pipe is rated.

02 Page Gr-XA CE

BDS ISO 3459:2010**Polyethylene (PE) pressure pipes- Joints assembled with mechanical fittings- Internal under-pressure test method and requirement**

This International Standard specifies the requirement and method of test for checking the leakproofness of assembled joints (excluding fusion-welded joints) between mechanical fittings and polyethylene (PE) pressure pipes when the external pressure is greater than the pressure within the Pipe.

02 Page Gr-XA CE

BDS ISO 3474:2008**Unplasticized polyvinyl chloride (WC) pipes- Specification and measurement of Opacity**

This International Standard specifies a method for the determination of the Opacity of unplasticized polyvinyl chloride (PVC) pipes, and lays down the acceptable limit of light which may pass through the wall of the Pipe.

02 Page Gr-XA CE

BDS ISO 3497:2011

Metallic coatings- Measurement of coating thickness- X-ray spectrometric methods

This International Standard specifies methods for measuring the thickness of metallic coatings by the use of X-ray spectrometric methods

18 Page Gr-XB ME

BDS ISO 3501:2010

Assembled joints between fittings and polyethylene (PE) pressure pipes - Test of resistance to pull out

This International Standard specifies a method for checking the ability of assembled joints (excluding fusion-welded joints) between fittings and polyethylene (PE) pressure pipes to withstand longitudinal tensile stresses.

04 Page Gr-XA CE

BDS ISO 3503:2010

Assembled joints between fittings and polyethylene (PE) pressure pipes- Test of leakproofness under internal pressure when subjected to bending

This International Standard specifies a method for checking the leakproofness under internal pressure of assembled joints (excluding fusion-welded joints) between mechanical fittings and polyethylene (PE) pressure pipes when subjected to bending. It defines the calculation methods for the average bending radius and how to perform this bending.

02 Page Gr-XA CE

BDS ISO 3512 :2008

Heavy duty cranked link transmission chains

This International Standard specifies dimensions, tolerances, measuring loads and minimum breaking loads, together with the tooth gap forms and rim profiles of the associated chain wheels, for cranked link roller chains suitable for the mechanical transmission of power and allied applications under onerous conditions.

07 Page Gr-XA ME

BDS ISO 3545-3:2008

Steel tubes and fittings - Symbols for use in specifications -Part 3:Tubular fittings with circular cross-section.

This part of ISO 3545 defines the most common symbols with the aim of standardizing and facilitating the use of terminology in Standards for tubular fittings and associated products.

04 Page Gr-XA CE

BDS ISO 3599:2008

Vernier callipers reading to 0,1 and 0,05 mm

This International Standard specifies the most important dimensional, functional and quality characteristics of vernier callipers reading to 0,1 and 0,05 mm, with a maximum range of 1 000 mm. Methods for testing the accuracy of the instruments are given in an annex, for general information only

04 Page Gr-XA CE

BDS ISO 3611:2008

Micrometer callipers for external measurement

This International Standard specifies the most important dimensional, functional and quality characteristics of

micrometer callipers for external measurement. Information concerning values for the error of measurement at any point in the measuring range and recommendations for using the instruments and testing their accuracy are given in annexes.

Zinc and zinc alloys— Part 1: Analysis of solid samples by optical emission spectrometry

This part of ISO 3815 specifies analytical methods for determining the chemical composition of zinc and zinc alloys in accordance with ISO 301 and ISO 752 by optical emission spectrometry.

08 Page Gr-XA ME

BDS ISO 3815-2:2013**Zinc and zinc alloys- Part 2: Analysis by**

This part of ISO 3815 specifies analytical methods for determining the chemical composition of zinc and zinc alloys in accordance with ISO 301 and ISO 752 by inductively coupled plasma optical emission spectrometry.

This part of ISO 3815 includes recommendations for preparation of test solutions and calibration solutions for zinc and zinc alloys.

03 Page Gr-XA ME

BDS ISO 3822-1:2009**Acoustics- Laboratory tests on noise emission from appliances and equipment used in water supply installations- Part 1: Method of measurement**

Specifies a method of measurement, in the laboratory, of the noise emission resulting from the flow of water through appliances and equipment used in water supply installations.

18 Page Gr-XB CE

BDS ISO 3822-2:2009**Acoustics- Laboratory tests on noise emission from appliances and equipment used in water supply installations- Part 2: Mounting and operating conditions for draw-off taps and mixing valves**

Specifies the mounting and operating conditions to be used for draw-off taps and mixing valves when measuring noise emission resulting from water flow.

02 Page Gr-XA CE

BDS ISO 3822-4:2009**Acoustics- Laboratory tests on noise emission from appliances and equipment used in water supply installations- Part 4: Mounting and operating conditions for special appliances**

Specifies the mounting and operating conditions to be used for a number of appliances which cannot be regarded as draw-off or in-line valves, when measuring the noise emission resulting from water flow.

24 Page Gr-XC CE

BDS ISO 3877-1:2012**Tyres, valves and tubes- List of equivalent term- Part 1: Tyres**

This part of ISO 3877 presents a list of equivalent tyre terms commonly used in the tyre industry.

The terms are arranged in three columns. The first column gives the English terms in alphabetical order. The second column gives the English terms used in the USA and it should be noted that such terms are not necessarily in alphabetical order. An alphabetical index of the English (USA) terms is located at the end of this part of ISO 3877. The third column gives the equivalent French terms.

18 Page Gr-XB ME

BDS ISO 3877-2:2012**Tyres, valves and tubes- List of equivalent terms- Part 2: Tyres.**

This part of ISO 3877 presents a list of equivalent tyre terms commonly used in the tyre industry.

The terms are arranged in three columns. The first column gives the English terms in alphabetical order. The second column gives the equivalent French terms.

14 Page Gr-XA ME

BDS ISO 3877-3:2012**Tyres, valves and tubes- List of equivalent terms- Part 3: Tubes**

This International Standard gives a list of equivalent terms relating to tubes, in English, French and Russian, as used in the tyre industry.

Terms relating to tyres and to tyre valves are given in ISO 3877/1 and ISO 3877/II respectively.

14 Page Gr-XB ME

BDS ISO 3877-4:2012**Tyres, valves and tubes- List of equivalent terms- Part 4: Solid tyres**

This part of ISO 3877 gives a list of equivalent terms in English, French and Russian, relating to solid tyres as used in the tyre industry. Terms relating to tyres, tyre valves, and tubes are given in parts 1,2 and 3 respectively.

14 Page Gr-XB ME

BDS ISO 3893:2009**Concrete-Classification by compressive strength**

This International Standard establishes a System of classification for concrete according to its characteristic compressive strength at 28 days..

02 Page Gr-XA CE

BDS ISO 3911:2012**Wheels and rims for pneumatic tyres- Vocabulary, designation and marking**

This International Standard presents a vocabulary of terms related to, and systems for the designation and marking of, wheels and rims intended for use with pneumatic tyres. The intention is to define fundamental wheel and rim terms rather than provide a comprehensive tabulation of all wheel design features. Also specified are the content, location and minimum size of the wheel and rim marking, with the purpose of establishing, on a worldwide basis, a uniform identification system for wheels and rims.

30 Page Gr-XC ME

BDS ISO 3941 :2009**Classification of fires**

This International Standard classifies, into five categories, the different kinds of fires defined in terms of the nature of the fuel. Such a classification is particularly useful in the context of fire-fighting by means of an extinguisher.

04 Page Gr-XA CE

BDS ISO 3951-1:2016**Sampling procedures for inspection by variables- Part1: Specification for single sampling plans**

indexed by acceptance quality limit (AQL) for lot-by-lot inspection for a single quality characteristic and a single AQL

This part of ISO 3951 is primarily designed for use under the following conditions.

92 Page Gr-XE CE

BDS ISO 3951-2:2016

Sampling procedures for inspection by variables- Part 2: General specification for single sampling plans indexed by acceptance quality limit (AQL) for lot-by-lot inspection of independent quality characteristics

Unplasticized polyvinyl chloride (PVC) and metal adaptor fittings for pipes under pressure- Laying lengths and size of threads - Metric series

This International Standard specifies the series of diameters to be used and the dimensions which are common to all types of unplasticized polyvinyl chloride (PVC) and metal adaptor fittings for pipes under pressure, to achieve the connection to existing metal pipes, fittings, valves and/or apparatus with pipe threads.

05 Page Gr-XA CE

BDS ISO 4144:2008

Pipework- Stainless steel fittings threaded in accordance with ISO 7-1

This International Standard specifies the types, pressure-temperature ratings, minimum dimensions and materials of stainless steel fittings for threaded connections in accordance with ISO 7-1, used for ordinary piping for steam, air, gas, water, oil, etc.

19 Page Gr-XA CE

BDS ISO 4145:2008

Non-alloy steel fittings threaded to ISO 7/1

This International Standard specifies requirements for nonalloy steel fittings for threaded connections in accordance with ISO 711, used mainly for industrial purposes.

12 Page **Gr-XB** **CE**

ISO 4179:2008**Ductile iron pipes for pressure and non-pressure pipelines- Centrifugal cement mortar lining- General requirements**

This International Standard specifies the nature, the method of application, the surface condition and the minimum thickness of internal linings of centrifuged cement mortar for ductile iron pipes for pressure and non-pressure pipelines as defined in ISO 2531 and ISO 7186.

04 Page **Gr-XA** **CE**

BDS ISO 4183:2008**Belt drives - Classical and narrow V-belts- Grooved pulleys (System based on datum width)**

This International Standard specifies the principal dimensions of grooved pulleys for classical V-belts (sections Y, Z, A, B, C, D and E) and narrow V-belts (sections SPZ, SPA, SPB and SPC) specified in the terminology System based on datum width.

It is important that narrow belts are not used with pulleys uniquely designed for classical belts, and, on the other hand, that multiple belt drives are not used with joined V-belts.

06 Page **Gr-XA** **ME**

BDS ISO 4184:2008**Belt drives - Classical and narrow V-belts - Lengths in datum System**

This International Standard specifies, for classical and narrow V-belts of sections Y(for groove Profile with datum width 53 mm), Z(for groove Profile with datum width 83 mm),

A(for groove Profile with datum width 11 mm),

B(for groove Profile with datum width 14 mm),

C(for groove Profile with datum width 19 mm),

D(for groove Profile with datum width 27 mm),

E(for groove Profile with datum width 32 mm),

SPZ for groove Profile with datum width 83 mm),

SPA(for groove Profile with datum width 11 mm),

SPB(for groove Profile with datum width 14 mm),

SPC(for groove Profile with datum width 19 mm):- the recommended datum lengths;

- the tolerances for datum lengths;

- the centre distance variations;

- the conditions for measuring the datum length and the centre distance Variation.

BDS ISO 4548-3:2016

Methods of test for full-flow lubricating oil filters for internal combustion engines- Part 3: Resistance to high pressure and to elevated temperature

This part of ISO 4548 specifies tests for measuring the resistance to high differential pressure and the resistance to elevated temperatures of filter elements of full-flow lubricating oil filters for internal combustion engines.

10 page **Gr-XA** **ME**

BDS ISO 4548-4:2016**Methods of test for full-flow lubricating oil filters for internal combustion engines — Part 4: Initial particle retention efficiency, life and cumulative efficiency (gravimetric method)**

This part of ISO 4548 specifies tests for determining the performance of full-flow lubricating oil filters for internal combustion.

30 page Gr-XC ME

BDS ISO 4548-5:2016**Methods of test for full-flow lubricating oil filters for internal combustion engines- Part 5: Cold start simulation and hydraulic pulse durability test**

This part of ISO 4548 specifies a method of testing the ability of full-flow lubricating oil filters for internal combustion engines to withstand an internal pressure surge such as occurs when an engine is started from cold, and cyclic internal pressure variations experienced during operation.

08 page Gr-XA ME

BDS ISO 4548-6:2016**Methods of test for full-flow lubricating oil filters for internal combustion engines- Part 6: Static burst pressure test**

This part of ISO 4548 specifies a method of testing full-flow lubricating oil filters for internal combustion engines to determine their ability to withstand a static pressure objective and to determine their burst pressure and the failure mode concerned.

03 page Gr-XA ME

BDS ISO 4548-7:2016**Methods of test for full-flow lubricating oil filters for internal combustion engines- Part 7: Vibration fatigue test**

This part of ISO 4548 specifies a method of testing the constructional integrity of full-flow lubricating oil filters to withstand engine vibrations. This test is intended for application to spin-on type filters and detachable filters with disposable elements with a maximum flow rate of 100 l/min.

06 page Gr-XA ME

BDS ISO 4548-9:2016**Methods of test for full-flow lubricating oil filters for internal combustion engines- Part 9: Inlet and outlet anti-drain valve test**

This part of ISO 4548 specifies methods of measuring the effectiveness of either inlet or outlet anti-drain valves if fitted to a full-flow lubricating oil filter of the “spin-on” or “easy change” type, for internal combustion engines.

06 page Gr-XA ME

BDS ISO 4548-12:2016**Methods of test for full-flow lubricating oil filters for internal combustion engines — Part 12: Filtration efficiency using particle counting and contaminant retention capacity**

This part of ISO 4548 specifies a multi-pass filtration test with continuous contaminant injection and using the online particle counting method for evaluating the performance of full-flow lubricating oil filters for internal combustion engines.

26 page Gr-XB ME

BDS ISO 4548-13:2016**Methods of test for full-flow lubricating oil filters for internal combustion engines — Part 13: Static burst pressure test for composite filter housings**

This part of ISO 4548 specifies a method of testing full-flow lubricating oil filters for internal combustion engines to determine their ability to withstand a static pressure objective at high and cold temperatures and to determine their burst pressure and the failure mode.

03 page Gr-XA ME

BDS ISO 4548-14:2016**Methods of test for full-flow lubricating oil filters for internal combustion engines- Part 14: Cold start simulation and hydraulic pulse durability for composite filter housings**

This part of ISO 4548 specifies a method of testing the ability of full-flow lubricating oil filters manufactured with composite pressure vessel materials for internal combustion engines to withstand an internal pressure surge and cyclic internal pressure variations experienced in the application at specified operating temperatures.

06 page Gr-XA ME

BDS ISO 4548-15:2016**Methods of test for full-flow lubricating oil filters for internal combustion engines — Part 15: Vibration fatigue test for composite filter housings**

This part of ISO 4548 specifies a method of testing the structural integrity of full-flow lubricating oil filters to withstand engine vibrations. This test is intended for application to spin-on type filters and detachable filters with disposable elements with a maximum flow rate of 100 L/min. Upon agreement between manufacturer and purchaser, this test method can be applied to filters with higher flow rates.

Fire tests- Smoke-control door and shutter assemblies- Part 1: Ambient- and medium-temperature leakage tests

The test described in this part of ISO 5925 determines the rate of leakage of ambient (cold) and medium (warm) temperature smoke from one side of door and shutter assemblies to the other under the specified test conditions. The test is applicable to door and shutter assemblies of different configurations intended for purposes of controlling the passage of smoke in case of fire.

11 Page **Gr-XB** **CE**

BDS ISO/TR 5925-2:2015

Fire tests- Smoke-control door and shutter assemblies- Part 2: Commentary on test method and the applicability of test conditions and the use of test data in a smoke containment strategy

This Technical Report provides a commentary that explains the general philosophy and factors on which the test specified in Part 1 of ISO 5925 has been designed, to describe the limitations of its application and to provide some general guidance for those who use the result of the test. Smoke control-door and shutter assemblies can be used as part of a smoke containment strategy for the purposes of life safety or property protection.

12 Page **Gr-XB** **CE**

BDS ISO 6054-1:2012**Motorcycle tyres and rims (code-designated series) – Diameter Codes 4 to 12 - Part 1: Tyres**

This part of ISO 6054 lays down the designation, dimensions, and load ratings for an inch-code-designated series of tyres for motorcycles, fitted on rims with a nominal diameter corresponding to the Codes 4, 5, 6, 7, 8, 9, 10 and 12.

ISO 6054-2 deals with the requirements for rims.

06 Page **Gr-XA** **ME**

BDS ISO 6054-2:2012**Motorcycle tyres and rims (Code-designated series) – Diameter Codes 4 to 12 -Part 2: Rims**

This part of ISO 6054 lays down rim dimensions for an inch-code-designated series of motorcycle tyres for diameter Codes 4 to 12. It sets only those rim contour dimensions necessary for the mounting and fitment of the tyre to the rim.

06 Page **Gr-XA** **ME**

BDS ISO 6259-1:2008**Thermoplastics pipes- Determination of tensile properties- Part 1:General test method**

Specifies a method of determining the tensile properties of thermoplastics pipes, including in particular the following properties:

- stress at yield point; - elongation at break.

06 Page **Gr-XA** **CE**

BDS ISO 6259-2:2008**Thermoplastics pipes- Determination of tensile properties- Part 2:Pipes made of unplasticized poly (vinyl chloride) (PVC-U), chlorinated poly (vinyl chloride) (PVC-C) and high-impact poly (vinyl chloride) (PVC-HI)**

Specifies a method of determining the tensile properties of pipes made of poly(vinyl chloride)(PVC-U), chlorinated poly(vinyl chloride) (PVC-C) and high-impact poly(vinyl chloride) (PVC-HI), and in particular the following properties:— the stress at yield;— the elongation at break.

04 Page **Gr-XA** **CE**

BDS ISO 6259-3:2008**Thermoplastics pipes- Determination of tensile properties- Part 3: Polyolefin pipes**

Specifies a method of determining the tensile properties of polyolefin (polyethylene, crosslinked polyethylene, polypropylene and polybutene) pipes, and in particular the following properties:

— the stress at yield;

— the elongation at break

05 Page **Gr-XA** **CE**

BDS ISO 6274:2008**Concrete- Sieve analysis of aggregates**

Specifies a method, using test sieves, for the determination of the particle size distribution of normal weight aggregates for concrete.

BDS ISO 6455:2008

Unplasticized polyvinyl chloride (PVC) fittings with elastic sealing ring type joints for pipes under pressure- Dimensions of laying lengths- Metric series
Specifies the series of diameters to be used and the dimensions which are common to those types of fittings made of unplasticized polyvinyl chloride (PVC) with elastic sealing ring type joints for pipes under pressure, regardless of their method of manufacture and composition.

07 Page **Gr-XA** **CE**

BDS ISO 6506-1:2008**Metallic materials- Brinell hardness test- Part 1: Test method**

Specifies the method for the Brinell hardness test for metallic materials and is applicable up to the limit of 650 HBW.

15 Page **Gr-XB** **CE**

BDS ISO 6506-2:2008**Metallic materials- Brinell hardness test- Part 2: Verification and calibration of testing machines**

Specifies a method of verification and calibration of testing machines used for determining Brinell hardness in accordance with ISO 6506-1.

06 Page **Gr-XA** **CE**

BDS ISO 6506-3:2008**Metallic materials- Brinell hardness test- Part 3: Calibration of reference blocks**

Specifies a method for the calibration of reference blocks to be used in the indirect verification of Brinell hardness testing machines as described in ISO 6506-2.

04 Page **Gr-XA** **CE**

BDS ISO 6507-1:2008**Thermoplastics pipes and fittings- Vicat softening temperature -Part 1: General test method**

This part of ISO 2507 specifies a general method for determining the Vicat softening temperature of thermoplastics pipes and fittings.

07 Page **Gr-XA** **CE**

BDS ISO 6507-1:2008**Metallic materials- Vickers hardness test- Part 1: Test method**

Specifies the Vickers hardness test method, for the three different ranges of test force for metallic materials.

07 Page **Gr-XA** **CE**

BDS ISO 6507-2:2008**Metallic materials- Vickers hardness test- Part 2:Verification and calibration of testing machines**

Specifies a method of verification of testing machines for determining Vickers hardness in accordance with ISO 6507-1.

08 Page **Gr-XA** **CE**

BDS ISO 6507-2:2008

Thermoplastics pipes and fittings- Vicat softening temperature- Part 2:Test conditions for unplasticized poly (vinyl chloride) (PVC-U) or chlorinated poly (vinyl chloride) (PVC-C) pipes and fittings and for

high impact resistance poly (vinyl chloride) (PVC-H 1) pipes

Specifies the particular test conditions for determining the Vicat softening temperature(VST) of unplasticized poly(vinyl chloride) (PVC-U) or chlorinated poly(vinyl chloride) (PVC-C) pipes and fittings and of high impact resistance poly(vinyl chloride) (PVC-H) pipes.

02 Page Gr-XA CE

BDS ISO 6508-1:2008

Metallic materials- Rockwell hardness test- Part 1: Test method (scales A, B, C, D, E, F, G, H, K, N,)

Specifies the method for Rockwell and Rockwell superficial hardness tests (scales and field of application according to Table 1) for metallic materials. Attention is drawn to the fact that, in this part of ISO 6508, the use of hardmetal for ball indenters is considered to be the standard type of Rockwell indenter ball.

11 Page Gr-XB CE

BDS ISO 6508-2:2008

Metallic materials- Rockwell hardness test- Part 2: Verification and calibration of testing machines (scales A, B, C, D, E, F, G, H, K, N, T)

Specifies a method of verification of testing machines for determining Rockwell hardness (scales A, B, C, D, E, F, G, H, K, N, T) in accordance with ISO 6508-1.

10 Page Gr-XA CE

BDS ISO 6508-3:2008

Metallic materials- Rockwell hardness test- Part 3: Calibration of reference blocks (scales A, B, C, D, E, F, G, H, K, N, T)

Specifies a method for the calibration of reference blocks to be used for the indirect verification of Rockwell hardness testing machines (scales A, B, C, D, E, F, G, H, K, N, T), as specified in ISO 6508-2.

08 Page Gr-XA CE

BDS ISO 6695:2006

Cycles- Pedal axle and crank assembly with square end fitting- Assembly dimensions

This standard specifies the dimension for assembly of cranks on bottom bracket pedal axles with square end fittings.

02 Page Gr-XA ME

BDS ISO 6696:2006

Cycles- Screw threads used in bottom bracket assemblies

This standard specifies the thread profile and limits and tolerances for the screw threads used to assemble bottom bracket cups to bottom brackets on bicycles

06 Page Gr-XA CE

BDS ISO 6697:2006

Cycles- Hubs and freewheels- Assembly dimensions

This standard specifies the main dimensions for hubs and freewheels, including single speed coaster brake

hubs and multispeed gear hubs to ensure assembly and interchangeability.

04 Page Gr-XA CE

BDS ISO 6698:2006

Cycles- Screw threads used to assemble freewheels on bicycle hubs

This standard specifies the thread profile and limits and tolerances for the screw threads used to assemble freewheels of bicycle hubs.

06 Page Gr-XA CE

BDS ISO 6699:2006

Cycles- Stem and handlebar bend- Assembly dimensions

Specifies the dimensions and tolerances to ensure secure assembly between the stem and handlebar bend of a bicycle. It applies to bicycles intended for use on public roads.

02 Page Gr-XA CE

BDS ISO 6701:2006

Cycles- External dimensions of spoke nipples

Specifies the external dimensions and tolerances for the spoke nipples of bicycles and also designation. It applies to round of flat head spoke nipples.

02 Page Gr-XA CE

BDS ISO 6708:2008

Pipe components- Definition of nominal size

Gives the definition of the nominal size of pipe components.

02 Page Gr-XA CE

BDS ISO 6761:2009

Steel tubes- Preparation of ends of tubes and fittings for welding

Specifies the most usual preparation of ends of tubes and of ends of fittings for welding.

02 Page Gr-XA CE

BDS ISO 6782:2008

Aggregates for concrete- Determination of bulk density

Specifies a method for the determination of the bulk density of dry or moist aggregates (normal or lightweight) for concrete, in either loose or compacted condition.

02 Page Gr-XA CE

BDS ISO 6783:2008

Coarse aggregates for concrete- Determination of particle density and water absorption - Hydrostatic balance method

Specifies a method for the determination of the particle density and water absorption of coarse aggregates, having a nominal size greater than 4 mm, for concrete

02 Page Gr-XA CE

BDS ISO 6784:2008

Concrete- Determination of static modulus of elasticity in compression

Specifies a method for the determination of the static modulus of elasticity in compression of hardened concrete, on test specimens which may be cast or taken from a structure.

03 Page **Gr-XA** **CE**

BDS ISO 6798:2011

Reciprocating internal combustion engines- Measurement of emitted airborne noise- Engineering method and survey method

This International Standard specifies methods for measuring the sound pressure levels on a measurement surface enveloping a source, and for calculating the sound power level produced by the source. It gives requirements for the test environment and instrumentation, as well as techniques for obtaining the surface sound pressure level from which the A-weighted sound power level of the source and octave or one-third octave band sound power levels are calculated. This method may be used to perform acceptance tests.

18 Page **Gr-XB** **ME**

BDS ISO 6826:2011

Reciprocating internal combustion engines- Fire protection

This International Standard establishes requirements for reciprocating internal combustion engines to minimize the risk of fire caused by the engine, its components and the auxiliaries fitted to it. Where necessary, special requirements can be given for particular engine applications.

08 Page **Gr-XA** **ME**

BDS ISO 6892:2008

Metallic materials –Tensile testing at ambient temperature

(Cancels and replaces by BDS ISO 6892-1:2012, BDS ISO 6892-2:2012)

BDS ISO 6892-1:2012

Metallic materials- Tensile testing- Part 1: Method of test at room temperature

This part of ISO 6892 specifies the method for tensile testing of metallic materials and defines the mechanical properties which can be determined at room temperature

65 Page **Gr-XE** **CE**

BDS ISO 6892-2:2012

Metallic materials- Tensile testing- Part 2 : Method of test at elevated temperature

This part of ISO 6892 Specifies a method of tensile testing of metallic materials at temperatures higher than room temperature.

20 Page **Gr-XB** **CE**

BDS ISO 6925:2016

Textile floor coverings- Burning behaviour- Tablet test at ambient temperature

This International Standard specifies a method for the assessment of the burning behaviour, often superficial, of textile floor coverings in a horizontal position when

exposed to a small source of ignition under controlled laboratory conditions.

03 Page **Gr-XA** **ME**

BDS ISO 6927:2008

Building construction- Jointing products- Sealants- Vocabulary

Defines technical terms for sealants for building purposes and applies to joints filled with hardening, plastic or elastic materials which are not preformed.

03 Page **Gr-XA** **CE**

BDS ISO 6929:2016

Steel products- Vocabulary

This International Standard defines terms for steel products according to their

- a) stage of manufacture,
- b) shape and dimensions, and
- c) appearance.

40 page **Gr-XD** **CE**

BDS ISO 6934-1:2008

Steel for the prestressing of concrete -Part I: General requirements

Specifies requirements for high tensile strength steel to be used in prestressed concrete. It applies only to material in the condition as supplied by the manufacturer. It does not cover requirements for materials and anchorage devices used in conjunction with the prestressing steel in structural components.

04 Page **Gr-XA** **CE**

BDS ISO 6934-2:2008

Steel for the prestressing of concrete- Part 2: Cold-drawn wire

Specifies requirements for round, cold-drawn, high-tensile steel wire, either plain, indented, ribbed or crimped. The product is supplied as mill coil wire or straightened and stress-relieved wire in coils or cut lengths, according to the general requirements specified in

04 Page **Gr-XA** **CE**

ISO 6934-3:2008

Steel for the prestressing of concrete- Part 3: Quenched and tempered wire

Specifies requirements for round wire made of quenched and tempered high tensile steel, with a surface which is either plain, ribbed, grooved or indented. The product is delivered in coils, according to the general requirements specified in ISO 6934-1.

06 Page **Gr-XA** **CE**

BDS ISO 6934-4:2008

Steel for the prestressing of concrete- Part 4: Strand

Specifies requirements for high tensile steel strand which has been given a stress-relieving heat treatment according to the general requirements specified in ISO 6934-1. The strand may contain either 2, 3, 7 or 19 individual wires.

04 Page **Gr-XA** **CE**

BDS ISO 6934-5:2008

Steel for the prestressing of concrete -Part 5: Hot-rolled steel bars with or without subsequent processing

Specifies requirements for round high tensile steel bars. The bars may be supplied either hot-rolled or in a hot-rolled and processed condition, according to the general requirements specified in ISO 6934-1. The surface may be plain or ribbed. The bars are delivered in straight lengths.

04 Page **Gr-XA** **CE**

BDS ISO 6935-1:2012

Steel for the reinforcement of concrete- Part 1: Plain bars (Second Revision)

This part of ISO 6935 specifies technical requirements for plain bars to be used as reinforcement in concrete.

10 Page **Gr-XA** **CE**

BDS ISO 6935-2:2016

Steel for the reinforcement of concrete- Part 2: Ribbed bars

This part of ISO 6935 specifies technical requirements for ribbed bars to be used as reinforcement in concrete.

20 Page **Gr-XB** **CE**

BDS ISO 6935-3: 2006

Steel for the re-inforcement of concrete-Part-1: Welded Fabric

Specifies technical requirements for factory made sheets or rolls welded fabric manufacture from steel wires or bars with diameters from 4 mm to 16 mm and designed for re-inforcement in ordinary concrete structured and for non-prestressed reinforcement in prestressed concrete structures.

08 Page **Gr-XA** **CE**

BDS ISO 6940:2016

Textile fabrics- Burning behaviour- Determination of ease of ignition of vertically oriented specimens

This International Standard specifies a method for the measurement of ease of ignition of vertically oriented textile fabrics and industrial products in the form of single or multi- component fabrics (coated, quilted, multilayered, sandwich constructions, and similar combinations), when subjected to a small, defined flame

14 Page **Gr-XB** **ME**

BDS ISO 6941:2016

Textile fabrics- Burning behaviour- Measurement of flame spread properties of vertically oriented specimens

This International Standard specifies a method for the measurement of flame spread times of vertically oriented textile fabrics and industrial products in the form of single or multi- component fabrics (coated, quilted, multilayered, sandwich combinations, and similar combinations) when subjected to a small, defined flame.

13 Page **Gr-XB** **ME**

BDS ISO 6964:2010

Polyolefin pipes and fittings- Determination of carbon black content by calcination and pyrolysis- Test method and basic specification

This International Standard specifies a test method for the determination of the carbon black content of polyolefin compositions used in particular for the manufacture of pipes and fittings, and provides a basic specification for polyethylene pipes and fittings.

02 Page **Gr-XA** **CE**

BDS ISO 6971:2008

Cranked- link drag chains of welded construction, attachments and sprockets

Specifies the characteristics of cranked-link1 drag chains of welded construction suitable for conveying bulk materials, together with associated attachments and chain sprockets. The chain dimensions specified in this International Standard ensure interchangeability of both complete chains and individual links for repair purposes.

14 Page **Gr-XA** **CE**

BDS ISO 6972:2008

Cranked-link mill chains of welded construction, attachments and sprockets

Specifies the characteristics of cranked-link1) mill chains of welded construction suitable for conveying bulk materials, together with associated attachments and chain sprockets. The chain dimensions specified in this International Standard ensure interchangeability of both complete chains and individual links for repair purposes.

18 Page **Gr-XB** **ME**

BDS ISO 6992:2008

Unplasticized polyvinyl chloride (PVC-U) pipes for drinking water supply- Extractability of Cadmium and mercury occurring as impurities

Specifies a test method for the determination of the extractability of certain impurities from unplasticized polyvinyl chloride (PVC-U) pipe in order to verify that the extraction quantities do not exceed a certain concentration. Section one deals exclusively with the extraction method and leaves the analytical method to the choice of the Operator. Section two gives limits for these impurities in the extract, which have been found by experience to ensure that actual extraction in Service will be acceptable by many regulatory authorities, particularly the World Health Organization (WHO).

04 Page **Gr-XA** **CE**

BDS ISO 7005-1:2008

Metallic flanges -Part 1: Steel flanges

Specifies requirements for circular steel flanges in the following PN designations:

79 Page **Gr-XE** **CE**

BDS ISO 7005-2:2008

Metallic flanges- Part 2: Cast iron flanges

Specifies requirements for circular grey, malleable and ductile cast iron flanges in the following nominal pressure ratings:

33 Page **Gr-XD** **CE**

BDS ISO 7005-3:2008**Metallic flanges -Part 3: Copper alloy and composite flanges**

Specifies requirements for circular copper alloy and composite flanges in the following nominal pressure ratings:

26 Page **Gr-XC** **CE**

BDS ISO 7033:2008**Fine and coarse aggregates for concrete- Determination of the particle mass-per-volume and water absorption - Pycnometer method**

Specifies a method for the determination of the particle mass-per-volume and the water absorption of fine and coarse aggregates for concrete. The method is based on the use of a pycnometer for the determination of the volume of the aggregate particles.

03 Page **Gr-XA** **CE**

BDS ISO 7076-1:2014**Fire protection- Foam fire extinguishing systems- Part 1: Foam proportioning equipment**

This International Standard specifies requirements and test methods for foam proportioning equipment of fixed foam extinguishing systems for indoor or outdoor use or both.

16 Page **Gr-XB** **CE**

BDS ISO 7076-2:2014**Fire protection- Foam fire extinguishing systems- Part 2: Low expansion foam equipment**

This International Standard specifies requirements and test methods for low expansion foam equipment of fixed-foam extinguishing systems for indoor or outdoor use or both.

16 Page **Gr-XB** **CE**

BDS ISO 7152:2016**Camping tents and caravan awnings - Vocabulary and list of equivalent terms**

This International Standard gives a list of the most frequent terms relating to camping tents and caravan awnings together with some definitions.

41 page **Gr-XE** **ME**

BDS ISO 7165:2010**Fire fighting- Portable fire extinguishers- Performance and construction**

This International Standard specifies the principal requirements intended to ensure the safety, reliability and performance of portable fire extinguishers.

57 Page **Gr-XE** **CE**

BDS ISO 7202:2014**Fire protection- Fire extinguishing media- Powder (First Revision)**

This International Standard specifies requirements for the chemical and physical properties, and for minimum performance in defined test methods, of fire extinguishing powders suitable for use against fires of classes A, B, C and D. Requirements are also given for

the information and data to be declared by the manufacturer.

26 Page **Gr-XC** **CE**

BDS ISO 7203-1:2014**Fire extinguishing media- Foam concentrates- Part 1: Specification for low expansion foam**

(First Revision)

This part of ISO 7203 specifies the essential properties and Performance of liquid foam concentrates used to make low expansion foams for the control, extinction and inhibition of reignition of fires of water-immiscible liquids. Minimum Performance on certain test fires is specified.

20 Page **Gr-XB** **CE**

BDS ISO 7203-2:2014**Fire extinguishing media- Foam concentrates- Part 2: Specification for low expansion foam concentrates for medium and high application to water-immiscible liquids (First Revision)**

This part of ISO 7203 specifies the essential properties and Performance of liquid foam concentrates used to make low expansion foams for the control, extinction and inhibition of reignition of fires of water-immiscible liquids. Minimum Performance on certain test fires is specified.

22 Page **Gr-XC** **CE**

BDS ISO 7203-3:2014**Fire extinguishing media- Foam concentrates- Part 3: Specification for low expansion foam concentrates for top application to water miscible liquids (First Revision)**

This part of ISO 7203 is applicable to low expansion foam concentrates which conform to ISO 7203-1. It specifies additional requirements to assess their suitability for use on water-miscible fuels.

18 Page **Gr-XB** **CE**

BDS ISO 7225:2008**Gas cylinders- Precautionary labels**

Specifies the design, content, i.e. hazard Symbols and text, and application of warning labels for gas cylinders.

09 Page **Gr-XA** **ME**

BDS ISO 7268:2008**Pipe components- Definition of nominal pressure**

Gives the definition of nominal pressure when applied to components of a metallic piping system, and states two series of PN ratings for use with these same components.

02 Page **Gr-XA** **CE**

BDS ISO 7279:2009**Polypropylene (PP) fittings for pipes under pressure - Sockets for fusion using heated tools - Metric series - Dimensions of sockets Steel tubes - Preparation of ends of tubes and fittings for welding**

Specifies the dimensions of sockets for polypropylene (PP) fittings intended for fusion with heated tools to polypropylene pipes under pressure.

02 Page **Gr-XA** **CE**

BDS ISO 7349:2008**Thermoplastics valves- Connection references**

Specifies and identifies in a table of comparison the possible types of connections of thermoplastic valves to various pipe Systems.

02 Page **Gr-XA** **CE**

BDS ISO 7438:2008**Metallic materials- Bend test**

Specifies a method for determining the ability of metallic materials to undergo plastic deformation in bending.

08 Page **Gr-XA** **CE**

BDS ISO 7452:2016**Hot-rolled steel plates- Tolerances on dimensions and shape**

This International Standard specifies requirements for tolerances for hot-rolled steel plates made on a reversing mill with the following characteristics:

- a) nominal thickness: $3 \text{ mm} \leq t \leq 400 \text{ mm}$;
- b) nominal width: $w \geq 600 \text{ mm}$.

14 page **Gr-XA** **CE**

BDS ISO 7483:2008**Dimensions of gaskets for use with flanges to BDS ISO 7005**

Specifies the dimensions of the following gaskets for use in conjunction with flanges to ISO 7005-1, ISO 7005-2 and ISO 7005-3

33 Page **Gr-XD** **CE**

BDS ISO 7500-1:2008**Metallic materials- Verification of static uniaxial testing machines- Part 1: Tension/compression testing machines- Verification and calibration of the force-measuring system**

Specifies the verification of tension/compression testing machines. The verification consists of a general inspection of the testing machine, including its accessories for the force application a calibration of the force-measuring system.

15 Page **Gr-XB** **CE**

BDS ISO 7500-2:2008**Metallic materials- Verification of static uniaxial testing machines- Part 2: Tension creep testing machines- Verification of the applied force**

This part of ISO 7500 specifies the verification of testing machines used for uniaxial creep testing in tension in accordance with ISO 204.

17 Page **Gr-XA** **CE**

BDS ISO 7508:2008**Unplasticized polyvinyl chloride (PVC-U) valves for pipes under pressure- Basic dimensions- Metric series**

This International Standard specifies the series of diameters to be used and the basic dimensions which are common to all types of unplasticized polyvinyl chloride (PVC-U) valves for pipes under pressures of 10 and 16

bar, regardless of their method of manufacture and composition.

05 Page **Gr-XA** **CE**

BDS ISO 7591:2006**Road vehicles- Retro-reflective registration plates for motor vehicles and trailers - Specification**

This standard specifies the provisions applicable to retro reflective registration plates for motor vehicles and their trailers.

04 Page **Gr-XA** **CE**

BDS ISO 7778:2008**Steel plate with specified through-thickness characteristics**

This International Standard specifies the criteria which shall be satisfied by the qualities of steel plate and wide flats for which through-thickness reduction of area properties are specified in the direction of thickness perpendicular to the surface and also the test conditions.

04 Page **Gr-XA** **CE**

BDS ISO 7788:2008**Steel- Surface finish of hot-rolled plates and wideflats- Delivery requirements**

This International Standard specifies delivery requirements which apply to the surface finish of hot-rolled plates and wide flats rolled on reversing mills, with nominal thicknesses equal to or less than 150 mm. For plates with a thickness greater than 150 mm and for special applications for which a different surface condition is required, special agreements shall be made at the time of enquiry and order.

08 Page **Gr-XA** **CE**

BDS ISO 7801:2008**Metallic materials- Wire- Reverse bend test**

This International Standard specifies the method for determining the ability of metallic wire of diameter or thickness 0,3 to 10 mm inclusive to undergo plastic deformation during reverse bending. The range of diameters or thicknesses for which this International Standard is applicable may be more exactly specified in the relevant product standard.

04 Page **Gr-XA** **CE**

BDS ISO 7866:2008**Gas cylinders- Refillable seamless aluminium alloy gas cylinders- Design, construction and testing**

This International Standard specifies minimum requirements for the material, design, construction and workmanship, manufacturing processes and tests at manufacture of refillable seamless aluminium alloy gas cylinders of water capacities from 0,5 l up to and including 150 l for compressed, liquefied and dissolved gases for worldwide use (normally up to + 65 °C).

41 Page **Gr-XE** **ME**

BDS ISO 8098:2006**Cycle- Safety requirements for bicycles for young children**

This standard specifies safety and performance requirements and test methods for the design assembly and testing of bicycles for young children of from about four to eight years of age

26 Page **Gr-XC** **CE**

BDS ISO 8179-2:2008

Ductile iron pipes - External zinc coating -Part 2: Zinc rich paint with finishing layer

Deals with a factory-applied protective external coating system for centrifugally cast ductile iron pipes as specified in ISO 2531 and ISO 7186. This coating system comprises a metallic zinc layer followed by a finishing layer.

02 Page **Gr-XA** **CE**

BDS ISO 8233:2008

Thermoplastics valves- Torque- Test method

Specifies a test method for the determination of the opening and closing torque of thermoplastics valves.

09 Page **Gr-XA** **CE**

BDS ISO 8283:2008

Plastics pipes and fittings - Dimensions of sockets and spigots for discharge Systems inside , buildings- Part 1: Unplasticized poly (vinyl chloride) (PVC-U) and chlorinated poly (vinyl chloride) (PVC-C)

Establishes a classification and designation System for sockets and specifies the design formulae and the derived dimensions, together with tolerances, of these sockets and of spigots for joints of unplasticized poly(vinyl chloride) (PVC-U) and chlorinated poly(vinyl chloride) (PVC-C) fittings and for integral sockets of PVC-U and PVC-C pipes used in discharge Systems inside buildings.

09 Page **Gr-XA** **CE**

BDS ISO 8419:2008

Belt drives- Narrow V-belts- Sections 9N/J, 15N/J and 25N/J (lengths in the effective system)

Specifies, for narrow V-belts of cross-sections 9N/J (for pulley grooves of effective width 8,9 mm), 15N/J (for pulley grooves of effective width 15,2 mm) and 25N/J (for pulley grooves of effective width 25,4 mm),. the standard effective lengths, . the tolerances on effective lengths,. the centre distance variations,. the conditions for measuring the effective length and the centre distance variation, and. the designation and marking.

07 Page **Gr-XA** **ME**

BDS ISO 8421:2009

Fire protection- Vocabulary- Part 4 : Fire extinction equipment

Gives terms and definitions relating to

- extinguishing media;
- mobile extinguishers;
- fixed extinguishing Systems.

General terms are covered by ISO 8421 / 1.Terms are given in English alphabetical Order; English and French alphabetical indexes are provided.

10 Page **Gr-XA** **CE**

BDS ISO 8491:2015

Metallic materials- Tube (in full section)- Bend test

This International Standard specifies a method for determining the ability of full-section metallic tubes of circular cross-section to undergo plastic deformation in bending. It is intended for tubes with an outside diameter no greater than 65 mm, although the range of the outside diameter for which this International Standard is applicable may be more exactly specified in the relevant product standard.

03 Page **Gr-XA** **CE**

BDS ISO 8492:2015

Metallic materials- Tube- Flattening test

This International Standard specifies a method for determining the ability of metallic tubes of circular cross-section to undergo plastic deformation by flattening. It may also be used to reveal the defects in the tubes.

02 Page **Gr-XA** **CE**

BDS ISO 8493:2015

Metallic materials- Tube- Drift- expanding test

This International Standard specifies a method for determining the ability of metallic tubes of circular cross-section to undergo plastic deformation in drift expansion.

03 Page **Gr-XA** **CE**

BDS ISO 8494:2015

Metallic materials- Tube- Flanging test

This International Standard specifies a method for determining the ability of metallic tubes of circular cross-section to undergo plastic deformation during flange formation.

03 Page **Gr-XA** **CE**

BDS ISO 8495:2015

Metallic materials- Tube- Ring-expanding test

This International Standard specifies a method for a ring-expanding test on tubes, that is used to reveal defects both on the surfaces and within the tube wall by expanding the test piece using a conical mandrel until fracture occurs. It may be also used to assess the ability of tubes to undergo plastic deformation.

03 Page **Gr-XA** **CE**

BDS ISO 8496:2015

Metallic materials- Tub - Ring tensile test

This International Standard specifies a method for a ring tensile test of tubes to reveal surface and internal defects by subjecting the test piece to strain until fracture occurs. This test may also be used to assess the ductility of tubes.

02 Page **Gr-XA** **CE**

BDS ISO 8659:2008

Thermoplastics valves - Fatigue strength -Test method

This International Standard specifies the endurance test necessary to confirm the ability of hand-operated plastics

valves to withstand prolonged use, with repeated opening and closure. It does not specify the ability of valves to withstand adverse conditions, in particular those of chemically aggressive fluid media and/or environments, or excessive fluid velocities and cavitation.

02 Page Gr-XA CE

BDS ISO 9080:2008

Plastics piping and ducting systems- Determination of the long-term hydrostatic strength of thermoplastics materials in pipe form by extrapolation

Describes a method for estimating the long-term hydrostatic strength of thermoplastics materials by statistical extrapolation. The method is applicable to all types of thermoplastics pipe at applicable temperatures. It was developed on the basis of test data from pipe systems. The dimensions of the pipes to be tested may be

specified in the relevant product/system standards and, if so, are included in the test report.

22 Page Gr-XA CE

BDS ISO 9112:2012

Truck and bus tyres- Methods of measuring tyre rolling circumference- Loaded new tyres

This International Standard specifies two methods for measuring the rolling circumference and the number of revolutions per unit distance (kilometre) of new commercial vehicle tyres, under loaded conditions, for use on trucks and buses. The first method is a drum method consisting of loading a test tyre mounted on a free axle against a driven road wheel (or drum) of specified diameter. The second method involves a vehicle whose drive axle is equipped with the test tyres driven on a straight, paved road.

08 Page Gr-XA ME

BDS ISO 9125:2016

Fibre-cement slates and fittings- Product specification and test methods

This International Standard specifies technical requirements and methods for the inspection and testing of fibre-cement slates and shingles and their fibre-cement fittings, designed to protect the weather-exposed surfaces on roofs and claddings of buildings.

40 Page Gr-XE CE

BDS ISO 9176:2006

Tubular technical pens- Adaptor for compasses

This International Standard specifies the preferred dimensions of adaptors for attaching tubular technical pens to compasses with interchangeable points-1) and of the screw threads for the connecting plates and tubular technical pens.

Mechanical pencils- Part 1: Classification, dimensions, performance requirements and testing

This part of ISO 9177 specifies a classification, dimensions, performance requirements and testing for hand held mechanical pencils used for draughting writing.

03 Page Gr-XA CE

BDS ISO 9177-2:2006

Mechanical pencils- Part 2 : Black Leads- Classification and dimensions

This part of ISO 9177 specifies a classification, dimensions, for black leads used for mechanical pencils.

02 Page Gr-XA CE

BDS ISO 9177-3:2006

Mechanical pencils- Part 3 : Black Leads - Bending strengths of HB leads

This part of ISO 9177 specifies bending strengths and a test method for black leads of HB hardness degree used for mechanical pencils for technical drawings.

04 Page Gr-XA ME

BDS ISO 9227:2010**Corrosion tests in artificial atmospheres- Salt spray tests**

This International Standard specifies the apparatus, the reagents and the procedure to be used in conducting the neutral salt spray (NSS), acetic acid salt spray (AASS) and copper-accelerated acetic acid salt spray (CASS) tests for assessment of the corrosion resistance of metallic materials, with or without permanent or temporary corrosion protection

18 Page Gr-XB CE

BDS ISO 9276-1:2008**Representation of results of particle size analysis- Part 1: Graphical representation**

This part of ISO 9276 specifies rules for the graphical representation of particle size analysis data in histograms, density distributions and cumulative distributions. It also establishes a standard nomenclature to be followed to obtain the distributions mentioned above from the measured data.

09 Page Gr-XA CE

BDS ISO 9276-2:2008**Representation of results of particle size analysis- Part 2: Calculation of average particle sizes/ diameters and moments from particle size distributions**

The object of this part of ISO 9276 is to provide the relevant equations for the calculation of average particle sizes or average particle diameters and moments from a given particle size distribution. It is assumed that the size distribution is available as a histogram. It is nevertheless also possible to apply the same mathematical treatment if the particle size distribution is represented by an analytical function.

16 Page Gr-XB CE

BDS ISO 9276-4:2008**Representation of results of particle size analysis- Part 4: Characterization of a classification process**

The main object of this part of ISO 9276 is to provide the mathematical background for the characterization of a classification process. This part of ISO 9276 is not limited to an application in particle size analysis, the same procedure may be used for the characterization of a technical classification process (e.g. air classification, centrifugal classification) or a separation process (e.g. gas or hydrocyclones).

16 Page Gr-XB CE

BDS ISO 9276-5:2008**Representation of results of particle size analysis- Part 5: Methods of calculation relating to particle size analyses using logarithmic normal probability distribution**

Provides the background for the representation of a cumulative particle size distribution which follows a logarithmic normal probability distribution, as a means by which calculations performed using particle size distribution functions may be unequivocally checked.

12 Page Gr-XB CE

BDS ISO 9328-1:2009**Steel flat products for pressure purposes- Technical delivery conditions- Part 1: General requirements**

Specifies the general technical delivery conditions for steel flat products (plate/sheet and strip) used principally for the construction of pressure equipment.

13 Page Gr-XB CE

BDS ISO 9328-2:2009**Steel flat products for pressure purposes- Technical delivery conditions- Part 2: Non-alloy and alloy steels with specified elevated temperature properties**

Specifies the technical delivery conditions for plates and strip for pressure equipment made of non-alloy and alloy steels as specified in Tables A.1 and B.1. The requirements and definitions of ISO 9328-1 also apply to this part of

ISO 9328.
08 Page Gr-XA CE

BDS ISO 9328-3:2009**Steel flat products for pressure purposes- Technical delivery conditions- Part 3: Weldable fine grain steels, normalized**

Specifies the requirements for flat products for pressure equipment made of weldable fine grain steels as specified in Tables A.1 and B.1. The requirements and definitions of ISO 9328-1 also apply to this part of ISO 9328.

11 Page Gr-XB CE

BDS ISO 9328-4:2009**Steel flat products for pressure purposes- Technical delivery conditions- Part 4: Nickel-alloy steels with specified low temperature properties**

Specifies the technical delivery conditions for plates and strip for pressure equipment made of nickel-alloy steels as specified in Tables A.1 and B.1. The requirements and definitions of ISO 9328-1 also apply to this part of ISO 9328.

10 Page Gr-XA CE

BDS ISO 9328-5:2009**Steel flat products for pressure purposes- Technical delivery conditions- Part 5: Weldable fine grain steels, thermomechanically rolled**

Specifies the requirements for flat products for pressure equipment, made of thermomechanically rolled weldable fine grain steels as specified in Tables A.1 and B.1. The steels are not suitable for hot forming.

13 Page Gr-XB CE

BDS ISO 9328-6:2009**Steel flat products for pressure purposes- Technical delivery conditions- Part 6: Weldable fine grain steels, quenched and tempered**

Specifies the requirements for flat products for pressure equipment made of quenched and tempered fine weldable grain steels as listed in Tables A.1 and B.1.

12 Page Gr-XB CE

BDS ISO 9328-7:2009

Steel flat products for pressure purposes- Technical delivery conditions- Part 7: Stainless steels

This part of ISO 9328 specifies the technical delivery conditions for flat products for pressure purposes made of stainless steels, including austenitic creep resisting steels, in thicknesses as indicated in Tables 7 to 10.

15 Page Gr-XB CE

BDS ISO 9364:2011

Continuous hot-dip aluminium/ zinc coated steel sheet of commercial, drawing and structural qualities

This International Standard applies to the characteristics of steel sheet of commercial, drawing and structural qualities coated by a continuous hot-dip aluminium/zinc alloy coating process. The aluminium/zinc alloy composition by mass is nominally 55 % aluminium, 1,6 % silicon, and the balance zinc.

16 Page Gr-XB ME

BDS ISO 9393-1:2008

Thermoplastics valves for industrial applications- Pressure test methods and requirements- Part 1: General

Specifies the test methods for the resistance to internal pressure and the leaktightness of thermoplastics valves for use in industrial applications with cold water or with industrial fluids, but excluding gas applications covered by thermoplastics-valve product standards.

07 Page Gr-XA CE

BDS ISO 9393-2:2008

Thermoplastics valves for industrial applications- Pressure test methods and requirements- Part 2: Test conditions and basic requirements

Specifies the test parameters and conditions for hydrostatic-pressure tests on valves made of the following thermoplastic materials:

06 Page Gr-XA CE

BDS ISO 9513:2008

Metallic materials- Calibration of extensometers used in uniaxial testing

Specifies a method for the static calibration of extensometers used in uniaxial testing. The term "extensometer" is understood to mean the displacement measuring device and the system for indicating or recording this displacement.

10 Page Gr-XA CE

BDS ISO 9513 Cor 1:2008

Metallic materials- Calibration of extensometers used in uniaxial testing (Technical Corrigendum 1)

Specifies a method for the static calibration of extensometers used in uniaxial testing.

03 Page Gr-XA CE

BDS ISO 9563:2008

Belt drives- Electrical conductivity of antistatic endless synchronous belts- Characteristics and test method

This International Standard specifies the maximum electrical resistance of antistatic endless synchronous belts and a corresponding laboratory method of measurement.

04 Page Gr-XA ME

BDS ISO 9608:2008

V-belts- Uniformity of belts- Test method for determination of centre distance variation

This International Standard specifies a test method for determining the centre distance variation of V-belt drives as a criterion for the uniformity of V-belts.

02 Page Gr-XA ME

BDS ISO 9624:2010

Thermoplastics pipes for fluids under pressure- Mating dimensions of flange adapters and loose backing flanges

This International Standard specifies the mating dimensions of flange adaptors of thermoplastic materials and the corresponding dimensions of loose backing flanges to be used with thermoplastic pipes under pressure.

06 Page Gr-XA CE

BDS ISO 9633:2006

Cycles chain- Characteristics and test methods

This standard specifies the dimensions and mechanical properties of cycle chain as well as test methods for determining these mechanical properties (i.e. twist, lateral deviation, stiff link and side bow).

13 Page Gr-XB CE

BDS ISO 9705:2015

Fire tests- Full-scale room test for surface products

This International Standard specifies a test method that simulates a fire that under well ventilated conditions starts in a corner of a small room with a single open doorway.

31 Page Gr-XD CE

BDS ISO TR 9769:2008

Steel and iron - Review of available methods of analysis

This Technical Report aims to facilitate reference to the available international Standard method(s) for the determination of required element(s) in steel and iron. In this Technical Report, field of application, method of determination (principle) and precision (see informative annex A) of each Standard are stated.

42 Page Gr-XE CE

BDS ISO 9809-1:2008

Gas cylinders- Refillable seamless steel gas cylinders- Design, construction and testing- Part 1: Quenched and tempered steel cylinders with tensile strength less than 1 100 MPa

This part of ISO 9809 specifies minimum requirements for material, design construction and workmanship, manufacturing processes and tests at manufacture of refillable quenched and tempered seamless steel gas cylinders of water capacities from 0.5 l up to and including 150 l for compressed, liquefied and dissolved gases exposed to extreme world-wide ambient temperatures (normally between 50 °C and + 65 °C). This part of ISO 9809 is applicable to cylinders with a maximum tensile strength R_m of less than 1 100 MPa.

37 Page Gr-XD ME

BDS ISO 9809-2:2008

Gas cylinders- Refillable seamless steel gas cylinders- Design, construction and testing- Part 2: Quenched and tempered steel cylinders with tensile strength greater than or equal to 1 100 MPa

This part of ISO 9809 specifies minimum requirements for material, design construction and workmanship, manufacturing processes and tests at manufacture of refillable quenched and tempered seamless steel gas cylinders of water capacities from 0.5 l up to and including 150 l for compressed, liquefied and dissolved gases exposed to extreme world-wide ambient temperatures (normally between -50 °C and + 65 °C). This part of ISO 9809 is applicable to cylinders with a maximum tensile strength R_m of greater than 1 1 00 MPa..

42 Page Gr-XE ME

BDS ISO 9809-3:2008

Gas cylinders-Refillable seamless steel gas cylinders- Design, construction and testing- Part 3: Normalized steel cylinders

This part of ISO 9809 specifies minimum requirements for material, design construction and workmanship, manufacturing processes and tests at manufacture of refillable normalized, or normalized and tempered seamless steel gas cylinders with water capacities from 0.5 l up to and including 150 l for compressed, liquefied and dissolved gases.

37 Page Gr-XD ME

BDS ISO 9852:2008

Unplasticized poly (vinyl chloride) (PVC-U) pipes- Dichloromethane resistance at specified temperature (DCMT)- Test method

This International Standard specifies a method for determining the resistance of unplasticized poly(vinyl chloride) (PVC-U) pipes to dichloromethane at a specified temperature (DCMT).It is applicable to all PVC-U pipes, irrespective of their intended use.

06 Page Gr-XA CE

BDS ISO 9853:2008

Injection- moulded unplasticized poly (vinyl chloride) (PVC-U) fittings for pressure pipe systems- Crushing test

This International Standard specifies a crushing test to determine the percentage deformation of injection-moulded unplasticized poly(vinyl chloride) (PVC-U) fittings and recommends a basic specification(see annex A).

03 Page Gr-XA CE

BDS ISO 9854-1:2009

Thermoplastics pipes for the transport of fluids- Determination of pendulum impact strength by the Charpy method- Part 1:General test method

Specifies the general test method to be used for the determination of the impact strength of unnotched test pieces cut from thermoplastics pipes for the transport of fluids.

04 Page Gr-XA CE

BDS ISO 9854-2:2009

Thermoplastics pipes for the transport offluids- Determination of pendulum impact strength by the Charpy method -Part 2:Test conditions for pipes of various materials

Specifies the values or options chosen for the test parameters, i.e. the impact energy, test piece dimensions, shape and spacing of the test piece supports, and type of test piece, for testing the impact resistance (pendulum method) of thermoplastics pipes of the following materials, when tested in accordance with ISO 9854-1.

04 Page Gr-XA CE

BDS ISO 9962-3:2006

Manually operated draughting Machines- Part-3 :Dimensions of scale rule chuck plates

Specifies the main dimensions of scale rule chuck plates and the combined heights (thickness) of scale rule and scale rule and chuck plate for use on manually operated draughting machines(see ISO 9962-1 and 9962-2).

05 Page Gr-XA ME

BDS ISO 9980:2008

Belt drives- Grooved pulleys for V-belts (system based on effective width)- Geometrical inspection of grooves

Specifies the methods of checking the regularity of the grooves and pulleys for V-belts specified in the system based on effective width. The grooved pulleys may be designed for use with classical or narrow V-belts. The V-belts may be either single or joined units.

08 Page Gr-XA ME

BDS ISO 9982:2008

Belt drives- Pulleys and V-ribbed belts for industrial applications- Dimensions - PH, PJ, PK, PL and PM profiles

Specifies the principal dimensional characteristics of V-ribbed pulley groove profiles, together with the corresponding endless V-ribbed belts, of PH, PJ, PK, PL and PM profile which are used for general industrial applications.

07 Page Gr-XA ME

BDS ISO 10065:2006

Steel bars reinforcement of concrete- Bend and Rebend tests

Specifies procedures for bend and rebend testing of reinforcing steel bars. The purpose of the rebend test is to determined the ageing properties of bars exposed to plastic deformation.

03 Page Gr-XA CE

BDS ISO 10144:2016

Certification scheme for steel bars and wires for the reinforcement of concrete structures

Specifies rules for a certification scheme for continuous production of steel bars and wires for ordinary reinforcement of concrete structures in order to verify the conformity with requirements specified in product standards such as ISO 6935-1 and ISO 6935-2.

04 Page Gr-XA CE

BDS ISO 10156:2008

Gases and gas mixtures- Determination of fire potential and oxidizing ability for the selection of cylinder valve

Specifies two test methods for determining whether or not a gas is flammable in air and whether a gas is more or less oxidizing than air, respectively, with the aim of eliminating difficulties entailed in the application of

ISO 5145

10 Page Gr-XB ME

BDS ISO 10191:2012

Passenger car tyres- Verifying tyre capabilities- Laboratory test methods

This International Standard specifies test methods for verifying the capabilities of tyres for passenger cars. Of the test methods presented, it is possible that only some will be required depending on the type of tyre to be tested. The tests are carried out in a laboratory under controlled conditions. This International Standard includes a strength test for assessing the capability of the tyre structure, with respect to braking energy, in the tread area. A second test, the bead unseating test, assesses the resistance of the tyre to bead unseating. It applies to tubeless tyres only.

13 Page Gr-XB ME

BDS ISO 10231:2012

Motorcycle tyres- Test methods for verifying tyre capabilities

This International Standard specifies test methods for verifying the capabilities of tyres for motorcycles. Of the test methods presented, only some may be required depending on the type of tyre to be tested. The tests are carried out in the laboratory under controlled conditions.

10 Page Gr-XA ME

BDS ISO 10286:2008

Gas cylinders- Terminology

Standard establishes the terminology used in the field of gas cylinders.

19 Page Gr-XB ME

BDS ISO 10297:2008

Gas cylinders- Refillable gas cylinder valves- Specification and type testing

Specifies requirements for refillable gas cylinder valves and the method of testing such valves for type approval.

24 Page Gr-XC ME

BDS ISO TR 10358:2009

Plastics pipes and fittings- Combined Chemical-resistance classification table

Establishes a classification of the Chemical resistance of pipe materials to specified fluids over a range of temperatures.

44 Page Gr-XA CE

BDS ISO 10454:2012

Truck and bus tyres- Verifying tyre capabilities Laboratory test methods

This International Standard specifies test methods for verifying the capabilities of truck and bus tyres. Of the test methods presented, only some may be required depending on the type of tyre to be tested.

The tests are carried out in a laboratory under controlled conditions.

07 Page Gr-XA ME

BDS ISO 10460:2008

Welded carbon steel gas cylinders- Periodic inspection and testing

Specifies the minimum requirements for periodic inspection and testing to verify the integrity of gas cylinders for further service. It does not exclude the application of additional national requirements.

23 Page Gr-XC ME

BDS ISO 10461:2008

Seamless aluminium- alloy gas cylinders- Periodic inspection and testing

Specifies the minimum requirements for periodic inspection and testing to verify the integrity of gas cylinders for further service. It does not exclude the application of additional national requirements.

25 Page Gr-XC ME

BDS ISO 10462:2008

Cylinders for dissolved acetylene- Periodic inspection and maintenance

Specifies the minimum requirements for periodic inspection and maintenance to verify the integrity of acetylene cylinders for further service, regardless of the method of manufacture of the shell. It does not exclude the application of additional national requirements.

19 Page Gr-XB ME

BDS ISO 10463:2008

Cylinders for permanent gases- Inspection at time of filling

Specifies minimum requirements for filling inspections of transportable gas cylinders. These requirements reflect current practice and experience.

03 Page Gr-XA ME

BDS ISO 10474:2015

Steel and steel products – Inspection documents

This International Standard defines the different types of inspection documents supplied to the purchaser, in accordance with the requirements of the order, for the delivery of steel products.

04 Page Gr-XA CE

BDS ISO TR 10501:2008

Thermoplastics pipes for the transport of liquids under pressure- Calculation of head losses

Gives a method for calculating head loss in the transport of liquids under pressure in hydraulically smooth thermoplastics pipes.

04 Page Gr-XA CE

BDS ISO 10545-1:2015

Ceramic tiles- Part 1: Sampling and basis for acceptance

This part of ISO 10545 specifies rules for batching, sampling, inspection, and acceptance/rejection of ceramic tiles.

08 Page Gr-XA CE

BDS ISO 10545 -2:2006

Ceramic tiles Determination of dimensions and surface quality

Specifies methods for determining the dimensional characteristics (length,width,thickness, straightness of sides, rectangularity, surface flatness) and the surface of ceramic tiles.

10 Page Gr-XA CE

BDS ISO 10545 -3:2006

Ceramic tiles Determination of water absorption, apparent porosity, apparent relative density and bulk density

Specifies methods for determining water absorption, apparent porosity, apparent relative density and bulk density of ceramic tiles.

05 Page Gr-XA CE

BDS ISO 10545-4:2015

Ceramic tiles- Part 4: Determination of modulus of rupture and breaking strength

This part of ISO 10545 specifies a test method for determining the modulus of rupture and breaking strength of all ceramic tiles.

05 Page Gr-XA CE

BDS ISO 10545 -5:2005

Ceramic tiles

Determination of impact resistance by measurement of coefficient of restitution

Specifies methods for determining the impact resistance of ceramic tiles by measuring the coefficient of restitution.

10 Page Gr-XA CE

BDS ISO 10545 -6:2013

Ceramic tiles—Determination of resistance to deep abrasion for unglazed tiles (First Revision)

Specifies a test method for determining the resistance to deep abrasion of all unglazed ceramic tiles used for floor coverings.

08 Page Gr-XA CE

BDS ISO 10545 -7:2006

Ceramic tiles- Determination of resistance to surface abrasion for glazed tiles

Specifies a method for determining the resistance to surface abrasion of all glazed ceramic tiles used for floor covering.

10 Page Gr-XA CE

BDS ISO 10545-8:2015

Ceramic tiles- Part 8: Determination of linear thermal expansion

This part of ISO 10545 defines a test method for determining the coefficient of linear thermal expansion of ceramic tiles.

02 Page Gr-XA CE

BDS ISO 10545-9:2015

Ceramic tiles- Part 9: Determination of resistance to thermal shock

This part of ISO 10545 specifies a test method for determining the resistance to thermal shock of all ceramic tiles under normal conditions of use.

03 Page Gr-XA CE

BDS ISO 10545-10:2006

Ceramic tiles- Determination of moisture expansion

Specifies a method for determining the moisture expansion of all ceramic tiles.

06 Page Gr-XA CE

BDS ISO 10545-11:2006

Ceramic tiles- Determination of crazing resistance for glazed tiles

Defines a test method for determining the crazing resistance of all glazed ceramic tiles except when the crazing is an inherent decorative feature of the product.

06 Page Gr-XA CE

BDS ISO 10545-12:2006

Ceramic tiles- Determination of frost resistance

Specifies a method for determining the frost resistance of all ceramic tiles intended for use in freezing conditions in the presence of water.

04 Page Gr-XA CE

BDS ISO 10545 -13:2006

Ceramic tiles- Determination of chemical resistance

Specifies a test method for determining the chemical resistance of all ceramic tiles at room temperature. The method is applicable to all types of ceramic tiles.

10 Page Gr-XA CE

BDS ISO 10545-14:2006

Ceramic tiles- Determination of resistance to stains

Specifies a method for determining the resistance to stains of the proper surface of ceramic tiles.

10 Page Gr-XA CE

BDS ISO 10545-15:2006

Ceramic tiles- Determination of lead and cadmium given off by glazed tiles

Specifies a method for the determination of lead and cadmium given off by the glaze of ceramic tiles.

07 Page Gr-XA CE

BDS ISO 10545-16:2013**Ceramic tiles- Determination of small colour differences (First Revision)**

Describes a method for utilizing colour measuring instruments for quantifying the small colour differences between plain coloured glazed ceramic tiles, which are designed to be uniform and consistent colour. It permits the specification of a maximum acceptable value which depends only on the closeness of match and not on the nature of the colour difference.

05 Page **Gr-XA** **CE**

BDS ISO 10692-1:2008**Gas cylinders- Gas cylinder valve connections for use in the micro-electronics industry- Part 1: Outlet connections**

This part of ISO 10692 applies to the outlet connections of gas cylinder valves for gases and gas mixtures and concerns special requirements where the highest levels of cleanliness and freedom from particles are demanded for the manufacture of microelectronic components or similar applications.

17 Page **Gr-XB** **ME**

BDS ISO 10692-2:2008**Gas cylinders- Gas cylinder valve connections for use in the micro-electronics industry- Part 2: Specification and type testing for valve to cylinder connections**

This part of ISO 10692 specifies a test sequence and acceptability criteria for connections between gas cylinders and valves for gases and gas mixtures used under special conditions of service where the highest levels of cleanliness and/or freedom from particles are demanded for e.g. the manufacturing of microelectronic components.

06 Page **Gr-XA** **ME**

BDS ISO 10799-1:2016**Cold-formed welded structural hollow sections of non-alloy and fine grain steels- Part 1: Technical delivery conditions**

This part of ISO 10799 specifies the technical delivery requirements for cold-formed welded structural hollow sections of circular, square or rectangular form. It is applicable to structural hollow sections formed cold without subsequent heat treatment.

26 page **Gr-XB** **CE**

BDS ISO 10799-2:2016**Cold-formed welded structural hollow sections of non-alloy and fine grain steels- Part 2: Dimensions and sectional properties**

This part of ISO 10799 specifies the tolerances for cold-formed welded circular, square and rectangular structural hollow sections, and gives the dimensions and sectional properties for a range of standard sizes.

28 page **Gr-XB** **CE**

BDS ISO 10804-1:2008**Restrained joint systems for ductile iron pipelines- Part 1: Design rules and type testing**

This part of ISO 10804 specifies design rules and type testing for restrained joint systems to be used on ductile iron pipelines complying with ISO 2531 and ISO 7186, in order to determine their mechanical properties and leaktightness.

BDS ISO 10920:2008**Gas cylinders- 25E taper thread for connection of valves to gas cylinders- Specification**

This International Standard specifies definitions, dimensions and tolerances of a taper screw thread of nominal diameter 25,8 mm (designated 25E), for the connection of valves to medical and industrial gas cylinders.

05 Page **Gr-XA** **ME**

BDS ISO 10928:2016**Plastics piping systems- Glass-reinforced thermosetting plastics (GRP) pipes and fittings- Methods for regression analysis and their use**

This International Standard specifies procedures suitable for the analysis of data which, when converted into logarithms of the values, have either a normal or a skewed distribution. It is intended for use with the test methods and referring standards for glass-reinforced thermosetting plastics (GRP) pipes or fittings for the analysis of properties as a function of time.

51 Page **Gr-XE** **CE**

BDS ISO 10966:2016**Sports and recreational equipment- Fabrics for awnings- Specification**

This International Standard specifies the most important material characteristics for woven fabrics for awnings. It can also be applied to other types of fabrics.

06 Page **Gr-XA** **ME**

BDS ISO 11114-1:2008**Transportable gas cylinders- Compatibility of cylinder and valve materials with gas contents- Part 1: Metallic materials**

This standard gives guidance in the selection and evaluation of compatibility between metallic gas cylinder and valve materials, and the gas content.

43 Page **Gr-XA** **ME**

BDS ISO 11114-2:2008**Transportable gas cylinders- Compatibility of cylinder and valve materials with gas contents- Part 2: Non-metallic materials Bouteilles à gaz transportables- Compatibilité**

This Standard gives guidance in the selection and evaluation of compatibility between non-metallic materials for gas cylinders and valves and the cylinders'

gas contents. This standard also covers bundles, tubes and pressure drums.

16 Page Gr-XB ME

BDS ISO 11114-3:2008

Transportable gas cylinders- Compatibility of cylinder and valve materials with gas contents- Part 3:Autogenous ignition test in oxygen atmosphere

This standard specifies a test method to determine the autogenous ignition temperature of non metallic materials in pressurized gaseous oxygen.

09 Page Gr-XA ME

BDS ISO 11117:2008

Gas cylinders- Valve protection caps and valve guards for industrial and medical gas cylinders- Design, construction and tests

This International Standard specifies the requirements for valve protection caps and guards, intended for use with industrial and medical gas cylinders.

It defines tests for checking the mechanical strength and physical properties of the valve protection cap or valve guard.

09 Page Gr-XA ME

BDS ISO 11191:2008

Gas cylinders- 25 E taper thread for connection of valves to gas cylinders- Inspection gauges

This International Standard specifies types, dimensions and principles of use of gauges, to be used in conjunction with the taper thread specified in ISO 10920.

12 Page Gr-XB ME

BDS ISO 11210:2004

Determination of platinum in platinum jewellery alloys- Gravimetric method after precipitation of diammonium hexachloroplatinate

This International Standard specifies a gravimetric method for the determination of platinum in platinum jewellery alloys, preferably within the range of fineness stated in ISO 9202.

05 Page Gr-XA ME

BDS ISO 11357-6:2010

Plastics- Differential scanning calorimetry (DSC)- Part 6: Determination of oxidation induction time

This part of ISO 11357 specifies methods for the determination of oxidation induction time (isothermal OIT) and oxidation induction temperature (dynamic OIT) of polymeric materials by means of differential scanning calorimetry (DSC). It is applicable to polyolefin resins that are in a fully stabilized or compounded form, either as raw materials or finished products. It may be applicable to other plastics

12 Page Gr-XA CE

BDS ISO 11372:2008

Cylinders for dissolved acetylene -Inspection at time of filling

This International Standard specifies the minimum requirements for filling inspections of transportable cylinders for acetylene gas. These requirements reflect current practice and experience.

09 Page Gr-XA ME

BDS ISO 11413:2010

Plastics pipes and fittings- Preparation of test piece assemblies between a polyethylene (PE) pipe and an electrofusion fitting

This International Standard specifies a method for the preparation of test pieces assembled from polyethylene (PE) pipes or spigot-ended fittings and electrofusion fittings (e.g. socket fittings such as couplers, or saddles).

10 Page Gr-XA CE

BDS ISO 11414: 2010

Plastics pipes and fittings- Preparation of polyethylene (PE) pipe/pipe or pipe/fitting test piece assemblies by butt fusion

This International Standard specifies a method for preparing butt-fusion-jointed test piece assemblies between polyethylene (PE) pipes and spigot-ended fittings.

08 Page Gr-XA CE

BDS ISO 11427:2004

Determination of silver in silver jewellery alloys- Volumetric (potentiometric) method using potassium bromide

This International Standard specifies a volumetric method for the determination of silver in silver jewellery alloys, preferably within the range of fineness stated in ISO 9202.

04 Page Gr-XA ME

BDS ISO 11489:2004

Determination of platinum in platinum jewellery alloys- Gravimetric determination by reduction with mercury (I) chloride

This International Standard specifies a gravimetric method for the determination of platinum in platinum jewellery alloys, preferably within the range of fineness stated in ISO 9202.

05 Page Gr-XA ME

BDS ISO 11490 : 2004

Determination of platinum jewellery alloys- Gravimetric determination with dimethylglyoxime

This International Standard specifies a gravimetric method for the determination of platinum in platinum jewellery alloys, preferably within the range of fineness stated in ISO 9202.

04 Page Gr-XA ME

BDS ISO 11602-1:2009

Fire protection- Portable and wheeled fire extinguishers Part 1: Selection and installation

This part of ISO 11602 gives requirements for the selection and installation of portable and wheeled fire extinguishers. It should be used in conjunction with ISO 11602-2.

10 Page Gr-XA CE

BDS ISO 11602-2:2009

Fire protection- Portable and wheeled fire extinguishers Part 2: Inspection and maintenance

Specifies the inspection, maintenance, and periodic testing of portable and wheeled fire extinguishers.

10 Page Gr-XA CE

BDS ISO 11673:2008

Unplasticized polyvinyl chloride (PVC-U) pressure pipes- Determination of the fracture toughness properties

Specifies a method for determining the minimum fracture toughness, after a specified loading time, of unplasticized polyvinyl chloride (PVC-U) pressure pipes. It also makes provision for measuring alternative levels of fracture toughness.

14 Page Gr-XA CE

BDS ISO 11922-1:2008

Thermoplastics pipes for the conveyance of fluids- Dimensions and tolerances- Part 1: Metric series

Specifies tolerance grades for the outside diameter, out-of-roundness and wall thickness of metric thermoplastics pipes for the conveyance of fluids and manufactured with nominal outside diameters and nominal pressures in accordance with ISO 161-1 and nominal wall thicknesses in accordance with ISO 4065

12 Page Gr-XB CE

BDS ISO 11922-2:2008

Thermoplastics pipes for the conveyance of fluids- Dimensions and tolerances- Part 2: Inch-based series

Specifies tolerance grades for the outside diameter, out-of-roundness and wall thickness of inch-based thermoplastics pipes for the conveyance of fluids and manufactured with nominal outside diameters and nominal pressures in accordance with ISO 161-2111 (see annex A).

12 Page Gr-XB CE

BDS ISO 12092:2008

Fittings, valves and other piping system components made of unplasticized poly (vinyl chloride) (PVC-U), chlorinated poly (PVC-C), acrylonitrilebutadiene-styrene (ABS) and acrylonitrilestyrene- acrylester (ASA) for pipes under pressure- Resistance to internal pressure- Test method

Specifies methods for testing the resistance to internal pressure of piping components, such as fittings and valves, made of unplasticized polyvinyl chloride (PVC-U), chlorinated polyvinyl chloride (PVC-C), acrylonitrile-butadiene-styrene (ABS) and acrylonitrile-styrene-acrylester (ASA) and intended for use, respectively, with PVC-U, PVC-C, ABS and ASA pipes

under pressure, irrespective of the type and design of the component or the method of assembly used.

12 Page Gr-XB CE

BDS ISO 12111:2016

Metallic materials- Fatigue testing- Strain-controlled thermo mechanical fatigue testing method

This International Standard is applicable to the TMF testing of uniaxially loaded metallic specimens under strain control. Specifications allow for any constant cyclic amplitude of mechanical strain and temperature with any constant cyclic mechanical strain ratio and any constant cyclic temperature-mechanical strain phasing.

25 page Gr-XC CE

BDS ISO 12162:2008

Thermoplastics materials for pipes and fittings for pressure applications- Classification and designation Overall Service (design) coefficient

Establishes the classification of thermoplastics materials in pipe form and specifies the material designation. It also gives a method for calculating the design stress.

03 Page Gr-XA CE

BDS ISO 12176-1:2010

Plastics pipes and fittings- Equipment for fusion jointing polyethylene systems- Part 1: Butt fusion

This part of ISO 12176 specifies the general characteristics of, and performance requirements for, equipment for butt fusion jointing of polyethylene (PE) piping systems using electrically powered heater plates.

06 Page Gr-XA CE

BDS ISO 12176-2:2010

Plastics pipes and fittings- Equipment for fusion jointing polyethylene systems- Part 2: Electro fusion

This part of ISO 12176 specifies performance requirements for electrofusion control units for use with polyethylene (PE) electrofusion fittings for the supply of gaseous fuels or for the conveyance of water for human consumption, including raw water prior to treatment, and for the conveyance of water for general purpose or other fluids.

10 Page Gr-XB CE

BDS ISO 12176-3:2010

Plastics pipes and fittings- Equipment for fusion jointing polyethylene systems- Part 3: Operator's badge

This part of ISO 12176 describes the format and the contents of a fusion operator's badge, which is used during the construction of polyethylene (PE) piping systems for the supply of gaseous fuels or water to identify the fusion operator and to activate or deactivate the fusion-jointing equipment.

08 Page Gr-XA CE

BDS ISO 12176-4:2010

Plastics pipes and fittings- Equipment for fusion jointing polyethylene systems- Part 4: Traceability coding

This part of ISO 12176 specifies an encoding system for data on components, assembly methods and jointing

operations for polyethylene (PE) piping systems for gas supply, for use in a traceability system.

04 Page Gr-XA CE

BDS ISO 12439:2011

Mixing Water for Concrete

This International Standard specifies the requirements for water that is suitable for making concrete in accordance with ISO 22965 (all parts) and describes methods for assessing its suitability.

13 Page Gr-XA CE

BDS ISO 12468-1:2016

External exposure of roofs to fire- Part 1: Test method

The attention of all persons concerned with managing and carrying out this fire test is drawn to the fact that fire testing may be hazardous and that there is a possibility that toxic and/or harmful smoke and gases may be evolved during the test.

25 Page Gr-XC C

BDS ISO 12468-2:2016

External exposure of roofs to fire- Part 2: Classification of roofs

This part of ISO 12468 establishes the classification of roofs tested in accordance with ISO 12468-1.

Performance criteria are established with respect to the following:

- fire penetration or openings;
- external fire spread;
- falling of flaming droplets or debris.

05 Page Gr-XA CE

BDS ISO 13007-4:2013**Ceramic tiles- Grouts and adhesives- Part 4: Test method for grouts**

This part of ISO 13007 describes methods for determining characteristics of grouts used in the installatin of ceramic tiles. **33 Page Gr-XD CE**

BDS ISO 13050:2008**Curvilinear toothed synchronous belt drive systems**

This International Standard specifies the principal characteristics of synchronous endless belts and pulleys for use in synchronous belt drives1) for mechanical power transmission and where positive indexing or synchronization may be required

37 Page Gr-XD ME

BDS ISO 13253:2011**Ducted air conditioners and air-to-air heat pumps— testing and rating for performance.**

This International Standard specifies the standard conditions for capacity and efficiency ratings of ducted, air- cooled, air conditioners and ducted, air-to-air heat pumps. This International Standard is applicable to the test methods for determining the capacity and efficiency rating. Residential, commercial, and industrial single-package and split-system air-conditioners and heat pumps and included.

88 Page Gr-XE ME

BDS ISO 13326:2012**Test methods for measuring tyre uniformity**

This International Standard specifies test methods carried out under controlled conditins for verifying the uniformity of tyres for passenger cars, commercial vehicles and motorcycles.

14 Page Gr-XB ME

BDS ISO 13328:2012**Motorcycle tyres- Measurement of tyre rolling circumference Loaded new tyres**

This International Standard specifies a method for measuring the rolling circumference and revolutions per unit distance (kilometre) for new tyres, under loaded conditions, made for use on motorcycles and mopeds. The values obtained according to this method are not intended for use as levels of performance or quality. This

International Standard is applicable to all motorcycle and moped tyres designed and intended for use on the road.

03 Page Gr-XA ME

BDS ISO 13479:2010**Polyolefin pipes for the conveyance of fluids- Determination of resistance to crack propagation- Test method for slow crack growth on notched pipes**

This International Standard specifies a test method for determining the resistance to slow crack growth of polyolefin pipes, expressed in terms of time to failure in a hydrostatic pressure test on a pipe with machined longitudinal notches in the outside surface. The test is applicable to pipes of wall thickness greater than 5 mm.

08 Page Gr-XA CE

BDS ISO 13761:2010**Plastics pipes and fittings- Pressure reduction factors for polyethylene pipeline systems for use at temperatures above 20 °C**

This international Standard specifies a method for the derivation of reduction factors to apply to obtain the maximum allowable operating pressure for elevated-temperature operation of polyethylene (PE) pipeline systems.

03 Page Gr-XA CE

BDS ISO 13783:2008**Plastics piping systems- Unplasticized polyvinyl chloride (PVC-U) end-load- bearing double- socket joints- Test method for leaktightness and strength while subjected to bending and internal pressure**

This standard specifies a method for testing, while subjected to bending, the leaktightness and strength of assembled end-load-bearing double socket joints of unplasticized polyvinyl chloride (PVC-U) which allow a maximum angle of deflection of 30.

It is applicable to double socket couplers provided with elastomeric sealing rings and locking rings and intended for use with PVC-U pressure pipes.

06 Page Gr-XA CE

BDS ISO 13787:2016**Thermal insulation products for building equipment and industrial installations- Determination of declared thermal conductivity**

This standard establishes the procedure for the determination and verification of the declared thermal conductivity as a function of temperature of thermal insulating materials and products used for the insulation of building equipment and industrial installations.

19 Page Gr-XB CE

BDS ISO 13844:2008**Plastics piping systems- lastomeric-sealing- ring- type socket joints of unplasticized polyvinyl chloride**

(PVC-U) for use with PVC-U pipes- Test method for leaktightness under negative pressure

This standard specifies a method for testing the leaktightness of:

- single sockets of unplasticized polyvinyl chloride(PVC-U);
- double sockets of PVC-U;
- sockets of PVC-U fittings, with elastomeric sealing rings.

04 Page Gr-XA CE

BDS ISO 13845:2008

Plastics piping systems- Elastomeric-sealing-ring-type socket joints for use with unplasticized polyvinyl chloride (PVC-U) pipes- Test method for leaktightness under internal pressure and with angular deflection

Specifies a method for testing the leaktightness of assemblies of unplasticized polyvinyl chloride (PVC-U) pipes with elastomeric sealing-ring-type socket joints including:

- single sockets of pipes;
- double sockets;
- sockets of fittings.

It is also applicable to elastomeric-sealing-ring-type sockets made of ductile cast iron for use with PVC-U pressure piping

03 Page Gr-XA CE

BDS ISO 13846:2008

Plastics piping systems- End- loadbearing and non-end-load-bearing assemblies and joints for thermoplastics pressure piping- Test method for long-term leaktightness under internal water pressure

Specifies a test method for the long-term leaktightness of end-load-bearing and nonend-load-bearing mechanically jointed assemblies and joints between fittings, ancillaries, valves and thermoplastics pressure pipes, including integral pipe joints.

06 Page Gr-XA CE

BDS ISO 13943:2015

Fire safety- Vocabulary

This International Standard defines terminology relating to fire safety as used in International Standards and other documents of the International Standardization Organization and the International Electrotechnical Committee.

51 Page Gr-XE CE

BDS ISO 13951:2010

Plastics piping systems- Test method for the resistance of polyolefin pipe/pipe or pipe/fitting assemblies to tensile loading

This International Standard specifies a method for testing the resistance to tensile loading of polyolefin pipe/pipe or Pipe/fitting assemblies with electrofusion joints, butt-fusion joints or mechanical fittings. This method is applicable to assemblies with nominal pipe diameters less than or equal to 250 mm.

03 Page Gr-XA CE

BDS ISO 13953:2010

Polyethylene (PE) pipes and fittings- Determination of the tensile strength and failure mode of test pieces from a butt-fused joint

This International Standard describes a test method for determination of the tensile strength and tensile failure mode of butt-fused polyethylene (PE) pipe assemblies.

05 Page Gr-XA CE

BDS ISO 13954:2010

Plastics pipes and fittings- Peel decohesion test for polyethylene electrofusion assemblies of nominal outside diameter greater than or equal to 90 mm

This International Standard describes a peel test method for determining the decohesive resistance of polyethylene electrofusion socket assemblies for use in the distribution of fluids. This method is applicable to assemblies with nominal outside diameters greater than or equal to 90 mm.

05 Page Gr-XA CE

BDS ISO 13955:2010

Plastics pipes and fittings — Crushing decohesion test for polyethylene (PE) electrofusion assemblies

This International Standard describes a crushing test method for determining the decohesive resistance of polyethylene (PE) pipe and electrofusion socket or saddle assemblies for use in the distribution of fluids.

04 Page Gr-XA CE

BDS ISO 13957:2010

Plastics pipes and fittings- Polyethylene (PE) tapping tees- Test method for impact resistance

This International Standard specifies a test method for the impact resistance of polyethylene (PE) tapping tees. This International Standard is applicable to PE tapping tees intended for the conveyance of fluids.

03 Page Gr-XA CE

BDS ISO 14236:2010

Plastics pipes and fittings- Mechanical-joint compression fittings for use with polyethylene pressure pipes in water supply systems

This International Standard specifies the required properties and test methods for mechanical fittings intended to join polyethylene pressure pipes of nominal outside diameters not greater than 160 mm, used in water supply systems conveying potable water and water for general purposes at temperatures up to and including 40 °C.

04 Page Gr-XA CE

BDS ISO 14284:2008

Steel and iron- Sampling and preparation of samples for the determination of Chemical composition

This International Standard specifies methods for sampling and Sample preparation for the determination of the Chemical composition of pig iron, cast iron and steel. Methods are specified for use with both liquid and solid metal.

Plastics piping systems for industrial applications- Polybutene (PB), polyethylene (PE) and polypropylene (PP)- Specifications for components and the system - Metric series

Specifies the characteristics and requirements for components such as pipes, fittings and valves made from one of the following materials:

- polybutene (PB);
- polyethylene (PE);
- polypropylene (PP);

Intended to be used for thermoplastics piping systems in above-ground industrial applications.

89 Page Gr-XE CE

BDS ISO 14654:2013

Epoxy-coated steel for the reinforcement of concrete.

The International Standard specifies requirements for fusion-bonded epoxy-coated post-fabricated and prefabricated steel bar, wire and welded fabric for the reinforcement of concrete.

This International Standard permits the application of either flexible (type A) or nonflexible (type B) coating shall not be fabricated after coating.

28 Page Gr-XC CE

BDS ISO 14655:2013

Epoxy-coated steel for the Prestressing of concrete

The International Standard specifies requirements for fusion-bonded epoxy-coated or epoxy-coated and filled seven-wire prestressing steel for the prestressing of concrete.

18 Page Gr-XB CE

BDS ISO 14656:2013

Epoxy-powder and sealing material for the coating of steel for the reinforcement of concrete

This International Standard specifies requirements for epoxy powders for use in preparing fusion-bonded epoxy-coated steel reinforcing bar, wire and welded fabric. This International Standard also includes requirements for sealing material used to repair damaged areas and cut ends on reinforcing steel.

This International Standard defines a flexible (type A) coating and a nonflexible (type B) coating. The adhesion and moisture resistance of fusion-bonded epoxy powder coatings can be enhanced by certain formulation designs. These coating enhancements typically result in a reduction of the coating's flexibility.

08 Page Gr-XA CE

BDS ISO 14657:2013

Zinc-coated steel for the reinforcement of concrete

This International Standard specifies requirements for hot-dip zinc (galvanized) coating on steel reinforcing bars, wire and welded fabric used in the reinforcement of concrete.

It specifies three classes, class A, class B and class C coatings, which differ in coating mass (see 6.2.3).

10 Page Gr-XA CE

Such promises and related provisions are aimed at enhanced customer satisfaction.

19 Page Gr-XB ET

BDS ISO 10002:2009**Quality management — Customer satisfaction — Guidelines for complaints handling in organization**

Provides guidance on the process of complaints handling related to products within an organization, including planning, design, operation, maintenance and improvement. The complaint handling process described is suitable for use as one of the processes of an overall quality management system

33 Page Gr-XC ET

BDS ISO 10003:2009**Quality management — Customer satisfaction — Guidelines for dispute resolution external to organizations**

Provides guidance for an organization to plan, design, develop, operate, maintain and improve an effective and efficient dispute-resolution process for complaints that have not been resolved by the organization. Complaints relating to the organization's products intended for, or required by, customers, the complaint handling process or dispute-resolution process

43 Page Gr-XD ET

BDS ISO TR 10013:2014**Guidelines for quality management system documentation**

Provides guidelines for the development and maintenance of the documentation necessary to ensure an effective quality management system, tailored to the specific needs of the organization. The use of these guidelines will aid in establishing a documented system as required by the applicable quality management system standard.

22 Page Gr-XC ET

BDS ISO/IEC 10373-1:2003

**Identification cards — Test methods — Part-1:
General characteristic tests**

Defines the test methods for characteristics of identification cards, which are common one or more card technologies.

22 Page Gr-XC ET

BDS ISO/IEC 10373-5:2003

**Identification cards — test methods — Part-5:
Optical memory card**

Deal with test methods, which are specifies to optical memory card technology.

06 Page Gr-XA ET

BDS ISO 10656:2008

**Electric resistance welding — Integrated
transformers for welding guns**

Specifies transformers for electric resistance welding used in welding guns with integrated transformers (robot guns). For these transformers it supplements the requirements given in ISO 5826.

06 Page Gr-XA ET

BDS ISO/IEC 11411:2007

**Information technology — Representation for human
communication of state transition of software**

The underlying concept is that diagrams and symbols defined herein be helpful in representing software functions and transitions and in improving human communication. The areas covered are development, communication and review of software requirement analysis and design.

10 Page Gr-XA ET

BDS ISO/IEC 11571:2011

**Information technology — Telecommunications and
information exchange between systems — Private
integrated services networks — Addressing**

Defines the requirements for the handling of network addresses for the identification of entities which use or provide telecommunication services offered by Private Integrated Services Networks (PISNs)..

21 Page Gr-XB ET

BDS ISO/IEC 11572:2014

**Information technology – Telecommunications and
information exchange between systems – Private
integrated services network – Circuit mode bearer
services – Inter-exchange signalling procedures and
protocol**

Defines the signalling procedures and protocol for the purpose of circuit-switched Call Control at the Q-reference point between Private Integrated Network Exchanges (PINXs) connected together within a Private Integrated Services Network (PISN).

137 Page Gr-XE ET

BDS ISO/IEC 11573:2002

**Information technology – Telecommunication and
information exchange between systems –**

**Synchronization methods and technical requirements
for private integrated service network**

Timing with in a digital private network needs to be controlled carefully to ensure that the rate of occurrence of slips between PINXs within the PISN, and the public switched networks is sufficiently low not to affect unduly performance of voice transmissions, or the accuracy or throughput of non voice services.

37 Page Gr-XD ET

BDS ISO/IEC 11574:2014

**Information technology – Telecommunications and
information exchange between systems – Private
integrated services network – Circuit-mode 64 kbit/s
bearer services – Service description, functional
capabilities and information flows**

Specifies the service description and control aspects, including functional capabilities and information flows, of standardised circuit-mode bearer services which may be supported by a Private Integrated Services Network (PISN).

87 Page Gr-XE ET

BDS ISO/IEC 11579-1:2002

**Information technology – Telecommunication and
information exchange between systems – Private
integrated service network – Part-1: Reference
configuration for PISN exchange (PINX)**

Reference configuration (RC) for private integrated service network exchange (PINX) for their interconnection to form private integrated service network (PISN).

12 Page Gr-XB ET

BDS ISO/IEC 11579-2:2002

**Information technology – Telecommunication and
information exchange between systems – Private
integrated service network — Part 2: Reference
configuration for HS-PISN exchange (HS-PINX)**

Reference configuration (RC) for high-speed private integrated service network exchange (HS-PINX) for their interconnection to form high-speed private integrated service network (HS-PISN). The configuration is intended to provide guidance for the specification of PINX capabilities, but does not impose any specific implementation of a HS-PINX.

08 Page Gr-XA ET

BDS ISO/IEC 11579-3:2002

**Information technology — Telecommunication and
information exchange between systems — Private
integrated service network — Part 3 Reference
configuration for PISN extension lines**

Reference configuration (RC) for extension line of a private integrated service network exchange (PINX) including high level functions in addition to the physical termination system.

10 Page Gr-XA ET

BDS ISO/IEC 11582:2009**Information technology — Telecommunications and information exchange between systems — Private integrated services network — Generic functional protocol for the support of supplementary services — Inter-exchange signaling procedures and protocol**

Defines the signaling protocol for the control of supplementary services and Additional Network Features (ANFs). The protocol is part of Private Signaling System (PSS), Detailed procedures applicable to individual.

106 Page Gr-XE ET

BDS ISO/IEC 11584:2008**Information technology — Telecommunications and information exchange between systems – Private integrated services network – Circuit-mode multi – rate bearer services — Service description, functional capabilities and information flows**

Specifies service description and control aspects of the multi-rate circuit-mode basic services which may be supported by Private Integrated Services Network (PISN).

08 Page Gr-XA ET

BDS ISO/IEC 11693:2003**Identification cards — Optical memory cards — General characteristics**

Provides information necessary to store data on cards, to read data from cards, and for the physical, optical and data interchangeability of optical memory cards in information processing systems.

07 Page Gr-XA ET

BDS ISO/IEC 12119:2006**Information technology — Software packages — Quality requirements and testing.**

Applicable to software packages.

12 Page Gr-XB ET

BDS ISO 12166:2008**Resistance welding equipment — Particular specifications applicable to transformers with one secondary winding for multispot welding, as used in the automobile industry**

Give specific details or to complement ISO 5826, which deals with general specifications applicable to all transformers, relating to particular transformers within its field of application.

04 Page Gr-XA ET

BDS ISO/IEC TR 12182:2006**Information Technology — Categorization of software**

Categories of software that are produced by software engineering processes. It describes a categorization scheme for software that encompasses different points of view and significant characteristics and attributes that describe and define software and software categories

BDS ISO/IEC 13241:2008**Information technology — Telecommunications and****information exchange between systems — Private Integrated Services Network — Inter-exchange signalling protocol — Route Restriction Class additional network**

Specifies the signalling protocol for the support of the Route Restriction Class (RRC) additional network feature (ANF-RRC) point between Private Integrated Services Network Exchanges (PINXs) connected together within a Private Integrated Services Network (PISN).

22 Page Gr-XC ET

BDS ISO/IEC 13242:2008**Information technology — Telecommunications and information exchange between systems — Private integrated services network — Specification, functional model and information flows — Route Restriction Class additional network feature**

Route Restriction Class additional network feature (ANF-RRC), which is applicable to various basic services supported by Private Integrated Services Networks (PISN). Basic services are specified in ISO/IEC 11574.

14 Page Gr-XB ET

BDS ISO/IEC 13246:2008**Information technology — Telecommunications and information exchange between Systems –Broadband Private integrated services network – Inter exchange signaling protocol — Signalling ATM adaptation layer**

Signalling ATM adaptation layer (SAAL) protocol used at the interface between Broadband PINXs and between Broadband PISNs within the framework of the B-QSIG signalling System protocol family.

14 Page Gr-XB ET

BDS ISO 13351:2011**Fans — Dimensions**

Specifies the dimensions of the circular and rectangular flanges of general-purpose fans, as well as the fan size designations. It provides for three different flange series: one for light-duty casing thicknesses, another for medium-duty fans and the third for heavy-duty fans.

13 Page Gr-XB ET

BDS ISO 13528:2013**Statistical methods for use in proficiency testing by interlaboratory comparisons**

Providing detailed descriptions of sound statistical methods for organizers to use to analyse the data obtained from proficiency testing schemes, and by giving recommendations on their use in practice by participants in such schemes and by accreditation bodies.

74 Page Gr-XE ET

BDS ISO/IEC 13800:2006**Information Technology — Procedure for the registration of identifiers and attributes for volume and files structure**

Procedure to be followed by a Registration Authority in preparing, maintaining and publishing an International

Register of attributes and one or more International Registers of identifiers for volume and file structure.

12 Page Gr-XA ET

BDS ISO 14001:2015

Environmental management systems — Requirements with guidance for use

Specifies the requirements for an environmental management system that an organization can use to enhance its environmental performance. Intended for use by an organization seeking to manage its environmental responsibilities in a systematic manner that contributes to the environmental pillar of sustainability.

43 Page Gr-XE ET

BDS ISO 14050:2015

Environmental management systems — Vocabulary

Defines terms of fundamental concepts related to environmental management, published in the ISO 14000 series of International Standards.

88 Page Gr-XE ET

BDS ISO/IEC TR 14471:2007

Information technology — Software engineering — Guidelines for the adoption of CASE tools

Since CASE adoption is a subject of the broader technology transition problem, this Technical Report addresses the adoption practices appropriate for a wide range of computing organisations.

20 Page Gr-XB ET

BDS ISO/IEC 14598-1:2008

Information Technology — Software product evaluation — Part 1: General overview

Introduces the other parts. It provides an overview of the other parts and explains the relationship between ISO IEC 14598 and the quality model in ISO IEC 9126.

20 Page Gr-XB ET

BDS ISO IEC 14598-2:2008

Information Technology — Software Product evaluation — Part 2: Planning and management

Provides requirements, recommendations and guidelines for a supporting function which is responsible for the management of software product evaluation.

10 Page Gr-XA ET

BDS ISO IEC 14598-3:2008

Information Technology — Software product evaluation Part 3: Process for developers

Provides requirements and recommendations for the practical implementation of software product evaluation when the evaluation is conducted in parallel with the development and carried out by the developer.

15 Page Gr-XA ET

BDS ISO/IEC 14598-4:2008

Information technology — Software engineering — Product Evaluation — Part 4: Process for acquirers

Contains requirements, recommendations and guidelines for the systematic measurement, assessment and evaluation of software product quality during acquisition of “off-the-shelf” software products, custom software products, or modifications to existing software products.

35 Page Gr-XD ET

BDS ISO/IEC 14598-5:2008

Information technology — Software product evaluation — Part 5: Process for evaluators

Provides requirements and recommendations for the practical implementation of software product evaluation when several parties need to understand and trust evaluation results.

35 Page Gr-XC ET

BDS ISO/IEC 14598-6:2008

Information technology — Software engineering — Product Evaluation — Part 6: Documentation of evaluation modules

Defines the structure and content of the documentation to be used to describe an Evaluation Module.

28Page Gr-XC ET

BDS ISO/IEC 14764:2007

Information technology — Software maintenance

Describes in greater detail management of the Maintenance process. It also establishes definitions for the various types of maintenance. This provides guidance that applies to planning, execution and control, review and evaluation, and closure of the maintenance process. The scope includes maintenance for multiple software products with the same maintenance resources.

42 Page Gr-XE ET

BDS ISO 15189:2015

Medical laboratories — Requirements for quality and competence

Specifies requirements for quality and competence in medical laboratories. It can be used by medical laboratories in developing their quality management systems and assessing their own competence.

60 Page Gr-XE ET

BDS ISO/IEC 15428:2009

Information technology — Telecommunications and information exchange between systems — Private integrated services network – Specification, functional model and information flows – Wireless terminal location registration supplementary service and Wireless terminal information exchange additional network feature

Specifies the Wireless Terminal Location Registration supplementary service (SS-WTLR) and the Wireless Terminal Information Exchange additional network feature (ANF-WTINFO), which are applicable to various basic services supported by Private Integrated Services Networks (PISN).

42 Page Gr-XE ET

BDS ISO/IEC 15429:2009

Information technology — Telecommunications and information Exchange between systems — Private integrated services network — Interexchange signalling protocol — Wireless terminal location

registration supplementary service and wireless terminal information exchange additional network feature

Specifies the signaling protocol for the support of the Wireless Terminal Location Registration supplementary service (SS-WTLR) and the Wireless Terminal Information exchange additional network feature (ANFWTINFO) at the Q reference point between Private Integrated services Network exchanges (PINXs) connected together within a Private Integrated Services Network.

42 Page Gr-XE ET

BDS ISO/IEC 15430:2009

Information technology — Telecommunications and information exchange between systems — Private integrated services network — Specification, functional model and information flows — Wireless terminal call handling additional network features

Specifies the Wireless terminal call handling additional network features (ANF-WTMI, ANF-WTMO), which are applicable to various basic services supported by Private Integrated Services Networks (PISN).

32 Page Gr-XD ET

BDS ISO/IEC 15431:2014

Information technology — Telecommunications and information exchange between systems — Private integrated services network — Interexchange signalling protocol — Wireless terminal call handling additional network features

Specifies the signalling protocol for the support of the Wireless terminal call handling additional network features (ANF-WTMI and ANF-WTMO) at the Q reference point between Private Integrated services Network eXchanges (PINX) connected together within a Private Integrated Services Network (PISN).

47 Page Gr-XE ET

BDS ISO/IEC 15507:2002

Information technology — Telecommunications and information exchange between systems — Private integrated service network — Interexchange signalling protocol — PINX clock synchronization.

Specifies signaling protocol for the support of clock synchronization (SYNC-SIG) between private integrated service network exchanges (PINXs) connected together within a private integrated service network (PISN).

18 Page Gr-XB ET

BDS ISO/IEC 17000:2008

Conformity assessment — Complaints and appeals — Principles and requirements assessment — Vocabulary and general principles

Specifies general terms and definitions relating to conformity assessment, including the accreditation of conformity assessment bodies, and to the use of conformity assessment to facilitate trade. A description of the functional approach to conformity assessment is included.

12 Page Gr-XB ET

BDS ISO PAS 17001:2008

Conformity assessment — Impartiality — Principles and requirements

Contains principles and requirements for the elements of impartiality as it relates to standards for conformity assessment.

08 Page Gr-XA ET

BDS ISO PAS 17002:2008

Conformity assessment — Confidentiality — principles and requirements

Contains principles and requirements for the element of confidentiality as it relates to conformity assessment.

05 Page Gr-XA ET

BDS ISO PAS 17003:2008

Conformity assessment — Complaints and appeals — Principles and requirements

Contains principles and requirements for the elements of complaints and appeals as they relate to conformity assessment.

08 Page Gr-XA ET

BDS ISO PAS 17004:2008

Conformity — Assessment — Disclosure of information — Principles and requirements

Contains principles and requirements for the element of disclosure of information as it relates to standards for conformity assessment.

08 Page Gr-XA ET

BDS ISO/IEC TC 17010:1998

General requirements for bodies providing accreditation of inspection bodies

Gives general requirements for bodies providing accreditation of inspection bodies so that the accreditations granted and the services covered by the accreditations may be recognized at a national or an international level and the body operating the accreditation system may be recognized at national or international level as competent and reliable.

16 Page Gr-XA ET

BDS ISO/IEC 17011:2008

Conformity assessment – General requirements for accreditation bodies accrediting conformity assessment bodies

Specifies general requirements for accreditation bodies assessing and accrediting conformity assessment bodies (CABs). It is also appropriate as a requirements document for the peer evaluation process for mutual recognition arrangements between accreditation bodies.

26 Page Gr-XA ET

BDS ISO/IEC 17020:2014

General criteria for the operation of various types of bodies performing inspection

Specifies general criteria for the competence of impartial bodies performing inspection irrespective of the sector involved.

16 Page Gr-XB ET

BDS ISO/IEC 17021:2013**Conformity assessment — Requirements for bodies providing audit and certification of management systems**

Contains principles and requirements for the competence, consistency and impartiality of the audit and certification of management systems of all types and for bodies providing these activities.

25 Page Gr-XC ET

BDS ISO/IEC TS 17021-2:2015**Conformity assessment — Requirements for bodies providing audit and certification of management systems — Part 2: Competence requirements for auditing and certification of environmental management systems**

Specifies additional competence requirements for personnel involved in the audit and certification process for Environmental Management Systems (EMS).

18 Page Gr-XB ET

BDS ISO/IEC TS 17021-3:2015**Conformity assessment — Requirements for bodies providing audit and certification of management systems — Part 3: Competence requirements for auditing and certification of quality management systems**

It includes specific competence requirements for personnel involved in the certification process for quality management systems (QMS).

16 Page Gr-XB ET

BDS ISO/IEC TS 17021-4:2015**Conformity assessment — Requirements for bodies providing audit and certification of management systems Part 4: Competence requirements for auditing and certification of event sustainability management systems**

It specifies additional competence requirements for personnel involved in the audit and certification process for event sustainability management systems (ESMS).

18 Page Gr-XB ET

BDS ISO/IEC TS 17021-5:2015**Conformity assessment — Requirements for bodies providing audit and certification of management systems — Part 5: Competence requirements for auditing and certification of asset management systems**

It specifies additional competence requirements for personnel involved in the certification process for asset management systems.

12 Page Gr-XA ET

BDS ISO/IEC TS 17023:2014**Conformity assessment — Guidelines for determining the duration of management system certification audits**

Provides guidelines for determining the duration of management system certification audits, to the bodies

providing audit and certification of management systems and to those that develop and maintain certification schemes.

14 Page Gr-XB ET

BDS ISO/IEC 17024:2003**Conformity assessment — General requirements for bodies operating certification of persons**

Specifies requirements for a body certifying persons against specific requirements, including the development and maintenance of a certification scheme for persons.

08 Page Gr-XA ET

BDS ISO/IEC 17025:2005**General requirements for the competence of testing and calibration laboratories**

General requirements for the competence to carry out tests and or calibrations, including sampling. It covers the testing and calibration methods applicable to all laboratories. This standard does not cover the regulatory and safety requirements on the operation of laboratories.

29 Page Gr-XC ET

BDS ISO/IEC TS 17027:2015**Conformity assessment – Vocabulary related to competence of persons used for certification of persons**

Specifies terms and definitions related to the competence of persons used in the field of certification of persons, in order to establish a common vocabulary. These terms and definitions can also be used as applicable in other documents specifying competence of persons, such as regulations, standards, certification schemes, research, training, licensing and registration.

11 Page Gr-XB ET

BDS ISO/IEC 17030:2008**Conformity assessment – General requirements for third-party marks of conformity**

Provides general requirements for third-party marks of conformity, including their issue and use.

04 Page Gr-XA ET

BDS ISO/IEC 17040:2008**Conformity assessment – General requirements for peer assessment of conformity assessment bodies and accreditation bodies**

Specifies the general requirements for the peer assessment process to be carried out by agreement groups of accreditation bodies or conformity assessment bodies. It addresses the structure and operation of the agreement group only.

15 Page Gr-XB ET

BDS ISO/IEC 17043:2012**Conformity assessment – General requirements for proficiency testing**

Specifies general requirements for the competence of providers of proficient testing schemes and for the development and operation of proficiency testing schemes. These requirements are intended to be general for all types of proficiency testing schemes, and they can be used as a basis for particular fields of application.

38 Page Gr-XD ET

BDS ISO/IEC 17050-1:2008

Conformity assessment – Supplier's declaration of conformity – Part 1: General requirements

Specifies general requirements for a supplier's declaration of conformity in cases where it is desirable, or necessary, that conformity of an object to the specified requirements be attested, irrespective of the sector involved. The object of a declaration of conformity can be a product, process, management system, person or body.

06 Page Gr-XA ET

BDS ISO/IEC 17050-2:1998

Conformity assessment — Supplier's declaration of conformity — Part 2: Supporting documentation supplier's declaration of conformity

The object of a declaration of conformity can be a product, process, management system, person or body. Instead of "supplier's declaration of conformity", the term "declaration of conformity" can be used.

03 Page Gr-XA ET

BDS ISO/IEC 17065:2014

Conformity assessment — Requirements for bodies certifying products, processes and services

Contains requirements for the competence, consistent operation and impartiality of product, process and service certification bodies.

28 Page Gr-XC ET

BDS ISO/IEC 17067:2014

Conformity assessment — Fundamentals of product certification and guidelines for product certification schemes

Describes the fundamentals of product certification and provides guidelines for understanding, developing, operating or maintaining certification schemes for products, processes and services.

20 Page Gr-XB ET

BDS ISO/IEC 17309:2003

Information technology — Telecommunications and information exchange between systems — Private integrated services network — Mapping functions for the employment of a circuit mode basic service and the supplementary service user to user signalling as a pair of on-demand inter PINX connections

Specifies the mapping functions for a pair of on demand inter-PINX connections using a circuit mode basic service and the supplementary service User-in-User signalling of a public ISDN at the same time.

12 Page Gr-XB ET

BDS ISO/IEC 17310:2003

Information technology — Telecommunications and information exchange between systems — Private integrated services network — Mapping functions for the employment of 64 k bit/s circuit mode connections with 16 k bit/s sub-multiplexing

Defines the mapping functions in exchanges of private integrated services networks (PISNs) required for the utilization of scenarios in which 64 kbit/s circuit mode connections are multiplexed into 4 x16 kbit/s channels for carrying inter-PINX signalling and user information.

13 Page Gr-XB ET

BDS ISO/IEC 17311:2003

Information technology — Telecommunications and information exchange between systems — private integrated services network — mapping functions for the employment of 64 k bit/s circuit mode connections with 8 k bit/s sub-multiplexing

Defines the mapping functions in exchanges of private Integrated services networks (PISNs) required for the utilization of scenarios in which 64 kbit/s circuit mode connections are sub-multiplexed into one 16 kbit channel for carrying inter-PINX signalling and 6x8 kbit/s channels for carrying inter-PINX user information.

13 Page Gr-XB ET

BDS ISO/IEC 17799:2011

Information technology – Security techniques — Code of practice for information security management

Establishes guidelines and general principles for initiating, implementing, maintaining, and improving information security management in an organization. The objectives provide general guidance on the commonly accepted goals of information security management.

30 Page Gr-XC ET

BDS ISO 19011:2009

Guidelines for quality and/or environmental management systems auditing

Provides guidance on auditing management systems, including the principles of auditing, managing an audit programme and conducting management system audits, as well as guidance on the evaluation of competence of individuals involved in the audit process, including the person managing the audit programme, auditors and audit teams.

50 Page Gr-XE ET

BDS ISO TS 21748:2013

Guide to the use of repeatability, reproducibility and trueness estimates in measurement uncertainty estimation

Gives guidance for evaluation of measurement uncertainties using data obtained using formal principles of uncertainty propagation.

44 Page Gr-XE ET

BDS ISO 22000:2009**Food safety management – Requirements for any organization in the food chain**

Specifies requirements for a food safety management system where an organization in the food chain needs to demonstrate its ability to control food safety hazards in order to ensure that food is safe at the time of human consumption.

40 Page Gr-XD ET

BDS ISO TS 22003:2010**Food safety management systems – Requirements for bodies providing audit and certification of food safety management system**

Defines the rules applicable for the audit and certification of a food safety management system provides the necessary information and confidence to customers about the way certification of their suppliers has been granted.

22 Page Gr-XC ET

BDS ISO/IEC 24787:2013**Information technology — Identification cards — On-card biometric comparison**

Requirements for performing comparisons of biometric samples and returning decisions on an integrated circuit card, and security policies for on-card biometric comparison.

It also establishes commands and rules to permit pre comparison computations to be done off-card.

48 Page Gr-XE ET

BDS ISO/IEC 27001:2015**Information technology — Security techniques — Information security management systems — Requirements**

Specifies the requirements for establishing, implementing, maintaining and continually improving an information security management system within the context of the organization. It also includes requirements for the assessment and treatment of information security risks tailored to the needs of the organization.

23 Page Gr-XC ET

BDS ISO/IEC 27002:2015**Information technology — Security techniques — Code of practice for information security controls**

Gives guidelines for organizational information security standards and information security management practices including the selection, implementation and management of controls taking into consideration the organization's information security risk environment(s).

80 Page Gr-XE ET

BDS ISO/IEC 27003:2014**Information technology — Security techniques — Information security management system implementation guidance**

Focuses on the critical aspects needed for successful design and implementation of an Information Security Management System The process of ISMS specification

and design from inception to the production of implementation plans.

68 Page Gr-XE ET

BDS ISO/IEC 27010:2015**Information technology – Security techniques – Information security management for inter-sector and inter-organizational communications**

Provides guidelines in addition to guidance given in the ISO/IEC 27000 family of standards for implementing information security management within information sharing communities.

46 Page Gr-XE ET

BDS ISO 37001:2016**Anti-bribery management systems – Requirements with guidance for use**

Provides guidance for establishing, implementing, maintaining, reviewing and improving an anti-bribery management system. The system can be standalone or can be integrated into an overall management system.

47 Page Gr-XE ET

BDS ISO 50001:2012**Energy management systems – Requirements with guidance for use**

Specifies requirements for establishing, implementing, maintaining and improving an energy management system, whose purpose is to enable an organization to follow a systematic approach in achieving continual improvement of energy performance, including energy efficiency, energy use and consumption.

28 Page Gr-XC ET

BDS ISO 50002:2015**Energy audits – Requirements with guidance for use**

Specifies the process requirements for carrying out an energy audit in relation to energy performance. It is applicable to all types of establishments and organizations, and all forms of energy and energy use.

31Page Gr-XD ET

BDS ISO 50003:2015**Energy management systems – Requirements for bodies providing audit and certification of energy management systems**

Specifies requirements for competence, consistency and impartiality in the auditing and certification of energy management systems (EnMS) for bodies providing these services. In order to ensure the effectiveness of EnMS auditing, it enclosed auditing process, competence requirements for personnel involved in the certification process for energy management systems, the duration of audits and multi-site sampling.

27 Page Gr-XC ET

BDS IEC 60034-1:2008

Rotating Electrical machines Part 1: Rating and Performance

Applicable to all rotating electrical machines except those covered by other IEC standards.

60 Page Gr-XE ET

BDS IEC 60034-2-1:2009

Rotating electrical machines Part 2-1: Standard methods for determining losses and efficiency

Intended to establish methods of determining efficiencies from tests, and also to specify methods of obtaining specific losses. This standard applies to d.c. machines and to a.c. synchronous and induction machines of all sizes.

63 Page Gr-XE ET

BDS IEC 60034-6:2009

Rotating electrical machines Part 6: Methods of cooling (IC Code)

Identifies the circuit arrangements and the methods of movement of the coolant in rotating electrical machines, classifies the methods of cooling and gives a designation system for them.

13 Page Gr-XB ET

BDS IEC 60034-9:2009

Rotating electrical machines Part 9: Noise limits

This part of IEC 60024

- Specifies test methods for the determination of sound power level of rotating electrical machines;
- Specifies maximum A-weighted sound power levels for factory acceptance testing of network-supplied, rotating electrical machines in accordance with IEC 60034-1 having methods of cooling according to IEC 60034-6 and degrees of protection according to IEC 60034-5, and having the following characteristics;
- Provides guidance for the determination of noise levels for a.c. cage induction motors supplied by converters.

08 Page Gr-XA ET

BDS IEC 60034-29:2013

Rotating electrical machines – Part 29: Equivalent loading and superposition techniques–Indirect testing to determine temperature rise

Applies to machines covered by IEC 60034-1 when they cannot be loaded to a specific condition. It is applicable to both motors and generators.

08 Page Gr-XA ET

BDS IEC 60034-30:2011

Rotating electrical machines - Part 30: Efficiency classes of single-speed, three-phase, cage-induction motors (IE-code)

Specifies efficiency classes for single-speed, three-phase, 50 Hz and 60 Hz, cage-induction motors.

16 Page Gr-XB ET

BDS IEC 60038:2010

IEC standard voltages

Standard voltage ratings for eclectic devices instruments apparatus and requirement

10 Page Gr-XA ET

BDS IEC 60050-411:2008

International electrotechnical vocabulary – Part-411: Rotating machines

Describe the electrotechnical vocabulary of rotating machines

37 Page Gr-XD ET

BDS IEC 60050-461:2013

International electrotechnical vocabulary – Part 461: Electric cables

Defines the terms used in standards relating to electrical wires, cables and conductors.

20 Page Gr-XB ET

BDS IEC 60050-481:2008

International electrotechnical vocabulary – Part 481 Primary cells and batteries

Describe the electrotechnical vocabulary of primary cells and batteries

13 Page Gr-XB ET

BDS IEC 60050-486 :2005

International electrotechnical vocabulary – Part 486: Secondary cells and batteries

Describe the electrotechnical vocabulary of Secondary cells and batteries.

16 Page Gr-XB ET

BDS IEC 60050-551:2008

International electrotechnical vocabulary Part 551 Power electronics

Describe the electrotechnical vocabulary of power electronics.

20 Page Gr-XB ET

BDS IEC 60050-901:2015

International electrotechnical vocabulary – Part 901: Standardization

Gives the general terminology used in the field of standardization, as well as general terms pertaining to specific applications and associated technologies.

54 Page Gr-XE ET

BDS IEC 60059:2010

IEC standard current ratings

Standard current ratings for electrical devices, apparatus, instruments and equipment and should be applied to the designing of utilization systems or equipment as well as to operating characteristics.

07 Page Gr-XA ET

BDS IEC 60065:2015

Audio, video and similar electronic apparatus – Safety requirements

Applies to electronic apparatus designed to be fed from the MAINS, from a SUPPLY APPARATUS, from batteries or from REMOTE POWER FEEDING and intended for reception, generation, recording or reproduction respectively of audio, video and associated

signals. It also applies to apparatus designed to be used exclusively in combination with the above-mentioned apparatus.

160 Page Gr-XE ET

BDS IEC 60076-1:2016

Power transformers – Part 1: General

Applies to three-phase and single-phase power transformers (including auto-transformers) with the exception of certain categories of small and special transformers

71 Page Gr-XE ET

BDS IEC 60076-2:201

Power transformers – Part 2: Temperature rise for liquid-immersed transformers

Applies to liquid-immersed transformers, identifies power transformers according to their cooling methods, defines temperature rise limits and gives the methods for temperature rise tests.

41 Page Gr-XE ET

BDS IEC 60076-3:2016

Power transformers – Part 3: Insulation levels, dielectric tests and external clearances in air

Applies to power transformers as defined by and in the scope of IEC 60076-1. It gives details of the applicable dielectric tests and minimum dielectric test levels. Recommended minimum external clearances in air between live parts and between live parts and earth are given for use when these clearances are not specified by the purchaser.

56 Page Gr-XE ET

BDS IEC 60076-4:2007

Power transformers – Part 4 Guide to the lightning impulse and switching impulse testing - power transformers and reactors

Gives guidance and explanatory comments on the existing procedures for lightning and switching impulse testing of power transformers to supplement the requirements. It is also generally applicable to the testing of reactors, modifications to power transformer procedures being indicated where required.

51 Page Gr-XE ET

BDS IEC 60076-5:2006

Power transformers – Part-5: Ability to withstand short circuit

Identifies the requirements for power transformers to sustain without damage the effects of overcurrent originated by external short circuits. It describes the calculation procedures used to demonstrate the thermal ability of a power transformer to withstand such overcurrents and both the special test and the theoretical evaluation method used to demonstrate the ability to withstand the relevant dynamic effects.

34 Page Gr-XD ET

BDS IEC 60076-7:2007

Power transformers – Part-7: Loading guide for oil-immersed power transformers

Applicable to oil-immersed transformers. It describes the effect of operation under various ambient temperatures and load conditions on transformer life.

51 Page Gr-XE ET

BDS IEC 60076-8 : 2006

Power transformers – Part-8: Application guide

Applies to power transformers complying with the series of publications IEC 60076.

83 Page Gr-XB ET

BDS IEC 60076-10:2006

Power transformers – Part-10: Determination of sound levels

Defines sound pressure and sound intensity measurement methods by which sound power levels of transformers, reactors and their associated cooling auxiliaries may be determined.

30 Page Gr-XC ET

BDS IEC 60076-10-1:2008

Power Transformers – Part 10-1: Determination of Sound Levels – Application Guide

Provides supporting information to help both manufacturers and purchasers apply the measurement techniques. The sources and characteristics of transformer and reactor sound are described. Practical guidance on making measurements is given, and factors that may influence the accuracy of the methods are discussed.

42 Page Gr-XE ET

BDS IEC 60076-11:2009

Power transformers – Part-11: Dry-type power transformers

Dry-type power transformers (including auto-transformers) having values of highest voltage for equipment up to and including 36 kV and at least one winding operating at greater than 1.1 kV.

30 Page Gr-XC ET

BDS IEC 60076-12:2015

Power transformers – Part 12: Loading guide for dry-type power transformers

Applicable to dry-type transformers It provides the means to estimate ageing rate and consumption of lifetime of the transformer insulation as a function of the operating temperature, time and the loading of the transformer.

39 Page Gr-XD ET

BDS IEC 60076-13:2009

Power transformers – Part-13: Self-protected liquied-filled transformers

Applies to high-voltage/low-voltage self-protected liquied-filled and naturally cooled transformers for rated power 50 kVA to 1000 kVA for indoor or outdoor use

13 Page Gr-XB ET

BDS IEC 60076-14:2015

Power transformers – Part 14: Liquid-immersed power transformers using high-temperature insulation materials

Applies to liquid-immersed power transformers employing either high-temperature insulation or

combinations of high-temperature and conventional insulation, operating at temperatures.

60 Page Gr-XE ET

BDS IEC 60076-15:2015

Power transformers – Part 15: Gas-filled power transformers

Applies to gas-filled power transformers (including auto-transformers). The standard applies to all construction technologies.

28 Page Gr-XC ET

BDS IEC 60076-16:2015

Power transformers – Part 16: Transformers for wind turbine applications

Applies to dry-type and liquid-immersed transformers for rated power 100 kVA up to 10 000 kVA for wind turbine applications having a winding with highest voltage for equipment up to and including 36 kV and at least one winding operating at a voltage greater than 1,1 kV.

40 Page Gr-XD ET

BDS IEC 60081:2006

Double-capped fluorescent lamps – Performance Specification

Describe the double-capped fluorescent lamps of performance specification.

98 Page Gr-XE ET

BDS IEC 60085:2010

Electrical insulation – Thermal evaluation and designation

Distinguishes between thermal classes for electrical insulation systems and electrical insulating materials. It establishes the criteria for evaluating the thermal endurance of either electrical insulating materials (EIM) or electrical insulation systems (EIS). It also establishes the procedure for assigning thermal classes.

03 Page Gr-XA ET

BDS IEC 60086-1:2005

Primary batteries – Part-1: General

It standardize primary batteries with respect to their electrotechnical system, dimensions, nomenclature, terminal configurations, marketings, test methods, typical performance, safety and environmental aspects.

45 Page Gr-XE ET

BDS IEC 60086-2:2005

Primary batteries – Part-2: Physical and electrical specifications

Applicable to primary batteries based on standardized electrochemical systems.

59 Page Gr-XE ET

BDS IEC 60086-3:2005

Primary batteries – Part-3: Watch batteries

Specifies dimensions designation, methods of tests and requirements for primary batteries for watches. In several cases a menu of test methods is given.

19 Page Gr-XB ET

BDS IEC 60086-4:2005

Primary batteries – Part-4: Safety of lithium batteries

Specifies tests and requirements for primary lithium batteries to ensure their safe operation under intended use and reasonably foreseeable misuse.

32 Page Gr-XD ET

BDS IEC 60086-5:2005

Primary batteries – Part-5: Safety of batteries with aqueous electrolyte

Specifies tests and requirements for primary batteries with aqueous electrolyte to ensure their safe operation under normal use and reasonably foreseeable misuse.

34 Page Gr-XD ET

BDS IEC 60137:2005

Insulated bushings for alternating voltages above 1000 V

Specifies the characteristics and tests for insulated bushings.

45 Page Gr-XE ET

BDS IEC 60143-1:2009

Series capacitors for power systems – Part-I: General

Applies both to capacitor units and capacitor banks intended to be used connected in series with an a.c. transmission or distribution line or circuit forming part of an a.c. power system having a frequency of 15 Hz to 60 Hz

58 Page Gr-XE ET

BDS IEC 60143-2:2009

Series capacitors for power systems – Part-2: Protective equipment for series capacitor banks

Covers protective equipment for series capacitor banks, with a size larger than 10 Mvar per phase. Protective equipment is defined as the main circuit apparatus and ancillary equipment, which are part of a series capacitor installation, but which are external to the capacitor part itself.

50 Page Gr-XE ET

BDS IEC 60143-3:2009

Series capacitors for power systems – Part 3: Internal fuses

Covers intrnal fuses designed to isolate faulty capacitor elements, to allow peration of the remaining parts of that capacitor unit and the bank in which the capacitor unit is connected. Such fuses are not a substitute for a switching device such as a circuitbreaker, or for external protection of the capacitor bank, or any part thereof.

10 Page Gr-XA ET

BDS IEC 60155:2006

Glow – starters for fluorescent lamps

Specifies interchangeable glow-starters used with pre-heat type fluorescent lamps, hereafter called "starters" specifies the general and safety regularements with which starters shall comply-specifies the performance

26 Page Gr-XC ET

BDS IEC 60173:2010

Colours of the cores of flexible cables and cords.

Applies to flexible cables and cords with not more than five cores.

03 Page **Gr-XA** **ET**

BDS IEC 60188:2006

High-pressure mercury vapour lamps – Performance Specifications

Specifies the performance requirements for high-pressure mercury vapour lamps for general lighting purposes, with or without a red correcting fluorescent coating. For some of the requirements given in this standard, reference is made to "the relevant lamp data sheet". For some lamps these data sheets are contained in this standard. For other lamps, falling under the scope of this standard, the relevant data are supplied by the lamp manufacturer or responsible vendor.

30 Page **Gr-XC** **ET**

BDS IEC 60192:2010

Low-pressure sodium vapour lamp – Performance specifications

Specifies the performance requirements for low-pressure sodium vapour lamps for general lighting purposes. For some of the requirements given in this standard, reference is made to "the relevant lamp data sheet". For some lamps these data sheets are contained in this standard. For other lamps, falling under the scope of this standard, the relevant data are supplied by the lamp manufacturer or responsible vendor.

24 Page **Gr-XC** **ET**

BDS IEC 60196:2010

IEC standard frequencies

Frequencies to be adopted for single-phase and three-phase a.c. systems, for installations in ships, for a.c. traction systems, for tools and for aircraft.

03 Page **Gr-XA** **ET**

BDS IEC 60228:2009

Conductors of insulated cables

Specifies the nominal cross-sectional areas, in the range 0,5 mm² to 2 500 mm², for conductors in electric power cables and cords of a wide range of types. Requirements for numbers and sizes of wires and resistance values are also included. These conductors include solid and stranded copper, aluminium and aluminium alloy conductors in cables.

10 Page **Gr-XA** **ET**

BDS IEC 60229:2010

Electric cables – Tests on extruded oversheaths with a special protective function

Provides a range of tests which may be required for electric cables which have an extruded oversheath and where that oversheath performs a special protective function.

10 Page **Gr-XA** **ET**

BDS IEC 60230:2005

Impulse tests on cables and their accessories

Lay down the conditions and procedure for carrying out impulse tests on cables and their accessories, with a view to rationalizing the practice in different laboratories, and thus to facilitate valid comparisons

between the results obtained on cables made to different specifications.

05 Page **Gr-XA** **ET**

BDS IEC 60238:2010

Edison screw lampholders

Applies to lampholders with Edison thread E14, E27 and E40, designed for connection to the supply of lamps and semi-uminares only. It also applies to switched-lampholders for use in a.c. circuits only, where the working voltage does not exceed 250 V r.m.s.

73 Page **Gr-XE** **ET**

BDS IEC 60254-1:2003

Lead-acid traction batteries – Part 1: General requirements and methods of test

Applicable to lead-acid traction batteries used as power sources for electric propulsion.

13 Page **Gr-XB** **ET**

BDS IEC 60254-2:2003

Lead-acid traction batteries – Part 2: Dimensions of cells and terminals and marking of polarity on cells

Applicable to lead-acid traction batteries used as power sources for electric propulsion.

07 Page **Gr-XA** **ET**

BDS IEC 60270:2010

High-voltage test techniques – Partial discharge measurements

Applicable to the measurement of partial discharges which occur in electrical apparatus, components or systems when tested with alternating voltages up to 400 Hz or with direct voltage.

48 Page **Gr-XE** **ET**

BDS IEC 60287-1-1:2009

Electric cables – Calculation of the current rating – Part 1-1: Current rating equations and calculation of losses – General

Applicable to the conditions of steady-state operation of cables at all alternating voltages, and direct voltages up to 5 kV, buried directly in the ground, in ducts, troughs or in steel pipes, both with and without partial drying-out of the soil, as well as cables in air.

29Page **Gr-XC** **ET**

BDS IEC 60296:2010

Fluids for electrotechnical applicatons – Unused mineral insulating oils for transformers and switchgera

Covers specifications and test methods for unused mineral insulating oils. It applies to oil delivered to the agreed point and time of delivery,intended for use in transformers, switchgear and similar electrical equipment in which oil is required as an insulant and for heat transfer.

16Page **Gr-XB** **ET**

BDS IEC 60311:2005

Electric irons for household or similar use – Methods for measuring performance

Applies to electric irons for household or similar use.

36 Page **Gr-XD** **ET**

BDS IEC 60312:2010

Vacuum cleaners for household use – Methods of measuring the performance

Applicable to vacuum cleaners for household use in or under conditions similar to those in households.

76 Page **Gr-XE** **ET**

BDS IEC 60335-1:2010

Household and similar electrical appliances – Safety – Part 1: General requirements

This International Standard deals with the safety of electrical appliances for household and similar purposes, their rated voltage being not more than 250 V for single-phase appliances and 480 V for other appliances

128 Page **Gr-XE** **ET**

BDS IEC 60335-2-7:2014

Household and similar electrical appliances – Safety – Part 2-7: Particular requirements for washing machines

Deals with the safety of electric washing machines for fousehold and similar use, that are intended for washing clothes and textiles, their rated voltage being not more than 250 V for single-phase appliances and 480 V for other appliances.

70 Page **Gr-XE** **ET**

BDS IEC 60335-2-80:2010

Household and similar electrical appliances – Safety – Part 2-80:Particular requirements for fans

Deals with the safety of electric fans for household and similar purposes, their rated voltage being not more than 250 V for single-phase appliances and 480 V for other appliances.

10 Page **Gr-XA** **ET**

BDS IEC 60338:2010

Telemetry for consumption and demand

Applies to new telemetry apparatus, intended to operate in conjunction with electrical integrating meters in particular for billing and statistical purposes.

10 Page **Gr-XA** **ET**

BDS IEC 60357:2014

Tungsten halogen lamps (non-vehicle) – Performance specifications

Specifies the performance requirements for single-capped and double-capped tungsten halogen lamps, having rated voltages of up to 250 V, used for the following applications:

- Projection (including cinematograph and still projection)
- Photographic (including studio)
- Floodlighting
- Special purpose
- General purpose
- Stage lighting

185 Page **Gr-XE** **ET**

BDS IEC 60359:2010

Electrical and electronic measurements equipment – Expression of performance

Applies to the specification of performance, with primary reference to industrial applications, of the following kinds of electrical and electronic equipment:
-indicating and recording instruments which measure electrical quantities;

- material measures which supply electrical quantities;
- instruments which measure non-electrical quantities using electrical means.

37 Page **Gr-XD** **ET**

BDS IEC 60376:2014

Technical grade sulfur hexafluoride for use in electrical equipment

Defines the quality requirements and properties for technical grade sulfur hexafluoride (SF₆) for use in electrical equipment. It covers the properties and methods of test applicable to SF₆ when this substance is supplied for use in connection with any electrical equipment.

10 Page **Gr-XA** **ET**

BDS IEC 60383-1:2006

Insulators for overhead lines with a nominal voltage above 1000 V – Part 1 : Ceramic or glass insulator units for a.c systems – Definitions, test methods and acceptance criteria

Applies to insulators of ceramic material or glass for use on a.c overhead power lines and overhead traction lines with a nominal voltage greater than 1000 V and a frequency not greater than 100 Hz.

52 Page **Gr-XE** **ET**

BDS IEC 60383-2:2006

Specification for insulators for overhead lines with a nominal voltage above 1000 V – Part 2: Insulator strings and insulator sets for a.c systems – Definitions, test methods and acceptance criteria

Applies to insulator string and insulator sets comprising string insulator units of ceramic material or glass for use on a.c overhead power lines with a nominal voltage greater than 1000 V and a frequency not greater than 100 Hz.

10 Page **Gr-XA** **ET**

BDS IEC 60387:2003

Symbols for alternating-current electricity meters

Applies to letter and graphical symbols for a.c electricity meters and their auxiliary device, independent of induction or static measurement elements.

16 Page **Gr-XB** **ET**

BDS IEC 60394-1:2010

Varnished fabrics for electrical purposes – Part 1: Definitions and General Requirements

Contains the definitions related to, and the general requirements to be fulfilled by, varnished fabrics for electrical purposes.

05 Page **Gr-XA** **ET**

BDS IEC 60394-2:2010

**Varnished fabrics for electrical purposes – Part 2:
Methods of test**

Varnished fabrics comprising bases woven from cotton, natural silk, or synthetic fibres (including glass) supplied in the form of full width rolls, sheets, or tapes slit to various widths.

13 Page Gr-XB ET

BDS IEC 60404-1:2016

Magnetic materials – Part 1: Classification

Classify commercially available magnetic materials. The term "magnetic materials" denotes substances where the application requires the existence of ferromagnetic or ferrimagnetic properties. The classification of magnetic materials is based upon the generally recognized existence of two main groups of products:

65 Page Gr-XE ET

BDS IEC 60404-8-4:2016

Magnetic materials – Part 8-4: Specifications for individual materials – Cold-rolled non-oriented electrical steel strip and sheet delivered in the fully-processed state

Defines the grades of cold-rolled non-oriented electrical steel strip and sheet in nominal thicknesses of 0,35 mm, 0,50 mm, 0,65 mm and 1,00 mm. It specifies general requirements, the magnetic properties, geometric characteristics and tolerances, and technological characteristics, as well as the inspection procedure. The magnetic properties of cold-rolled non-oriented electrical steel strip and sheet of nominal thickness 0,47 mm for use at 60 Hz only. This standard applies to materials supplied in the fully annealed condition intended for the construction of magnetic circuits.

23 Page Gr-XC ET

BDS IEC 60404-8-7:2016

Magnetic materials – Part 8-7: Specifications for individual materials – Cold-rolled grain-oriented electrical steel strip and sheet delivered in the fully-processed state

Defines the grades of cold-rolled grain-oriented electrical steel strip and sheet in nominal thicknesses of 0,23 mm, 0,27 mm, 0,30 mm and 0,35 mm. It gives general requirements, magnetic properties, geometric characteristics, tolerances and technological characteristics, as well as inspection procedures.

19 Page Gr-XB ET

BDS IEC 60404-11:2016

Magnetic materials – Part 11: Method of test for the determination of surface insulation resistance of magnetic sheet and strip

Intended to define a measurement method for the determination of the characteristics of surface insulation resistance of magnetic sheet and strip. This method is applicable to magnetic sheet and strip insulated on one or both surfaces and is suitable for manufacturing control in the application of insulation coatings.

04 Page Gr-XA ET

BDS IEC 60428:2010

Standard cells

Applies to the following two types of standard cells used as electromotive force (e.m.f.) references, viz.:

- saturated standard cells;
- unsaturated standard cells.

09 Page Gr-XA ET

BDS IEC 60442:2010

Electric toasters for household and similar purposes – Methods for measuring the performance

Applies to electric toasters for household and similar use.

To state and define the main performance characteristics for toasters, which are of interest to the user, to describe the standard methods for measuring these characteristics and to give some guidelines for the evaluation of test results.

13 Page Gr-XB ET

BDS IEC 60456:2013

Clothes washing machines for household use – Methods for measuring the performance

Specifies methods for measuring the performance of clothes washing machines for household use, with or without heating devices utilising cold and/or hot water supply. It also deals with appliances for water extraction by centrifugal force (spin extractors) and is applicable to appliances for both washing and drying textiles.

12 Page Gr-XB ET

BDS IEC 60480:2009

Guidelines for the checking and treatment of sulfur hexafluoride taken from electrical equipment and specification for its re-use

Concerns the re-use of sulfur hexafluoride (SF₆) after removal from electrical equipment. Recommends procedures for reclaiming used SF₆ and for restoring its quality to an acceptable level, which would allow the filling of new or existing electrical equipment.

30 Page Gr-XC ET

BDS IEC 60502-1:2005

Power cables with extruded insulation and their accessories for rated voltages from 1 kV up to 30 kV –Part 1: Cables for rated voltages of 1 kV and 3 kV

Specifies the construction, dimensions and test requirements of power cables with extruded solid insulation of rated voltages 1 kV and 3 kV for fixed insulations such as distribution networks or industrial installations.

46 Page Gr-XE ET

BDS IEC 60502-2:2005

Power cables with extruded insulation and their accessories for rated voltages from 1kV up to 30 kV – Part-2: Cables for rated voltages from 6 kV up to 30 kV

Specifies the construction, dimensions and test requirements of power cables with extruded solid insulation from 6 kV up to 30 kV for fixed insulations such as distribution networks or industrial installations.

46 Page Gr-XE ET

BDS IEC 60502-4:2005

Power cables with extruded insulation and their accessories for rated voltages from 1 kV up to 30 kV – Part-4: Test Requirements on accessories for cables with rated voltages from 6 kV up to 30 kV

Specifies the test requirements for type testing of accessories of power cables.

25 Page Gr-XC ET

BDS IEC 60507:2015

Artificial pollution tests on high-voltage ceramic and glass insulators to be used on a.c. systems

Applicable for the determination of the power frequency withstand characteristics of ceramic and glass insulators to be used outdoors and exposed to polluted atmospheres, on a.c. systems with the highest voltage of the system greater than 1 000 V.

43 Page Gr-XE ET

BDS IEC 60531:2010

Household electric thermal storage room heaters – Methods for measuring performance

Applies to electric storage heaters having a daily operating cycle and intended to heat the room in which they are located.

33 Page Gr-XD ET

BDS IEC 60535:2008

Jet Fans and Regulators

Requirements and methods of test of jet fans commonly known as air circulator and air blast cooling fans, oscillating and non-oscillating, and their associated regulators intended for use on single-phase a.c. circuits and d.c. circuits not exceeding 250 V; air blast cooling fans may be intended for use on three-phase a.c. systems up to 440 V.

10 Page Gr-XA ET

BDS IEC 60616:2010

Terminal and tapping markings for power transformers

Guidance on markings for the terminals and tapings of power transformers a uniform alphanumeric system of terminal markings. Only simple examples are illustrated, more complicated cases, e.g. two units in one tank, being subject to agreement between the manufacturer and the purchaser.

10 Page Gr-XA ET

BDS IEC 60622:2010

Secondary cells and batteries containing alkaline or other non-acid electrolytes – Sealed nickel-cadmium prismatic rechargeable single cells

Specifies marking, tests and requirements for sealed nickel-cadmium prismatic secondary single cells.

13 Page Gr-XB ET

BDS IEC 60623:2008

Secondary cells and batteries containing alkaline or other non-acid electrolytes vented nickel-cadmium prismatic rechargeable single cells

Specifies marking, designation, dimension, tests and requirements for vented nickel-cadmium prismatic secondary single cells.

10 Page Gr-XA ET

BDS IEC 60649:2006

Calculation of maximum external diameter of cables for indoor installations

This standard method of calculation.

07 Page Gr-XA ET

BDS IEC 60661:2010

Methods for measuring the performance of electric household coffee makers

Applies to electric coffee makers for household and similar use. It does not apply to appliances designed exclusively for commercial or industrial use.

18 Page Gr-XB ET

BDS IEC 60664-1:2009

Insulation coordination for equipment within low – voltage systems – Part 1: Principles, requirements and tests

Deals with insulation coordination for equipment within low voltage systems. It applies to equipment for use up to 2000 m above sea level having a rated voltage up to a.c. 1000 V with rated frequencies up to 30 kHz or a rated voltage up to d.c. 1500 V.

65 Page Gr-XE ET

BDS IEC 60664-2-1:2009

Insulation coordination for equipment within low-voltage systems – Part 2-1: Application guide – Dimensioning procedure worksheets and dimensioning examples

Intended as a guide for technical committees pacifying dimensioning requirements for products.

04 Page Gr-XA ET

BDS IEC 60665:2007

AC electric ventilating fans and regulators for household and similar purposes

Specifies the performance and the corresponding methods of test of ventilating fans for household and similar purposes intended for air forcing and exhaust, not exceeding 0.5 m in size, having a power consumption not exceeding 500 W for use on single-phase a.c. circuits not exceeding 250 V

29 Page Gr-XC ET

BDS IEC 60669-1:2007

Switches for household and similar fixed-electrical installations – Part 1: General requirements

Applies to manually operated general purpose switches, for a.c. only with a rated voltage not exceeding 440 V and a rated current not exceeding 63 A, intended for

household and similar fixed electrical installations, either indoors or outdoors.

89 Page Gr-XE ET

BDS IEC 60675:2010

Household electric direct-acting room heaters – Methods for measuring performance

Applies to electric direct-acting room heaters. They may be portable, stationary, fixed, or built-in.

20 Page Gr-XB ET

BDS IEC 60705:2008

Household microwave ovens – Methods for measuring performance

Applies to microwave ovens for household use. It also applies to combination microwave ovens.

25 Page Gr-XC ET

BDS IEC 60726:2005

Dry-type power transformers [Withdrawn]

(Cancels and replaces by BDS IEC 60076-11)

BDS IEC 60728-4:2014

Cable networks for television signals, sound signals and interactive services – Part 4: Passive wideband equipment for coaxial cable networks

Applies to system outlets, splitters and taps, passive single or multiple port equipment comprising filters, attenuators, equalizers, galvanic isolators, power injectors, cable splices, terminating resistors and transfer points, but excluding coaxial cables and receiver leads

34 Page Gr-XD ET

BDS IEC 60728-11:2012

Cable networks for television signals, sound signals and interactive services – Part 11: Safety

Applies to fixed sited system and equipment. As far as applicable, it is also valid for mobile and temporarily installed systems, for example, caravans.

74 Page Gr-XE ET

BDS IEC 60736:2010

Testing Equipment for electrical energy meters

Applicable to three-phase and/or single-phase equipment used for type and acceptance testing of electrical energy meters.

33 Page Gr-XE ET

BDS IEC 60740-1:2016

Laminations for transformers and inductors – Part 1: Mechanical and electrical characteristics

Specifies the characteristics of laminations. Their preferred use is cores for transformers and inductors. The laminations are made of sheets and strips of magnetic materials.

59 Page Gr-XE ET

BDS IEC 60749-20-1:2013

Semiconductor Devices – Mechanical and climatic test methods – Part 20-1: Handling, packing, labelling and shipping of surface-mount devices

sensitive to the combined effect of moisture and soldering heat

Applies to all non-hermetic SMD packages which are subjected to reflow solder processes and which are exposed to the ambient air. The purpose of this document is to provide SMD manufacturers and users with standardized methods for handling, packing, shipping,

29 Page Gr-XC ET

BDS IEC 60810:2010

Lamps for road vehicles – Performance requirements

Applicable to replaceable lamps (filament lamps and discharge lamps) to be used in headlamps, fog-lamps and signalling lamps for road vehicles. The standard may also be used for other lamps falling under the scope as well as for future developments, e.g. such where the light is produced by light emitting diodes (LED).

30 Page Gr-XC ET

BDS IEC 60832:2008

Insulating poles (insulating sticks);and universal tool attachments (fittings) for live working

Applicable to insulating poles (insulating sticks) and tool attachments (fittings) and is divided into three chapters.

56 Page Gr-XE ET

BDS IEC 60836:2010

Specifications for unused silicone insulating liquids for electrotechnical purposes

Covers specifications and test methods for unused silicone liquid intended for use in transformers and other electrotechnical equipment.

10 Page Gr-XA ET

BDS IEC 60839-1-1:2010

Alarm systems Part 1: General requirements – Section One - General

Specifies the general requirements for the design, installation, commissioning, operation, maintenance test and records of manual and automatic alarm systems employed for the protection of persons, property and the environment.

12 Page Gr-XB ET

BDS IEC 60839-1-2:2010

Alarm systems Part 1: General requirements – Section Two – Power units, test methods and performance criteria

Specifies the requirements, test methods and performance criteria for power supply units for alarm systems. The specific requirements for particular system components are specified in separate standards, which shall be used in conjunction with this standard.

10 Page Gr-XA ET

BDS IEC 60885-1:2005

Electrical test methods for electric cables – Part 1: Electrical tests for cables, cords and wires for voltages upto and including 450/750 V

Described as a guide to be followed for testing wires, cords and cables in case the relevant cable standard does not prescribe different electrical test method.

05 Page Gr-XA ET

BDS IEC 60885-2:2005

Electrical test methods for electric cables Part 2 : Partial discharge tests

The purpose of the test is to determine the partial discharge magnitude at a specified voltage and with a given sensitivity.

04 Page Gr-XA ET

BDS IEC 60885-3:2010

Electrical test methods for electric cables – Part 3: Test methods for partial discharge measurements on lengths of extruded power cable

Specifies the essential requirements for partial discharge measurements on lengths of extruded power cable. Gives the techniques and considerations applicable to partial discharge measurements in general.

33 Page Gr-XD ET

BDS IEC 60887:2005

Glass bulb designation system for lamps

Provides designations of the glass bulbs used as envelopes for electric lamps. The application of such designations is directed towards the descriptions of finished lamps.

10 Page Gr-XA ET

BDS IEC 60888:2010

Zinc-coated steel wires for stranded conductors

Applies to zinc-coated steel wires used in the construction and/or reinforcement of conductors for overhead power transmission purposes. It is intended to cover all wires used in constructions where the individual wire diameters, including coating, are in the range of 1.25 mm to 5.50 mm.

10 Page Gr-XA ET

BDS IEC 60889:2005

Hard-drawn aluminium wire for overhead line conductors

Applicable to hard-drawn aluminium wires for the manufacture of stranded conductors for overhead power transmission purposes. It specifies the mechanical and electrical properties of wires in the diameter range 1.25 mm to 5.00 mm.

05 Page Gr-XA ET

BDS IEC 60891:2010

Procedures for temperature and irradiance corrections to measured I-V characteristics of crystalline Silicon Photovoltaic devices

Describes the procedure for temperature and irradiance corrections to the measured I-V characteristics of crystalline silicon photovoltaic devices. It includes procedures for the determination of temperature

coefficients; internal series resistance and curve correction factor.

08 Page Gr-XA ET

BDS IEC 60896-11:2016

Stationary lead-acid batteries – Part 11: Vented types – General requirements and methods of tests

Applicable to lead-acid cells and batteries which are designed for service in fixed locations and which are permanently connected to the load and to the d.c. power supply. Batteries operating in such applications are called “stationary batteries”.

39 page Gr-XD ET

BDS IEC 60896-21:2015

Stationary lead-acid batteries – Valve regulated types – Part 21: Methods of test

Applies to all stationary lead-acid cells and monobloc batteries of the valve regulated type for float charge applications, in a static location and incorporated into stationary equipment.

43 Page Gr-XE ET

BDS IEC 60896-22:2015

Stationary lead-acid batteries – Valve regulated types – Part 22: Requirements

Applies to all stationary lead-acid cells and monobloc batteries of the valve regulated type for float charge applications, in a static location and incorporated into stationary equipment or installed in battery rooms for use in telecom, UPS, utility switching, emergency power.

32 Page Gr-XD ET

BDS IEC 60898-1:2016

Electrical accessories – Circuit-breakers for overcurrent protection for household and similar installations – Part 1: Circuit-breakers for a.c

Applies to a.c. air-break circuit-breakers for operation at 50 Hz, 60 Hz or 50/60 Hz, having a rated voltage not exceeding 440 V (between phases), a rated current not exceeding 125 A and a rated short-circuit capacity not exceeding 25 000 A.

147 page Gr-XE ET

BDS IEC 60901:2006

Single-capped fluorescent lamps – Performance specification.

Specifies the performance requirements for single-capped fluorescent lamps for general lighting service.

90 page Gr-XE ET

BDS IEC 60904-1:2013

Photovoltaic devices – Part 1: Measurement of photovoltaic current-voltage characteristics

Describes procedures for the measurement of current-voltage characteristics of photovoltaic devices in natural or simulated sunlight. These procedures are applicable to a single photovoltaic solar cell, a sub-assembly of photovoltaic solar cells, or a PV module.

23 Page Gr-XC ET

BDS IEC 60904-2:2013

Photovoltaic devices – Part 2: Requirements for reference solar devices

Gives requirements for the classification, selection, packaging, marking, calibration and care of reference solar devices. This standard covers solar reference devices used to determine the electrical performance of solar cells, modules and arrays under natural and simulated sunlight.

28 Page **Gr-XC** **ET**

BDS IEC 60904-3:2013

Photovoltaic devices – Part 3: Measurement principles for terrestrial photovoltaic (PV) solar devices with reference spectral irradiance data

Applies to the following photovoltaic devices for terrestrial applications:

- solar cells with or without a protective cover;
- sub-assemblies of solar cells;
- modules;
- systems

33 Page **Gr-XD** **ET**

BDS IEC 60904-9:2013

Photovoltaic devices – Part 9: Solar Simulator performance requirements

Photovoltaic devices require the use of specific classes of solar simulators deemed appropriate for specific tests. Solar simulators can be either used for performance measurements of PV devices or endurance irradiation tests. Provides the definitions of and means for determining simulator classifications.

18 Page **Gr-XB** **ET**

BDS IEC 60904-10:2014

Photovoltaic devices – Part 10: Methods of linearity measurement

Describes procedures used to determine the degree of linearity of any photovoltaic device parameter with respect to a test parameter.

15 Page **Gr-XB** **ET**

BDS IEC 60921:2005

Ballasts for tubular fluorescent lamps – Performance requirements

Specifies performance requirements for ballasts excluding resistance types for use on a.c. supplies up to 1000 V at 50 Hz or 60 Hz, associated with tubular fluorescent lamps with pre-heated cathodes operated with or without a starter or starting device

33 Page **Gr-XD** **ET**

BDS IEC 60923:2007

Auxiliaries for lamps – Ballasts for discharge lamps (excluding tubular fluorescent lamps) – Performance requirements

Specifies performance requirements for ballasts for discharge lamps such as high-pressure mercury vapour, low-pressure sodium vapour, high-pressure sodium vapour and metal halide lamps. Specific requirements for a particular type of ballast in details. This standard covers inductive type ballasts for use on a.c. supplies up to 1 000 V at 50 Hz to 60 Hz associated with discharge

lamps, having rated wattage, dimensions and characteristics.

24 Page **Gr-XC** **ET**

BDS IEC 60929:2005

A.C. supplied electronic ballasts for tubular fluorescent lamps – Performance requirements

Specifies performance requirements for electronic ballasts for use on a.c. supplies up to 1000 V at 50 Hz or 60 Hz with operating frequencies deviating from the supply frequency, associated with tubular fluorescent lamps.

45 Page **Gr-XE** **ET**

BDS IEC 60947-1:2015

Low-voltage switchgear and controlgear – Part 1: General rules

Applies, to low-voltage switchgear and controlgear hereinafter referred to as 'equipment' or 'device' and intended to be connected to circuits, the rated voltage of which does not exceed 1 000 V a.c. or 1 500 V d.c.

255 Page **Gr-XE** **ET**

BDS IEC 60947-2:2015

Low-voltage switchgear and controlgear – Part 2: Circuit-breakers

Applies to circuit-breakers, the main contacts of which are intended to be connected to circuits, the rated voltage of which does not exceed 1 000 V a.c. or 1 500 V d.c.; it also contains additional requirements for integrally fused circuit-breakers.

230 Page **Gr-XE** **ET**

BDS IEC 60972:2005

Classification and interpretation of new lighting products

Lighting devices and systems are becoming more complicated owing to the integration of the light source with various parts of the circuit. This can lead to confusion about the interpretation of testing methods. Many of these special lighting products employ discharge lamps requiring ballasting for proper operation.

09 Page **Gr-XA** **ET**

BDS IEC 60983:2005

Miniature lamps

Specifies requirements for miniature halogen and not-halogen lamps with a nominal voltage up to 30 V and a nominal wattage up to 25 W.

38 Page **Gr-XC** **ET**

BDS IEC 61039:2010

General Classification of insulating liquids.

Establishes the detailed classification of the N family (insulating liquids) that belongs to class L (lubricants, industrial oils and related products) affecting product categories that include products derived from petroleum processing, synthetic chemical products and synthetic and natural esters.

10 Page Gr-XA ET

BDS IEC 61079-1:2008

Methods of measurement on receivers for satellite broadcast transmission in the 12 GHz band - Part 1: Radio-frequency measurements on outdoor units

Applies to the outdoor unit of a receiver for the direct reception of satellite broadcast transmissions in the 12 GHz band. The channels are those defined by WARC BS-77 and RARC SAT-83

37 Page Gr-XD ET

BDS IEC 61079-2:2008

Methods of measurement on receivers for satellite broadcast transmission in the 12 GHz band: Part 2: Electrical measurements on DBS outdoor units

Applies to the tuner unit of a receiver for the direct reception of satellite broadcast transmissions in the 12 GHz band.

46 Page Gr-XE ET

BDS IEC 61195:2010

Double-capped fluorescent lamps – Safety specifications

Specifies the safety requirements for double-capped fluorescent lamps for general lighting purposes of all groups.

22 Page Gr-XC ET

BDS IEC 61196-1:2016

Coaxial communication cables – Part 1: General Specification – General, definitions and requirements

Specifies the general requirements, the definitions and the requirements for the design and test methods of coaxial communication cables.

29 page Gr-XC ET

BDS IEC 61196-1-100:2016

Coaxial communication cables – Part 1-100: Electrical test methods – General requirements

Gives the general requirements and conditions for electrical tests to be performed on coaxial communication cables, which specifies electrical test methods for coaxial communication cables.

08 page Gr-XA ET

BDS IEC 61199:2005

Single-capped fluorescent lamps – Safety specifications

Specifies the safety requirements for single-capped fluorescent lamps for general lighting purposes of all groups.

24 Page Gr-XC ET

BDS IEC 61215:2016

Crystalline silicon terrestrial photovoltaic (PV) modules Design qualification and type approval

Lays down IEC requirements for the design qualification and type approval of terrestrial photovoltaic modules suitable for long-term operation. It applies only to crystalline silicon modules types.

47 page Gr-XE ET

BDS IEC 61232:2010

Aluminium-clad steel wires for electrical purposes

Applies to bare, hard-drawn, round, aluminium-clad steel wires of different electrical and mechanical properties for electrical purposes, before stranding.

17 Page Gr-XB ET

BDS IEC 61284:2009

Overhead lines – Requirements and tests for fittings

This International Standard applies to fittings for Overhead lines of nominal voltage above 45 kV. It may also be applied to fittings for overhead lines of lower nominal voltage and to similar fittings for substations

63 Page Gr-XE ET

BDS IEC 61316:2010

Industrial cable reels

Applies to cable reels provided with a non-detachable flexible cable with a rated operating voltage not exceeding 690 V a.c/d.c. and 500 Hz with a rated current not exceeding 63 A, primarily intended for industrial use, either indoors or outdoors.

28 Page Gr-XC ET

BDS IEC 61347-1:2005

Lamp controlgear – Part 1: General and safety requirements

Specifies general and safety requirements for lamp controlgear for use on d.c supplies upto 250 V and/or a.c supplies upto 1000 V at 50 Hz or 60 Hz.

60 Page Gr-XE ET

BDS IEC 61347-2-3:2005

Lamp controlgear– Part 2-3: Particular requirements for a.c supplied electronic ballasts for fluorescent lamps

Specifies particular safety requirements for electronic ballasts for use on a.c supplies upto 1000 V at 50 Hz or 60 Hz with operating frequencies deviating from the supply frequency, associated with fluorescent lamps.

28 Page Gr-XC ET

BDS IEC 61347-2-8:2005

Lamp controlgear – Part 2-8: Particular requirements for ballasts for fluorescent lamps

Specifies safety requirements for ballasts, excluding resistance types, for use on a.c supplies up to 1000 V at 50 Hz or 60 Hz, associated with fluorescent lamps with or without pre-heated cathodes operated with or without starter or starting device.

18 Page Gr-XB ET

BDS IEC 61347-2-9:2013

Lamp controlgear – Part 2-8: Particular requirements for ballasts for fluorescent lamps

Specifies safety requirements for ballasts for discharge lamps such as high-pressure mercury vapour, low-pressure sodium vapour, high-pressure sodium vapour and metal halide lamps. Covers inductive-type ballasts for use on a.c supplies up to 1000 V at 50 Hz or 60 Hz, associated with discharge lamps, having rated wattages, dimensions and characteristics.

23 Page Gr-XC ET

BDS IEC 61427-1:2016

Secondary cells and batteries for renewable energy storage – General requirements and methods of test
Part 1: Photovoltaic off-grid application

Gives general information relating to the requirements for the secondary batteries used in photovoltaic energy systems (PVES) and to the typical methods of test used for the verification of battery performances. Deals with cells and batteries used in photovoltaic off-grid applications.

18 page Gr-XB ET

BDS IEC 61430:2010

Secondary cells and batteries – Test methods for checking the performance of devices designed for reducing explosion hazards – Lead-acid starter batteries

Gives guidance on procedures for testing the effectiveness of devices which are used to reduce the hazards of an explosion, together with the protective measures to be taken.

BDS IEC TS 61836:2013

Solar photovoltaic energy systems – Terms, definitions and symbols

Deals with the terms and symbols form national and international solar photovoltaic standards and relevant documents used within the field of solar photovoltaic (PV) energy systems.

77 Page Gr-XE ET

BDS IEC 61951-1:2015

Secondary cells and batteries containing alkaline or other non-acid electrolytes – Portable sealed rechargeable single cells – Part 1 Nickel-cadmium

Specifies marking, designation, dimensions, tests and requirements for portable sealed nickel-cadmium small prismatic, cylindrical and button rechargeable single cells, suitable for use in any orientation.

37 Page Gr-XD ET

BDS IEC 62019:2003

Electrical accessories – Circuit-breakers and similar equipment for household use – Auxiliary contract units

Applies to auxiliary contact units associated (or intended to be associated) with circuitbreakers for overcurrent protection, and with residual current operated circuit-breakers with or without integral overcurrent protection for household and similar installations.

32 Page Gr-XD ET

BDS IEC 62040-1-1:2009

Uninterruptible Power System (UPS) – Part 1-1: General and safety requirements for UPS used in operator access areas

Applies to electronic uninterruptible power systems (UPS) with an electrical energy storage device in the d.c. link.

33 Page Gr-XD ET

BDS IEC 62040-2:2009

Uninterruptible Power Systems (UPS) – Part 2: Electromagnetic compatibility (EMC) requirements

Applies to UPS units intended to be installed:

– as a unit or in UPS systems comprising a number of interconnected UPS and associated control/switchgear forming a single power system; and

– in any operator accessible area or in separated electrical locations, connected to lowvoltage supply networks for either industrial or residential, commercial and light industrial environments.

29 Page Gr-XC ET

BDS IEC 62040-3:2009

Uninterruptible Power Systems (UPS) – Part 3: Method of specifying the performance and test requirements

This standard applies to electronic indirect a.c. converter systems with electrical energy storage means in the d.c. link. The primary function of the uninterruptible power system (UPS) is to ensure continuity of an alternating power source. The uninterruptible power system may also serve to improve the quality of the power source by keeping it within specified characteristics.

89 Page Gr-XE ET

BDS IEC 62051:2003

Electricity metering – Glossary of terms

Provides definitions of specific terms which may be used for drafting standards for electrical energy measurement, and load control and customer/utility information exchange systems.

53 Page Gr-XE ET

BDS IEC 62052-11:2013

Electricity metering equipment (ac) – General requirements, tests and test conditions – Part 11: metering equipment

Covers type tests for electricity metering equipment for indoor and outdoor application and applies to newly manufactured designed to measure the electrical energy on 50 Hz or 60 Hz networks with a voltage up to 600 V.

40 Page Gr-XD ET

BDS IEC 62053-11:2013

Electricity metering equipment (ac) – Particular requirements – Part 11: Electromechanical meters for active energy (classes 0.5 and 2)

Applies only to newly manufacture electromechanical watt-hour meters of accuracy classes 0.5 and 2 for the measurement of alternating current electrical active energy in 50 Hz or 60 Hz networks and it applies to their type tests only.

10 Page Gr-XA ET

BDS IEC 62053-21:2013

Electricity metering equipment (a.c.) – Particular requirements – Part 21: Static meters for active energy (classes 1 and 2)

Applies only to newly manufactured static watt-hour meters of accuracy classes 1 and 2, for the measurement of alternating current electrical active energy in 50 Hz or 60 Hz networks and it applies to their type tests.

82 Page Gr-XE ET

BDS IEC 62053-31:2010

Electricity metering equipment ac) – Particular Requirements – Part 31: Pulse output devices for electromechanical and electronic meters (two wires only)

Applicable to passive, two-wire, externally powered pulse output devices to be used in electricity meters as defined by the relevant standards of technical committee 13 as well as future standards for static VA-hour meters.

38 Page Gr-XD ET

BDS IEC 62058-11:2014

Electricity metering equipment (ac) – acceptance inspection – Part 11: General acceptance inspection methods

The general acceptance inspection methods apply to newly manufactured electricity meters produced and supplied in lots of 50 and above.

166 Page Gr-XE ET

BDS IEC 62060:2010

Secondary cells and batteries – Monitoring of lead acid stationary batteries

Applicable to lead-acid vented and valve regulated batteries, for use in stationary battery applications. The object of this technical report is:

- to assist users in the selection of methods to obtain sufficient information to indicate the state of health of an operating stationary lead-acid battery;
- to achieve this by describing characteristics that can be electrically measured and remotely interrogated on a regular basis;
- to indicate the sensitivity and reliability of the measured data and to provide the user with methods of interpretation;
- to provide users with good operating characteristics and general guidelines.

36 Page Gr-XD ET

BDS IEC 62081:2010

Arc welding equipment – Installation and use

Applicable to the installation and professional use of welding power sources, equipment and accessories for arc welding and allied processes.

20 Page Gr-XB ET

BDS IEC 62109-1:2016

Safety of power converters for use in photovoltaic power systems – Part 1: General requirements

Applies to the power conversion equipment (PCE) for use in Photovoltaic (PV) systems where a uniform technical level with respect to safety is necessary. This standard defines the minimum requirements for the design and manufacture of PCE for protection against electric shock, energy, fire, mechanical and other hazards.

150 page Gr-XE ET

BDS IEC 62109-2:2016

Safety of power converters for use in photovoltaic power systems – Part 2: Particular requirements for inverters

Covers the particular safety requirements relevant to d.c. to a.c. inverter products as well as products that have or perform inverter functions in addition to other functions, where the inverter is intended for use in photovoltaic power systems.

30 page Gr-XC ET

BDS IEC 62114:2007

Electrical Insulation Systems (EIS) – Thermal classification

Establishes the thermal classification of an electrical insulation system (EIS). It also identifies recognized procedures for the thermal evaluation of EIS.

20 Page Gr-XB ET

BDS IEC 62223:2015

Insulators – Glossary of terms and definitions

Specifies terms defined in standards insulators.

22 Page Gr-XC ET

BDS IEC 62271-1:2016

High-voltage switchgear and controlgear – Part 1: Common specifications

Applies to a.c. switchgear and controlgear designed for indoor and outdoor installation and for operation at service frequencies up to and including 60 Hz on systems having voltages above 1000 V.

122 Page Gr-XE ET

BDS IEC 62271-100:2015

High-voltage switchgear and controlgear – Part 100: Alternating-current circuit-breakers

Applicable to a.c. circuit-breakers designed for indoor or outdoor installation and for operation at frequencies of 50 Hz and 60 Hz on systems having voltages above 1 000 V.

338 Page Gr-XE ET

BDS IEC 62271-200:2016

High-voltage switchgear and controlgear – Part 200: AC metal-enclosed switchgear and controlgear for rated voltages above 1 kV and up to and including 52 kV

Specifies requirements for prefabricated metal-enclosed switchgear and controlgear for alternating current of rated voltages above 1 kV and up to and including 52 kV for indoor and outdoor installation, and for service frequencies up to and including 60 Hz. Enclosures may include fixed and removable components and may be filled with fluid (liquid or gas) to provide insulation.

87 Page Gr-XE ET

BDS IEC 62275:2009

Cable management systems – Cable ties for electrical installations

Specifies requirements for metallic, non-metallic and composite cable ties and their associated fixing devices used for the management and support of wiring systems in electrical installations.

17 Page Gr-XB ET

BDS IEC 62701:2015

Fluids for electrotechnical applications – Recycled mineral insulating oils for transformers and switchgear

Specifies requirements for recycled mineral insulating oils intended for use in transformers, switchgear, and similar electrical equipment in which oil is required for insulation and heat transfer.

16 Page Gr-XB ET

BDS IEC TS 62504:2014

General lighting – LEDs and LED modules – Terms and definitions

Presents terms and definitions relevant for lighting with LED light sources. It provides both descriptive terms (such as “built-in LED module”) and measurable terms

17 Page Gr-XB ET

BDS IEC 62509:2016

Battery charge controllers for photovoltaic system – Performance and functioning

Establishes minimum requirements for the functioning and performance of battery charge controllers (BCC) used with lead acid batteries in terrestrial photovoltaic (PV) systems. The main aims are to ensure BCC reliability and to maximise the life of the battery.

27 Page Gr-XC ET

BDS IEC 62560:2015

Self-ballasted LED- lamps for general lighting services by voltage > 50 V – Safety specifications

Specifies the safety and interchangeability requirements, together with the test methods and conditions required to show compliance of LED-lamps with integrated means for stable operation (self-ballasted LED-lamps), intended for domestic and similar general lighting purposes.

29 Page Gr-XC ET

BDS IEC 62612:2015

Self-ballasted LED lamps for general lighting services with supply voltages > 50 V – Performance requirements

Specifies the performance requirements, together with the test methods and conditions, required to show compliance of LED lamps with integral means for stable operation, intended for domestic and similar general lighting purposes,

47 Page Gr-XE ET

BDS IEC 62701:2015

Fluids for electrotechnical applications – Recycled mineral insulating oils for transformers and switchgear

Specifies requirements for recycled mineral insulating oils intended for use in transformers, switchgear, and similar electrical equipment in which oil is required for insulation and heat transfer.

18 Page Gr-XB ET

CHEMICAL DIVISION:

BDS ISO 35:2008

Natural rubber latex concentrate- Determination of mechanical stability

This International Standard specifies a method for the determination of the mechanical stability of natural rubber latex concentrate. It is also applicable to prevulcanized natural rubber latex concentrate.

04 Page Gr-XA CH

BDS ISO 123:2008

Rubber latex- Sampling

This International Standard specifies procedures for sampling natural rubber latex concentrate and for sampling synthetic rubber latices and artificial latices. It is also suitable for sampling rubber latex contained in drums, tank cars or tanks. The procedures may also be used for sampling plastics dispersions.

08 Page Gr-XA CH

BDS ISO 126:2008

Natural rubber latex concentrate - Determination of dry rubber content

This International Standard specifies a method for the determination of the dry rubber content of natural rubber latex concentrate.

04 Page Gr-XA CH

BDS ISO 127:2008

Rubber, natural latex concentrate - Determination of KOH number

This International Standard specifies a method for the determination of the KOH number of natural rubber latex concentrate which is preserved wholly or in part with ammonia. The method is applicable to latices containing boric acid. The method is not applicable to latices preserved with potassium hydroxide.

06 Page Gr-XA CH

BDS ISO 186:2012

Paper and board- Sampling to determine average quality

This international Standard specifies a method of obtaining a representative sample from a lot of paper or board, including solid and corrugated fibreboard (see ISO 4046), for testing to determine whether or not its average quality complies with set specifications.

10 Page Gr-XA CH

BDS ISO TR 210:2005

Essential Oils - General rules for packing, conditioning and storage

This Technical Report describes the specifications to be met by the containers intended for containing essential oils, as well as recommendations relating to their conditioning and storage.

09 Page Gr-XA CH

BDS ISO TR 211:2005

Essential Oils - General rules for labelling and marking of containers

This Technical Report specifies the general rules for labelling and marking of containers for essential oils to enable identification of the contents.

03 Page Gr-XA CH

BDS ISO 212:2003

Specification for Essential Oils- Sampling

This international standards specifies procedure for sampling consignments of essential oils for the purpose of determining their organoleptic, physical and chemical characteristics.

03 Page Gr-XA CH

BDS ISO 216:2012

Writing paper and certain classes of printed matter- Trimmed sizes- A and B series, and indication of machine direction

This international Standard specifies the trimmed sizes of writing paper and certain classes of printed matter.

10 Page Gr-XA CH

BDS ISO 248:2008

Rubber, raw - Determination of volatile matter content

This International Standard specifies two methods, a hot-mill method and an oven method, for the determination of moisture and other volatile-matter content in raw rubbers. These methods are applicable to the determination of the volatile-matter content in the R-group of rubbers listed in ISO 1629 which are rubbers having an unsaturated carbon chain, for example, natural rubber and synthetic rubbers derived at least partly from diolefins.

09 Page Gr-XA CH

BDS ISO 249:2008

Rubber, raw natural- Determination of dirt content

This International Standard specifies a method for the determination of the dirt content of raw natural rubber. It is not applicable to dirt present as surface contamination.

06 Page Gr-XA CH

BDS ISO 279:2011

Essential oils- Determination of relative density at 20°C Reference method

This International Standard specifies the reference method for the determination of the relative density of essential oils at 20°C.

04 Page Gr-XA CH

BDS ISO 280:2011

Essential oils- Determination of refractive index

This International Standard specifies a method for the determination of the refractive index of essential oils.

04 Page Gr-XA CH

BDS ISO 287: 2016

Paper and board- Determination of moisture content of a lot- Oven- drying method

This International Standard specifies an oven-drying method for the determination of the moisture content of a lot of paper and board. The procedure in Clause 8,

describing how the test pieces are drawn from the lot, is performed at the time of sampling.

09 Page Gr-XA CH

BDS ISO 356:2011

Essential oils -Preparation of test samples

This International Standard gives general guidance for the preparation of samples of essential oils submitted to a laboratory for analysis. It is applicable, in particular, to those essential oils that cannot be analysed directly; that is those which are solid or partially solid at room temperature or those which are cloudy due to the presence of water or suspended particles.

04 Page Gr-XA CH

BDS ISO 456:2008

Surface active agents- Analysis of soaps- Determination of free caustic alkali

This International Standard specifies two methods of determining free caustic alkali in commercial soaps, excluding compounded products:

-Method A, ethanol method;

- Method B, barium chloride method.

03 Page Gr-XA CH

BDS ISO 457:2008

Soaps -Determination of chloride content - Titrimetric method

This International Standard specifies a method for determining the chloride content of commercial soaps, excluding compounded products; this method is applicable to soaps having chloride content, expressed as sodium chloride, equal to or greater than 0,1 % (m/m).

02 Page Gr-XA CH

BDS ISO 473:2006

Lithopone Pigments for Paints Specifications and Methods of Test

This international standard specifies the requirements and the corresponding test methods for to types of lithopone pigments, suitable for used in paints and related products.

04 Page Gr-XA CH

BDS ISO 498:2008

Natural rubber latex concentrate- Preparation of dry films

This International Standard specifies a method for preparing dry, homogeneous films, substantially free of air bubbles, from natural rubber latex concentrate.

02 Page Gr-XA CH

BDS ISO 506:2008

Rubber latex, natural, concentrate- Determination of volatile fatty acid number

This International Standard specifies a method for the determination of the volatile fatty acid number of natural rubber latex concentrate.

04 Page Gr-XA CH

BDS ISO 534:2012

Paper and board -Determination of thickness, density and specific volume
This international Standard specifies two methods for measuring the thickness of paper and board.
10 Page Gr-XA CH

BDS ISO 535:2012
Paper and board- Determination of water absorptiveness- Cobb method
This international Standard specifies a method of determining the water absorptiveness of sized paper and board, including corrugated fibreboard, under standard conditions. It may not be suitable for paper of grammage less than 50 g/m² or embossed paper. It is not suitable for porous papers such as newsprint or unsized papers such as blotting paper or other papers having a relatively high water absorptiveness for which ISO 8787 is more suitable.
10 Page Gr-XA CH

BDS ISO 536: 2016
Paper and board- Determination of grammage
This International Standard specifies a method for determining the grammage of paper and board.
06 Page Gr-XA CH

BDS ISO 592:2011
Essential oils- Determination of optical rotation
This International Standard specifies a method for determining the optical rotation of essential oils. When dealing with solid oils, partially solid oils, oils that are highly viscous at room temperature, or highly coloured oils, this determination is carried out on a solution of the oil.
10 Page Gr-XA CH

BDS ISO 614:2012
Shipbuilding and marine structures-Toughened safety glass panes for rectangular windows and side scuttles- Punch method of non-destructive strength testing
This international Standard specifies a method for the non-destructive strength testing of toughened safety glass panes for rectangular windows, complying with ISO 3254, and side scuttles, complying with ISO 1095.
14 Page Gr-XB CH

BDS ISO 672:2015
Soaps- Determination of moisture and volatile matter content- oven method
This International Standard specifies an oven method for the determination of the moisture and volatile matter content of commercial soaps, excluding compounded products.
05 Page Gr-XA CH

BDS ISO 673:2007
Soaps- Determination of analysis of ethanol-insoluble matter
This International Standard specifies a method for the determination of the content of ethanol-insoluble matter in commercial soaps, excluding compounded products.
02 Page Gr-XA CH

BDS ISO 684:2015
Analysis of soaps - Determination of total alkali
This International Standard specifies a method for the determination of the total free alkali content of commercial soaps, excluding compounded products.
05 Page Gr-XA CH

BDS ISO 685:2015
Analysis of soaps-Determination of total alkali content and total fatty matter content
This International Standard specifies a method for the simultaneous determination of the total alkalil) content and the total fatty matter content of soaps, excluding compounded products.

Rubber latex- Determination of density between 5 °C and 40°C
This International Standard specifies a method for the determination of the density of natural rubber latex concentrate between the temperatures of 5 °C and 40 °C.
03 Page Gr-XA CH

BDS ISO 709:2011
Essential oils- Determination of ester value
This International Standard specifies a method for the determination of the ester value of an essential oil. This method is not applicable to essential oils containing lactones or an appreciable proportion of aldehydes.
04 Page Gr-XA CH

BDS ISO 719: 2016
Glass – Hydrolytic resistance of glass grains at 98 °C – Method of test and classification
This International Standard specifies
a) a method for determining the hydrolytic resistance of glass grains at 98 °C. The resistance is measured and expressed by the volume of acid required for titration of the alkali extracted from the unit mass of glass, and may also be expressed by the amount of sodium Oxide equivalent to this volume of acid;
b) a classification of glass according to the hydrolytic resistance determined by the method of this International Standard.
06 page Gr-XA CH

BDS ISO 720: 2016**Glass – Hydrolytic resistance of glass grains at 121 °C– Method of test and classification**

This International Standard specifies

- a) a method for determining the hydrolytic resistance of glass grains at 121 °C. The resistance is measured and expressed by the volume of acid required for titration of the alkali extracted from the unit mass of glass, and may also be expressed by the amount of sodium oxide equivalent to this volume of acid;
- b) a classification of glass according to the hydrolytic resistance determined by the method of this International Standard.

BDS ISO 788:2011**Ultramarine pigments for paints**

This International Standard specifies the requirements and corresponding test methods for artificial ultramarine pigments, suitable for use in paints

04 Page Gr-XA CH

BDS EN 878:2006**Chemicals used for treatment of water intended for human consumption (Aluminium sulphate)**

This European standard is applicable to aluminium sulphate used for treatment of water intended for human consumption. It describes the characteristics of aluminium sulphate and specifies the requirements for aluminium sulphate and gives reference to the analytical methods. It gives information on its use in water treatment. It also determines the rules relating to safe handling and use of aluminium sulphate

17 Page Gr-XB CH

BDS ISO 1041:2015**Essential oils – Determination of freezing point**

This International Standard specifies a method of determining the freezing points of essential oils. It is not applicable in the special case of essential oil of rose.

05 Page Gr-XA CH

BDS ISO 1066:2015**Analysis of soaps - Determination of glycerol content - Titrimetric method**

This International Standard specifies a titrimetric method for the determination of the glycerol content of commercial soaps, excluding compounded products.

09 Page Gr-XA CH

BDS ISO 1067:2008**Analysis of soaps- Determination of unsaponifiable, unsaponified and unsaponified saponifiable matter**

This International Standard specifies a method for the determination of the contents of unsaponifiable, unsaponified and unsaponified. saponifiable matter in commercial soaps, excluding compound products.

02 Page Gr-XA CH

BDS ISO 1095:2012**Shipbuilding and marine structures-Toughened safety glass panes for side scuttles**

This international Standard specifies materials and finish, dimensions for interchangeability, tolerances and flatness, testing, marking and designation of toughened safety glass panes for side scuttles complying with ISO 1751.

10 Page Gr-XA CH

BDS ISO 1242:2011**Essential oils – Determination of acid value**

This International Standard specifies a method of determining the acid value of essential oils. This method is not applicable to essential oils containing appreciable quantities of lactones.

05 Page Gr-XA CH

BDS ISO 1248:2003**Specification for Iron Oxide Pigments for Paints**

This international standard specifies the requirements and corresponding test methods for all manufactured and natural iron oxide pigments, including micaceous iron

oxide pigments and rapid dispersion pigments, in dry form suitable for use in paints.

06 Page Gr-XA CH

BDS ISO 1249:2005

Zinc chromate pigments-Basic zinc potassium chromate pigments and zinc tetrahydroxychromate pigments

This International Standard specifies the requirements and corresponding test methods for zinc chromate pigments suitable for use in and / or corrosion-inhabiting coatings.

07 Page Gr-XA CH

BDS ISO 1271:2015

Essential oils- Determination of carbonyl value- Free hydroxylamine method

This International Standard specifies a method for the determination of the carbonyl value of essential oils. It is applicable to essential oils which contain carbonyl compounds (especially ketones, excluding methylketones) which are difficult to convert to oximes by the method specified in ISO 1279.

07 Page Gr-XA CH

BDS ISO 1272:2011

Essential oils- Determination of content of phenols

This International Standard specifies a method for the determination of the percentage, by volume, of phenols in essential oils.

05 Page Gr-XA CH

BDS ISO 1279:2015

Essential oils – Determination of carbonyl value- Potentiometric methods using hydroxylammonium chloride

This International Standard specifies two methods for the potentiometric determination of the carbonyl value of essential oils which contain carbonyl compounds, either aldehydes or ketones. Method I, is based on a cold oximation reaction with hydroxylammonium chloride.

13 Page Gr-XB CH

BDS ISO 1342:2009

Oil of rosemary (*Rosmarinus officinalis* L.)

This International Standard specifies certain characteristics of oil of rosemary (*Rosmarinus officinalis* L.), in order to facilitate assessment of its quality.

12 Page Gr-XB CH

BDS ISO 1432:2008

Rubber, vulcanized or thermoplastic – Determination of low temperature stiffening (Gehman test)

This International Standard specifies a static procedure, known as the Gehman test, for determining the relative stiffness characteristics of vulcanized or thermoplastic rubbers over a temperature range from room temperature to approximately -150 °C.

10 Page Gr-XA CH

BDS ISO 1517:2008

Paints and varnishes – Surface-drying test- Ballotini method

This International Standard specifies a method for determining the surface-drying characteristics of a coating of a paint or varnish which dries by the action of air or by chemical reaction of its components. The method is not intended to apply to stoving products.

02 Page Gr-XA CH

BDS ISO 1518:2008

Paints and varnishes – Scratch test

This International Standard is one of a series of Standards dealing with the sampling and testing of paints, varnishes and related products. It specifies a test method for determining under defined conditions the resistance of a single coating or a multi-coat system of paint, varnish or related product to penetration by scratching with a hemispherically tipped needle.

08 Page Gr-XA CH

BDS ISO 1519:2007

Paints and varnishes - Bend test (cylindrical mandrel

This International Standard specifies an empirical test procedure for assessing the resistance of a coating of paint, varnish or related product to cracking and/or detachment from a metal or plastic substrate when subjected to bending round a cylindrical mandrel under standard conditions.

08 Page Gr-XA CH

BDS ISO 1520:2008

Paints and varnishes- cupping test

This International Standard specifies an empirical method for assessing the resistance of a coating of paint, varnish or related product to cracking and/or detachment from a metal substrate when subjected to gradual deformation by indentation under standard conditions.

06 Page Gr-XA CH

BDS ISO 1522:2008

Paints and varnishes- Pendulum damping test

This International Standard specifies two methods of carrying out a pendulum damping test on a coating of paint, varnish or other, related, product. It is applicable to single coatings and to multicoat systems.

06 Page Gr-XA CH

BDS ISO 1523:2008

Determination of flash point- Closed cup equilibrium method

This International Standard specifies a method to determine the flash point of paints, varnishes, paint binders, solvents, petroleum or related products.

10 Page Gr-XA CH

BDS ISO 1524:2008

Paints, varnishes and printing inks- Determination of fineness of grind

This International Standard is one of a series of standards dealing with the sampling and testing of paints, varnishes, printing inks and related products. It specifies a method for determining the fineness of grind

of paints, inks and related products by use of a suitable gauge, graduated in micrometres.

06 Page Gr-XA CH

BDS ISO 1619:2009

Cryolite, natural and artificial – Preparation and storage of test samples

This International Standard specifies the procedure for the preparation and storage of test samples, i.e. crude samples and dried samples, of natural and artificial cryolite, and of natural and synthetic materials having a molar ratio (NaF/AlF₃) between 3 and 1,7 approximately.

05 Page Gr-XA CH

BDS ISO 1620:2009

Cryolite, natural and artificial - Determination of silica content - Reduced molybdosilicate spectrophotometric method

This International Standard specifies a reduced molybdosilicate spectrophotometric method for the determination of the silica content of natural and artificial cryolite and of natural and synthetic materials having a molar ratio (NaF/AlF₃) between 3 and 1,7 approximately.

07 Page Gr-XA CH

BDS ISO 1686:2009

Sodium and potassium silicates and methods of test- General for industrial use – Samples

This International Standard provides general descriptions relative to the treatment of samples and to the test methods for potassium and sodium silicates for industrial use

05 Page Gr-XA CH

BDS ISO 1689:2009

Sodium and potassium silicates for industrial use Calculation of the ratio - $\frac{\text{SiO}_2}{\text{Na}_2\text{O}}$ or $\frac{\text{SiO}_2}{\text{K}_2\text{O}}$

This International Standard specifies the formula for the calculation of the ratio $\frac{\text{SiO}_2}{\text{Na}_2\text{O}}$ or $\frac{\text{SiO}_2}{\text{K}_2\text{O}}$ for sodium silicates

and potassium silicates for industrial use, respectively. In this ratio, only the Na₂O or the K₂O combined in the form of silicates is considered.

BDS ISO 2176:2009

Petroleum products- Lubricating grease- Determination of dropping Point

This International Standard specifies a method for the determination of the dropping point of lubricating grease.

13 Page Gr-XB CH

BDS ISO 2227:2014

Formaldehyde solutions for industrial use- Determination of formaldehyde content

This International Standard specifies a volumetric method for the determination of the formaldehyde content of formaldehyde solutions for industrial use.

04 Page Gr-XA CH

BDS ISO 2285:2008

Rubber, vulcanized or thermoplastic – Determination of tension set under constant elongation, and of tension set, elongation and creep under constant tensile load

This International Standard specifies a number of methods of determining the dimensional changes in test pieces of vulcanized or thermoplastic rubber during and after tensile loading for relatively short periods under constant elongation or constant loading.

14 Page Gr-XB CH

BDS ISO 2409:2008

Paints and varnishes – Cross-cut test

This International Standard describes a test method for assessing the resistance of paint coatings to separation from substrates when a right-angle lattice pattern is cut into the coating, penetrating through to the substrate. The property measured by this empirical test procedure depends, among other factors, on the adhesion of the coating to either the preceding coat or the substrate. This procedure is not to be regarded, however, as a means of measuring adhesion. Where a measurement of adhesion is required, attention is drawn to the method described in ISO 4624.

11 Page **Gr-XB** **CH**

BDS ISO 2417:2009

Leather – Physical and mechanical tests- Determination of the static absorption of water

This International Standard specifies a method for determining the water absorption of leather under static conditions. The method is applicable to all leather, particularly heavy leather.

08 Page **Gr-XA** **CH**

BDS ISO 2418:2009

Leather – Chemical, physical and mechanical and fastness test- Sampling location

This International Standard specifies the location of a laboratory sample within a piece of leather and the method of labelling and marking the laboratory samples for future identification. It is applicable to all types of leather derived from mammals irrespective of the tanning used.

10 Page **Gr-XA** **CH**

BDS ISO 2419:2009

Leather- Physical and mechanical tests- Sample preparation and conditioning

This International Standard specifies the preparation of leather test pieces for physical and mechanical testing together with two standard atmospheres for conditioning and testing. It is applicable to all types of dry leather.

10 Page **Gr-XA** **CH**

BDS ISO 2420:2008

Leather- Physical and mechanical tests- Determination of apparent density

This International Standard specifies a method for determining the apparent density of leather. It is applicable to all heavy leather.

BDS ISO 2470-1:2011

Paper, board and pulps- Measurement of diffuse blue reflectance factor- Part 1: indoor daylight conditions (ISO brightness)

This part of ISO 2470 specifies a method for measuring the diffuse blue reflectance factor (ISO brightness) of

pulps, papers and boards. This, part of ISO 2470 is limited in its scope to white and near-white pulps, papers and boards. The measurement can only be made in an instrument in which the ultraviolet energy level of the illumination has been adjusted to correspond to the CIE illuminant C using a fluorescent reference standard.

12 Page **Gr-XB** **CH**

BDS ISO 2470-2:2011

Paper, board and pulps- Measurement of diffuse blue reflectance factor- Part 2: Outdoor daylight conditions (D65 brightness)

This part of ISO 2470 specifies a method for measuring the D65 brightness of pulps, papers and boards. This part of ISO 2470 is limited in its scope to white and near-white pulps, papers and boards, particularly those exhibiting fluorescence which promotes the appearance of whiteness. The measurement can only be made in instrument in which the ultraviolet energy level of the illumination has been adjusted to correspond to the CIE standard illuminant D65 using a fluorescent reference standard.

09 Page **Gr-XA** **CH**

BDS ISO 2471:2011

Paper and board- Determination of opacity (paper backing)- Diffuse reflectance method

This International Standard specifies a method for the determination of the opacity (paper backing) of paper by diffuse reflectance.

It can be used to determine the opacity of papers or boards which contain fluorescent whitening agents, provided the UV content of the radiation incident on the test piece has been adjusted to conform to that in the CIE illuminant C using a fluorescent reference standard provided by an ISO/TC 6 authorized laboratory as described in ISO 2470-1.

10 Page **Gr-XA** **CH**

BDS ISO 2588:2008

Leather- Sampling- Number of items for a gross sample

This International Standard specifies a method for the drawing, from a lot, of whole pieces of leather to form a gross Sample. The method is applicable to all kinds of leather of any type of tannage.

02 Page **Gr-XA** **CH**

BDS ISO 2589:2008

Leather- Physical and mechanical tests- Determination of thickness

This International Standard specifies a method for determining the thickness of leather. The method is applicable to all types of leather of any tannage. The measurement is valid for both the whole leather and a test sample.

02 Page **Gr-XA** **CH**

BDS ISO 2758:2011

Paper- Determination of bursting strength

This International Standard specifies a method for measuring the bursting strength of paper submitted to increasing hydraulic pressure. It is applicable to paper

having bursting strengths within the range 70 kPa to 1 400 kPa. It is not intended to be used for the components of a combined board, for which the method given in ISO 2759 is more suitable.

12 Page **Gr-XB** **CH**

BDS ISO 2759:2011

Board - Determination of bursting strength

This International Standard specifies a method for measuring the bursting strength of board submitted to increasing hydraulic pressure. It is applicable to all types of board having bursting strengths within the range 350 kPa to 5 500 kPa. It is also applicable to papers or boards having bursting strengths as low as 250 kPa if the paper or board is to be used to prepare a material of higher bursting strength, such as corrugated board.

12 Page **Gr-XA** **CH**

BDS ISO 2808:2008

Paints and varnishes- Determination of film thickness

This International Standard reviews and specifies a number of methods that are applicable to the measurement of the thickness of organic coatings applied to a substrate. It does not apply to metallic coatings. Some of the techniques described can be adapted for the measurement of the thickness of detached coatings. The principles of the methods, their particular field of application.

BDS ISO 3537:2012**Road vehicles- Safety glazing materials- Mechanical tests**

This international Standard specifies mechanical test methods relating to the safety requirements for all safety

glazing materials in a road vehicle, whatever the type of glass or other material of which they are composed.

04 Page Gr-XA CH

BDS ISO 3538:2012**Road vehicles-Safety glazing materials- test methods for optical properties**

This international Standard specifies optical test methods relating to the safety requirements for all safety glazing materials in a road vehicle, whatever the type of glass or other material of which they are composed.

10 Page Gr-XA CH

BDS ISO 3710:2011**Lead chrome green- Specifications and methods.**

This International Standard specifies the requirements and the corresponding methods of test for lead chrome green containing not more than 50 % (m/m) of an iron blue pigment.

05 Page Gr-XA CH

BDS ISO 3783:2011**Paper and board- Determination of resistance to picking accelerated speed method using the IGT-type tester (electric model)**

This International Standard specifies an accelerated speed method for determining the surface strength in arms of the pick velocity and pick resistance of coated and uncoated paper and board, and in terms of the delaminating resistance of the liner on paperboard, by simulating the behavior in the printing process. Because of the limited area tested and the general character of the test, it will not usually detect local imperfections such as surface debris.

14 Page Gr-XB CH

BDS ISO 3849:2011**Oil of citronella, (Sri Lanka type)**

This International Standard specifies certain characteristics of the oil of citronella, Sri Lanka type W. Watson var. lenabatu Stapf., in order to facilitate assessment of its quality.

10Page Gr-XA CH

BDS ISO 3856-1:2016**Paints and varnishes- Determination of 'soluble' metal content- Part 1: Determination of lead content – Flame atomic absorption spectrometric method and dithizone spectrophotometric method**

This part of ISO 3856 describes two methods for the determination of the lead content of the test solutions, prepared according to ISO 6713 or other suitable International Standards.

06 page Gr-XA CH

BDS ISO 3856-2: 2016

Paints and varnishes- Determination of ‘soluble’ metal content- Part 2: Determination of antimony content- Flame atomic absorption spectrometric method and Rhodamine B spectrophotometric method

This part of ISO 3856 describes two methods for the determination of the antimony content of the test solutions prepared according to ISO 6713 or other suitable International Standards.

06 page Gr-XA CH

BDS ISO 3856-3:2016

Paints and varnishes- Determination of ‘soluble’ metal content- Part 3: Determination of barium content- Flame atomic emission spectrometric method

This International Standard is a part of ISO 3856, Paints and varnishes - Determination of “soluble” metal content.1

04 page Gr-XA CH

BDS ISO 3856-4:2016

Paints and varnishes-Determination of “soluble” metal content- Part 4: Determination of cadmium content- Flame atomic absorption spectrometric method and polarographic method

This part of ISO 3856 describes two methods for the determination of the cadmium content of the test solutions prepared according to ISO 6713 or other suitable International Standards.

04 page Gr-XA CH

BDS ISO 3856-5: 2016

Paints and varnishes- Determination of ‘soluble’ metal content – Part 5: Determination of – Hexavalent chromium content of the pigment portion of the liquid paint or the paint in powder form- diphenylcarbazide spectrophotometric method

This part of ISO 3856 describes a diphenylcarbazide spectrophotometric method for the determination of the “soluble” hexavalent chromium content of the hydrochloric acid extract of the pigment portion of the liquid paint or of the paint in powder form, prepared in accordance with sub-clause 8.2.3 of ISO 6713 or other suitable International Standards.

03 page Gr-XA CH

BDS ISO 3856-6: 2016

Paints and varnishes- Determination of ‘soluble’ metal content – Part 6: Determination of total chromium content of the liquid portion of the paint – Flame atomic absorption spectrometric method

This part of ISO 3856 describes a flame atomic absorption spectrometric (AAS) method for the determination of the total chromium content of the liquid portion of the paint, prepared in accordance with sub-clause 9.3 of ISO 6713 or other suitable International Standards.

03 page Gr-XA CH

BDS ISO 3856-7:2016

Paints and varnishes- Determination of ‘soluble’ metal content- Part 7: Determination of mercury content of the pigment portion of the paint and of the liquid portion of water-dilutable paints- Flameless atomic absorption spectrometric method

This part of ISO 3856 describes a flameless atomic absorption spectrometric method for the determination of the mercury content of the test solutions, prepared according to ISO 6713 or other suitable International Standards.

08 page Gr-XA CH

BDS ISO 3871:2008

Road vehicles- Labelling of containers for petroleum-based or non-petroleum-based brake fluid

This International Standard specifies the minimum labelling required for commercial containers of petroleum- and non-petroleum-based fluids used in the braking and hydraulic systems of road vehicles, including mopeds and motorcycles.

03 page Gr-XA CH

BDS ISO 3987:2009

Petroleum products- Lubricating oils and additives - Determination of sulfated ash

This International Standard describes a procedure for the determination of the mass percentage of sulfated ash from unused lubricating oils containing additives and from additive concentrates used in compounding.

08 Page Gr-XA CH

BDS ISO 4044:2008

Leather- Preparation of Chemical test samples

This International Standard specifies a method for preparation of a test sample of leather for chemical analysis. The method is applicable to all leathers of all types and tannage.

02 Page Gr-XA CH

BDS ISO 4045:2009

Leather Chemical tests- Determination of pH

This International Standard specifies a method for determining the pH value and the difference figure of an aqueous leather extract. It is applicable to all types of leather.

08 Page Gr-XA CH

BDS ISO 4046-1:2012

Paper, board, pulps and related terms- Vocabulary, part 1-Alphabetical index

This part of ISO 4046 is an alphabetical index of English and French terms which are defined in the ISO 4046 series of standards, which document the terminology of paper, board, pulp and related terms.

13 Page Gr-XB CH

BDS ISO 4046-2:2012

Paper, board, pulps and related terms-Vocabulary, part 2-Pulping terminology

This part of ISO 4046 defines terms related to pulping.

11 Page Gr-XB CH

BDS ISO 4046-3:2012**Paper, board, pulps and related terms-Vocabulary, part 3-paper making terminology.**

This part of ISO 4046 defines terms related to paper making, in English.

25 Page Gr-XC CH

BDS ISO 4046-4:2012**Paper, board, pulps and related terms-Vocabulary, part 4-paper and board grades and converted products**

This part of ISO 4046 defines terms related to paper and board grades and converted products, in English.

18 Page Gr-XB CH

BDS ISO 4046-5:2012**Paper, board, pulps and related terms-Vocabulary, part-5, properties of pulp, paper and board**

This part of ISO 4046 defines terms related to properties of pulp, paper and board.

28 Page Gr-XC CH

BDS ISO 4047:2009**Leather- Determination of sulphated total ash and sulphated water-insoluble ash**

This International Standard specifies a method for the determination of the sulphated total ash and the sulphated water-insoluble ash of leather. The method is applicable to all types of leather.

04 Page Gr-XA CH

BDS ISO 4048:2009**Leather- Chemical tests- Determination of matter soluble in dichloromethane and free fatty acid content**

This International Standard specifies a method for the determination of the substances in leather which are soluble in dichloromethane. This method is applicable to all types of leather.

04 Page Gr-XA CH

BDS ISO 4263-1:2009**Petroleum and related products- Determination of the ageing behaviour of inhibited oils and fluids-TOST test Part 1: Procedure for mineral oils**

This part of ISO 4263 specifies a method for the determination of the ageing behaviour of rust- and oxidationinhibited mineral oils having a density less than that of water, used as turbine oils, hydraulic oils, and circulating oils. Oils containing synthetic components can be tested by this procedure, but no precision statement is available yet for such fluids.

17 Page Gr-XA CH

BDS ISO 4406:2008**Hydraulic fluid power- Fluids- Method for coding the level of contamination by solid particles**

This International Standard specifies the code to be used in defining the quantity of solid particles in the fluid used in a given hydraulic fluid power system.

07 Page Gr-XA CH

BDS ISO 4648:2008**Rubber, vulcanized or thermoplastic- Determination of dimensions of test pieces and products for test purposes**

This International Standard specifies four methods for the measurement of the dimensions of solid vulcanized or thermoplastic rubber test pieces or products for test purposes, three contact methods, designated A, B and C, and one non-contact method, designated D.

06 Page Gr-XA CH

BDS ISO 4649:2014**Rubber, vulcanized or thermoplastic-determination of abrasion resistance using a rotating cylindrical drum device**

This International Standard specifies two methods for the determination of the resistance of rubber to abrasion by means of a rotating cylindrical drum device.

24 Page Gr-XC CH

BDS ISO 4925:2008**Road vehicles- Specification of non- petroleum- base brake fluids for hydraulic systems**

This International Standard gives the specifications-requirements and test methods- for non- petroleum-base fluids used in road-vehicle hydraulic brake and clutch systems that are designed for use with such fluids and equipped with seals, cups or double-lipped type gland seals made of styrene-butadiene rubber (SBR) and ethylene-propylene elastomer (EPDM).

27 Page Gr-XC CH

BDS ISO 4926:2008**Road vehicles- Hydraulic braking systems- Non-petroleum- base reference fluids**

This International Standard specifies the composition and characteristics of a reference fluid used for the compatibility testing of hydraulic braking systems and components mounted on road vehicles.

02 Page Gr-XA CH

BDS ISO 4995:2006**Hot-rolled steel sheet of structural quality**

This International Standard applies to hot-rolled steel sheet of structural quality in the grades and classes listed in Tables 1 and 2, usually without the use of microalloying elements. The product is intended for structural purposes where particular mechanical properties are required.

12 Page Gr-XB CH

BDS ISO 5626:2011**Paper- Determination of folding endurance**

This International Standard specifies the methods for determination of folding endurance of paper using kohler Molin, Lhomargy, MIT and Schopper testers. It sets out the conditions to be observed when using each instrument, and gives the precautions to be taken in using each instrument.

09 Page Gr-XA CH

BDS ISO 5627:2012

Paper and board-Determination of smoothness (Bekk method)

This international Standard specifies a method of measuring the smoothness of Paper and board, called the Bekk method.

13 Page Gr-XB CH

BDS ISO 5923:2006

Fire protection-fire extinguishing media-carbondioxide

This international Standard specifies requirements for carbondioxide for use as a fire extinguishing medium.

12 Page Gr-XB CH

BDS ISO 6072:2008

Hydraulic fluid power- Compatibility between fluids and standard elastomeric materials

This International Standard specifies test methods for the evaluation of fluids exposed to standard elastomeric materials that have been manufactured in accordance with the specified processes.

20 Page Gr-XB CH

BDS ISO 6295:2009

Petroleum products- Mineral oils- Determination of interfacial tension of oil against water- Ring method

This International Standard specifies a method for the measurement, under non-equilibrium conditions, of the interfacial tension of mineral oils against water, which has been shown by practice to give a reliable indication of the presence of hydrophilic compounds.

06 Page Gr-XA CH

BDS ISO 6486-1:2016

Ceramic ware, glass- ceramic ware and glass dinnerware in contact with food- Release of lead and cadmium- Part 1: Test Method

This part of ISO 6486 specifies a test method for the release of lead and cadmium from ceramic ware, glassceramic ware, and glass dinnerware intended to be used in contact with food, but excluding porcelain enamel articles.

11 Page Gr-XB CH

BDS ISO 6486-2: 2016

Ceramic ware, glass-ceramic ware and glass dinnerware in contact with food- Release of lead and cadmium- Part 2: Permissible limits

This part of ISO 6486 specifies permissible limits for the release of lead and cadmium from ceramic ware, glassceramic ware and glass dinnerware intended to be used in contact with food, but excluding porcelain enamel articles.

06 Page Gr-XA CH

BDS ISO 6503: 2016

Paints and varnishes- Determination of total lead- Flame atomic absorption spectrometric method

This International Standard describes a flame atomic absorption spectrometric method for the determination of total lead in paints and related products.

06 page Gr-XA CH

BDS ISO 6588-1: 2016

Paper, board and pulps- Determination of pH of aqueous extracts- Part 1: Cold extraction

This part of ISO 6588 specifies a method for the determination of the pH-value defined by the electrolytes extractable by cold water from a sample of paper, board or pulp. This part of ISO 6588 is applicable to all types of paper, board and pulp.

08 Page Gr-XA CH

BDS ISO 6588-2: 2016

Paper, board and pulps- Determination of pH of aqueous extracts- Part 2: Hot extraction

This part of ISO 6588 specifies a method for the determination of the pH-value defined by the electrolytes extractable by hot water from a sample of paper, board or pulp. This part of ISO 6588 is applicable to all kinds of paper, board and pulp.

08 Page Gr-XA CH

BDS ISO 6617:2009

Petroleum- based lubricating oils- Ageing characteristics- Determination of change in Conradson carbon residue after oxidation

This International Standard specifies a procedure for determination of the ageing characteristics of petroleum-based lubricating oils. It is applicable to those oils which have an evaporation loss of less than 15 % mass fraction, as determined by the procedure specified in 9.3 of this standard.

06 Page Gr-XA CH

BDS ISO 6745:2011

Zinc phosphate pigments for paints- Specifications and methods of test

This International Standard specifies the requirements and the corresponding methods of test for zinc phosphate pigments suitable for use in corrosion-inhibiting paints.

10 Page Gr-XA CH

BDS ISO 6860:2007

Paints and varnishes- Bend test (conical mandrel)

This International Standard describes an empirical test procedure for assessing the resistance of a coating of paint, varnish or related product to cracking and/or detachment from a metal substrate when subjected to bending around a conical mandrel under standard conditions.

03 Page Gr-XA CH

BDS ISO 7086-1:2006

Glass Hollowware in Contact with Food-Release of Lead and Cadmium Part 1 Test Method

This part of ISO 7086 specifies a test method for the release of lead and cadmium from glass hollowware that is intended to be used in contact with food.

09 Page Gr-XA CH

BDS ISO 7086-2:2006

Glass Hollowware in Contact with Food-Release of Lead and Cadmium Part 2 Permissible limits

This part of ISO 7086 specifies permissible limits for the release of lead and cadmium from glass hollowware that is intended to be used in contact with food.

BDS ISO 7202:2006

Fire Protection- Fire Extinguishing Media- powder

This International Standard specifies requirements for the chemical and physical properties, and for minimum performance in defined test methods, of fire extinguishing powders suitable for use of extinguishing powders. They do not, however, form part of the specification.

12 Page Gr-XB CH

BDS ISO 7252: 2016

Paints and varnishes- Determination of total mercury- Flameless atomic absorption spectrometric method

This International Standard describes a flameless atomic absorption spectrometric reference method for the determination of the total mercury content in paints and related products.

06 page Gr-XA CH

BDS ISO IEC 7501-1:2003

Identification cards-Machine readable travel documents Part-1: Machine readable passport

This international standard specifies the and provides guidance on the construction of machine readable passports, in particular in relation to the sections of the document containing details of the holder in a form which is both visible machine readable.

01 Pag Gr-XA CH

BDS ISO IEC 7501-2:2003

Identification cards – Machine readable travel documents- Part- 2: Machine- readable visa

This international standard specifies the form and provides guidance on the construction of machine readable visas, in particular in relation to the sections of the document containing details of the holder in a form which is both visible machine readable.

01 Pag Gr-XA CH

BDS ISO IEC 7501-3:2003

Identification cards-Machine readable travel documents – Part-3: Machine-readable official travel documents

This international standard specifies generic formats and minimum data elements for visual inspection and machine reading of official travel documents in the ID-1 and ID-2 card formats containing a single form of machine readable data (optical character recognition, OCR), which may at the option of Governments.

01 Pag Gr-XA CH

BDS ISO 7619-1:2014

Rubber, Vulcanized or thermoplastic-determination of indentation hardness Part- 1: durometer method (Shore hardness)

This part of ISO 7619 specifies a method for determining the indentation hardness of vulcanized or thermoplastic rubber using durometers with the following scales:

- the A scale for rubbers in the normal-hardness range;
- the D scale for rubbers in the high-hardness range;
- the AO scale for rubbers in the low-hardness range and for cellular rubbers;
- the AM scale for thin rubber test pieces in the normal-hardness range.

08 Page Gr-XA CH

BDS ISO 7619-2:2014

Rubber, Vulcanized or thermoplastic of determination hardness Part- 2: Irhd pocket meter method

This part of ISO 7619 specifies a method for determining the indentation hardness of vulcanized or thermoplastic rubber by means of a pocket hardness meter calibrated in IRHD. The use of such meters is primarily intended for control, not specification, purposes. It is possible to increase precision by fixing the pocket hardness meter on a support.

12 Page Gr-XB CH

BDS ISO IEC 7810:2003

Identification cards- physical characteristics

This international standard specifies the physical characteristics of identification cards including card materials, construction, and dimensions for three sizes of card.

05 Pag Gr-XA CH

BDS ISO 7991:2008

Glass- Determination of coefficient of mean linear thermal expansion

This International Standard specifies a method for determining the coefficient of mean linear thermal expansion of glass in the elastic solid-like state, well below the transformation temperature . This International Standard applies to all glasses of normal bulk-production compositions. It does not apply to fused silica, glass ceramics or other glasses of similarly low linear thermal expansion coefficients.

BDS ISO 8781-1:2006

Pigments and Extenders – Methods of Assessment of dispersion characteristics, Part- 1:Assessment from the change in tinting strength of coloured pigments

This part of ISO 8781 specifies a method for assessing, on the basis of tinting strength ,the dispersion characteristics of coloured pigments which have been dispersed by one of the methods described in ISO 8780 It should be read in conjunction with ISO 8780-1.

05 Page Gr-XA CH

BDS ISO 8781-2:2006**Pigments and Extenders- Methods of Assessment of dispersion characteristics, Part- 2:Assessment from the change in fineness of grind**

This part of ISO 8781 specifies a method for assessing, on the basis of fineness of grind, the dispersion characteristics of pigments which have been dispersed by one of the methods of dispersion described in ISO 8780 It should be read in conjunction with ISO 8780-1.

03 Page Gr-XA CH

BDS ISO 8781-3:2006**Pigments and Extenders- Methods of Assessment of dispersion Characteristics, Part- 3:Assessment from the Change in Gloss**

This part of ISO 8781 specifies a method for assessing, on the basis of specular gloss, the dispersion characteristics of pigments which have been dispersed by one of the methods of dispersion described in ISO 8780 It should be read in conjunction with ISO 8780-1.

04 Page Gr-XA CH

BDS ISO 8782-1:2005**Specification for Safety, Protective and Occupational Footwear for professional use Part- 1: Requirements and Test Methods**

This part of ISO 8782 specifies requirements and, where appropriate, test methods too establish conformity with these requirements for footwear intend to protect the wearer's feet and legs against foreseeable hazards in a variety of working sectors.

63 Page Gr-XE CH

BDS ISO 8782-2:2005**Safety, Protective and Occupational Footwear for professional use Part- 2: Specification for Safety footwear**

This part of ISO 8782 specifies by reference to ISO 8782 - 1, basis and additional (optional) requirements for safety footwear professional use.

06 Page Gr-XA CH

BDS ISO 8782-3:2005**Safety, Protective and Occupational Footwear for professional use Part-3: Specification for Protective footwear**

This part of ISO 8782 specifies by reference to ISO 8782-1, basis and additional requirements for protective footwear professional use.

06 Page Gr-XA CH

BDS ISO 8782-4:2005**Safety, Protective and occupational footwear for professional use Part- 4: specification for occupational footwear**

This part of ISO 8782 specifies by reference to ISO 8782-1, basis and additional (optional) requirements for Occupational footwear professional use.

06 Page Gr-XA CH

BDS ISO 8782-5:2006**Safety, Protective and Occupational Footwear for professional use Part 5: Additional requirements and test methods**

This part of ISO 8782 specifies requirements and test methods relating to properties of footwear for professional use additional to those specified in ISO 8782-1 .It covers water resistance, protection against cutting by hand held chain saws , resistance to fire fighting hazards (foot wear for fire fighters), metatarsal protection and cut resistance.

15 Page Gr-XB CH

BDS ISO 8782-6:2006**Safety, Protective and occupational footwear for professional use Part 6:Additional specifications for safety footwear**

This part of ISO 8782 specifies to ISO 8782-1 and ISO 8782-5, additional requirements for safety footwear, relating to water resistance, protection against cutting by hand held chain saws, resistance to fire fighting hazards (footwear for fire fighters), metatarsal protection and cut resistance.

06 Page Gr-XA CH

BDS ISO 8782-7:2006**Safety, Protective and Occupational Footwear for professional use Part- 7:Additional Specifications for Protective Footwear**

This part of ISO 8782 specifies by reference to ISO 8782-1, and ISO 8782-5, additional requirements for protective footwear, relating to water resistance, metatarsal protection and cut resistance.

03 Page Gr-XA CH

BDS ISO 8782-8:2006**Safety, Protective and occupational footwear for professional use Part 8: Additional specifications for occupational footwear**

This part of ISO 8782 specifies by reference to ISO 8782-1, and ISO 8782-5, additional requirements for occupational footwear, relating to water resistance.

02 Page Gr-XA CH

BDS ISO 8784-1:2016**Pulp, paper and board – microbiological examination part 1: enumeration of bacteria and bacterial spores based on disintegration**

This part of ISO 8784 specifies a method for determining the total number of colony-forming units of bacteria and bacterial spores in dry market pulp, paper, and paperboard after disintegration. The enumeration relates to specific media.

14 Page Gr-XB CH

BDS ISO 8791-1:2012**Paper and board-Determination of roughness/smoothness (air leak methods)- Part 1: General method**

This part of ISO 8791 specifies basic requirements and operating procedures for determining the roughness/smoothness of paper and board by air leak methods.

16 Page Gr-XB CH

BDS ISO 8791-2:2012

Paper and board- Determination of roughness/smoothness (air leak methods) Part 2: Bendtsen method

This part of ISO 8791 specifies a method for the determination of the roughness of paper and board using the Bendtsen apparatus. It should be read in conjunction with ISO 8791-1.

11 Page Gr-XB CH

BDS ISO 8791-3:2012

Paper and board- Determination of roughness/smoothness (air leak methods) Part 3: Sheffield

This part of ISO 8791 specifies a method for the determination of the roughness of paper and board using the Sheffield apparatus.

13 Page Gr-XB CH

BDS ISO 8791-4:2012

Paper and board – Determination of roughness/smoothness (air leak methods) Part 4: Print- Surf method

This part of ISO 8791 specifies a method for determination of the roughness of paper and board using the apparatus which complies with the Print-surf method, as defined in this part of ISO 8791. It is applicable to all printing papers and boards with which it is possible to form a substantially airtight seal against the guard lands of the measuring head.

11 Page Gr-XB CH

BDS ISO 9184-1:2014

Paper, board and pulps- Fibre furnish analysis- Part 1: General method

This part of ISO 9184 specifies the general performance of the test for fibre furnish analysis of paper, board and pulps.

It is applicable to all kinds of pulps and to most papers and boards, including those containing more than one kind of fibre, taking into account different pulping processes.

09 Page Gr-XA CH

BDS ISO 9184-2:2014

Paper, board and pulps- Fibre furnishes analysis- Part 2: Staining guide

This part of ISO 9184 is a guide for choosing the appropriate staining tests for the Performance of fibre furnish analysis of Paper, board and pulps.

04 Page Gr-XA CH

BDS ISO 9184-3:2014

Paper, board and pulps- Fibre furnish analysis- Part 3: Herzberg staining test

This part of ISO 9184 specifies the preparation, use and colour reactions of Herzberg stain in fibre furnish analysis. It should be used in conjunction with ISO 9184-1 and, if necessary, with other staining tests defined in ISO 9184-2.

05 Page Gr-XA CH

BDS ISO 9184-4:2014

Paper, board and pulps- Fibre furnish analysis- Part 4: Graff T” staining test

This part of ISO 9184 specifies the preparation, use and colour reactions of Graff YY stain in fibre furnish analysis. It should be used in conjunction with ISO 9184-1 and, if necessary, with other staining tests defined in ISO 9184-2.

06 Page Gr-XA CH

BDS ISO 9184-5:2014

Paper, board and pulps- Fibre furnish analysis - Part 5: Lofton- Merritt staining test (modification of Wisbar)

This part of ISO 9184 specifies the preparation, use and colour reactions of Lofton-Merritt stain in fibre furnish analysis. It should be used in conjunction with ISO 9184-1 and, if necessary, with other staining tests defined in ISO 9184-2.

06 Page Gr-XA CH

BDS ISO 9184-6:2014

Paper, board and pulps- Fibre furnish analysis- Part 6: Determination of fibre coarseness

This part of ISO 9184 specifies a method for the determination of fibre coarseness, which is a fibre property characterizing pulp.

06 Page Gr-XA CH

BDS ISO 9184-7:2014

Paper, board and pulps- Fibre furnish analysis- Part 7: Determination of weight factor

This part of ISO 9184 specifies two methods for determining the weight factor of fibres used in the fibre furnish analysis of paper, board and pulp. In this part of ISO 9184, the weight factor is obtained either by a comparison method or by calculating from the fibre coarseness.

05 Page Gr-XA CH

BDS ISO 9385:2008

Glass and glass-ceramics -Knoop hardness test

This International Standard describes the method of test for determining the Knoop hardness number of glass and glass-ceramics. The Knoop hardness number characterizes the behaviour of glass and glass-ceramics concerning a permanent Change of the surface after indentation with a solid material.

03 Page Gr-XA CH

BDS ISO 9665:2008

Adhesives - Animal glues – Methods of sampling and testing

This International Standard specifies the methods to be used for sampling and testing bone and skin glues in the form of powder, granules, pearls or cubes.

10 Page Gr-XA CH

BDS ISO 9706:2008

Information and documentation – Paper for documents- Requirements for permanence

This International Standard specifies the requirements for permanent paper intended for documents. It is applicable to unprinted papers. It is not applicable to boards.

06 Page Gr-XA CH

BDS ISO 9842:2015

Oil of rose (*Rosa × damascena* Miller)

This International Standard specifies certain characteristics of the oil of rose (*Rosa × damascena* Miller) cultivated in Turkey, Morocco and Bulgaria, of the Rosaceae family, in order to facilitate assessment of its quality.

13 Page **Gr-XB** **CH**

BDS ISO 9843:2015**Oil of cedarwood, Chinese type (*Cupressus funebris* Endlicher)**

This International Standard specifies certain characteristics of the oil of cedarwood, Chinese type (*Cupressus funebris* Endlicher), in order to facilitate assessment of its quality.

13 Page **Gr-XB** **CH**

BDS ISO 9895:2008**Paper and board- Compressive strength- Short span test**

This International Standard specifies a method for the determination of the compressive strength in the machine and cross directions of paper and board using a short span compression tester. This International Standard is intended for papers or boards used for the manufacture of containers and boxes.

04 Page **Gr-XA** **CH**

BDS ISO 10123:2008**Adhesives-Determination of shear strength of anaerobic adhesives using pin- and- collar specimens**

This International Standard specifies a method for the determination of the shear strength of anaerobic-curing liquid adhesives used for retaining cylindrical assemblies, pin- and- collar type, or for locking and sealing threaded fasteners. This test method may also be used for other adhesives.

02 Page **Gr-XA** **CH**

BDS ISO 10282:2003**Specifications for Single- use Sterile Rubber Surgical Gloves**

This International Standard specifies requirements and test methods for evaluation of the permance and durability of writing, printing and copying on paper stored in libraries, archives and other protected environments for long period of time.

10 Page **Gr-XA** **CH**

BDS ISO 10354:2008**Adhesives- Characterization of durability of structural-adhesive- bonded assemblies- Wedge rupture test**

This International Standard simulates in a qualitative manner the forces and effects on an adhesivebonded joint at a metal-adhesive primer interface. It can also be used as a method of checking the surface preparation of substrates,

04 Page **Gr-XA** **CH**

BDS ISO 10363:2008**Hot-melt adhesives- Determination of thermal stability.**

This International Standard specifies a method determining the thermal stability of non-reactive melt adhesives at temperatures up to 260 °C.

02 Page **Gr-XA** **CH**

BDS ISO 10364:2008**Structural adhesives- Determination of the pot life (working life) of multicomponent adhesives**

This International Standard specifies methods for determining the pot life of multi-component adhesives in order to be able to determine whether the pot life conforms to the minimum specified working life required of an adhesive.

BDS ISO 12775:2008**Guidelines on types of glass of normal Bulk-production composition and their test methods**

This International Standard establishes a survey of glass types and of methods for testing their chemical and physical properties to give, for example, consumers and producers of glass of normal bulk-production composition the possibility to compare the different types of glass and test methods and to decide which are of interest for a special demand or use. For this purpose, these comprehensive guidelines give a classification of the different glass types of normal bulk-production composition according to the chemical composition and indicate the different test methods and, where they exist, the classifications according to chemical resistance.

Textiles – Tests for colour fastness - Part

A01: General principles of testing

This part of ISO 105 provides general information about the methods for testing colour fastness of textiles test the guidance of users. The uses and limitations of the

methods are pointed out, several terms are defined, an outline of the form of the methods is given and the contents of the clauses constituting the methods are discussed.

15 Page Gr-XB JT

BDS ISO 105 - A02:2005

Textiles-tests for colour fastness -Part A02:grey scal for assessing change in colour

This part of ISO 105 describes the grey scale for determining changes in colour of textiles in colour fastness tests, and its use small precise colorimetric specification of the scale is given as a permanent record against which newly prepared working standards and standards that may have changed can be compared.

05 Page Gr-XA JT

BDS ISO 105 - A03:2005

Textiles-tests for colour fastness- Part A03 :Grey Scal for assessing staining

This part of ISO 105 describes the grey scale for determining staining of adjacent fabrics in colour fastness tests, and its use. A precise colorimetric specification of the scale is given as a permanant record against which newly prepared working standards and standards that may have changed can be compared.

05 Page Gr-XA JT

BDS ISO 105-A04:2005

Textiles-Tests for Colour Fastness- Part A04 :Method for the Instrumental Assessment of the degree of staining of Adjacent Fabrics

This part of ISO 105 specifies an instrumentalmethod for assessing the degree of staining of adjacent fabrics in any fastness test,as an alternative to the visual method.

05 Page Gr-XA JT

BDS ISO 105-A06:2005

Textiles-Tests for Colour Fastness- Part A06 :Instrumental determinatiion of 1/1 standard depth of colour

This method is intended for determining 1/1 standard depth of a dyeing on any textiles material by a colourimetric method as a permitted alternative to the visual method described in clause 12 of ISO 105-A01:1994.

05 Page Gr-XA JT

BDS ISO 105 - A08:2006

Textiles-Tests for Colour Fastness- Part A 08: Vocabulary used in Colour Measurement

This part of ISO 105 specifies the terms and definitios on colour measurements that are used throughout ISO 105. These definitions are intended to be used only within the context and scope of ISO 105.

09 Page Gr-XA JT

BDS ISO 105-B01:2015

Textiles- Test for colour fastness- Part B01: Colour fastness to light: Daylight

This part of ISO 105 specifies a method intended for determining the resistance of the colour of textiles of all kinds and in all forms to the action of daylight.

13 Page Gr-XB JT

BDS ISO 105-B02:2015**Textiles- Test for colour fastness- Part B02: Colour fastness to artificial light: Xenon arc fading lamp test**

This part of ISO 105 specifies a method intended for determining the effect on the colour of textiles of all kinds and in all forms to the action of an artificial light source representative of natural daylight (D65). The method is also applicable to white (bleached or optically brightened) textiles.

36 Page Gr-XD JT

BDS ISO 105 – B03:2006**Textiles- Tests for Colour Fastness- Part B03: Colour fastness to Weathering :Outdoor Exposure**

This part of ISO 105 specifies a method intended for determining the resistance of the colour of textiles of all kinds except loose fibres to the action of weather as determined by outdoor exposure.

09 Page Gr-XA JT

BDS ISO 105 B04:2006**Textiles- Tests for Colour Fastness- Part B04: Colour fastness to Artificial Weathering: Xenon Arc Fading lamp Test.**

This part of ISO 105 specifies a method intended for determining the resistance of the colour of textiles of all kinds except loose fibres, to the action of weather as determined by exposure to simulated weathering conditions in a cabinet equipped with a xenon arc lamp.

13 Page Gr-XB JT

BDS ISO 105–B08:2014**Textiles- tests for colour fastness- Part B08: Quality control of blue wool reference materials 1 to 7**

This part of ISO 105 describes a method for carrying out quality control of production batches of the blue wool reference materials 1 to 7 which are to be used in the appropriate Parts of ISO 105-B series of test methods for colour fastness to light.

08 Page Gr-XA JT

BDS ISO 105– B10:2014**Textiles- tests for colour fastness- Part B10: artificial weathering- exposure to filtered xenon- arc radiation**

This part of ISO 105 specifies a procedure for exposing textiles to artificial weathering in xenon-arc apparatus, including the action of liquid water and water vapour, in order to determine the weather resistance of the colour of textiles. The exposure is carried out in a test chamber with a filtered xenon-arc light source simulating solar spectral irradiance according to CIE 85:1989, Table 4. The method can be used either for determining the colour fastness or the ageing behaviour of the textile under test. The method is also applicable to white textiles.

12 Page Gr-XB JT

BDS ISO 105-C01:2005**Textiles- Tests for Colour Fastness- Part C01: Colour fastness to Washing : Test 1**

This part of ISO 105 specifies Test No.1 of a series of five washing tests that have been established to

investigate the fastness to washing of coloured textiles and which between them cover the range of washing procedures from mild to severe.

08 Page Gr-XA JT

BDS ISO 105-C02:2005**Textiles- Tests for Colour Fastness- Part C02: Colour fastness to Washing: Test 2**

05 page Gr-XA JT

BDS ISO 105-E03:2011

Textiles- Tests for colour fastness- Part E03: Colour fastness to chlorinated water (swimming-pool water)

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all kinds and in all forms to the action of active chlorine in concentrations such as are used to disinfect swimming-pool water (break-point chlorination).

08 Page Gr-XA JT

BDS ISO 105-E04:2016

Textiles- Tests for colour fastness- Part E04:Colour fastness to perspiration

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all kinds and in all forms to the action of human perspiration.

05 page Gr-XA JT

BDS ISO 105-E05:2011

Textiles - Tests for colour fastness – Part E05:Colour fastness to spotting: Acid

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all kinds, and in all forms, to the action of dilute solutions of organic and mineral acids. Four tests differing in severity are provided. Any or all can be used, depending upon the nature of the fibre.

06 Page Gr-XA JT

BDS ISO 105 E06:2011

Textiles- Tests for colour fastness- Part E06: Colour fastness to spotting: Alkali

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all kinds, and in all forms, to the action of dilute alkaline solutions. Three tests differing in severity are provided. Any or all may be used, depending on the nature of the fibre.

06 Page Gr-XA JT

BDS ISO 105–E07:2011

Textiles- Tests for colour fastness- Part E07: Colour fastness to spotting: Water

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all kinds and in all forms to spotting by water.

06 Page Gr-XA JT

BDS ISO 105– E08:2003

Textile – Tests for Colour Fastness- Part E08: Colour fastness to Hot water

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all kinds and in all forms to the action of hot water .The method is mainly applicable to wool and textiles containing wool.

08 Page Gr-XA JT

BDS ISO 105– E09:2011

Textiles- Tests for colour fastness- Part E09: Colour fastness to potting

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all kinds and in

all forms to the action of boiling water. It is mainly applicable to wool and textiles containing wool.

08 Page Gr-XA JT

BDS ISO 105–E10:2003

Textiles-Tests for Colour Fastness- Part E10: Colour fastness to Decatizing

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles to the action of steam, as employed in the decatizing of wool fabrics. Two tests, mild and severe, are given.

08 Page Gr-XA JT

BDS ISO 105– E11:2004

Textiles- Tests for Colour Fastness- Part E11:Colour fastness to Steaming

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles to all kinds and in all forms to the action of steam under atmospheric.

10 Page Gr-XA JT

BDS ISO 105 E13:2004

Textiles- Tests for Colour Fastness- Part E13 :Colour fastness to Acid- Felting:severe

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all forms to the action of acids, as used under severe conditions in the acids felting process.

05 Page Gr-XA JT

BDS ISO 105 –E14: 2004

Textiles- Tests for Colour Fastness- Part E14: Colour fastness to Acid- felting: Mild

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles to the action of dilute, and hot mineral acids, as used under mild felting conditions in the hat-making and felt industries.

05 Page Gr-XA JT

BDS ISO 105 –F01:2004

Textiles- Tests for Colour fastness- Part F01: Specification for wool adjacent Fabric

This part of ISO 105 specifies an undyed wool adjacent fabric which may be used for the assessment of staining in colour fastness tests. The staining properties of the wool adjacent fabric under test are assessed against a wool reference adjacent fabric, using two wool dyed reference fabrics and one cotton dyed reference fabric, all of which are available from a specified source.

10 Page Gr-XA JT

BDS ISO 105– F03:2004

Textiles- Tests for Colour fastness- Part F03: Specification for polyamide adjacent Fabric

This part of ISO 105 specifies an undyed polyamide adjacent fabric which may be used for the assessment of staining in colour fastness tests. The staining properties of the polyamide adjacent fabric under test are assessed against a polyamide reference adjacent fabric, using a polyamide dyed reference fabric, both of which are available from a specified source.

08 Page Gr-XA JT

BDS ISO 105– F04:2004

Textiles- Tests for Colour fastness- Part F04: Specification for polyester adjacent Fabric

This part of ISO 105 specifies an undyed polyester adjacent fabric which may be used for the assessment of staining in colour fastness tests. The staining properties of the polyester adjacent fabric under test are assessed against a polyester reference adjacent fabric, using a polyester dyed reference fabric, both of which are available from a specified source.

08 Page Gr-XA JT

BDS ISO 105–F05:2004

Textiles- Tests for Colour fastness- Part F05: Specification for Acrylic adjacent Fabric

This part of ISO 105 specifies an undyed acrylic adjacent fabric which may be used for the assessment of staining in colour fastness tests. The staining properties of the acrylic adjacent fabric under test are assessed against an acrylic reference adjacent fabric, using an acrylic dyed reference fabric, both of which are available from a specified source.

08 Page Gr-XA JT

BDS ISO 105-G01:2007

Textiles - Tests for colour fastness - Part G01: Colour fastness to nitrogen oxides

This part of ISO 105 specifies two methods for determining the resistance of the colour of textiles of all kinds and in all forms to the action of nitrogen oxides produced during combustion of gas, coal, Oil, etc., and when air is passed over heated filaments.

08 Page Gr-XA JT

BDS ISO 105-G02:2007

Textiles - Tests for colour fastness - Part G02: Colour fastness to burnt-gas fumes

This part of ISO 105 specifies two methods for determining the resistance of the colour of textiles of all kinds and in all forms, except loose fibres, to exposure to atmospheric oxides of nitrogen as derived from the combustion of chemically pure butane gas.

05 Page Gr-XA JT

BDS ISO 105-G03:2007

Textiles - Tests for colour fastness - Part G03:Colour fastness to ozone in the atmosphere

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all kinds and in all forms to the action of ozone in the atmosphere, both at ambient room temperatures with relative humidities not exceeding 65 % and at elevated temperatures with relative humidities above 80 %.

05 Page Gr-XA JT

BDS ISO 105-G04:2007

Textiles - Tests for colour fastness - Part G04 :Colour fastness to oxides of nitrogen in the atmosphere at high humidities

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles to the action of oxides of nitrogen in the atmosphere at elevated temperatures and high relative humidities.

03 Page Gr-XA JT

BDS ISO 105-J01:2009

Textiles- Tests for colour fastness- Part J01: General principles for measurement of surface colour

This part of ISO 105 is designed as a reference document to support the proper measurement of the colour of specimens by instrumental means as required in many parts of ISO 105. The document describes general concepts and problems associated with reflectance colour measurement.

16 Page Gr-XB JT

BDS ISO 105- J02:2009

Textiles- Tests for colour fastness- Part J02: Instrumental assessment of relative whiteness

(Technical corrigendum 1:1998)

This part of ISO 105 specifies a method intended for quantifying the whiteness and tint of textiles, including fluorescent materials.

15 Page Gr-XB JT

BDS ISO 105- J03:2007

Textiles - Tests for colour fastness -Part J03: Calculation of colour differences

This part of ISO 105 provides a method of calculating the colour difference between two specimens of the same material, measured under the same conditions, such that the numerical value AECmC (Z:c) for the total colour difference quantifies the extent to which the two specimens do not match. It permits the specification of a maximum value which depends only on the closeness of match required for a given end-use and not on the colour involved, nor on the nature of the colour difference.

08 Page Gr-XA JT

BDS ISO 105- J05:2009

Textiles- Tests for colour fastness- Part J05: Method for the instrumental assessment of the colour inconstancy of a specimen with change in illuminant

This part of ISO 105 provides a colorimetric method for calculating an estimate of the magnitude (and optionally the direction) of the change in the perceived colour of a textile specimen when the chromaticity of the illumination by which it is viewed is changed. It therefore provides an estimate of the colour inconstancy of the specimen.

12 Page Gr-XB JT

BDS ISO 105-N01:2007

Textiles - Tests for colour fastness -

Part N01: Colour fastness to bleaching: Hypochlorite

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all kinds and in all forms to the action of bleaching baths containing sodium or lithium hypochlorite in concentrations

normally used in commercial bleaching. It is applicable mainly to natural and regenerated cellulose materials.

02 Page Gr-XA JT

BDS ISO 105-N02:2007

Textiles - Tests for colour fastness -

Part N02: Colour fastness to bleaching: Peroxide

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all kinds, and in all forms, to the action of bleaching baths containing peroxide in concentrations commonly used in textile processing.

03 Page Gr-XA JT

BDS ISO 105-N03:2007

Textiles - Tests for colour fastness -

Part N03: Colour fastness to bleaching: Sodium chlorite (mild)

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles composed of natural and regenerated cellulose, and synthetic fibres, to the action of mild bleaching with sodium chlorite as employed in textile processing.

02 Page Gr-XA JT

BDS ISO 105-N04:2007

Textiles - Tests for colour fastness -

Part N04: Colour fastness to bleaching: Sodium chlorite (severe)

This part of ISO 105 specifies a method for determining the resistance of the colour of natural cellulose textiles to the action of severe bleaching with sodium chlorite as ordinarily employed in textile processing.

02 Page Gr-XA JT

BDS ISO 105-N05:2007

Textiles - Tests for colour fastness -

Part N05: Colour fastness to stoving

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all kinds and in all forms to the action of Sulfur dioxide as used for bleaching animal fibres.

03 Page Gr-XA JT

BDS ISO 105-P01:2007

Textiles - Tests for colour fastness -

Part P01: Colour fastness to dry heat (excluding pressing)

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all kinds and in all forms to the action of dry heat, excluding pressing, as it is used to stabilize the size and form of textiles.

03 Page Gr-XA JT

BDS ISO 105-P02:2007

Textiles - Tests for colour fastness -

Part P02: Colour fastness to pleating: Steam pleating

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all kinds and in all forms to the action of steam-pleating processes. The materials are not pleated during the test, and it is emphasized that the test is not intended for assessing the quality of the pleating process.

05 Page Gr-XA JT

BDS ISO 105-S01:2007

Textiles - Tests for colour fastness -Part S01:

Colour fastness to vulcanization: Hot air

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all kinds and in all forms to the action of a typical rubber compound, such as may be used in the proofing industry, and to its decomposition products, during vulcanization in hot air.

02 Page Gr-XA JT

BDS ISO 105-S02:2007

Textiles - Tests for colour fastness -

Part S02: Colour fastness to vulcanization: Sulfur monochloride

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all kinds and in all forms to the action of Sulfur monochloride under the conditions usually occurring during the cold vulcanizing of rubber.

02 Page Gr-XA JT

BDS ISO 105-S03:2007

Textiles - Tests for colour fastness -

Part S03: Calculation of Colour differences

This part of ISO 105 specifies a method of calculating the colour difference between two specimens of the same material, measured under the same conditions, such that the numerical value .

05 Page Gr-XA JT

BDS ISO 105- X01:2007

Textiles- Tests for colour fastness- Part X01: Colour fastness to carbonizing: Aluminium chloride

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles in all forms to the manufacturing operation designed to remove vegetable impurities by a treatment with aluminium chloride at high temperatures. The method is mainly applicable to wool and textiles containing wool, particularly those containing also acetate or polyamide fibres.

08 Page Gr-XA JT

BDS ISO 105- X02:2007

Textiles – Tests for colour fastness – Part X02: Colour fastness to carbonizing: Sulfuric acid

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles in all forms to the manufacturing operation designed to remove vegetable impurities by treatment with sulfuric acid at high temperatures. The method is mainly applicable to wool and textiles containing wool.

08 Page Gr-XA JT

BDS ISO 105-X04:2007

Textiles – Tests for colour fastness – Part X04: Colour fastness to mercerizing

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles to the action of concentrated solutions of sodium hydroxide used in mercerizing. The method is mainly applicable to cotton and to mixtures containing cotton.

08 Page Gr-XA JT

BDS ISO 105-X05:2007

Textiles - Tests for colour fastness – Part X05: Colour fastness to organic solvents

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all kinds and in all forms to organic solvents. If dry cleaning is involved, use the method specified in ISO 105-D01:1993, Textiles - Tests for colour fastness- Part D01: Colour fastness to dry cleaning.

08 Page Gr-XA JT

BDS ISO 105-X06:2007

Textiles- Tests for colour fastness - Part X06: Colour fastness to soda boiling

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all kinds and in all forms to the action of boiling dilute sodium carbonate solution. The method is mainly applicable to natural and regenerated cellulose materials.

08 Page Gr-XA JT

BDS ISO 105-X07:2007

Textiles- Tests for colour fastness - Part X07: Colour fastness to Cross- dyeing: Wool

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles to the action of processes used for dyeing wool.

08 Page Gr-XA JT

BDS ISO 105-X08:2007

Textiles - Tests for colour fastness - Part X08: Colour fastness to degumming

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all kinds, except loose fibre, to the action of soap solutions such as those used in degumming raw silk.

08 Page Gr-XA JT

BDS ISO 105-X09:2007

Textiles - Tests for colour fastness - Part X09: Colour fastness to formaldehyde

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all kinds and in all forms to the action of formaldehyde vapour, as may be encountered in storehouses where fabrics are stored with materials which have undergone a crease resistant treatment.

08 Page Gr-XA JT

BDS ISO 105-X10:2007

Textiles - Tests for colour fastness - Part X10: Assessment of migration of textile colours into polyvinyl chloride coatings

This part of ISO 105 specifies a method for determining the resistance of the colour in textile fabrics to migration into polyvinyl chloride (PVC) which contains plasticizer.

08 Page Gr-XA JT

BDS ISO 105-X11:2005

Textiles -Tests for Colour Fastness - Part X11: Colour fastness to Hot pressing

This part of specifies a method for determining the resistance of the colour of textiles of all kinds and in all forms to ironing and to processing on hot cylinders.

09 Page Gr-XA JT

BDS ISO 105-X12:2006

Textiles -Tests for Colour Fastness - Part X12: Colour fastness to Rubbing

This part of ISO105 specifies a method for determining the resistance of the colour of textiles of all kinds , including textile floor coverings and other pile fabrics, to rubbing off and staining other materials.

09 Page Gr-XA JT

BDS ISO 105-X13:2007

Textiles- Tests for colour fastness- Part X13: Colour fastness of wool dyes to processes using chemical means for creasing, pleating and setting

This part of ISO 105 specifies a method for determining the resistance of the colour of wool textiles of all kinds to processes using chemical means in conjunction with steam for creasing, pleating and setting purposes.

08 Page Gr-XA JT

BDS ISO 105-X14:2007

Textiles - Tests for colour fastness - Part X14: Colour fastness to acid chlorination of wool: Sodium dichloroisocyanurate

This part of ISO 105 specifies a method for determining the resistance of the colour of wool in all forms to acid chlorination using sodium dichloroisocyanurate '1. This simulates the manufacturing operation in which a liquid containing or liberating active chlorine under mildly acid conditions is used for imparting shrink-resistant properties to wool in textiles.

08 Page Gr-XA JT

BDS ISO 105-X16:2006

Textile -Test for colour Fastness - Part X16: Colour Fastness to rubbing small areas

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles to rubbing off and staining other materials where the singling out of areas smaller than possible to test with the apparatus described in ISO 105-X12 is required.

10 Page Gr-XA JT

BDS ISO 105-X18:2012

Textile -Test for colour Fastness - Part X18: Assessment of the potential to phenolic yellowing of materials

This part of ISO 105 specifies a method intended for assessment of the potential to phenolic yellowing of textile materials. The method is specific to phenolic yellowing and does not cover the many other possible causes of yellow discolouration found on textile materials.

07 Page Gr-XA JT

BDS ISO 105-Z01:2008

Textiles - Tests for colour fastness - Part Z01: Colour fastness to metals in the dye- bath: Chromium salts

This part of ISO 105 specifies a method for determining the effect, on the colour of a dye, of dyeing in the

presence of hexavalent chromium salts. It is applicable to wool.

07 Page Gr-XA JT

BDS ISO 105-Z02:2008

Textiles –Tests for colour fastness – Part Z02: Colour fastness to metals in the dye- bath: Iron and copper

This part of ISO 105 specifies a method for determining the effect, on the colour of a dye, of dyeing in the presence of metals either used in the construction of dyeing machinery or resulting from water and steam used in dyeing.

07 Page Gr-XA JT

BDS ISO 105– Z03:2008

Textiles-Tests for colour fastness – Part Z03: Intercompatibility of basic dyes for acrylic fibres

This International Standard specifies a method for determining the behaviour of a basic dye in relation to its compatibility with other basic dyes when applied to acrylic fibres in the presence of those basic dyes.

08 Page Gr-XA JT

BDS ISO 105-Z04:2008

Textiles- Tests for colour fastness- Part Z04: Dispersibility of disperse dyes

This part of ISO 105 describes a method for determining the dispersibility, as evaluated by filtering time and filter residue, of disperse dyes.

10 Page Gr-XA JT

BDS ISO 105-Z05:2008

Textiles - Tests for colour fastness – Part Z05: Determination of the dusting behaviour of dyes

This part of ISO 105 specifies a method for determination of the dusting behaviour of dyes.

18 Page Gr-XB JT

BDS ISO 105-Z06:2008

Textiles- Tests for colour fastness- Part Z06: Evaluation of dye and pigment migration

This part of ISO 105 describes a method for assessing the migration propensity of a pad liquor system containing dyes or pigments, subsequently referred to as colorants, and which may also contain different types and amounts of migration inhibitors. The degree of migration is obtained by visual examination or by reflectance measurements.

13 Page Gr-XB JT

BDS ISO 105-Z07:2008

Textiles –Tests for colour fastness – Part Z07: Determination of application solubility and solution stability of water-soluble dyes

This part of ISO 105 describes a method for the determination of the application solubility of watersoluble dyes in the range 40 °C to 90 °C and of their Solution stability.

10 Page Gr-XA JT

BDS ISO 105-Z08:2008

Textiles – Tests for colour fastness – Part Z08: Determination of solubility and Solution stability of reactive dyes in the presence of electrolytes

This part of ISO 105 describes a method for the determination of the solubility and the Solution stability of reactive dyes for use in batchwise and continuous dyeing processes in the presence of electrolytes.

10 Page Gr-XA JT

BDS ISO 105-Z09:2008

Textiles - Tests for colour fastness - Part Z09: Textiles - Tests for colour fastness- Part Z09: Determination of cold water solubility of water-soluble dyes

This part of ISO 105 describes a method for the determination of solubility of water- soluble dyes at 25° C in aqueous Solution without previous heating. The method is not intended to measure absolute solubility

10 Page Gr-XA JT

BDS ISO 105-Z10:2008

Textiles - Tests for colour fastness - Part Z10: Determination of reactive colour strength of dyes in solution

This method is intended for the determination of the colour strength of a dye in relation to that of a reference dye by means of spectrophotometric absorption measurements on solutions of dyes.

15 Page Gr-XB JT

BDS ISO 105-Z11:2008

Textiles- Tests for colour fastness- Part Z11: Evaluation of speckiness of colorant dispersions

This International Standard describes a test method to determine speckiness primarily of disperse dye, vat dye and pigment dispersions. Agglomerates in colorant dispersions may become apparent as specks on a continuously dyed (padded), or on a printed fabric, especially when pale and light shades are produced.

11 Page Gr-XB JT

BDS ISO 108:2006

Textile machinery and accessories - Weaving looms- Definition of left and right sides

This standard gives the definition of the left and right sides of weaving looms

07 Page Gr-XA JT

BDS ISO 109:2009

Textile machinery- Working widths of weaving machines

This Standard defines the working width as well as other terms which relate to the main dimensions of the working widths of weaving machines.

08 Page Gr-XA JT

BDS ISO 139:2006

Textile- Standard atmospheres for conditioning and testing (including Amendment 1:2012)

This Standard defines the characteristics and use of a standard atmosphere for conditioning, for determining

the physical and mechanical properties of textiles and a standard alternative atmosphere that may be used if agreed between parties.

14 Page Gr-XB JT

BDS ISO 142:2006

Textile machinery and accessories - Weaving preparatory machines- Definition of left and right sides

This International Standard gives the definition of the left and right sides of weaving preparatory machines.

07 Page Gr-XA JT

BDS ISO 143:2009

Textile machinery and accessories - Weft pirns for automatic looms

This International Standard specifies the dimensions of weft pirns for automatic looms.

07 Page Gr-XA JT

BDS ISO 342:2007

Textile machinery and accessories - Worsted and woollen cards- Width of cylinder and width on the wire

This Standard defines the width of cylinder and width on the wire of worsted and woollen cards.

07 Page Gr-XA JT

BDS ISO 344:2007

Textile machinery and accessories - Spinning machines- Flyer bobbins

This International Standard specifies the main dimensions and the corresponding tolerances of bobbins from plastics material, for open-leg type flyers.

05 Page Gr-XA JT

BDS ISO 363-1:2009

Textile machinery and accessories - Flat steel healds with closed end loops - Part 1: Dimensions of healds manufactured of rolled steel wire

This part of ISO 363 specifies the main dimensions of flat steel healds with closed end loops, manufactured of rolled steel wire for use in the textile industry.

10 Page Gr-XA JT

BDS ISO 363-2:2009

Textile machinery and accessories- Flat Steel healds with closed end loops - Part 2: Dimensions of healds manufactured of hardened strip steel

This part of ISO 363 specifies the main dimensions and tolerances of flat steel healds with closed end loops (O-shaped end loops), manufactured of hardened strip steel for use in the textile industry.

10 Page Gr-XA JT

BDS ISO 364:2009

Textile machinery and accessories - Twin wire healds for weaving machines with heald frames

This International Standard specifies the types and lays down the dimensions of twin wire healds for weaving machines with heald frames.

10 Page Gr-XA JT

BDS ISO 365:2009**Textile machinery and accessories - Twin wire healds with inset mail for Jacquard weaving**

This International Standard lays down the main dimensions of twin wire healds with inset mail for Jacquard weaving.

10 Page Gr-XA JT

BDS ISO 366-1:2007**Textile machinery and accessories - Reeds -Part 1:Pitch bound reeds - Dimensions. Main Dimensions for section wires for metallic code clothing Part 1: Foot without interlocking or interchanging**

This part of ISO 366 specifies the dimensions of pitch bound reeds for use in the textile machinery industry.

05 Page Gr-XA JT

BDS ISO 366-2:2009**Textile machinery and accessories-Reeds-Part 2: Dimensions and designation of metal reeds, with plate baulk**

This part of ISO 366 specifies the main dimensions and designation of metal reeds with plate bulk for weaving machines

10 Page Gr-XA JT

BDS ISO 366-3:2010**Textile machinery and accessories – Reeds-Part 3: Dimensions and designation of metal reeds with double- spring baulk**

This part of ISO 366 specifies the dimensions and designation of metal reeds with double-spring baulk for weaving machines.

12Page Gr-XB JT

BDS ISO 366-4:2009**Textile machinery and accessories- Reeds- Part 4: Dimensions and designation of plasticbound metal reeds**

This part of ISO 366 specifies the dimensions and designation of plastic-bound metal reeds for weaving machines. For the strip steel used in the manufacture of dents of reeds, see ISO 9473-1 and 9473-2.

10 Page Gr-XA JT

BDS ISO 366-5:2009**Textile machinery and accessories- Reeds- Part 5: Dimensions and designation of profile capsules**

This part of ISO 366 specifies the dimensions and designation of profile capsules for weaving machine reeds. These capsules are used to manufacture plastic-bound metal reeds according to ISO 366-4.

08 Page Gr-XA JT

BDS ISO 368:2007**Spinning preparatory, spinning and doubling (twisting) machinery- Tubes for ring-spinning, doubling and twisting spindles, taper 1:38 and 1:64**

This International Standard specifies the dimensions (length and inner diameter) and permissible total run-out of tubes with taper 1:38 and 1:64 for ringspinning, doubling and twisting spindles. It also specifies the dimensions and tolerances of the gauges for checking the tubes.

11 Page Gr-XA JT

BDS ISO 441:2009**Textile machinery and accessories- Drop wires for warp stop motions for weaving machines without automatic drawing- in**

This International Standard specifies the principal dimensions, tolerances and designation of drop wires for mechanical, electromechanical and electrical warp stop motions for weaving machines..

09 Page Gr-XA JT

BDS ISO 476:2007**Textile machinery and accessories- Pirn winding machines- Vocabulary**

This International Standard establishes a list of basic terms used in the designation of pirn winding machines and of their accessories as well as certain corresponding definitions, in the field of terminology for weaving preparatory machinery.

09 Page Gr-XA JT

BDS ISO 477:2007**Textile machinery and accessories- Cone and cheese winding machines- Vocabulary**

This International Standard establishes a list of basic terms used for the designation of cone and cheese winding and their components, as well as the corresponding definitions, in the field of terminology for textile machinery for cross winding.

10 Page Gr-XA JT

BDS ISO 570:2009**Textile machinery and accessories- Heald carrying rods for healds with closed “0”shaped end loops**

This International Standard specifies the main dimensions and the co-ordination of heald carrying rods for healds with closed “0” shaped end loops.

07 Page Gr-XA JT

BDS ISO 572:2009**Textile machinery and accessories- Shuttles for pirn changing automatic looms- Dimensions**

This International Standard specifies the dimensions of 9⁰⁰ shuttles for pirn changing automatic looms used in the textile industry.

07 Page Gr-XA JT

BDS ISO 575:2007**Textile machinery and accessories- Transfer cones- Half angle of the cone 4° 20**

This International Standard specifies the dimensions and the tolerances of transfer cones, having a half angle of the cone of 4° 20, which, after the cones for dyeing purposes have been removed from the dyed or bleached wound packages, are put in the packages for the purpose of re-processing. These transfer cones shall not be used for winding purposes. This International Standard also specifies the dimensions and tolerances of the gauges for checking the cones.

05 Page Gr-XA JT

BDS ISO 576:2009

Textile machinery and accessories- Paper Patterns for dobbies - Dimensions

This International Standard specifies the dimensions of paper patterns for dobbies for use in the textile industry.

07 Page Gr-XA JT

BDS ISO 675:2010

Textiles-Woven fabrics- Determination of dimensional change on commercial laundering near the boiling point

This International Standard specifies a method for the determination of the dimensional change (shrinkage or stretch) of all types of woven fabrics after commercial laundering near the boiling point.

11 Page Gr-XB JT

BDS ISO 811:2006

Textiles Fabricks- Determination of Resistance to water penetration- Hydrostatic Pressure Test

This international standard specifies a Hydrostatic Pressure method for determininig the resistance of fabrics to penetration by water. The method is primary intended for dense fabrics, e.g. ducks, tarpaulins and tentings.

09 Page Gr-XA JT

BDS ISO 1107:2009

Fishing nets- Netting- Basic terms and definitions

This International Standard gives the principal terms relating to netting for fishing nets, together with their definitions or, in some cases, the method of expressing dimensions.

09 Page Gr-XA JT

BDS ISO 1130:2009

Textile fibres- Some methods of sampling for testing

This International Standard specifies several methods for preparing laboratory samples of fibres, and presents a limited treatment of the problem of drawing specimens for testing.

13 Page Gr-XB JT

BDS ISO 1139:2008

Textiles- Designation of yarns

This International Standard specifies two methods of indicating the composition of yarns, whether single, folded, cabled or multiple wound. The notation comprises linear density indicated in the Tex System,

number of filaments in filament yarns, direction and amount of twist, and number of folds.

07 Page Gr-XA JT

BDS ISO 1140:2015

Fibre ropes- Polyamide - 3, 4, 8- and 12-strand ropes

This International Standard specifies requirements for 3-strand hawser-laid and 4-strand shroud-laid ropes, 8-strand braided ropes and 12-strand braided ropes for general service made of polyamide, and gives rules for their designation.

07 Page Gr-XA JT

BDS ISO 1141:2015

Fibre ropes- Polyester- 3, 4, 8- and 12- strand ropes

This International Standard specifies requirements for 3-strand hawser-laid and 4- strand shroud-laid ropes, 8-strand braided ropes and 12-strand braided ropes for general service made of polyester, and gives rules for their designation.

07 Page Gr-XA JT

BDS ISO 1144:2009

Textiles-Universal system for designating linear density (Tex System)

This International Standard gives the principles and recommended units of the Tex System for the expression of linear density and includes conversion tables for calculating the tex values of numbers or counts in other systems together with a statement of the procedure for the implementation of the Tex System in trade and industry.

12 Page Gr-XB JT

BDS ISO 1150:2009

Textile machinery and accessories- Drop wires for warp stop motions for weaving machines with automatic drawing- in

This International Standard specifies the principal dimensions, tolerances and designation of drop wires for mechanical, electromechanical and electrical warp stop motions for weaving machines.

10 Page Gr-XA JT

BDS ISO 1181:2004

Ropes- Manila and sisal- Specification

This International Standard specifies the main characteristics of 3- strand laid ropes made of Manila and sisal and gives rules for their designation.

08 Page Gr-XA JT

BDS ISO 1346:2015

Fibre ropes- Polypropylene split film, monofilament and multifilament (PP2) and olypropylene high-tenacity multifilament (PP3)- 3, 4, 8 and 12- strand ropes

This International Standard specifies requirements for 3-strand hawser-laid and 4-strand shroud-laid ropes, 8-strand braided ropes and 12-strand braided ropes for general service made of polypropylene, and gives rules for their designation.

07 Page Gr-XA JT

BDS ISO 1586:2009**Textile machinery and accessories- Shuttles-Terms and designation in relation to the Position of the shuttle eye**

This International Standard gives an illustrated nomenclature of equivalent terms for shuttles in English, French and Russian, and a method of designation used in conventional weaving looms according to the Position (left, right or centre) of the shuttle eye.

10 Page Gr-XA JT

BDS ISO 1763:2009**Carpets- Determination of number of tufts and/or loops per unit length and per unit area**

This International Standard specifies a method for the determination of the number of tufts and/or loops per unit length and per unit area of a carpet, and is applicable to carpets the pile of which consists of uniformly spaced tufts and/or loops.

06 Page Gr-XA JT

BDS ISO 1809:2007**Textile machinery and accessories – types of formers for yarn packages – nomenclature**

This International Standard gives an illustrated nomenclature in English, French and Russian of different types of formers for yarn package

05 Page Gr-XA JT

BDS ISO 1833-1:2012**Textiles- Quantitative chemical analysis- Part 1: General principles of testing**

This part of ISO 1833 specifies a common method for the quantitative chemical analysis of various binary mixtures of fibres. This method and the methods described in the other parts of ISO 1833 are applicable, in general, to fibres in any textile form. Where certain textile forms are excepted, these are listed in the scope of the appropriate part.

20 Page Gr-XA JT

BDS ISO 1833-2:2012**Textiles- Quantitative chemical analysis- Part 2: Ternary fibre mixtures**

This part of ISO 1833 specifies methods of quantitative chemical analysis of various ternary mixtures of fibres. The field of application of each method for analysing binary mixtures, specified in the parts of ISO 1833, indicates the fibres to which the method is applicable.

08 Page Gr-XA JT

BDS ISO 1833-3:2012**Textiles- Quantitative chemical analysis- Part 3: Mixtures of acetate and certain other fibres (method using acetone)**

This part of ISO 1833 specifies a method, using acetone, to determine the percentage of acetate, after removal of non-fibrous matter, in textiles made of binary mixtures of - acetate. and - wool, animal hair, silk, regenerated protein, cotton (scoured, kiered, or bleached), flax,

hemp, jute, abaca, alfa, coir, broom, ramie, cupro, viscose, modal, polyamide, polyester, acrylic and glass fibres.

10 Page Gr-XA JT

BDS ISO 1833-4:2012**Textiles- Quantitative chemical analysis- Part 4: Mixtures of certain protein and certain other fibres (method in using hypochlorite)**

This part of ISO 1833 specifies a method, using hypochlorite, to determine the percentage of protein fibre, after removal of non-fibrous matter, in textiles made of binary mixtures of certain non-protein fibres and one protein fibre.

05 Page Gr-XA JT

BDS ISO 1833-5:2012**Textiles- Quantitative chemical analysis- Part 5: Mixtures of viscose, cupro or modal and cotton fibres (method using sodium zincate)**

This part of ISO 1833 specifies a method, using sodium zincate, to determine the percentage of viscose, cupro or modal fibre, after removal of non-fibrous matter, in textiles made of binary mixtures of- viscose or most of the current cupro modal fibres and- raw, scoured, kiered or bleached cotton.

07 Page Gr-XA JT

BDS ISO 1833-7:2012**Textiles – Quantitative chemical analysis- Part 7: Mixtures of polyamide and certain other fibres (method using formic acid)**

This part of ISO 1833 specifies a method, using formic acid, to determine the percentage of polyamide fibre. After removal of non-fibrous matter, in textiles made of binary mixtures

07 Page Gr-XA JT

BDS ISO 1833-8:2012**Textiles – Quantitative chemical analysis- Part 8: Mixtures of acetate and triacetate fibres (method using acetone)**

This part of ISO 1833 specifies a method, using acetone, to determine the percentage of acetate, after removal of non-fibrous matter, in textiles made of binary mixtures.

07 Page Gr-XA JT

BDS ISO 1833-11:2012**Textiles – Quantitative chemical analysis- Part 11: Mixtures of cellulose and polyester fibres (method using Sulfuric acid)**

This part of ISO 1833 specifies a method, using sulfuric acid, to determine the proportion of cellulose fibre, after removal of non-fibrous matter, in textiles made of mixtures.

07 Page Gr-XA JT

BDS ISO 1833-12:2012**Textiles – Quantitative chemical analysis-Part 12: mixtures of acrylic, certain modacrylics, certain**

chlorofibres, certain elastanes and certain other fibres (method using dimethyl for mamide)

This part of ISO 1833 specifies a method, using dimethylformamide, to determine the percentage of acrylic, modacrylic, chlorofibre or elastane, after removal of non-fibrous matter, in textiles made of binary mixtures.

07 Page Gr-XA JT

BDS ISO 1833-13:2013

Textiles - Quantitative chemical analysis- Part 13: mixtures of certain choro fibres and certain (other fibres (method using carbon disulfide/ acrtone)

This part of ISO 1833 specifies a method, using carbon disulfide/acetone, to determine the percentage of chlorofibre, after removal of non-fibrous matter, in textiles made of mixtures of- certain chlorofibres, whether after-chlorinated or not, and- wool, animal hair, silk, cotton, viscose, cupro, modal, polyamide, polyester, acrylic and glass fibres.

04 Page Gr-XA JT

BDS ISO 1833-14:2016

Textiles- Quantitative chemical analysis- Part 14: Mixtures of acetate and certain chlorofibres(method using acetic acid)

This part of ISO 1833 specifies a method, using acetic acid, to determine the percentage of acetate, after removal of non- fibrous matter, in textiles made of mixtures of- acetate and- certain chlorofibres or after-chlorinated chlorofibres.

02 page Gr-XA JT

BDS ISO 1833-15:2013

Textiles - Quantitative chemical analysis- Part 15: Mixtures of jute and certain animal fibres (method by determining nitrogen content)

This part of ISO 1833 specifies a method, by determining the nitrogen content, to calculate the proportion of each component, after the removal of non-fibrous matter, in textiles made of binary mixtures of jute and animal fibres. The animal-fibre component may consist solely of hair or wool, or of any mixtures of the two.

04 Page Gr-XA JT

BDS ISO 1833-16:2014

Textiles - Quantitative chemical analysis – part 16: mixtures of polypropylene fibres and certain other fibres (method using xylene)

This part of ISO 1833 specifies a method, using xylene, to determine the percentage of polypropylene, after removal of non-fibrous matter, in textiles made of binary mixtures of- polypropylene fibres and wool, animal hair, silk, cotton, viscose, cupro, modal, acetate, triacetate, polyamide, polyester, acrylic and glass fibres.

02 Page Gr-XA JT

BDS ISO 1833-18:2014

Mixtures of silk and wool or hair (method using sulfuric acid)

This part of ISO 1833 specifies a method, using sulfuric acid, to determine the percentage of silk, after removal

of non- fibrous matter, in textiles made of binary mixtures of- Silk and wool or animal hair

02 Page Gr-XA JT

BDS ISO 1865:2009

Textile machinery and accessories- Serrated bars for mechanical Warp stop motions-Designations of dimensions, and dimensions of Cross-section

This International Standard gives the designations of dimensions of serrated bars for mechanical warp stop motions. values of the dimensions of the Cross-section of assembled serrated bars are also given.

10 Page Gr-XA JT

BDS ISO 1957:2011

Machine-Made textile floor coverings- Selection and cutting of specimens for Physical tests

This International Standard specifies a procedure to be followed when specimens are cut from samples if such specimens are to be used for physical tests. The reference method for selection of the sample from the bulk material is given in informative annex A.

08 Page Gr-XA JT

BDS ISO 1968:2008

Fibre ropes and cordage- Vocabulary

This International Standard specifies vocabulary relating to fibre ropes and cordage

65 Page Gr-XE JT

BDS ISO 1969:2008

Fibre ropes- Polyethylene - 3- and 4- strand ropes

This International Standard specifies requirements for 3-strand hawser-laid and 4-strand shroud-laid ropes for general service made of polyethylene and gives rules for their designation.

10 Page Gr-XA JT

BDS ISO 2012:2009

Textile machinery and accessories- Cone sectional warping machines- Maximum usable width

This International Standard specifies, for a specific cylinder of a sectional warping machine, the maximum usable width of the warp on the cylinder and, consequently, on the warping machine itself.

05 Page Gr-XA JT

BDS ISO 2060:1998

Textiles- yarn from packages- Determination of liner density (mass per unit) by the skein methods

This international standards specifies a method for the determination of the linear density of all types of yarn in packages form, with the exception of any yarn that may be the subject of a separate international standard.

19 Page Gr-XB JT

BDS ISO 2061:2011**Textiles- Determination of twist in yarns- Direct counting method**

This International Standard specifies a method for the determination of the direction of twist in yarns, the amount of twist, in terms of turns per unit length, and the change in length on untwisting, by the direct counting method.

17 Page Gr-XB JT

BDS ISO 2062:2014**Textiles- Yarn From Packages- Determination of single-end breaking force and elongation at break using constant rate of extension(Cre) tester**

This standard specifies methods for the determination of the breaking force and elongation at break of textile yarns taken from packages.

10 Page Gr-XA JT

BDS ISO 2076:2003**Textiles- Man Made Fibres- Generic names**

This international standard lists the generic names used to designate the different categories of man-made fibres currently manufactured on an industrial scale for textile and other purpose, together with the distinguishing attributes that characterize them. The term man-made fibres has been adopted for those fibres obtained by a manufacturing process, as distinct from materials which occur naturally in fibrous form.

13 Page Gr-XB JT

BDS ISO 2187:2007**Spinning preparatory machinery, spinning and doubling (twisting) machinery- List of equivalent terms**

This International Standard gives equivalent terms in English, French, Russian, German and Italian relating to spinning preparatory machinery, spinning and doubling machinery for the following :1 Cotton System 2 Worsted System.

16 Page Gr-XB JT

BDS ISO 2205:2007**Textile machinery and accessories- Drafting arrangements for spinning machines- Terminology**

This International Standard gives the terms and definitions of the main Parts of a drafting arrangement of a spinning machine. The text is completed by the corresponding illustrations.

12 Page Gr-XB JT

BDS ISO 2307:2015**Fibre ropes- Determination of certain physical and mechanical properties**

This International Standard specifies, for ropes of different kinds, a method of determining .

16 Page Gr-XB JT

BDS ISO 2313:2008**Textile fabrics- Determination of the recovery from creasing of a horizontally folded specimen by measuring the angle of recovery. Thermal resistance- Part 1: Lou thermal resistance**

This International Standard specifies a method for determining the angle of recovery of fabrics from creasing. The results obtained by this method for textile fabrics of very different kinds cannot be compared directly.

06 Page Gr-XA JT

BDS ISO 2403:2015**Textiles- Cotton fibres- Determination of micronaire value**

This International Standard specifies a method of determining the micronaire value of loose disorientated cotton fibres taken from bales, laps and slivers, or other sources of lint cotton.

07 Page Gr-XA JT

BDS ISO 2424:2007**Textile floor coverings- Vocabulary**

This International Standard gives definitions of terms relating to textile floor coverings, and defines categories of these products.

60 Page Gr-XE JT

BDS ISO 2544:2009**Textile machinery and accessories- Warping Machinery- Preparation of warp for weaving- Vocabulary**

The International Standard establishes a vocabulary for use in the field of preparation of warp for weaving.

26 Page Gr-XC JT

BDS ISO 2549:2009**Hand- knotted carpets- Determination of tuft leg length above the woven ground**

This International Standard specifies a method for the determination of tuft leg length above the woven ground and is applicable to all kinds of hand-knotted carpets.

03 Page Gr-XA JT

BDS ISO 2572:2007**Textile machinery and accessories- Card gauges**

This International Standard lays down the numbering and the dimensions for the two types of card gauges currently used to set the distance between the working elements of cards.

03 Page Gr-XA JT

BDS ISO 2748:2009**Textile machinery and accessories- Lingoes for Jacquard weaving**

This International Standard specifies the dimensions and mass of lingoes for Jacquard weaving.

05 Page Gr-XA JT

BDS ISO 2913:2009**Wool- Colorimetric determination of cystine plus cysteine in hydrolysates**

This International Standard specifies a method for the colorimetric determination of cystine plus cysteine in wool hydrolysates. The method is applicable to all-wool

textiles in any form, namely loose fibre, sliver, roving, yarn or cloth.

08 Page Gr-XA JT

BDS ISO 2947:2012

Textiles- Integrated conversion table for replacing traditional yarn numbers by rounded values in the Tex System

This International Standard is intended to facilitate the changeover by industry and commerce from traditional yarn numbering systems to the Tex System (see ISOIR 1144).

13 Page Gr-XB JT

BDS ISO 2959:1998

Textiles- woven fabric descriptions

This international standard gives number of characteristic parameters for woven fabric and their constituents at various stage of manufacture and processing for the purpose of fabrics designation in is net intended that the list of parameters should be exclusive and additional information can be given as required.

05 Page Gr-XA JT

BDS ISO 3005:2010

Textiles- Determination of Dimensional Change of Fabrics Induced By Free-steam

This International standard specifies a method for determination of the dimensional change of fabrics when subjected to the action of free-steam. It does not deal with the consolidation and felting shrinkage of fabrics in wet treatments, or the mechanical effects of pressing.

08 Page Gr-XA JT

BDS ISO 3060:2009

Cotton fibres- Determination of breaking tenacity of flat bundles

This International Standard specifies a method of test for the determination of the breaking tenacity of cotton fibres arranged in a parallel manner in a flat bundle. The method applies to fibres from raw cotton, or to fibres from various stages in the manufacturing process, or to fibres separated or extracted from manufactured cotton products.

08 Page Gr-XA JT

BDS ISO 3071:2006

Textile- Determination of P^H of the aqueous extract

This International Standard specifies a method of determining the P^H of the aqueous extract of textiles. The method is applicable to textiles in any form.

07 Page Gr-XA JT

BDS ISO 3072:2008

WOOL- Determination of solubility in alkali

This International Standard specifies a method for determining the solubility of wool in alkali. The method is applicable to wool textiles in any form, namely loose fibre, sliver, roving, yarn or cloth. The test is most useful when an untreated control sample is available and when

the nature of the treatment of the Sample under test is known, i.e. as a method of control.

03 Page Gr-XA JT

BDS ISO 3073:2008

Wool-Determination of acid content

This International Standard specifies a method for determining the acid content of a wool Sample, expressed as a percentage by mass. This method is applicable to undyed wool in any form, for example loose fibre, sliver, yarn or fabric. It is also applicable to dyed wool when the amount of dye extracted during the test does not interfere with the determination of the end-point of the titration.

03 Page Gr-XA JT

BDS ISO 3074:2008

wool-Determination of dichloromethane- soluble matter in combed sliver

This International Standard specifies a method for determining the dichloromethane -soluble matter in combed wool sliver. Its use may be extended to wool in other forms. It should be recognized that extraction with dichloromethane under the prescribed conditions does not completely remove all the fatty material present in a Sample of wool. A further amount, possibly material of similar character, will usually be extracted by the use of solvents that cause greater swelling of the wool fibres.

06 Page Gr-XA JT

BDS ISO 3175-1:2008

Textiles-Dry cleaning and finishing- Part1: Method for assessing the cleanability of textiles and garments

This part of ISO 3175 specifies a method for assessing textile articles which have been tested according to ISO 3175-2. Fabric and garment properties which may change on dry cleaning and finishing are identified and methods for assessing change using existing International Standards are given as appropriate. Other properties which are also important, but for which there are no International Standards which provide methods of assessment, are indicated in annex A, together with advice on how to proceed on their assessment, and it is recommended that comments on these should be included in the test report

10 Page Gr-XA JT

BDS ISO 3175-2:2008

Textiles-Dry cleaning and finishing-Part 2: Procedures for tetrachloroethene

This part of ISO 3175 specifies dry-cleaning procedures for tetrachloroethene (*perchloroethylene*), using commercial dry-cleaning machines, for fabrics and garments. It comprises a procedure for normal materials and procedures for sensitive and very sensitive materials (see definitions 3.4 and 3.5).

10 Page Gr-XA JT

BDS ISO 3175-3:2008

Textiles- Professional care, drycleaning and wetcleaning of fabrics and garments - Part 3: Procedure for testing performance when cleaning and finishing using hydrocarbon solvents

This part of ISO 3175 specifies drycleaning procedures for hydrocarbon solvents, using commercial drycleaning machines, for fabrics and garments. It comprises procedures for normal and sensitive materials. When using commercial drycleaning equipment, national regulations and normal safety precautions should be observed.

10 Page Gr-XA JT

BDS ISO 3175-4:2008

Textiles- Professional care, drycleaning and wetcleaning of fabrics and garments-Part 4: Procedure for testing performance when cleaning and finishing using simulated wetcleaning

This part of ISO 3175 specifies simulating professional wetcleaning procedures, using a reference machine for fabrics and garments. It comprises a normal process for normal materials, a mild process for sensitive materials and a very mild process for very sensitive materials

14 Page Gr-XB JT

Ropes and Cordages- Equivalence between Natural Fibre Ropes and Man- made Fibre Ropes for use in the mooring of vessels

This International Standard provides a table of equivalence between certain natural fibre and man-made fibre ropes for use in the mooring of ships.

05 Page Gr-XA JT

BDS ISO 3635:2006

Size Designation of Clothes- Definitions and Body Measurement Procedure

This international standard defines body dimensions and specifies a standard procedure for measuring the body.

08 Page Gr-XA JT

BDS ISO 3636:2007

Size designation of clothes- Men's and boy's outerwear garments

This International Standard establishes a System of designating the sizes of men's and boy's outerwear garments (including knitwear and swimwear) that are classified as:

- a) covering the upper or the whole body, or
- b) covering the lower body only and applies to civilian and uniform garments. Both the control dimensions on which the size designation System is based and the method of indicating the size designation on a garment label are laid down.

06 Page Gr-XA JT

BDS ISO 3637:2007

Size designation of clothes- Women's and girls outerwear garments

This International Standard establishes a System of designating the sizes of women's and girl's outerwear garments (including knitwear and swimwear) that are classified as:

- a) covering the upper or the whole body, or
- b) covering the lower body only and applies to civilian and uniform garments. Both the control dimensions on which the size designation System is based and the method of indicating the size designation on a garment label are laid down.

06 Page Gr-XA JT

BDS ISO 3638:2007

Size designation of clothes- Infants' garments

This International Standard establishes a system of designating the sizes of infants' garments? Both the control dimension on which the size designation system is based, and the method of indicating the size designation on a garment label, are laid down.

06 Page Gr-XA JT

BDS ISO 3758:2013

Textiles- Care labelling code using symbols

This International Standard establishes a system of graphic symbols, intended for use in the marking of textile articles, and for providing information on the most severe treatment that does not cause irreversible damage to the article during the textile care process, and - specifies the use of these symbols in care labelling.

22 Page Gr-XC JT

BDS ISO 3759:2006

Textiles-Preparation, marking and measuring of fabric specimens and garments in tests for determination of dimensional Change

This International Standard specifies a method for the preparation, marking and measuring of textile fabrics, garments and fabric assemblies for use in tests for assessing dimensional Change after specified treatment, e.g. washing, dry cleaning, soaking in water and steaming.

07 Page Gr-XA JT

BDS 3801:2010

Textiles- Woven fabrics- Determination of mass per unit length and mass per unit area

This International Standard specifies methods for the determination of:

- a) the mass per unit length, and
- b) the mass per unit area of woven fabrics that have been conditioned in the Standard atmosphere for testing.

09 Page Gr-XA JT

BDS ISO 3914-1:2008

Textile machinery and accessories- Cylindrical tubes- Part 1: Recommended main dimensions

This part of ISO 3914 gives the recommended main dimensions of cylindrical tubes (inner diameters and lengths) used in the field of textile machinery.

06 Page Gr-XA JT

BDS ISO 3914-2:2008

Textile machinery and accessories - Cylindrical tubes - Part 2: Dimensions, tolerances and designation of tubes for open-end spinning machines

This part of ISO 3914 specifies the main dimensions, tolerances and designation of cylindrical tubes for open-end spinning (for example, rotor spinning). Furthermore, directives are given for the characteristics of tubes and for the control of the inner diameter and length of the tube.

06 Page Gr-XA JT

BDS ISO 3914-3:2008

Textile machinery and accessories- Cylindrical tubes- Part 3: Dimensions, tolerances and designation of tubes for tape yarns

This part of ISO 3914 specifies the main dimensions, tolerances and designation of cylindrical tubes for tape yarns. Furthermore, directives are given for the characteristics of tubes and for the control of the inner diameter and length of the tube.

06 Page Gr-XA JT

BDS ISO 3914-4:2008

Textile machinery and accessories- Cylindrical tubes- Part 4: Dimensions, tolerances and designation of tubes for textured yarns

This part of ISO 3914 specifies the main dimensions, tolerances and designation of cylindrical tubes for textured yarns. Furthermore, directives are given for the characteristics of tubes and for the control of the inner diameter and length of the tube.

06 Page Gr-XA JT

BDS ISO 3914-5:2008

Textile machinery and accessories Cylindrical tubes Part 5: Dimensions, tolerances and designation tubes for continuous spin-drawn synthetic filament yarns

This part of ISO 3914 specifies the main dimensions, tolerances and designation of cylindrical tubes for continuous spin-drawn synthetic filament yarns. This would include the spin-draw-texturizing process additionally. Furthermore, directives are given for the characteristics of tubes and for the control of the inner diameter and length of the tube.

16 Page Gr-XB JT

BDS ISO 3914-6:2008

Textile machinery and accessories- Cylindrical tubes- Part 6: Dimensions, tolerances and designation of tubes for cross-wound packages in winding and twisting

This part of ISO 3914 specifies the main dimensions, tolerances and designation of cylindrical tubes for cross-wound packages in winding and twisting. Furthermore, directives are given for the characteristics of tubes and for the control of the inner diameter and length of the tube.

06 Page Gr-XA JT

BDS ISO 3914-7:2008

Textile machinery and accessories- Cylindrical tubes- Part7: Dimensions, tolerances and designation of perforated tubes for cheese dyeing

This part of ISO 3914 specifies the main dimensions, tolerances and designation of cylindrical tubes of perforated tubes for cheese dyeing. Furthermore, directives are given for the characteristics of tubes and for the control of the inner diameter and length of the tube.

06 Page Gr-XA JT

BDS ISO 3998:2008

Textiles-Determination of resistance to certain insect pests

This International Standard specifies a method for the determination of the resistance of textiles to the larvae of certain insects. It is applicable to all textiles containing animal fibre in any proportion. Information relating to the breeding of the larvae is given in the annex.

06 Page Gr-XA JT

BDS ISO 4105:2008

Textile machinery and accessories - Wires for flexible card clothings

This International Standard specifies the dimensions, the shapes and sections of wires for flexible card clothings.

05 Page Gr-XA JT

BDS ISO 4167:2007

Polyolefin agricultural twines

This International Standard specifies the principal properties of polyolefin agricultural twines, the test methods which permit their verification, and the form of delivery for the twines.

11 Page Gr-XB JT

BDS ISO 4415:2007

Size designation of clothes- Men's and boys' underwear, nightwear and shirts

This International Standard establishes a System of designating the sizes of men's and boys' underwear, nightwear and shirts that are classified as

- a) covering the upper body only, or
- b) covering the whole body, or
- c) covering the lower body only.

06 Page Gr-XA JT

BDS ISO 4416:2006

Size designation of clothes-women's and girls underwear, nightwear, foundation garments and shirts

This international standard establishes a system of designating the sizes of women's and girls underwear garments, nightwear, foundation garments and shirts that are classified.

08 Page Gr-XA JT

BDS ISO 4417 :2007**Size designation of clothes- Headwear**

This International Standard establishes a System of designating the sizes of headwear.

04 Page Gr-XA JT

BDS ISO 4418:2006**Size Designation of Clothes- Gloves**

This international standard establishes a system of designating the sizes of gloves.

05 Page Gr-XA JT

BDS ISO 4880:2008**Burning behaviour of textiles and textile products- Vocabulary**

This International Standard defines terms used in testing the burning behaviour of textiles and textile products. Although some of the terms have wide general usage and may be applicable to many materials and products, the definitions herein are in accordance with the use of the terms in the textile field.

18 Page Gr-XB JT

BDS ISO 4911:2009**Textiles- Cotton fibres- Equipment and artificial lighting for cotton classing rooms**

This International Standard specifies requirements for artificial illumination used for judging accurately and uniformly the colour of cotton. It also describes a method of test for appraising the colour quality of lamps procured for this purpose.

08 Page Gr-XA JT

BDS ISO 4912:2009**Textiles- Cotton fibres- Evaluation of maturity- Microscopic method**

This International Standard specifies a method for the evaluation of the maturity of raw cotton fibres, or fibres taken from cotton articles which have not been chemically processed.

It is applicable to test specimens taken at random. Annex B describes other methods of sampling, based on fibre Sorter diagrams, or arranged fibres, which permit slightly more accurate appraisals of fibre maturity.

08 Page Gr-XA JT

BDS ISO 4913:2009**Textiles-cotton fibres-determination of length (span length) and uniformity index**

This International Standard specifies a method of test for the determination of the length and uniformity index of cotton fibres by scanning a test beard in an optical device.

08 Page Gr-XA JT

BDS ISO 4920:2012**Textile fabrics- Determination of resistance to surface wetting (Spray test)**

This International Standard specifies a spray test method for determining the resistance of any fabric - which may or may not have been given a water-resistant or water-repellent finish-to surface wetting by water.

04 Page Gr-XA JT

BDS ISO 5077:2008**Textiles - Determination of dimensional change in washing and drying**

This International Standard specifies a method for determination of the dimensional change of fabrics, garments or other textile articles when subjected to an appropriate combination of specified washing and drying procedures.

04 Page Gr-XA JT

BDS ISO 5080:2007**Sisal Agricultural Twines**

This International Standard establishes the principal properties of sisal agricultural twines, prescribes methods of test permitting their verification and specifies the form of commercial presentation for the twines.

08 Page Gr-XA JT

BDS ISO 5084:2009**Textiles - Determination of thickness of textiles and textile products**

This International Standard specifies a method for the determination of the thickness of textiles and textile products when under a specified pressure. It is not applicable to textile floor coverings, nonwovens, geotextiles and coated fabrics for which specific International Standards exist.

07 Page Gr-XA JT

BDS ISO 5085-1:2008**Textiles- Determination of thermal resistance- Part 1: Low thermal resistance**

This part of ISO 5085 specifies a method for the determination of the resistance of fabrics, fabric assemblies or fibre aggregates in sheet form to the transmission of heat through them in the "steady state" condition. It applies to materials whose thermal resistance is up to approximately 0.2 m² K/W (see however "Introduction", last Paragraph).

10 Page Gr-XA JT

BDS 5088:2009**Textiles- Ternary fibre mixtures- Quantitative analysis**

(Cancels and replaces by BDS ISO 1832-2)

JT

BDS ISO 5089:2008**Textiles- Preparation of laboratory test samples and test specimens for chemical testing**

This International Standard specifies methods of obtaining laboratory test samples of textile materials from laboratory bulk samples taken from a bulk Source, and gives general directions for the preparation of test specimens of convenient size for chemical tests.

No Provision for sampling from the bulk Source is described since it is assumed that the laboratory bulk Sample has been selected by a suitable procedure and is representative of the bulk Source.

06 Page Gr-XA JT

BDS ISO 5232:2007

Graphical Symbols for Textile Machinery

This International Standard lays down the graphical symbols and the corresponding referents in the English, French, Russian, Spanish and Italian languages in the field of textile machinery.

29 Page Gr-XC JT

BDS ISO 5233:2007

Textile machinery and accessories- Bottom fluted rollers for drafting Systems

This International Standard specifies the diameters and the widths of fluted bosses on bottom rollers for spinning preparatory and spinning machinery.

03 Page Gr-XA JT

BDS ISO 5234:2007

Textile machinery and accessories- Metallic card clothing- Definitions of dimensions, types and mounting

This International Standard defines dimensions, types and mounting of saw-tooth wire for metallic card clothing with various cross-sections and tooth forms

24 Page Gr-XC JT

BDS ISO 5238-1:2008

Textile machinery and accessories- Packages of yarns and intermediate products- Part 1: Terminology

This part of ISO 5238 defines the terms used for packages of yarns and intermediate products.

14 Page Gr-XB JT

BDS ISO 5238-2:2008

Textile machinery and accessories- Packages of yarns and intermediate products- Part 2 : Forms of winding

This part of ISO 5238 specifies forms of winding suitable for winding yarns and similar products (for example, tape yarns, roving, sliver) onto tubes or other formers. It may be applied to spinning, twisting and winding machinery as well as to other machines fitted with winding devices. All forms of winding are a combination of the rotation of the package and the lateral movement of the yarn relative to the package

14 Page Gr-XB JT

BDS ISO 5239:2008

Textile machinery and accessories- Winding -Basic terms

This International Standard defines basic terms used in the winding of yarns, onto formers or other suitable devices, by means of winding machines. This does not exclude the use of the terms in question for other textile processes, for example, spinning, twisting. This International Standard applies also to yarn-like textile materials such as filaments and man-made tapes.

18 Page Gr-XB JT

BDS ISO 5240:2008

Textile machinery and accessories- Warp creels- Main dimensions

This International Standard establishes terminology for warp creels and specifies their main dimensions. The pitches P should be applied for simple warp creels and only for packages unwound overend.

06 Page Gr-XA JT

BDS ISO 5243:2009

Textile machinery and accessories- Numbering of heald frames and drop wire bars in a loom

This International Standard gives the principle for the numbering of the heald frames and drop wire bars of the warp stop motions in a loom.

04 Page Gr-XA JT

BDS ISO 5247-1:2010

Textile machinery and accessories- Weaving machines- Part 1: Vocabulary and classification

This part of ISO 5247 establishes a vocabulary and system of classification for weaving machines used in the textile industry for the production of woven fabrics by the weaving technique, i.e. by interlacing two (or more) systems of parallel threads, and by machines using hybrid forming methods.

18 Page Gr-XB JT

BDS ISO 5247-2:2010

Textile machinery and accessories- Weaving machines- Part 2: Accessories- Vocabulary

This part of ISO 5247 defines the basic terms for accessories of weaving machines. These terms are subdivided into five categories.

17 Page Gr-XB JT

BDS ISO 5247-3:2010

Textile machinery and accessories- Weaving machines- Part 3: Parts of the machine- Vocabulary

This part of ISO 5247 defines the basic terms of parts of weaving machines. These terms are subdivided into the following eight categories:

28 Page Gr-XC JT

BDS ISO 5971:2006

Size designation of clothes- Pantyhose

This International Standard establishes a system of designating the sizes of pantyhose (including tights). Both the control dimensions on which the size designation system is based, and the method of indicating the size designation on a garment label are laid down.

BDS ISO 6170:2007**Spinning machinery- Condenser rubbers for cards**

This International Standard specifies the main dimensions of condenser rubbers for cards

04 Page Gr-XA JT

BDS ISO 6173:2008**Open- end spinning machines- Vocabulary**

The terms and definitions given in this International Standard have been confined to those Parts of the spinning machine which are specific to open-end yarn production technology. Terms and definitions which relate to machine Parts for which definitions appear elsewhere, for example in ISO 477 and ISO 2205, are not included.

13 Page Gr-XB JT

BDS ISO 6176:2009**Textile machinery- Warp sizing machines- Maximum usable width**

This International Standard specifies the various maximum usable widths for the entry and delivery sections of a warp sizing machine.

03 Page Gr-XA JT

BDS ISO 6177:2010**Textile machinery- Cloth rollers- Terminology and main dimensions**

This International Standard defines the basic terms, lays down the main dimensions and gives specifications of cloth rollers used for winding fabrics and feeding subsequent machines.

06 Page Gr-XA JT

BDS ISO 6330:2006**Textile- Domestic washing and drying procedures for textile testing**

This International Standard specifies domestic washing and drying procedures for textile testing. The procedures are applicable to textile fabrics, garments or other textile articles which are subjected to appropriate combinations of domestic washing and drying procedures.

18 Page Gr-XA JT

BDS ISO 6347:2004**Textile floor coverings- Consumer information**

This International Standard specifies the technical subjects that form the basis for the provision of information at the point of sale, for the guidance of the consumer prior to and after the purchase of a textile floor covering. It is applicable to textile floor coverings of all types.

08 Page Gr-XA JT

BDS ISO 6348:2008**Textiles- Determination of mass- Vocabulary**

This International Standard defines the principal terms relating to the quantification of the mass of water and extractable matter contained in a textile material. The terms defined in this International Standard may be used in the determination of the commercial mass of a

consignment textile material, in the determination of linear, area and volume densities of textile materials and in the determination of the composition by mass of the different components of a mixture of textile fibres.

04 Page Gr-XA JT

BDS ISO 6741-1:2000**Textiles-fibres and yarns- Determination of commercial mass of consignment Part 1: Mass determination and calculation.**

15 Page Gr-XB JT

BDS ISO 6741-2:2000**Textiles- fibres and yarns- Determination of commercial mass of consignments Part-2 : methods for obtaining laboratory samples**

This part of ISO 6741 specifies a method for obtaining laboratory samples for mass determination by one of the methods given in ISO 6741-1. The method appropriate for particular fibres is indicated in ISO 6741-4.

09 Page Gr-XA JT

BDS ISO 6741-3:2000**Textiles - fibres and yarns - Determination of commercial mass of consignments Part-3: Specimen cleaning procedures**

This part of ISO 6741 specifies specimen cleaning procedures to be used when the commercial mass is to be determined in accordance with ISO 6741-1 on a clean and dry basis. The procedure appropriate for a particular fibres is given in ISO 6741-4.

09 Page Gr-XA JT

BDS ISO 6939:1998**Textiles- Yarns from packages- Methods of test for breaking strength of yarn by the skein method**

This international standard specifies a method for the determination of the breaking strength by the skein method.

09 Page Gr-XA JT

BDS ISO 7211-1:2008**Textiles-Woven fabrics-Construction-Methods of analysis- Part 1: methods for the presentation of a weave diagram and plans for drafting, denting and lifting**

This part of ISO 7211 deals with recording of fabric weaves and makes provision for showing in relation to the weave repeat the sequence in which yarns of different character are used. A method is also provided for the presentation of the warp and weft yarn arrangement.

06 Page Gr-XA JT

BDS ISO 7211-2:2008**Textiles-woven fabrics – Construction - Methods of analysis - Part 2: determination of number of threads per unit length**

This part of ISO 7211 specifies three methods for the determination of the number of threads per centimetre in woven fabrics. Any of the three methods may be used, the choice depending on the character of the fabric. However, in case of dispute method A is recommended.

06 Page Gr-XA JT

BDS ISO 7211-3:2008

Textiles-Woven fabrics – Construction - Methods of analysis - Part 3: Determination of crimp of yarn in fabric

This part of ISO 7211 specifies a method for the determination of crimp of yarn in fabric. The method is applicable to most woven fabrics but is unsuitable for fabrics manufactured in such a way as to render removal of the crimp from the yarns impossible or impractical under the specified straightening tension

06 Page Gr-XA JT

BDS ISO 7211-4:2008

Textiles -woven fabrics-Construction-methods of analysis- part 4: determination of twist in yarn removed from fabric

This part of ISO 7211 specifies a method for the determination of twist in yarns removed from woven fabrics. The method is only applicable to yarns spun on conventional systems, and is not applicable to OE (open-end spun) or interlaced yarns, for example.

04 Page Gr-XA JT

BDS ISO 7211-5:2008

Textiles-woven fabrics-Construction-methods of analysis-part 5: determination of linear density of yarn removed from fabric

This part of ISO 7211 specifies methods for the determination of linear density of yarn removed from fabric. It relates to yarns of nominally uniform linear density; it describes the method of removing threads from fabric, and specifies the number of threads whose straightened length is to be determined and the methods of determining the mass of all the threads.

06 Page Gr-XA JT

BDS ISO 7211-6:2008

Textiles-Woven fabrics-Construction-Methods of analysis-Part 6: Determination of the mass of warp and weft per unit area of fabric

this part of iso 7211 specifies methods for determining the mass of the warp and weft threads per unit area of fabric after the removal of any non-fibrous matter.

03 Page Gr-XA JT

BDS ISO 7768:2012

Textiles-Test method for assessing the smoothness appearance of fabrics after cleansing

Specifies a method for assessing the retention of the original smooth appearance, after one or several cleansing treatments, of the fabrics tested. This method has been developed for use primarily with type B domestic washing machines, as defined in ISO 6330, in the cleansing process. However, it may be possible to use it with type A machines, as defined in the same International Standard.

10 Page Gr-XA JT

BDS ISO 7771:2006

Textile-Determination of dimensional changes of fabrics induced by cold- Water immersion

This International Standard specifies a method for determination of the dimensional changes that occur when a fabric is subjected to immersion in cold water without agitation, and dried. It is applicable to fabrics which, in use, are subjected to cold water without agitation.

07 Page Gr-XA JT

BDS ISO 8114:2007

Textile – Machinery and accessories–Spindles for ring-spinning and doubling machinery-list of equivalent terms

This International Standard gives equivalent terms in English, French, Russian, German and Italian relating to spindles for ring-spinning and doubling machines.

06 Page Gr-XA JT

BDS ISO 8115:2003

Cotton Bales- Dimensions and Density

This International Standard lays down the nominal overall dimensions and the bale density of banded cotton bales. It applies to the shaping and forming, the transport and the opening of the bales. It does not apply to wrapping, to banding and to the marking of bales.

06 Page Gr-XA JT

BDS ISO 8115-2:2003

Bales- Part 2, bales of man-made staple fibres- Dimensions

This part of ISO 8115 specifies the overall dimensions of banded bales of man-made staple fibres. The specified dimensions allow for an optimum utilisation of the loading space of freight containers and trucks.

07 Page Gr-XA JT

BDS ISO 8115-3:2003

Bales- Part- 3: Bales of cotton- Packaging and Labelling

This part of ISO 8115 specifies details for packaging and labelling of cotton bales.

06 Page Gr-XA JT

BDS ISO 8116-1:2008

Textile machinery and accessories- Beams for winding- Part 1:General vocabulary

This part of ISO 8116 is considered the basic Standard for beams and lays down the general vocabulary as well as the structure for the various types of beams for winding.

For particular applications subsequent Parts of ISO 8116 should be consulted. Such subsequent Parts give full information on dimensions of specific beams for winding as well as information on beam flanges and the method of measuring variations of form and Position.

10 Page Gr-XA JT

BDS ISO 8116-2:2008

Textile machinery and accessories-Beams for winding- Part 2: Warper's beams

This part of ISO 8116 defines the basic terms and lays down the main dimensions, the variations of form and Position, the driving devices and the designation for warpers beams with and without shafts.

10 Page Gr-XA JT

BDS ISO 8116-3:2008

Textile machinery and accessories-Beams for winding-Part 3: Weaver's beams

This part of ISO 8116 defines the basic terms and lays down the main dimensions and the variations in form and Position for weaver's beams that are used for weaving preparation as well as for weaving. Furthermore the main dimensions of the Profile threads for weaver's beams are given.

10 Page Gr-XA JT

BDS ISO 8116-4:2008

Textile machinery and accessories-Beams for winding-Part 4: Quality classification of flanges for weaver's beams, warper's beams and sectional beams

This part of ISO 8116 explains the theoretical relationships and gives directives for practical use, allowing classification of beam flanges.

10 Page Gr-XA JT

BDS ISO 8116-5:2008

Textile machinery and accessories- Beams for winding Part 5: Sectional beams for warp knitting machines

This part of ISO 116 specifies the main dimensions, mechanical strength, designation and permissible values of tolerances of form and position for the main elements of sectional beams for warp knitting machines. For cases where a limit must be fixed for the residual imbalance,a recommendation is made for the choice of quality grade.

10 Page Gr-XA JT

BDS ISO 8116-6:2008

Textile machinery and accessories - Beams for winding-Part 6: Beams for ribbon weaving and ribbon knitting

This part of ISO 8116 defines the basic terms and designation and lays down the main dimensions as well as the Variation of form and Position for beams for ribbon weaving and ribbon knitting.

12 Page Gr-XB JT

BDS ISO 8116-7:2008

Textile machinery and accessories - Beams for winding- Part 7: Beams for dyeing slivers, rovings and yarns

This part of ISO 8116 defines the basic terms and designation, and lays down the main dimensions as the driving devices for perforated beams used for dyeing slivers, rovings or yarns.

10 Page Gr-XA JT

BDS ISO 8116-8:2008

Textile machinery and accessories- Beams for winding- Part 8:Definitions of run-out tolerances and methods of measurement

This part of ISO 8116 defines variations of form and Position, i.e. axial circular run-out tolerance of barrel run-out tolerance of langes with and without shafts, and gives the methods of measuring of form and Position. I anges and total such variations.The maximum tolerances together with the recommended limit for residual unbalance are specified in the Parts of ISO 8116 for each type of beam.

10 Page Gr-XA JT

BDS ISO 8116-9:2008

Textile machinery and accessories- Beams for winding -Part 9:Dyeing beams for textile fabrics

This part of ISO 8116 specifies the terminology, principal dimensions and designation of dyeing beams for textile fabrics.

05 Page Gr-XA JT

BDS ISO 8159:2008

Textiles- Morphology of fibres and yarns-Vocabulary

This International Standard defines the principal terms used to describe the various forms into which textile fibres can be assembled, up to and including cabled yarns.

08 Page Gr-XA JT

BDS ISO 8160:2007

Textured- Filament Yarns- Vocabulary

This International Standard names the various types of textured filament yarn and defines them in terms of the processes by which they are produced.

05 Page Gr-XA JT

BDS ISO 8489-1:2009

Textile machinery and accessories - Cones for Cross winding -Part 1:Recommended main dimensions

This part of ISO 8489 specifies the recommended types of cones (values of half angles, lengths and large inner diameters) used in the field of textile industry..

08 Page Gr-XA JT

BDS ISO 8489-2:2009

Textile machinery and accessories - Cones for Cross winding- Part 2: Dimensions, tolerances and designation of cones with half angle 3° 30'

This part of ISO 8489 specifies the main dimensions, tolerances and designation of cones for Cross winding with a half angle of cone 3° 30'. Furthermore, directives are given for the characteristics of cones and for the control of the diameters and lengths of the cone.

08 Page Gr-XA JT

BDS ISO 8489-3:2009

Textile machinery and accessories- Cones for Cross winding-Part 3: Dimensions, tolerances and designation of cones with half angle 4° 20'

This part of ISO 8489 specifies the main dimensions, tolerances and designation of cones for Cross winding with a half angle of cone 4° 20'. Furthermore, directives are given for the characteristics of cones and for the control of the diameters and lengths of the cone.

08 Page Gr-XA JT

BDS ISO 8489-4:2009**Textile machinery and accessories - Cones for Cross winding- Part 4: Dimensions, tolerances and designation of cones with half angle 4 20' for winding for dyeing purposes**

This part of ISO 8489 specifies the main dimensions, tolerances and designation of cones for cross winding for dyeing purposes with a half angle of cone 4 20'. Furthermore, directives are given for the characteristics of cones.

08 Page Gr-XA JT

BDS ISO 8489-5:2009**Textile machinery and accessories- Cones for cross winding- Part 5: Dimensions, tolerances and designation of cones with half angle 5 57**

This part of ISO 8489 specifies the main dimensions, tolerances and designation of cones for cross winding with a half angle of cone 5 57. Furthermore, directives are given for the characteristics of cones and for the control of the diameters and lengths of the cone.

08 Page Gr-XA JT

BDS ISO 8498:1998**Woven fabrics-description of defects vocabulary**

This international standard describes defects, which commonly appear during the inspection of knitted piece goods.

13 Page Gr-XB JT

BDS ISO 8499:1998**Knitted fabrics- description of defects vocabulary**

This international standards describes defects, which commonly appear during the inspection of knitted piece goods.

10 Page Gr-XA JT

BDS ISO 8559:2007**Garment Construction and Anthropometric Surveys Body Dimensions**

This International Standard defines the location of body dimensions taken on anthropometric surveys and for the preparation of garment patterns and garment stands, and specifies a standard procedure for measuring the body.

10 Page Gr-XA JT

BDS ISO 9240:2007**Textiles- Design of apparel for reduced fire hazard**

This report sets out the design characteristics to be considered in designing apparel with a reduced fire risk. It also indicates the need to consider the garment as a whole rather than just the flammability of the fabric, in order to economically minimize the risk of flame burns. The risk of burn injury due to garments made from inherently flammable fabrics can be substantially reduced using the criteria herein.

04 Page Gr-XA JT

BDS ISO 9354:2005**Textiles-Weaves- Coding system and examples**

This international standard establishes a code for the systematic numerical for basic weaves and their simple derivatives.

10 Page Gr-XA JT

BDS ISO 9554:2007**Fibre Ropes - General Specifications**

This International Standard specifies the general characteristics of fibre ropes and their constituent materials. It is intended to be used in conjunction with the standards for the individual types of fibre rope, which cover the physical properties and specific requirements for that particular product type.

22 Page Gr-XC JT

BDS ISO 9862:2008**Geotextiles- Sampling and preparation of test specimens**

This International Standard establishes general principles for the sampling of geotextiles and preparation of test specimens from the samples.

06 Page Gr-XA JT

BDS ISO 9863-1:2008**Geosynthetics - Determination of thickness at specified pressures- Part 1:Single layers**

This part of EN ISO 9863 specifies a method for the determination of the thickness of geosynthetics at specified pressures and defines the pressure at which the nominal thickness is determined. The test results are intended for identification purposes and for use in technical data sheets and/or as part of other test methods, e.g. tests of hydraulic properties. The method is applicable to all geosynthetics.

10 Page Gr-XA JT

BDS ISO 9863-2:2008**Geotextiles and geotextile- Related products- Determination of thickness at specified pressures - Part 2: Procedure for determination of thickness of single layers of multilayer products**

This part of EN ISO 9863 specifies a method for determination of the thickness of single layers of multilayer products at specified pressures.

10 Page Gr-XA JT

BDS ISO 9864:2008**Geosynthetics- Test method for the determination of mass per unit area of geotextiles and geotextile-Related products**

This document specifies a method for the determination of mass per unit area of geotextiles and geotextile-related products for identification purposes and for use in technical data sheets. The method is applicable to all geotextiles and geotextile-related products

08 Page Gr-XA JT

BDS ISO 9865:2000**Textiles- Determination of water Repellency of fibres by the Bundesmann rain shower test**

This International Standard describes a method for the determination of the water repellency of textile fabrics by a rain-shower test known as the Bundesmann method.

09 Page Gr-XA JT

BDS ISO 9866-1:2004

Textiles-Effect of dry heat on fabrics under low pressure Part 1: Procedure for dry- heat treatment of fabrics

This part of ISO 9866 specifies a method for the dry-heat treatment of fabrics for use in assessing the dimensional stability and other heat-related properties of fabrics (see e.g. ISO 9866-2:1991).

05 Page Gr-XA JT

BDS ISO 9866-2:2004

Textiles-Effect of dry heat on fabrics under low pressure-Part 2: Determination of dimensional change in fabrics exposed to dry heat

This part of ISO 9866 specifies a method for the measuring the dimensional change of fabrics on exposure to dry heat. It is intended to predict the behaviour of fabrics in garment-making processes such as fusing and transfer printing.

06 Page Gr-XA JT

BDS ISO 9902-1:2007

Textile Machinery- Noise test code- Part 1: General Requirements

This part of ISO 9902 gives requirements for carrying out, efficiently and under standardized conditions, the determination, declaration and verification of basic noise emission quantities common to the types of textile machinery dealt with in ISO 9902-2 to ISO 9902-7. It specifies noise measurement methods, as well as the mounting and operating conditions, to be used for this noise test code.

17 Page Gr-XB JT

BDS ISO 9902-2:2007

Textile machinery- Noise test code- Part 2: Spinning preparatory and spinning machinery

This part of ISO 9902, taken together with ISO 9902-1, specifies the mounting, operating and measuring conditions required for the measurement, declaration and verification of noise emitted by spinning preparatory and spinning machinery.

17 Page Gr-XB JT

BDS ISO 9902-4:2007

Textile machinery- Noise test code- Part 4: Yarn processing, cordage and rope manufacturing machinery

This part of ISO 9902, taken together with ISO 9902-1, specifies the mounting, operating and measuring conditions required for the measurement, declaration and verification of noise emitted by yarn processing, cordage and rope manufacturing machinery.

13 Page Gr-XB JT

BDS ISO 9902-5:2009

Textile machinery- Noise test code- Part 5: Weaving and knitting preparatory machinery

This part of ISO 9902, taken together with ISO 9902-1, specifies the mounting, operating and measuring conditions required for the measurement, declaration and verification of noise emitted by weaving and knitting preparatory machinery.

14 Page Gr-XB JT

BDS ISO 9902-6:2009

Textile machinery - Noise test code- Part 6: Fabric manufacturing machinery

This part of ISO 9902, taken together with ISO 9902-1, specifies the mounting, operating and measuring conditions required for the measurement, declaration and verification of noise emitted by fabric manufacturing machinery. It is applicable to engineering (grade 2) and survey (grade 3) methods, in accordance with the International Standards to which it makes normative reference.

17 Page Gr-XB JT

BDS ISO 9903-1:2007

Textile machinery and accessories- Main dimensions for section wires for metallic card clothing-Part 1: Foot without interlocking or interchanging

This part of ISO 9903 specifies the main dimensions for section wires for metallic card clothing with foot without interlocking or interchanging

06 Page Gr-XA JT

BDS ISO 9903-2:2007

Textile machinery and accessories- Main dimensions for section wires for metallic card clothing- Part 2: Foot with interchanging

This part of ISO 9903 specifies the main dimensions for section wires for metallic card clothing with interchanging foot.

04 Page Gr-XA JT

BDS ISO 9904:2007

Textile machinery and accessories-Steel pins for spinning preparatory and spinning machinery

This International Standard specifies the dimensions, characteristics and designations of steel pins recommended for spinning preparatory and spinning machinery.

14 Page Gr-XB JT

BDS ISO 9947:2007

Textile machinery and accessories- Two-for-one twistors- Vocabulary

This International Standard establishes a vocabulary of terms used in the textile industry in respect of textile industry two-for-one twistors.

17 Page Gr-XB JT

BDS ISO 10132:2007

Textured- Filament Yarns-Definition

This International Standard establishes terms and definition for characteristics of textured filament yarns.

05 Page Gr-XA JT

BDS ISO 10290:2008

Textiles- Cotton yarns- Specifications

This International Standard specifies criteria, with relevant test methods, to be applied in describing single spun grey cotton yarns, which are widely used in international trade.

09 Page Gr-XA JT

BDS ISO 10306:2015

Textiles- Cotton fibres- Evaluation of maturity by the air flow method

This International Standard specifies a method for the evaluation of the maturity of loose randomized cotton fibres by measuring the resistance to air flow of a plug of cotton fibres under two prescribed conditions. The method is applicable to cotton taken at random from bales. Laps and slivers or other sources of lint cotton may be tested, however results may differ if fibres are taken from bales.

06 Page Gr-XA JT

BDS ISO 10318:2008

Geosynthetics- Terms and definitions

This International Standard defines terms related to functions, products, properties and other terms, as well as symbols applying to geosynthetics. Definitions of terms not included in this standard may be found in the standards describing appropriate test methods

40 Page Gr-XD JT

BDS ISO 10319:2008

Geotextiles- Wide-width tensile test

This International Standard describes an index test method for determination of the tensile properties of geotextiles and related products, using a wide-width Strip. The method is applicable to most geotextiles, including woven fabrics, nonwovens, geocomposites, knitted fabrics and felts. The method is also applicable to geogrids, but specimen dimensions may need to be altered.

10 Page Gr-XA JT

BDS ISO 10320:2008

Geotextiles- Identification on site

This International Standard specifies the information accompanying geotextiles to enable the worker on site to identify the goods as being identical to the goods ordered. The information specified cannot be used to assess the compliance of the product with technical requirements.

06 Page Gr-XA JT

BDS ISO 10321:2008

Geotextiles- Tensile test for joints/seams by wide-width method

This International Standard specifies an index test method for determination of the tensile properties of joints and seams in geotextiles and related products,

using a wide-width strip. The method is applicable to most geotextiles and geotextile-related products. It is also applicable to geogrids, but the specimen dimensions may need to be altered.

10 Page Gr-XA JT

BDS ISO 10458:2009

Textile machinery- Square bars for winding devices relating to dyeing and finishing machines- Dimensions.

This International Standard specifies the dimensions of the square section of bars of types A and B for winding devices relating to dyeing and finishing machines.

08 Page Gr-XA JT

BDS ISO 10652:2007

Standard sizing Systems for clothes

This Technical Report establishes a body sizing System to be used for compiling Standard garment sizes for infants (Section men and boys (Section 3) and women and girls (Section 4). Garment dimensions are not contained in this Technical Report

26 Page Gr-XA JT

BDS ISO 10722:2008

Geosynthetics- Index test procedure for the evaluation of mechanical damage under repeated loading- Damage caused by granular material

This International Standard describes an index test procedure for simulating mechanical damage to geosynthetics, caused by granular material, under repeated loading. The damage is assessed visually and by the loss of tensile strength.

10 Page Gr-XA JT

BDS ISO 11058:2008

Geotextiles and geotextile-related products- Determination of water permeability characteristics normal to the plane, without load

This International Standard specifies two test methods for determining the water permeability characteristics of a single layer of geotextile or geotextile-related product normal to the plane: the constant head method and the falling head method.

20 Page Gr-XB JT

BDS ISO 11111-1:2005

Textile machinery-Safety requirements- Part 1: Common requirements

This part of ISO 11111 specifies safety requirements for frequently occurring hazards common to the types of textile machinery and the hazards of certain machine elements covered by ISO 11111-2 to ISO 11111-7.

77 Page Gr-XE JT

BDS ISO 11111-2:2005

Textile machinery- Safety requirements- Part 2: Spinning preparatory and spinning machines

This part of ISO 11111 is intended to be used in conjunction with ISO 11111-1. It specifies significant hazards and corresponding safety requirements and/or measures for spinning preparatory and spinning

machinery. By taking into account the scope of ISO 11111-1 as far as is relevant, this part of ISO 11111 is applicable to all machinery, plant and related equipment intended to be used for opening, cleaning, blending, wool scouring, baling, carding, tow cutting and stretch breaking spinning, preparation subsequent to carding and spinning, as specified in Clause 5.

34 Page Gr-XD JT

BDS ISO 11111-4:2005

Textile machinery- Safety requirements- Part 4: Yarn processing, cordage and rope manufacturing machines

This part of ISO 11111 is intended to be used in conjunction with ISO 11111-1. It specifies significant hazards and corresponding safety requirements and/or measures for yarn processing, cordage and rope manufacturing machinery. By taking into account the scope of ISO 11111-1 as far as is relevant, this part of ISO 11111 is applicable to all machinery, plant and related equipment intended to be used for doubling, twisting, texturing, reeling, winding, ball winding, cordage, rope manufacturing and braiding, as specified in Clause 5.

BDS ISO 11659-1:2007

Textile Machinery and Accessories-Machine part in contact with Textile Processing oils- Part 1: Determination of anticorrosive effect upon steel

This part of ISO 11659 specifies a method for the determination of the anticorrosive effect of textile processing oils upon steel.

06 Page Gr-XA JT

BDS ISO 11659-2:2009

Textile machinery and accessories- Machine parts in contact with textile processing oils Part 2:Determination of the impact on polymeric materials

This part of ISO 11659 specifies tests for determining the impact of processing oils on textile machine parts made of polymeric materials. In view of the multitude of processing oils and polymeric materials, it addresses a selection of those substances and materials. However, testing of products not mentioned is also possible. It is applicable to textile processing oils used on fibres, yarns and the filaments prepared for their processing, and to polymeric materials in the thermoplastics, duroplastics, elastomers and thermoplastic elastomers groups.

19 Page Gr-XB JT

BDS ISO 11659-3:2004

Textile machinery and accessories- Machine parts in contact with textile processing oils- Part 3: Determination of the impact on lacquers

This part of ISO 11659 specifies tests for determining the impact of processing oils on textile machine parts made with lacquers. In view of the multitude of processing oils and lacquer systems, it addresses a selection of those substances and materials. However, testing of products not mentioned is also possible.

13 Page Gr-XB JT

BDS ISO 11676:2015

Textile machinery and accessories- Patterns disks and pattern chains for warp knitting machines-Vocabulary and symbols

This International Standard defines terms and marking of pattern disks and patterns chains for warp knitting machines.

07 Page Gr-XA JT

BDS ISO 11859:2008

Textile floor coverings- Pure wool, hand- knotted pile carpets- Specification

This International Standard specifies requirements for hand-knotted carpets produced from pure wool, of dimensions agreed between the purchaser and the supplier.

08 Page Gr-XA JT

BDS ISO 11860:2005

Textiles floor coverings - Jute carpet backing fabric-specification

This international standard specifies requirements for primary and secondary jute carpet backing fabrics.

08 Page Gr-XA JT

BDS ISO 11861:2008

Textile floor coverings - Coir mats-Types and specification

This International Standard specifies the requirements for mats produced from coir fibre, with or without pile.

06 Page Gr-XA JT

BDS ISO 12027:2015

Textiles - Cotton-fibre stickiness - Detection of sugar by colour reaction

This International Standard describes a method for evaluating the degree of cotton-fibre stickiness arising from honeydew contamination through detection of sugar by the colour reaction of a specific treated paper.

07 Page Gr-XA JT

BDS ISO 12236:2008

Geosynthetics – Static puncture test (CBR) test

This International standard specifies a method for the determination of the puncture resistance by measuring the force required to push a flat ended plunger through geosynthetics. The test is normally carried out on dry specimens conditioned in the specified atmosphere. Alternatively, on request, the test can be carried out on wet specimens.

14 Page Gr-XB JT

BDS ISO 12945-1:2009

Textiles- Determination of fabric propensity to surface fuzzing and to pilling- Part 1: Pilling box method

This part of ISO 12945 describes a method for the determination of the resistance to pilling and surface change of textile fabrics.

08 Page Gr-XA JT

BDS ISO 12945-2:2009

Textiles- Determination of fabric propensity to surface fuzzing and to pilling- Part 2: Modified Martindale method

This part of ISO 12945 specifies a method for determination of the resistance to pilling and surface change of textile fabrics using a modified Martindale method.

18 Page Gr-XB JT

BDS ISO 12947-1:2009

Textiles- Determination of the abrasion resistance of fabrics by the Martindale method- Part 1: Martindale abrasion testing apparatus

This part of ISO 12947 specifies requirements for the Martindale testing apparatus and auxiliary materials for use in the test methods specified in parts 2 to 4 of ISO 12947 for determination of the abrasion resistance of fabrics. This part of ISO 12947 is applicable to apparatus for the testing of:

- a) woven and knitted fabrics;
- b) pile textiles having a pile height of up to 2 mm;
- c) nonwovens

18 Page Gr-XB JT

BDS ISO 12947-2:2009

Textiles- Determination of the abrasion resistance of fabrics by the Martindale method- Part 2: Determination of specimen breakdown

This part of ISO 12947 is applicable to the determination of the inspection interval to breakdown of specimens covering all textile fabrics including nonwovens apart from fabrics where the specified indicates the end performance as having a low abrasion wear life.

14 Page Gr-XB JT

BDS ISO 12947-3:2009

Textiles- Determination of the abrasion resistance of fabrics by the Martindale method- Part 3: Determination of mass loss

This part of ISO 12947 is applicable to the determination of the mass loss of specimens covering all textile fabrics including nonwovens apart from fabrics where the specifier indicates the end performance as having a low abrasion wear life.

14 Page Gr-XB JT

BDS ISO 12947-4:2009

Textiles- Determination of the abrasion resistance of fabrics by the Martindale method- Part 4: Assessment of appearance change

This part of ISO 12947 is applicable to the assessment of the appearance change of specimens covering all textile fabrics including nonwovens and fabrics where the specifier indicates the end performance as having a low abrasion wear life.

14 Page Gr-XB JT

BDS ISO 12956:2008

Geotextiles and geotextile- Related products- Determination of the characteristic opening size

This European standard specifies a method for the determination of the characteristic size of the openings of a single layer of a geotextile or geotextile-related product using the wet-sieving principle

16 Page Gr-XB JT

BDS ISO 12957-1:2008

Geosynthetics - Determination of friction characteristics- Part 1: Direct shear test

This document describes an index test method to determine the friction characteristics of geotextiles and geotextile-related products in contact with a standard sand, i.e. with a specified density and moisture content, under a normal stress and at a constant rate of displacement, using a direct shear apparatus

14 Page Gr-XB JT

BDS ISO 12957-2:2008

Geosynthetics- Determination of friction characteristics- Part 2: Inclined plane test

This document describes a method to determine the friction characteristics of geosynthetics (geotextiles and geotextile-related products, geosynthetic barriers), in contact with soils, at low normal stress, using an inclining plane apparatus

16 Page Gr-XB JT

BDS ISO 12958:2008

Geotextiles and geotextile-related products- Determination of water flow capacity in their plane

This International standard specifies a method for determining the constant head water flow capacity within the plane of a geotextile or geotextile-related product.

18 Page Gr-XB JT

BDS ISO/TR 12960:2009

Geotextiles and geotextile- related products- Screening test method for determining the resistance to liquids

This standard specifies methods for screening the resistance of geotextile products to liquids while not subjecting them to external mechanical stress.

13 Page Gr-XB JT

BDS ISO 13426-1:2009

Geosynthetics – Guidelines for the assessment of durability

This Technical Specification provides guidelines for the assessment of the durability of geosynthetics, the object of which is to provide the design engineer with the necessary information, generally defined as changes in material properties or as partial safety factors, to ensure that the expected design life of a geosynthetic can be achieved with confidence.

42 Page Gr-XE JT

BDS ISO 13426-2:2009

Geotextiles and geotextile-related products- Strength of internal structural junctions- Part 2: Geocomposites

This part of ISO 13426 describes index tests for determining the strength of the internal structural junctions of all geocomposites and of clay geosynthetic barriers.

14 Page Gr-XB JT

BDS ISO 13427:2009

Geotextiles and geotextile-related products - Abrasion damage simulation (sliding block test)

This standard specifies a test method for the determination of the resistance of geotextiles to abrasion using a sliding block. After abrasion the loss in tensile properties is determined. The method is applicable to woven and nonwoven geotextiles and geotextile-related products.

10 Page Gr-XA JT

BDS ISO 13428:2009

Geosynthetics-Determination of the protection efficiency of a geosynthetic against impact damage

This International Standard describes an index test for the determination of the protection efficiency of a geosynthetic on a hard surface, exposed to the impact load of a hemispherical object. The index test measures the change in thickness of a thin lead plate lying between the geosynthetic and a rigid support.

13 Page Gr-XB JT

BDS ISO 13431:2009

Geotextiles and geotextile-related products- Determination of tensile creep and creep rupture behaviour

This Standard specifies a method for determining the tensile creep and creep rupture behaviour of geotextiles and geotextile-related products in an unconfined situation.

13 Page Gr-XB JT

BDS ISO 13433:2009

Geotextiles-Dynamic perforation test (cone drop test)

This International Standard specifies a method to determine the resistance of geosynthetics to penetration by a steel cone dropped from a fixed height.

13 Page Gr-XB JT

BDS ISO TR 13434:2009

Geotextiles and geotextile-related geotextiles and durability

This International Standard specifies a method to determine the resistance of geosynthetics to penetration

by a steel cone dropped from a fixed height. The degree of penetration is an indication of the behaviour of the geosynthetic when sharp stones are dropped on its surface.

13 Page Gr-XB JT

BDS ISO 13437:2009

Geotextiles and geotextile-related products- Method for installing and extracting samples in soil, and testing specimens in laboratory

This standard specifies a method for the on-site installation, retrieval and testing of geotextile samples, irrespective of the particular degradation mechanisms to which they are exposed.

13 Page Gr-XB JT

BDS ISO 13438:2009

Geotextiles and geotextile-related products- Screening test method for determining the resistance to oxidation

This International Standard specifies a screening test method for determining the resistance of geotextiles and geotextile-related products to oxidation. The test is applicable to polypropylene- and polyethylene-based products.

13 Page Gr-XB JT

BDS ISO 13553 :2009

Textile machinery and accessories- Weaver's beams- Specification for connections for automation of beam changing

This International Standard provides specifications for the connections of weaver's beams for the purposes of automation of beam changing. This permits the beams on different weaving machines to be changed in a uniform manner.

06 Page Gr-XA JT

BDS ISO 13754:2007

Textile machinery and accessories- Hexagon nuts and slotted nuts for spinning and twisting spindles

This International Standard specifies the dimensions for hexagon nuts and slotted nuts for spindles used in spinning and twisting machines for textile yarns.

08 Page Gr-XA JT

BDS ISO 13934-1:2006

Textiles-Tensile properties of fabrics-Part 1: Determination of maximum force and elongation at maximum force using the strip method

This part of EN ISO 13934 specifies procedure to determine the maximum force and elongation at maximum force of textile fabrics using method.

10 Page Gr-XA JT

BDS ISO 13934-2:2006

Textiles- Tensile properties of fabrics- Part 2: Determination of maximum force using the grab method

This part of EN ISO 13934 specifies a procedure to determination the maximum force of textile fabrics known as the grab test.

17 Page Gr-XB JT

BDS ISO 13935-1:2015**Textile- Seam tensile properties of fabrics and made-up testile articles-Part 1: Determination of maximum force to seam rupture using the strip method**

This part of EN ISO 13935 specifies a procedure to determine the seam maximum force of sewn seams when the force is applied perpendicularly to the seam. This part EN ISO 13935 specifies the method known as the strip test.

07 Page Gr-XA JT

BDS ISO 13935-2:2015**Textile- Seam tensile properties of fabrics and made-up textile articles- Part 2: Determination of maximum force to seam rupture using the grab method**

This part of EN ISO 13935 specifies methods for the determination of seam maximum force of sewn seams when the force is applied perpendicularly to the seam. This part of EN ISO 13935 describes the method known as the grab test.

13 Page Gr-XB JT

BDS ISO 13936-1:2013**Textiles- Determination of the slippage resistance of yarns at a seam in woven fabrics- Part 1: Fixed seam opening method**

This part of ISO 13936 is intended for the determination of the resistance offered by thread systems of woven fabric, to slippage at a sewn seam. This method is not suitable for stretch fabrics or for industrial fabrics, e.g. beltings.

10 Page Gr-XA JT

BDS ISO 13936-2:2013**Textiles- Determination of the slippage resistance of yarns at a seam in woven fabrics- Part 2: Fixed Load method**

This part of ISO 13936 is intended for the determination of the resistance offered by thread systems of woven fabric, to slippage at a sewn seam. This method is suitable for all apparel and uphosltery wover fabrics, stretch fabrics (including those containing elastomeric yarn) It is not suitable for industrial fabrics, e.g. beltings.

09 Page Gr-XA JT

BDS ISO 13936-3:2013**Textiles- Determination of the slippage resistance of yarns at a seam in woven fabrics- Part 3: Needle clamp method**

This part of ISO 13936 describes a method for the determination of the resistance offered by the yarns of a woven fabric to slippage while being held in a needle clamp under conditions of stress. This method provides a means to negate variations introduced by seam preparation or sewing thread variation that can have a marked influence on test results.

12 Page Gr-XB JT

BDS ISO 13937-1:2005**Textiles-Tear properties of fabrics- Part 1: Determination of tear force using ballistic pendulum method (Elmendorf)**

This part of EN ISO 13937 describes a method known as the ballistic pendulum (Elmendorf method of the determination of tear force of textile fabrics. The method describes the measurment of the tear force required to propagete a single-rip tear of defined length from a cut in a fabric when a sundden force is applied.

20 Page Gr-XB JT

BDS ISO 13937-2:2005**Textiles-Tear properties of fabrics- Part 2: Determination of tear force of trouser-shaped test specimens (single tear method)**

This part of EN ISO 13937 describes a single- tear method to determine fabric tear force, known as the trouser test, using a test specimen cut to form trouser-shaped legs.The tear force measured is the force required to propagale a previously started single tear when the force is applied parallel to the cut and the fabric tears in the direction of applied force.

22 Page Gr-XC JT

BDS ISO 13937-3:2005**Textiles- Tear properties of fabrics- Part 3: Determination of tear force of wing -shaped test specimens (single tear method)**

This part of EN ISO 13937 describes a single- tear method to determine fabric tear force, known as the wing test, using a test specimen cut to form wing for clamping inclined at a defined angle to the thread direction.The tear force measured is the force required to propagale a previously started tear.

19 Page Gr-XB JT

BDS ISO 13937-4:2005**Textiles - Tear properties of fabrics - Part 4: Determination of tear force of tongue-shaped test specimens (double tear method)**

This part of EN ISO 13937 describes a duble- tear method known as the tongue test, using a test specimen with cuts shaped from a tongue.The tear force measured is the force required to propagale a previously started double tears when the force is applied parallel to the cuts and the fabric tears in the direction of applied force.

24 Page Gr-XC JT

BDS ISO 13938-1:2009**Textiles-Bursting properties of fabrics-Part 1: Hydraulic method for determination of bursting strength and bursting distension**

This standard describes a hydraulic method for the determination of bursting strength and bursting distension of textile fabrics. In this part a hydraulic pressure is applied using a constant rate of pumping device.

13 Page Gr-XB JT

BDS ISO 13938-2:2009

Textiles-Bursting properties of fabrics-Part 2:Pneumatic method for determination of bursting strength and bursting distension

his standard describes a pneumatic pressure method for the determination of bursting strength and bursting distension of textile fabrics.

10 Page Gr-XA JT

BDS ISO 14184-1:2015

Textiles-Determination of formaldehyde-

Part 1: Free and hydrolized formaldehyde (water extraction method)

This Part of ISO 14184 specifies a method for determining the amount of free formaldehyde and formaldehyde extracted partly through hydrolysis by means of a water extraction method. The method can be applied to the testing of textile samples in any form.

08 Page Gr-XA JT

BDS ISO 14184-2:2015

Textiles-Determination of formaldehyde- Part 2: Released formaldehyde (vapour absorption method)

This standard specifies a method for determining the amount of formaldehyde released under the conditions of accelerated storage from textiles in any form by means of a vapour absorption method.

12 Page Gr-XB JT

BDS ISO 14419:2012

Textiles - Oil repellency - Hydrocarbon resistance test

This International Standard is applicable to the evaluation of a substrate's resistance to absorption of a selected series of liquid hydrocarbons of different surface tensions.

10 Page Gr-XA JT

BDS ISO 14500:2015

Textile machinery and accessories - Harness for Jacquard weaving machines-Vocabulary

This International Standard defines terms related to harnesses for Jacquard weaving machines used in the textile industry, with the aim of presenting a standardized, prescribed phraseology. It identifies the parts of, and positions on, the harness and establishes a nomenclature for those parts.

05 Page Gr-XA JT

BDS ISO 15228:2015

Textile machinery and accessories - Profile reeds for air jet weaving machines-Dimensions

This International Standard specifies the dimensions and designation for reeds used for air jet weaving machines.

04 Page Gr-XA JT

BDS ISO 15797:2011

Textiles-Industrial washing and finishing procedures for testing of workwear

This International Standard specifies test procedures and equipment which can be used in the evaluation of cotton, polyester/cotton and reverse blend workwear intended to

be industrially laundered. They serve as a basis for testing relevant properties such as e.g. dimensional stability, colour fastness, creasing and seam puckering.

18 Page Gr-XB JT

BDS ISO 15831:2009

Clothing- Physiological effects - Measurement of thermal insulation by means of a thermal manikin

This International Standard describes the requirements of the thermal manikin and the test procedure used to measure the thermal insulation of a clothing ensemble, as it becomes effective for the wearer in practical use in a relatively calm environment, with the wearer either standing or moving.

13 Page Gr-XB JT

BDS ISO 16322-1:2011

Textiles-Determination of spirality after laundering-Part 1: Percentage of wale spirality change in knitted garments

This part of ISO 16322 specifies a method of measuring the percentage of wale spirality change in weft-knitted jersey garments produced on knitting machines, following laundering. The results obtained from different procedures may not be comparable.

07 Page Gr-XA JT

BDS ISO 16322-2 :2011

Textiles-Determination of spirality after laundering-Part 2: Woven and knitted fabrics

This part of ISO 16322 specifies three procedures (diagonal marking, inverted-T marking and mock-garment marking) to measure the spirality or torque of woven and knitted fabrics after laundering. The results obtained from different procedures may not be comparable.

16 Page Gr-XB JT

BDS ISO 16322-3:2011

Textiles- Determination of spirality after laundering-Part 3: Woven and knitted garments

This part of ISO 16322 specifies procedures to measure the spirality or torque of woven and knitted garments after laundering. The results obtained from different procedures may not be comparable. This part of ISO 16322 is not intended to measure the spirality of garments as manufactured, but rather the spirality after laundering.

12 Page Gr-XB JT

BDS ISO 16549:2007

Unevenness of textile strands-Capacitance method.

This International Standard describes a method, using capacitance measuring equipment, for determining the unevenness of linear density along the length of textile standards.

13 Page Gr-XB JT

BDS ISO 16853:2007

Textile machinery- Sliver cans, rectangular- Main dimensions and tolerances

This International Standard specifies the main dimensions, with tolerances, of rectangular sliver cans

used in the textile industry. It also gives information about the right-angle position of cans.

06 Page Gr-XA JT

BDS ISO 16854 :2004

Textile machinery-Ring twisting machines - Vocabulary

This International Standard establishes a vocabulary of terms for ring twisting textile machinery

25 Page Gr-XC JT

BDS ISO 16875:2004

Textile machinery-Ring spinning machines for cotton spinning - Vocabulary

This International Standard establishes a vocabulary of terms for ring spinning textile machines used in cotton spinning. It also gives an example of the design of such machines.

18 Page Gr-XB JT

BDS ISO 17202:2007

Textiles-Determination of Twist in Single Spun Yarns- Untwist/ Retwist Method

This International Standard specifies a method for the determination of the direction of twist in single yarns and the amount of twist, in terms of turns per unit length, by the indirect untwist/retwist method.

15 Page Gr-XB JT

BDS ISO 18068:2015

Cotton fibres-Test method for sugar content-Spectrophotometry

This International Standard specifies a test method to determine the total sugar content in cotton fibres. Spectrophotometry is used as a quantitative determination method, and 3,5-dihydroxytoluene-sulfuric acid solution is used as a colour developer. This International Standard is applicable to cotton fibres.

05 Page Gr-XA JT

BDS ISO 18692:2008

Fibre ropes for offshore stationkeeping-Polyester

This International Standard specifies the main characteristics and test methods of new polyester fibre ropes used for offshore stationkeeping.

48 Page Gr-XE JT

BDS ISO 18695:2010

Textiles-Determination of resistance to water penetration - Impact penetration test

This International Standard is applicable to any textile fabric, which may or may not have been given a waterresistant or water-repellent finish. It measures the resistance of fabrics to the penetration of water by low impact, and thus can be used to predict the probable rain penetration resistance of apparel fabrics.

09 Page Gr-XA JT

BDS ISO 18696:2010

Textiles-Determination of resistance to water absorption- Tumble-jar absorption test

This International Standard is applicable to any textile fabric, which may or may not have been given a water-resistant or water-repellent finish. It measures the resistance of fabrics to wetting by water by the tumble-jar absorption test. It is particularly suitable for measuring the water-repellent efficacy of finishes applied to fabrics, because it subjects the treated fabrics to dynamic conditions similar to those often encountered during actual use.

09 Page Gr-XA JT

BDS ISO 20645:2010

Textile fabrics-Determination of antibacterial activity- Agar diffusion plate test

This document specifies a method for the determination of the effect of antibacterial treatments applied to woven, knitted and other flat textiles.

12 Page Gr-XB JT

BDS ISO 20725:2004

Textile machinery-Condensers for cotton spinning Vocabulary and principles of construction

This International Standard establishes a vocabulary of terms and principles of construction for condensers used in cotton spinning.

09 Page Gr-XA JT

BDS ISO 20726:2008

Textile machinery-Hopper feeders for cotton spinning- Vocabulary and principles of construction

This International Standard establishes a vocabulary of terms and principles of construction for hopper feeders used in cotton spinning.

BDS ISO 20727:2008

Textile machinery-Mixing bale openers for cotton spinning- Vocabulary and principles of construction

This International Standard establishes a vocabulary of terms and principles of construction for bale openers used in cotton spinning

14 Page Gr-XB JT

BDS ISO 20743:2010

Textiles-Determination of antibacterial activity of antibacterial finished products

This International Standard specifies quantitative test methods to determine the antibacterial activity of antibacterial finished textile products including nonwovens.

29 Page Gr-XC JT

BDS ISO 21748:2012

Guidance for the use of repeatability, reproducibility and trueness estimates in measurement uncertainty estimation

The International Standard gives guidance for evaluation of measurement uncertainties using data obtained from studies conducted in accordance with ISO 5725-2:1994; comparison of collaborative study results with

measurement uncertainty (MU) obtained using formal principles of uncertainty propagation

38 Page Gr-XD JT

BDS ISO 22198:2009

Textiles-Fabrics-Determination of width and length

This International Standard specifies a method for the determination of length and width of textile fabrics that are in a tension-free relaxed state. The test is applicable to textile fabrics of full width, folded lengthwise down the middle, or in tubular form, but no longer than 100 m.

08 Page Gr-XA JT

BDS ISO 22958:2010

Textiles-Water resistance-Rain tests:exposure to a horizontal water spray

This International Standard is applicable to any textile fabric, which may or may not have been given a water-resistant or water-repellent finish. It measures the resistance of fabrics to the penetration of water by impact, and thus can be used to predict the probable rain penetration resistance of textile fabrics. It is especially suitable for measuring apparel fabrics. With the instrument, tests may be made at different intensities of water impact to give a complete picture of the penetration resistance of a single fabric or combination of fabrics.

BDS ISO 24362-1:2016

Textiles-Methods for determination of certain aromatic amines derived from azo colorants– Part 1: Detection of the use of certain azo colorants accessible with and without extracting the fibres

This part of ISO 24362 describes a procedure to detect the use of certain azo colorants that may not be used in the manufacture or treatment of certain commodities made of textile fibres and that are accessible to a reducing agent with and without extraction.

25 page Gr-XC JT

BDS ISO 24362-3:2016

Textiles-Methods for determination of certain aromatic amines derived from azo colorants–Part 3: Detection of the use of certain azo colorants, which may release 4- aminoazobenzene

Azo colorants that are able to form 4-aminoazobenzene, generate under the conditions of ISO 24362-1 the amines aniline and 1,4-phenylenediamine. The presence of these 4-aminoazobenzene colorants cannot be reliably ascertained without additional information (e.g. the

chemical structure of the colorant used) or without a special procedure.
